Printed and bound in India

PRANAVA BOOKS

INDIA

SPECIAL NOTICE

The Airman's Guide dated August 5, 1947, was the last issue to contain the flight planning charts. Beginning with this issue the Guide no longer carries these charts and facing data pages, but does include the Notices to Airmen. This step has been made necessary by reductions in appropriations.

Airport Directory information will be included in the semi-annual Flight Information Manual, the next issue of which will be dated January 1, 1948. It is, therefore most important that you save the last issue of the Airman's Guide, dated August 5, 1947 since it contains the most up-to-date Airport Directory available until January 1, 1948.

The Government Printing Office will continue to mail you the Airman's Guide every two weeks until your present subscription expires. You can then order a new subscription, covering both the revised Airman's Guide and the combined Flight Information Manual and Airport Directory, for $6.00 a year. Money orders should be sent to Superintendent of Documents, Washington 25, D. C.

Many subscribers may wish to supplement the Airman's Guide with the Radio Facilities Charts published by the Coast and Geodetic Survey. A single set of 42 charts covering the U. S., with revised charts issued on an average of four times a year may be obtained from the Coast and Geodetic Survey for $4.50 a year. Orders for these charts should be addressed to the Director, U.S. Coast and Geodetic Survey, Washington 25,D.C.

AIRMAN'S GUIDE

NOTICES TO AIRMEN

VOL. 2, NO. 11 . . . . AUGUST 19, 1947

This issue includes all data on record as of 0001 E.S.T. on the date above. For later information consult teletype NOTAMS.

U. S. DEPARTMENT OF COMMERCE
CIVIL AERONAUTICS ADMINISTRATION
OFFICE OF AVIATION INFORMATION

SPECIAL NOTICE

NOTAM CHARTS

When the discontinuance of the AIRMAN'S GUIDE Flight Planning Charts and facing Data Pages was announced, personal flying interests demanded compromise charts that would serve as notams to correct the less frequently issued sectionals.

Resultantly, the Coast and Geodetic Survey developed the series of notam charts which will be a continuing feature of the Guide.

These six notam charts will spot all new or discontinued airports, radio navigational aids, danger areas, and (by a retention of the Ⓡ symbol) all such airports or aids which are temporarily unusable or usable only with extreme caution.

Furthermore, these charts will be cumulative in nature as far as danger areas are concerned. Cumulative, that is, until a sectional chart is revised semi-annually.

Other features, such as new airports or radio aids, will be retained on the notam charts only as long as they are cited in the Notices to Airmen. Such citations are normally carried in only one issue of the Guide. Continuing very hazardous conditions, however, (such as field closed because of construction or radio range inoperative) will be charted as long as they are effective.

LEGEND

● **New airport**

X **New radio navigational aid**

Ⓡ **Discontinued airport or radio aid, or one usable only with extreme caution**

N.B. If the airport or radio aid indicated by an Ⓡ symbol is not cited in the Notices to Airmen, it must be assumed that the airport or aid has been discontinued

GCA AVAILABLE: How and Where

GROUND CONTROLLED APPROACH (GCA) AVAILABLE TO CIVIL PILOTS AS WELL AS ARMY AND NAVY: All GCA facilities (Army, Navy, or CAA) are available to any plane in emergency. To secure GCA assistance pilots should call the associated control tower for instructions.

In addition to the working frequencies listed below, Army and Navy GCA emergency VHF transmissions are made on 140.58 mcs. Simplex service on 3117.5 kcs will be provided at all Army and Navy installations to provide an alternate means of communications for scheduled air carrier aircraft. Army and Navy towers will relay GCA instructions on 200-400 kcs band to civil aircraft not equipped to receive VHF or HF.

A minimum of 30 minutes will generally be required to assemble a GCA crew and prepare the equipment for operation AFTER an alert has been received at those locations not providing continuous service.

NOTICES TO AIRMEN

SPECIAL NOTICES

✓ Indicates new or revised Special Notices

ARMY DATA: Advice covering Army fields or Army operations on civil fields, or Army radio facilities, and also Air National Guard fields and facilities should be forwarded to Commanding General, Air Transport Command, ATTN: Flight Operations Division, A-3. Requests for approval of the closing of Army airfields or restrictions in airfield facilities to transient military aircraft for over 10 days should be forwarded to the same address for submittal to Headquarters Army Air Forces, as required. Restrictions in Air National Guard Fields or facilities will be forwarded to the National Guard Bureau through the State Adjutant General for approval. That Bureau will forward approved restrictions to the above address for publishing. Information to be published will be coordinated and submitted to the Civil Aeronautics Administration.

NAVY DATA: In accordance with Hydro.Office Memorandum for Aviators No. 9, July 29, 1946, Hydrographic Office information concerning naval and marine corps air stations and facilities, including changes in field facilities, operation rules, air/ground communications facilities, instrument approach procedures and navigational aids, should be directed to: The Division of Air Navigation, Hydrographic Office, Washington 25, D.C., for transmittal to the Civil Aeronautics Administration. In accordance with Aviation Circular Letter No. 96-46 of June 13, 1946, approval for the closing of any naval or marine corps air station or facility to transient military aircraft for a period in excess of 10 days must be obtained from the Chief of Naval Operations. Also, approval is to be obtained from the Chief of Naval Operations before relocation or modification of any aid to air navigation, such as reorientation of radio ranges.

ARMY OFFICIAL BUSINESS: Within the meaning of AAF Regulation 85-2 is interpreted as the necessity for personnel aboard an aircraft to contact personnel, units, or organizations at or near the airfield selected for landing for the purpose of conducting transactions in the service of and in the interest of, the United States Government. This does not include the use of an airfield by transient aircraft for the purpose of obtaining clearance, service, or other items attendant with itinerant operations. Cross country flights for the purpose of maintaining flying proficiency are not considered to be official business within the meaning of this regulation.

ARMY FOREIGN CLEARING STATIONS: Under the authority of AAF Regulation 61-4, Army aircraft with destinations listed below or returning therefrom to the United States will clear through the stations indicated: AFRICA AND AZORES - Brookley Field, Ala., MacDill Field, Fla., Washington National Airport, D.C., or Westover Field, Mass. ALASKA - McChord Field, Wash., or Great Falls AAF, Mont. BERMUDA - Mitchel Field, N.Y., Brookley Field, Ala., MacDill Field, Fla., Washington National Airport, D.C., or Westover Field, Mass. CANADA - Great Falls AAF, Mont., Brookley Fld, Ala., McChord Field, Wash., Washington National Airport, D.C., Selfridge Field, Mich., or Westover Field, Mass. CANAL ZONE, CENTRAL AMERICA, MEXICO AND SOUTH AMERICA - March Field, Calif., MacDill Fld, Fla., Kelly Field, Tex., or Brookley Field, Ala. CARIBBEAN - Brookley Field, Ala., Kelly Field, Tex. or MacDill Field, Fla. ENGLAND, GREENLAND, ICELAND AND NORTH IRELAND - Washington National Airport, D.C., or Westover Field, Mass. NOVA SCOTIA AND NEWFOUNDLAND - Washington National Airport, D.C., Westover Field, Mass., Selfridge Field, Mich., or Brookley Field, Ala. HAWAII - Fairfield-Suisun AAF, Calif. EUROPEAN THEATER - Brookley Field, Ala., MacDill Field, Fla., Washington National Airport, D.C., or Westover Field, Mass.

✓ PILOT PROCEDURES WITH FLIGHT SERVICE, USING AAF MILITARY FLIGHT SERVICE COMMUNICATIONS SYSTEM (PLAN 62): (1) Departure from AAF Bases: No change. References: AAF Regulations 15-23 and 60-22. (2) Departure from non-AAF Bases. All pilots of AAF aircraft departing from a non-AAF base will file a complete flight plan with, and when necessary secure approval from the nearest Flight Service Center prior to take-off, or as outlined in AAF Regulation 60-22. Communication with a Flight Service Center may be established by a collect telephone call. When a telephone is not available the nearest AAF base or AACS station may be contacted by radio. After obtaining the Flight Service approval, pilots contemplating flight under Instrument Flight Rule conditions will secure a CAA Airway Traffic Control clearance. The CAA clearance normally can be obtained more rapidly by contacting CAA direct through CAA communications facilities. However, if CAA communications facilities are not available, the CAA clearance may be obtained through Flight Service. (3) Change of Contact Flight Rule (CFR) Flight Plan Enroute: AAF aircraft requiring a change of route or point of first intended landing of a CFR flight plan enroute will contact Flight Service through an CAA airway radio station or control tower, submit the information required by AAF Regulation 60-22 and, when necessary, secure Flight Service approval. (4) Change of IFR Flight Plan, or CFR to IFR, or IFR to CFR Enroute: Any AAF aircraft requiring a change of route, altitude, point of first intended landing, cruising speed, or alternate airport, or change from CFR to IFR, or IFR to CFR, enroute will contact a CAA communications station for CAA Airway Traffic Control clearance and Flight Service approval if necessary. Pilots possessing clearance authority must furnish Flight Service their new flight plan. If communication with a CAA communications station cannot be established, an AACS airways radio station will be contacted for coordination between CAA and Flight Service and to obtain CAA Airway Traffic Control clearance and Flight Service approval when necessary. (5) CFR Position Reports: When flying under CFR conditions, pilots will make position reports, wherever practicable, to AACS airway radio stations enroute and receive any necessary advisories from Flight Service. One position report each 30 minutes is considered adequate. (6) IFR Position Reports: When flying under IFR conditions pilots will first make position reports to CAA communications stations as heretofore required by Civil Air Regulations, and then to AACS airways radio stations en route, and receive any pertinent Flight Service Advisories. (7) Voice Calls: AACS airways radio stations will be called by the location

ollowed by the word "airways", such as "Bolling Airways". This is t from the CAA radio call system which uses the location name foll- y the word "radio", such as "Washington Radio". (8) Arrival Re- it non-AAF Bases: Arrival reports from fields where there is no shed AAF Base Operations will immediately be sent by the most ex- us means available or by a collect telephone call to the nearest Flight Center. (9) RON Messages: At bases not connected with Flight Ser- nters by military interphone, pilots may file RON messages via long e telephone to the Flight Service Center at the time the arrival report l. (10) All VHF equipped aircraft will be provided with a card to be ently mounted near the VHF control box which will specify button, ncy, and service obtainable. An Index of AACS airways stations within ., together with a listing of the assigned frequencies, may be found on 100 and 101 of T.O. 08-15-1. The following table displays the channels quencies normally used to contact the various communications instal-

Frequency	Service
116.1 mcs.	CAA Arwys (Range Stns) **AACS Arwys (Plan 62)
126.18 mcs.	Control Towers
137.88 mcs.	AACS Airways (Plan 62) **Control Towers
140.58 mcs.	Military Emergency & GCA Final Appch Control

**Available for service indicated on a secondary basis.

will be some time before all AAF aircraft are equipped for operation S airways frequencies. It is not the intent that pilots flying aircraft equipped attempt to make position reports to Flight Service as des- above. Emergency Flight Service advisories, however, may be trans- to such aircraft on the AAF control tower frequency. Aircraft which ipped for operation on AACS airways frequencies will contact airways whenever possible.rather than AAF control towers. (12) The following telephone numbers will be used for contacting military Flight Service s:

A AREA	FLGT SVC. AREA	PHONE NO.
gton;Pittsburgh; ork; Boston	Olmsted Flight Svc. Ctr. Middletown, Penna.	Steelton 93387 " 93470

CLEARANCE OF AAF AIRCRAFT IN NEW YORK CITY AREA: In accordance with notification from Headquarters, Army Air Forces, July 2nd AAF Letter 63-9 has been rescinded and the following instructions will govern the clearance of AAF aircraft in the New York City Area: For clearance purposes into or from the New York City Area (encompassed by a 25 mile radius from the southern tip of Manhattan) CFR is defined as ceiling at least 2000' and the visibility 3 miles or more; IFR when the visibility is not less than one mile and the ceiling is unlimited, or when the ceiling is not less than 5000' and the visibility not less than 2 miles. AAF aircraft flying into the New York City Area may be cleared to any authorized field therein provided weather conditions are not less than those defined above. In all cases in-flight approval from Olmsted Flight Service Center by contacting Olmsted Airways, Rome Airways, Westover Airways, Mitchel Airways, or Ft. Dix Airways must b e obtained prior to proceeding to the field of destination. All pilots whose destination is an airfield within the area will indicate on the AAF Form 23 that their flight plan to the field of destination is via any of the five stations listed. Flights for which the point of first intended landing is Mitchel Field may be made using normal clearance procedure and restrictions outlined herein are not applicable to that station. AAF aircraft engaged in regularly scheduled transport flights under the operational control of the Air Transport Command are exempt from these restrictions.

SELECTION OF WEATHER ALTERNATES BY ARMY PILOTS: In accordance with policy stated by the CG, AAF, April 7, 1947, Army pilots are not to be refused IFR clearances because of selection of other than "A,N,NG, or P" fields as an alternate. The selection of an alternate airport is a planned procedure to be resorted to in case of emergency and any suitable airport, military or civilian, will be accepted for clearance purposes. Concerning this policy, it is pointed out that pilots who do utilize other than "A,N,NG, or P" fields under such circumstances may be called upon to justify their use of same.

REVISION TO ARMY FLIGHT CLEARANCE PROCEDURE: Effective August 15, 1947, within the continental limits of the U.S., flight clearance procedure is revised as follows: (Conflicting portions of AAF Regulation 15-23 and 60-16 are being rescinded): All written weather data will be eliminated from Form 23. Forecaster will indicate on Form 23 whether the flight should be conducted under IFR or CFR conditions. A verbal briefing consisting of at least the following factors will be given: (1) Existing synoptic situation and terminal forecast for destination, and if required, for alternate. (2) Existing route weather. (3) Location of pertinent hazardous weather areas and recommended procedures for avoiding them. The pilot will certify on Form 23 as follows: "I have been adequately briefed on the current and forecast weather affecting my flight and I understand the weather situation". A written or cross section forecast will be furnished only upon request submitted two hours in advance. At non-AAF bases and AAF bases where no forecaster is on duty, the appropriate Flight Service Center forecaster will brief the pilot verbally over the interphone system or telephone. The Flight Service dispatches will monitor receipt of pilots acknowledgments of adequate weather briefing.

CIVIL USAGE OF MILITARY FIELDS: Army and Navy fields are open to civil fliers only in emergency or with prior permission of the commanding officers thereof.

REISSUANCE OF EXPIRED PILOTS CERTIFICATES: 20.550 Reissuance: Any person who on June 30, 1947, held a valid private or commercial certificate and who failed to exchange such certificate in accordance with Section 20.55 of the C.A.R., may, notwithstanding such failure and without other showing, obtain a pilot certificate with appropriate ratings upon application to the Administrator.

PERSONAL POSSESSION OF PILOT CERTIFICATE: No person shall pilot a civil aircraft within the U.S. unless he holds a valid pilot certificate with appropriate ratings issued by the Administrator or an appropriate and valid foreign pilot certificate. Such certificate shall be in the personal possession of the pilot at all times while piloting aircraft and shall be presented for examination to any inspector of the Administration or State or local law enforcement officer upon the request of such inspector or enforcement officer.

ISSUANCE OF STUDENT PILOT CERTIFICATES AND TEMPORARY STUDENT PILOT CERTIFICATES. DURATION OF PILOT CERTIFICATES WITH PRIVATE OR COMMERCIAL RATING: The purpose of this regulation is to provide that (1) an authorized representative of the Administrator, as well as the Administrator, may issue student pilot certificates, (2) temporary student pilot certificates as well as pilot certificates with private or commercial rating may be issued by the Administrator or his authorized representative, and (3) pilot certificates with a private or commercial rating shall not have a prescribed expiration date. Effective July 22, 1947, Part 20, of the C.A.R. was amended to read in part as follows: "20.00 Issuance. A student pilot certificate will be issued by the Administrator or his authorized representative to an applicant who meets the applicable requirements." "20.51 Duration. (a) A student pilot certificate shall expire 24 calendar months after the month of issuance. (b) A pilot certificate with a private or commercial rating shall remain in effect unless it is suspended, or revoked, or a general termination date for such certificate is fixed by the Board" "20.52 Temporary certificates. The Administrator or his authorized representative may issue a temporary student pilot certificate or a temporary pilot certificate with a private or commercial rating for a period of not to exceed 90 days, subject to the terms and conditions specified therein by the Administrator. 20.53, Reinstatement, repealed.

NOTICE TO ALL FLYING PERSONNEL: Because of the increase in aircraft operations, both civil and military, in recent months, the number of complaints regarding airplane noise nuisance has reached such proportions that the advancement of aviation and development of new airports are in danger of being severely retarded. To reduce the number of such complaints, it is requested that the following practices be put into effect by all fliers: (1) Discontinue all unnecessary low flying. (2) When weather and traffic volume permit, increase altitudes of all traffic patterns that require flight over inhabited areas. (3) Re-route channels of approach, and departure to avoid residential and business districts whenever possible. (4) If the airport is located near inhabited areas, reduce power and increase pitch of propellers as quickly as possible during take-off so as to keep engine and propeller noises at a minimum(5) Keep rpm's set at a minimum required operational setting when low flying over populated areas is necessary.

SEAPLANE BASE DIRECTORY: A new Seaplane Base Directory, dated June 15, 1947, has been mailed to all seaplane base operators and seaplane owners on record. It is obvious from correspondence received that not all operators and owners received their copies. This is notice, therefore, that any qualified non-recipient may have a copy upon request to: Office of Aviation Information, Attention: A-258, CAA, Department of Commerce, Washington 25, D. C.

RADIO TELEPHONE-OPERATION AUTHORIZATION: This is the simple way in which an authorization to operate a radio telephone transmitter in an aircraft is obtained: the applicant appears in any of the Federal Communications Commission field offices, or before any CAA flight examiner of the CAA, who has been designated by the FCC to issue the permits, proves he is a United States citizen, that he has need of such an

ıorization, and that he understands the few simple rules and regulations. is given a card granting the authorization then and there. FCC offices listed under U.S. Government in phone books, and there are some 30 of m throughout the country. Mostly, they are in downtown offices. There more than 1,000 CAA designated flight examiners. Mostly they are lo-ɔd at airports. The "examination", if it may be so described, consists : few questions establishing the ability of the applicant to transmit and erstand spoken messages in English, and to understand the simple rules ern ing the use of such equipment. He is also given simple, printed in-ıctions for its use.

V.H.F. IFR FLIGHTS: Until further notice, Air Traffic Control will exercised on the assumption that aircraft are utilizing intermediate frency radio ranges. If a pilot desires to conduct IFR flight using VHF rngs r all or a portion of the route, his flight plan should so indicate. Further, ht should not be conducted on civil airways in IFR weather using VHF ges unless the ATC clearances so authorize.

NEW PRIVATE FLIER VHF FREQUENCIES: All CAA Communications lons and Towers are discontinuing receiving watches on 131.7 and 131.9 as new equipment becomes available to guard the new private flier frecies of 122.1 mcs for transmission to CAA Communications Stns and 5 mcs for transmission to CAA operated towers. Practically all CAA ɔrs now guard 122.5 mcs. but the commun. stations program is not fully ctive yet because of non-receipt of the new receivers. CAA Commun. normally reply to itinerant aircraft on the voice feature of the range, low quency or V.H.F., whichever is applicable. Replies are made on 111.1 , if V.H.F. reply has been requested on other than range frequency. CAA ort control towers will reply to itinerant aircraft on one of the frequen-118.3,118.5,118.7, or 118.9 mcs., in addition to towers' low frequencies.

U.S. WEATHER BROADCASTS AND TRANSMISSIONS: The time of ervation for all weather reports is 30 minutes after the hour, unless other e announced. Pilots enroute are requested to avoid, if possible, calling way communications stations at or about 15 and 45 minutes past the hour ich are the seheduled broadcast times) to request weather information, such calls may delay starting of scheduled broadcasts and cause inconvence to other persons who are dependent on the broadcasts for weather rets.

RADIOTELEPHONE COMMUNICATIONS: The word ROGER in radioɔphone communications means "I have received all of your last transmisɔ", and its use in any other sense by CAA stations and towers is not authsed. In order to avoid confusion it is suggested that pilots engaging in air-und contacts also limit the use of ROGER to acknowledments of transmisns.

INSTRUMENT FLIGHT, NEW YORK METROPOLITAN AREA: Revised arrival, departure, holding instrument approach and control procedures utilizing new radio aids were placed in effect in New York Metropolitan Area. Non air carrier pilots proposing instrument flight through this area or to or from Newark, Mitchel, or La Guardia Fields should write the Chief Controller, New York Air Traffic Control Center, Box 575, La Guardia Field, New York, for copies of applicable Operations Letters describing these procedures.

CFR FLIGHT PLANS, AND ARRIVAL REPORTS: CFR flight plans may be filed with any CAA airways communication station or airway traffic control center. One hour after E.T.A., if no notice of arrival is received, queries are sent out over CAA communications systems. If the arrival report is not received within three hours, search and rescue operations are initiated. Inasmuch as the Government may be put to considerable expense in determining the location of aircraft when an arrival report is not filed, it is vitally necessary that all pilots using this service make certain that notice of arrival is filed with the CAA communications station at the termination of the flight. To reduce radio congestion, pilots should file CFR flight plans, when required, in person or by telephoning the airways communication station or airway traffic control center. CAA control towers have discontinued accepting CFR flight plans for transmission and will not normally file arrival reports except upon the specific request of the pilot. Whenever practicable, however, it is desired that arrival reports be filed in the same manner as flight plans.

AERONAUTICAL CHART AND PUBLICATION CORRECTIONS: Correct Flight Information Manual, Vol. 2, No. 1, dated July 1, 1947: (1) Chapter IX, page 114, under heading of "Handling of CFR Flight Plans and Arrival Reports", erroneously states that CFR flight plans are forwarded in the same manner that IFR flight plans are. CFR flight plans are not transmitted. Upon termination of a CFR flight, the pilot should close out his flight plan. Notice of arrival is then sent over the C.A.A. communication system to the station holding the original flight plan. (a) Chapter VII, page 56, under Yankton, S.D. as follows: The array of station WNAX consists of 3 towers spaced 526 ft. apart The height of the towers are as follows: N tower 320 ft., center tower 927 ft., and S tower 449 ft. (b) Chapter XIII, page 168, San Diego, Calif., Lindbergh Field missed approach should be 3000 ft.

(2) Correct "TO-08-15-1", page 104, by showing that effective Sept. 1, 1947, coding for X-band radar beacon at New York City will be changed from 1-1-3 to 1-2-1; Disregard notice given in FO List 108 showing Cherry Pt. MCAS, N.C., GCA as inoperative. This has resumed operation; Danger Areas should be revised in accordance with recommendations of Air Space Subcommittee in Meetings 67, 68, 70 and 71: Rescind the following: Danger Area in the vicinity of Cedar Keys, Fla. as follows: Beginning at a point on the W coast of Fla. at lat. 29-19-00, long. 83-10-00, thence SE along the coast to lat. 28-45-00, long. 82-41-00, thence due W to long. 83-00-00, thence NW to lat. 29-19-00, long. 83-30-00, thence due E to lat.

29-19-00, long. 83-10-00, point of beginning. Danger Area in the vicinity of Mojave, Calif. as follows: Beginning at lat. 35-07-30, long. 117-54-00, thence to lat. 35-01-40, long. 118-03-10, thence to lat. 35-02-40, long. 118-10-00, thence to lat. 35-03-45, long. 118-10-30, thence to lat. 35-07-30, long. 118-05-10, thence to lat. 35-07-30, long. 117-54-00, point of beginning. Danger Area in the vicinity of Shell Beach, Tex. centered at lat. 27-36-00, long. 97-13-30. Danger Area as follows in the vicinity of Corpus Christi, Texas: Area "A" - Beginning at lat. 27-58-00, long. 96-15-00, thence SW and parallel to the shoreline to lat. 27-45-00, long. 96-33-00, thence due W to long. 97-07, thence NE to lat. 27-58-00, long. 96-57-00, thence due E to lat. 27-58-00, long. 96-15-00, point of beginning. Circular Danger Area in the vicinity of San Nicolas Island, Calif. at lat. 34-06-30, long. 120-24-12. Circular Danger Area in the vicinity of San Miguel Island, Calif. at lat. 33-21-46, long. 119-41-40. Circular Danger Area in the vicinity of Lake Charles, La. centered at lat. 29-21-00, long. 93-23-00. Danger Area in the vicinity of Calcasieu Lake, La. as follows: Beginning at lat. 29-59-00, long. 93-15-00, thence to lat. 29-53, long. 93-15-30, thence to lat. 29-54-00, long. 93-18-30, thence to lat. 29-59-30, long. 93-16-30, thence to lat. 29-59-00, long. 93-15-00, point of beginning. Danger Area over bombing targets in the vicinity of Clovis, N.M. as follows: PB-2N - lat. 34-05-30, long. 104-35-00; PB-3N - lat. 34-05-30, long. 104-22-30; PB-8N - lat. 33-56-00, long. 104-42-30; N boundary - lat. 35-26-00, E boundary - long. 103-05-45; S boundary - lat. 35-22-30, W boundary - long. 103-10-00. Circular Danger Areas over dive, rocket, and skip bombing targets in the vicinity of Fallon, Nev. as follows: Target No. 11, lat. 39-41, long. 118-34-20, Target No. 15, lat. 39-38-00, long. 118-31-30, Target No. 16, lat. 39-45-20, long. 118-42-20, Target No. 18, lat. 39-19-00, long. 118-49-00, Danger Area in the vicinity of Merryville, La. as follows: Beginning at lat. 30-45-00, long. 93-33-00, thence SE along a road to lat. 30-39-30, long. 93-25-00, thence southerly along the RR to lat. 30-31-30, long. 93-26-30, thence W to long. 93-30-30, thence westerly and northerly along the road to lat. 30-32-00, long. 93-41-00, thence northerly and northeasterly along the road to lat. 30-45-00, long. 93-33-00, point of beginning. Circular Danger Area in the vicinity of Seal Island, Me. centered at lat. 43-53-30, long. 68-44-30.

Revise the following: Danger Area in the vicinity of Myrtle Beach, S.C. to the following: Beginning at lat. 33-54-30, long. 78-07-00, thence to lat. 33-00-00, long. 78-24-30, thence W to long. 79-00-00, thence to lat. 33-12-00, long. 79-10-00, thence northerly along the shoreline to lat. 33-22-00, long. 79-09-00, thence to lat. 33-40-00, long. 78-30-00, thence to lat. 33-55-00, long. 78-14-00, thence along the shoreline to lat. 33-54-30, long. 78-07-00, point of beginning. Establish the Following: Danger Areas in the vicinity of Cedar Keys, Chassahowitzka Bay and Rainbow Point, Fla. for the 15th Air Force as follows: (a) Beginning at lat. 28-48-00, long. 82-45-00, thence S to lat. 28-38-00, long. 82-45-00, thence W to lat. 28-38-00, long. 82-58-00, thence N to lat. 28-48-00, long. 82-58-00, thence E to lat. 28-48-00, long. 82-45-00, point of beginning. (b) Beginning at lat. 28-33-00, long. 82-43-00, thence S to lat. 28-23-00, long. 82-43-00, thence W to lat. 28-23-00, long. 82-56-00, thence N to lat. 28-33-00, long. 82-56-00, thence E to lat. 28-33, long. 82-43-00, point of beginning. (c) A circular area with a 3 mile radius centered at lat. 29-11-25, long. 83-12-40. (d) A circular area with a 3 mile radius centered at lat. 29-05-00, long. 82-54-00. Danger Area for the Navy Department in the vicinity of Corpus Christi, Tex. as follows: Beginning at lat. 27-58-00, long. 96-30-00, thence S to lat. 27-45-00, thence W to long. 96-45-00, thence S to lat. 27-19-00, thence to lat. 27-05-00, long. 96-53-00, thence W to long. 97-45-00, thence N to lat. 27-32-00, thence to lat. 27-42-30, long. 97-32-30, thence counterclockwise along the arc of a circle with a radius of 2 miles centered at lat. 27-43-15, long. 97-30-30, to lat. 27-44-30, long. 97-30-00, thence to lat. 27-45-00, long. 97-29-00, thence counterclockwise along the arc of a circle with a radius of 3 miles centered at lat. 27-46-00, long. 97-26-15 to lat. 27-46-20, long. 97-23-30, thence to lat. 27-53-00, long. 97-15-00, thence to lat. 27-50-00, long. 97-93-00, thence to lat. 27-58-00, long. 96-57-00, thence to lat. 27-58-00, long. 96-30-00, point of beginning. Circular Danger Area in the vicinity of Carrington Island, Utah for use by the 15th Air Force, Wendover Field, with a radius of 3 mi. centered at lat. 41-00-30, long. 112-34-30. Circular Danger Area in the vicinity of Antioch, Calif. for Commander NAB, 12th Naval District with a radius of 2 miles centered at lat. 38-02-00, long. 121-36-00.

(3) Correct for FO List No. 113, Notice re listing of (NG) designation for Barnes Field should have referred to Barnes Field, Westfield, Mass. and have deleted (P) designation.

(4) Correct for FO List No. 114, page 5, Danger Area for the Navy Dept. in the vicinity of Corpus Christi, Tex., long. 97-93-00, in the 17th line of description is deleted and 97-03-00 is shown instead.

(5) Correct "To-08-15-2", page 45, by showing telephone no. of 5th Rescue Squadron at MacDill Field as Tampa H-8811, Ext. 628; to show Flight "C" 5th Rescue Squadron at Pope Field, N.C. (rather than Air Rescue Squadron "A") with telephone no. Fayetteville 4151, Ext. 27204 and 24244; to show Flight "D", 5th Rescue Sqd. at Westover Field, Mass. (rather than Air Rescue Detachment #2) and to add Ext. 657 to present telephone no.; to delete Ext. 2142 from telephone no. for Air Rescue Detachment #4, Selfridge Field, Mich. and to substitute therefore Ext. 3105; to show telephone no. of Air Rescue Detachment #10 at Hill Field, Utah as Ogden 5561 with Ext. 779 only; and to delete Ext. 383 from telephone no. of Air Rescue Detachment #11, Great Falls AAB, Mont. and substitute therefor Ext. 302.

WEATHER REPORTING SERVICE

Weather Reporting Location	Type of Report.	Lat., Long.	Elev.	Action taken
Roswell, N. Mex.	3-hourly			Discont.
Ottumwa, Iowa	Pibal & hourly			" 8-1-47
Bishop, Calif.	3-hourly			"
Fallon, Nev.	Hourly	39-25,118-41	3934'	Re-inaug.
Tonopah, Nev.	Hourly	38-04,117-05	5400'	"
Paris, Tex. (Cox AAF)	Supplemen.	33-38,95-27	546'	Inaugurated

NOTE: Hourly in lieu of supplementary weather reports now available from Windsor Locks, Conn.

TELETYPE NOTAMS: Throughout the year climatic conditions (snow rms, floods, etc.) render many fields temporarily unusable or unsafe. addition, there are intermittent maintenance operations in progress on ny fields. Radio facilities suffer temporary power failures or course salignments, and lighting facilities are temporary inoperative. Because se temporary conditions cannot be given immediate coverage in the irman's Guide", full cognizance must be taken of Teletype Notam service ich gives the desired coverage on any facility or field at which teletype nsmitting STATIONS ARE BASED. Cross-country pilots, accordingly, uld consult these Teletype Notams for latest availab le data on air naviga- n aids. These teletype notams are posted in CAA Communications Sta- ns and in all Army Air Field and Naval Air Station Operations Offices ring teletype drops.

AIRPORT TRAFFIC CONTROL PROCEDURES: (a) Planes with 2-way lio should establish communication with control tower when 15 miles from airport of destination and before taxiing or taking off. (b) Planes without :eivers, when approaching tower-controlled fields, and before taxiing l taking off, should be on the alert for and be guided by light gun signals e AAF Regulation 100-4, dated March 4, 1944, and CAR Digest or Manual . (c) Flashing tetrahedron lights, as well as the daylight operation of ating beacons, indicate suspension of CFR traffic.

AIRPORT AND RADIO NOTICES

LEGEND

** - New or revised airport, danger area, or miscellaneous data to be added to records .

★ - New or revised radio data to be added to records

FOREIGN DATA

SPECIAL NOTICES

FOREIGN ENTRY PROCEDURES; AIRPORTS OF ENTRY, CUSTOMS - ORTS, CIVIL AIRCRAFT CLEARANCE FOR FOREIGN COUNTRIES: ese procedures and regulations were all incorporated into the Flight ormation Manual, Vol. 2, No. 1, dated July 1, 1947. Only amendments to data contained in the Manual will hereafter be carried in the Airman's ide.

FREQUENCIES GUARDED BY U.S. OPERATED OCEAN STATION SSELS: Effective Aug. 5, 1947, all U.S. operated ocean station vessels he North Atlantic will guard 118.1 mcs for routing VHF communications h aircraft in lieu of 116.1 mcs. Continuous guard of 140.58 mcs distress quency remain unchanged.

UNITED KINGDOM MILITARY AIR BASE USAGE: The following United Kingdom Military Air Bases are available to civil air carriers of only U.S. and United Kingdom and to aircraft which were purchased in either the U.S. or the United Kingdom and are in ferry status. (a) for regular use: Kindley Field, Bermuda; Beane Field, St. Lucia; Coolidge Field, Antigua; and Atkinson Field, British Guiana. (b) for alternate use: Waller Field, Trinidad; Vernam Field, Jamaica; and Carlsen Field, Trinidad. Even though the above fields are open to civil air carriers and ferry status planes it is mandatory that the operators of such aircraft secure approval for use of these military air bases from Headquarters, AAF, Washington, D C., prior to the departure of each flight or series of flights.

INTERNATIONAL RADIOTELETYPE CIRCUITS: Effective May 16, 1947, WFM Lagens, Azores permanently decommissioned. The following radioteletype circuits are established and in operation at CSY Santa Maria; WSY New York; DIP Shannon; FXO Paris; NHY Port Lyautey. Inter-island radioteletype link CSY Santa Maria to WYQY Lagens will be continued until further advised. All above circuits are operating in accordance with ICAO Communications Procedures.

NAVAL COMMUNICATIONS WITH COMMERCIAL AIRCRAFT IN CARIBBEAN AREA: Effective March 24, 1947, and until further notice, San Juan NAS, Trinidad NAS, Guantanamo NAS, guard 6515 kcs voice cont., transmitting and receiving, for communications with commercial aircraft.

LORAN RATE RELOCATED: "Frederick Dahl Loran Rate 1L4" shifted to new operations bldg June 23, 1947. This change involved new antennas, transmitter, timers, and transmission lines. A Loran System error may develop.

AFRICA-Casablanca: The following established circuits are now in operation at CNO Casablanca Aeronautical Communication Station: CSZ Lisbon, FXW Bordeau, FOO Paris, CNC Tangier, CNS Gaercife, CNA Fez; CNV Oujda, CNU Meknes, FOR Oran, FNA Algiers, CNN Taza, CNZ Fort Trinquet, CNY Tindouf, CND Agadir, CNX Marrekech, FOK Dakar. Landline teletype to FFAG Algiers and CNPL Port Lyautey. Guards Route C radio-telegraph frequencies 3248, 6563, 8538, and 12776 kcs. Additional air ground guards 333, 336, 6510, 4195 kcs. Radio range and beacon identification "KR", 222 and 403 kcs. respectively. Tower voice VHF 116.1 mcs. and 6440 kcs.

Dakar: Effective May 15, 1947, Overseas Foreign Aero-nautical Communications Station WFG, YOFF Airport, Dakar FWA, will be combined with FOK under call sign FOK. Following CAA circuits will be operated and supervised by French Nationals: A/G 3285, 6563 kcs. cont. 11319 kcs. daylight hrs, point-to-point circuits, FOK/WFH Port Lyautey, FOK/ELPA Roberts Field, FOK/ZVJ Recife, FOK/ZNT Accra. Following principal circuits operation and supervision French Nationals: Point-to-point,

FOK with following stations, CNB Casablanca, X 08 Natal, FOO Paris, FGS Abidjan, FNA Algiers, FSP Port Etienne, FMW Port Au France, FHK Amsterdam. Yoff Tower, range and beacon operation and supervision French Nationals, frequencies unchanged.

Dakar Weather Broadcast: Effective 0820Z GCT, March 24, 1947, station WFG commenced broadcasting Dakar METAR hourly at 20 minutes past each hour on 3285 kcs., A1 emission.

Port Lyautey Communications: Effective June 11, 1947, circuit operations NHY Port Lyautey to FOK Dakar and CSZ Lisbon were transferred to station CNO Casablanca. Following civil circuit functions remain in operation NHY Port Lyautey: Circuit 207T Port Lyautey-Santa Maria.Circuit 224 Port Lyautey - Roberts Field, Liberia. 24 hour landline teletype operations connecting NHY Port Lyautey and CNO Casablanca facilities. E and W traffic movements via 207T. Port Lyautey maintains continuous civil air ground guards 3285, 6563 kcs, 11319 kcs. from 0700 until 2200 GCT. Additional civil air ground guards 8554, 6543, 6523 kcs upon req.

AZORES-Fayal-Radio: Radio beacon call sign CTN. Operates on 333 kcs days and on request. Air to ground call sign CTN for emergency use only on 6563 and 6577 kcs.

Florez-Radio: Radio Beacon call sign CF operates from 00 to 05. from 20 to 25 and from 40 to 45. Reliable for Homing

Lagens-Radio: Tower operating on 116.1,126.18 mcs and 2834, 2993 kcs for cont. transmitting & rcvg. Twr on 4220 kcs. for emerg & on 5000 kcs on req. GP rng on 341 kcs in cont. oper. with legs of 343 & 163° mag. reliable for instrument letdowns if caution is used. DK radio range on 288 kc on cont. oper. with legs of 343 and 163° mag. reliable for instrument letdowns if caution is used. Z markers are operating on both ranges. Racon bcn inop. ufn. SCS-51 operates cont. between 1730 & 0900Z & on 30 min.req.thereafter on channel Y for rnwy 16 & channel X for rnwy 34 if no glide path oper. on channey Y. Localizers not modified in accordance with T.O. 16-1-62. Long range DF on 6563 kcs. days and ngt transmitting and rcvg and rcvs fixing signal on 6210 kcs call sign is CSE9. Short range DF call sign CSE7 on 4575 kcs operating on req. from Lagens twr or CSY at Santa Maria. GCA oper on 1 hr. req. on all voice freqs. Field: Crews inbound to Lagens will be cautioned of high terrain on.E and W sides of rnwy 34. Due to rprs being made on 2700' on the N end of rnwys 16/34, no GCA landing will be made on rnwy 16 until further notice.

Santa Ana-Radio: Radio Beacon call sign BB7 operates cont. on 308 kcs.

Santa Maria-Radio: Tower transmits and receives on 116.8 and 126.18 mcs. and 2834 kcs. Tower transmits on 278 kcs and guards 6440 kcs. Radio range operates cont. on 249 kcs. Call sign WY. Radio Bcn operates on 329 kcs., call sign WY. No Z marker on WY range. SCS-51 localizer on channel X on rnwy 19 operates cont. Glide path has resumed operation. Localizer not modified in accordance with T.O. on 6-1-62 Santa Airways operates on 3993 kcs cont. and 4220 kcs in emerg. Air to ground call sign CSY operates cont. on 6563, 12776, 3248, 8538 kcs on CW. CSY is ICAO control center for the Azores. All letdowns are to be made on the N and S legs of the WY range.

BELGIUM-Brussels: ONBU reports as from July 1, 1947, the Queen Code ICAO document 2560 will be used by all the Belgian Stations.

BRITISH HONDURAS-Belize, Landing of Private Aircraft: Aircraft intending to land at Belize Airport or on the Belize waterfront should give the Director of Aviation, Belize, B.H., at least 4 hours' advance notice of their intended arrival. Flight plans may be filed for transmission to Belize between the hours of 1400Z and 2400Z through MIAMI CAA-operated overseas foreign aeronautical communication stn.

BRITISH WEST INDIES-Kingston, Jamaica-Montego Bay Arpt: Montego Bay Airport is a British Controlled airport now under limited operation by Pan American Airways. It is necessary for all flights departing from Montego Bay for points in the U.S. to file flight plans with the Kingston ATC through the Kingston Communications Stn-call letters MRX. Flight plans also must filed for all flights departing from U.S. for Montego Bay.. They may be filed for transmission to Montego Bay through the CAA-operated Overseas Foreign Aeronautical Communication Station at Miami-call letters WBR, or New Orleans - call letters WEK.

Kingston, Jamaica-Palisadoes Airport Facilities: The Palisadoes Arpt is a British Government controlled airport. The Government controlled tower transmits on 397 kcs only, and guards 2870, 6210, 3105 kcs. It is necessary for all itinerant flights coming to Palisadoes to file a Flight Plan from point of departure to the Communications Station at Kingston - call letters MRX. This Flight Plan should be marked for Information: Palisadoes Airway Traffic Control. The route frequency of 6515 kcs. A3 emission is guarded at MRX. They have a good signal on this frequency and can be read consistently throughout the day and night in the Caribbean Area. Flight Plans may be filed for transmission to Palisadoes through the CAA-operated Overseas Foreign Aeronautical Communications Station, WBR, Miami.

Trinidad NAS: Effective June 16, 1947, Navy Sqd commenced conducting aerial gunnery from 1300Z to 2000Z daily except Sat. and Sun. until further notice. Surface craft and aircraft remain clear of area 10° N, 60°45' W, 10°30', 60°45', 10° N, 60° W, 10°30', 60° The marine radiobcn at Trinidad was discont. 7-10-47.

✓ CANADA-Barrington, P.Q.-Radio: Name of FM on Montreal rng changed to Hemmingford. (8-1)

✓ Copper Lake, N.S.-Radio: Stn now gds 3105,4495,6210, 3117.5 kcs. (8-1)

✓ Fort William, Ont.-Radio: Name of rng changed to Lakehead. Ont. (8-1)

✓ Mont Joli, P.Q.-Radio: Stn now gds 3105,4495,6210, 3117.5 kcs. (8-1)

✓ North Bay, Ont.-Radio: Correct rng courses: 181-A, 307-N, 008-A, 106-N. (8-1)

✓ North Bay-North Bay Airport-Radio: Twr oper. 0700-2300E. (8-1)

✓ Port Hardy, B.C.-Radio: Stn no longer gds 6545 kcs (8-1)

✓ Wiarton, Ont.-Radio: Stn class: BRAZ-T Gds. 3105, 3117.5,6210 kcs. Weather bdcast at 10 and 40; Gore Bay, Wiarton, and Toronto. (8-1)

Yarmouth, N.S.-Radio: Stn now gds 3105,4495,6210,3117.5 kcs. (8-1)

CUBA-Rancho Boyeros Airport, Havana: Effective May 19, 1947, and until further notice, all aircraft operating into and out of the Rancho Boyeros Airport must file a flight plan prior to entering the area. This applies to both IFR and CFR flights. Form of flight plan as follows: Identification; type; route of flight; time of flight departure; time of minutes; altitude, CFR or IFR indicated by C or N respectively and alternate if necessary. *Example:* NC60459 DC3 Miami Havana 1230 92/60 N KW. For trial period and until further advised all flight plans except Expreso and those presently using PAA communications facilities may be forwarded through WBR addressed to OAHAV at no charge.

ENGLAND-London Airport: SCS51 and SBA facilities to be considered out of service as navigational or landing aids They can be used for holding and letdown pro cedures only until further notice. Because of the possible presence of vehicles within the restricted area of the SCS51 and SBA sites the accuracy of these installations is questionable.

GREECE-Hassani Airport, Athens, Radio Call: Effective April 30, 1947, call sign WWJC replaced Army call sign WUCW on all circuits formerly using call signs at this station.

HAWAII-Kaneohe NAS-Radio: True bearings: 26°, 116°, 206°, 296° present variation used 12° E; 1947 magnetic variation 11° E. Change magnetic bearings from 14-104-194-284 to 15°,105°,195°,285°.

Honolulu-Radio: True bearings 67°, 181°, 243°, 001°. Present variation used 12° E ; 1947 magnetic variation 11° E. Change magnetic bearings from 55-169-231-349 to 56°,170°,232°,350° (Honolulu Terminal chart is due to be printed during the month of August).

ICELAND-Keflavik: After flight check VT Range legs inbound mag. found to be as follows: W 114°, NW 169°, E 299°, SE 349°.

LABRADOR-Goose Bay: Effective July 15, 1947, the following changes apply to air ground services offered by station VOAV Goose Bay: Goose Bay VOAV will maintain continuous watch and transmit on frequencies 3248, 6563, 8538, 12776 kcs., but with frequencies 3285,6577,8554 (receive and transmit) available on request.

NEWFOUNDLAND-Military and Naval Landings: All military and naval aircraft landing in Newfoundland should use Harmon Field at Stephenville or Naval Operating Base at Argentia. Gander has very limited military facilities and is reserved for commercial and weather diverted military aircraft.

Gander-Radio: Voice feature on H fac no longer transmits on 3492.5, 5410 kcs. (8-1)

Gander-Gander Metar weather broadcast now in operation on 3 and 5410 kcs. simultaneously at hour plus 20 min and hour plus 50 min. Reception reports on 5410 kcs. requested. Effective immediately the dew-point will be added as a remark at the end of the Metar for Gander, Stephenville, Sydney, and Moncton broadcast by VOAC on 5410 and 363 kcs at hour plus 20 and hour plus 50. Example: D.P. 47. Tele VOGA.

Torbay-Radio: Stn now gds 3105,4495,6210,3117.5 kcs. (8-1)

Field: Torbay Airport open to traffic between hours of 1030Z and 0230Z. No aircraft will be dispatched to arrive at Torbay between hours of 0230Z and 1030Z. No traffic will be available between landing and take off minimums of 1930Z and 1030Z. Landings and take off minimums as published in ATLD Amendment #16 "Mile visibility, take off night 500' 1 mi. visibility, landing day 800' 1 mi. visibility, landing night 800' 3 mi. visibility".

NORTH ATLANTIC-Route B Frequencies: Effective Aug. 15, 1947, WSY New York activated ICAO North Atlantic Route B frequencies with exception of 333 kcs and 8485 kcs. Frequencies guarded as follows: 6543 kcs. cont. 2912 kcs. between hours of 0000Z and 0800Z, on request other times. 11306 kcs. on req. Transmits same all frequencies. Advice on activation 333 kcs and 8485 kcs will be furnished at later date. Guarding of Route A and C unchanged.

PACIFIC OCEAN-Weather Station Communications: Effective July 1, 1947, Pacific Ocean Weathr Stn FOX discontinued use of 4220 kcs. for voice communications with trans-Pacific aircraft and substituted 5165 kcs. for this purpose. The following paragraphs of SOP-1-A should be changed in accordance with the above: Section IV: 4 (a); 4 (b); 5 (a) (5); 5 (b); 5 (c); (1); 7 (a)

Pacific ICAO Procedures: International Civil Aviation Organization Airway Traffic Control and Communication Procedures were placed into effect in the Eastern Pacific effective Aug. 1, 1947.

PUERTO RICO-Arecibo Airport (San Juan)- Revised data: Elev. 49'. (7-31)

AERONAUTICAL CHARTS OF THE U.S. COAST AND GEODETIC SURVEY

New editions of the charts listed below will be published in about one month, making former prints obsolete for use in aviation. Orders for these particular charts should be kept to a minimum for immediate requirements. As soon as the charts are available for distribution a second notice will appear in this publication.

Douglas, Jacksonville, Miami, Mobile, Orlando, Reno, Sacramento.
Seattle Local (Atlanta Local, San Francisco Local--New Charts
WAC 466, 467, 525
FC 230

A new edition (or chart) of the charts listed below which make former prints obsolete is now available for use. Former prints should be destroyed or stamped "OBSOLETE FOR USE IN AVIATION."

When ordering charts from the U.S. Coast and Geodetic Survey, correct remittances should accompany all orders. Sectional charts should be ordered by name; World Air charts by number with the prefix (WAC); Approach and Landing charts by number with the prefix (AL); Route charts by number with the prefix (FC) The above charts are priced at 25 cents each with the exception of Approach and Landing charts which are priced at 5 cents each.

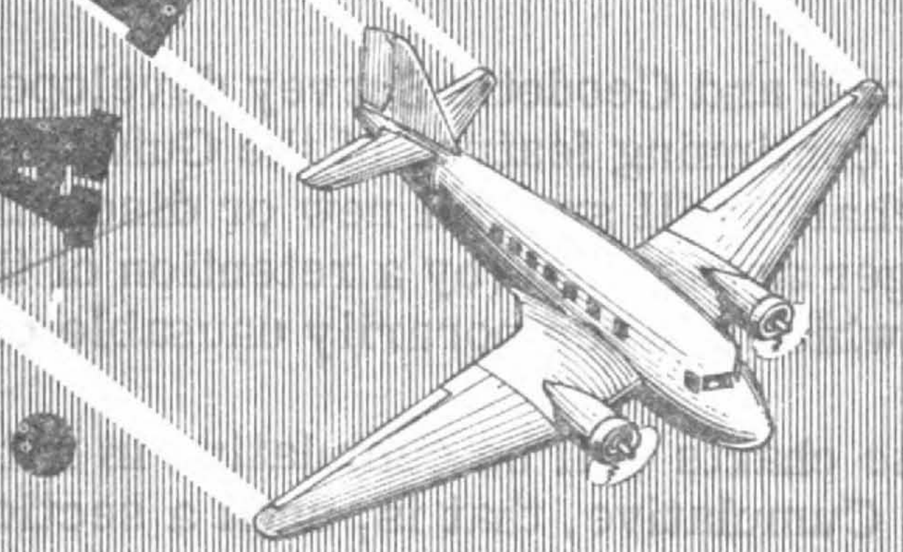
AIRMAN'S GUIDE



NOTICES TO AIRMEN

VOL. 2, NO. 12 ... SEPTEMBER 2, 1947

This issue includes all data on record as of 0001 E.S.T. on the date above. For later information consult teletype NOTAMS.

U. S. DEPARTMENT OF COMMERCE
CIVIL AERONAUTICS ADMINISTRATION
OFFICE OF AVIATION INFORMATION

SPECIAL NOTICE

NOTAM CHARTS

When the discontinuance of the AIRMAN'S GUIDE Flight Planning Charts and facing Data Pages was announced, personal flying interests demanded compromise charts that would serve as notams to correct the less frequently issued sectionals.

Resultantly, the Coast and Geodetic Survey developed the series of notam charts which will be a continuing feature of the Guide.

These six notam charts will spot all new or discontinued airports, radio navigational aids, danger areas, and (by a retention of the Ⓡ symbol) all such airports or aids which are temporarily unusable or usable only with extreme caution.

Furthermore, these charts will be cumulative in nature as far as danger areas are concerned. Cumulative, that is, until a sectional chart is revised semi-annually.

Other features, such as new airports or radio aids, will be retained on the notam charts only as long as they are cited in the Notices to Airmen. Such citations are normally carried in only one issue of the Guide. Continuing very hazardous conditions, however, (such as field closed because of construction or radio range inoperative) will be charted as long as they are effective.

LEGEND

● New airport.

✕ New radio navigational aid.

Ⓡ Discontinued airport or radio aid, or one usable only with extreme caution.

AIR NAVIGATION RADIO AIDS

RADIO CLASS DESIGNATIONS

AC..... Approach Control Tower, CAA
B..... Scheduled Broadcast Station (broadcasts weather reports at 15 and 45 minutes after the hour unless otherwise cited).
C..... Control Tower, CAA
CA..... Control Tower, Army
CI..... Control Tower (City, County, Private, etc.)
CN..... Control Tower, Navy
D..... Distantly controlled
FM..... VHF fan type marker (100 watts)
FMHW..... Non-directional radio beacon when combined with fan marker.
GCA..... Ground Controlled Approach Unit
H..... Non-directional radio-beacon (homing), power 50 watts or more
ILS..... Instrument Landing System (voice on localizer channel)
IM..... VHF boundary marker
K..... Independent Compass Locator Station
LFM..... VHF fan type marker, low-powered (5 watts-not over 10 miles from range)
LOR..... Low frequency omni-directional range
MH..... Non-directional radio-beacon (homing), power less than 50 watts
ML..... Range (loop radiators), power less than 50 watts
MM..... VHF middle marker
MMK..... Compass locator station when combined with middle marker of Instrument Landing System
MRA..... Range (Adcock, vertical radiators), power more than 50 less than 150 watts.
MRL..... Range (loop radiators), power more than 50-less than 150 watts
OM..... VHF outer marker
OMK..... Compass locator when installed at outer marker site or within 5.5 miles of middle marker
P..... Point to point radio
RA..... Range (Adcock, vertical radiators), power 150 watts or more
RL..... Range (loop radiators), power 150 watts or more
S..... Simultaneous (range signals and voice) type of transmitter
T..... Teletype
TX..... Principal teletype
V..... Additional voice feature on VHF
VAR..... Visual-aural VHF range (every VAR has simultaneous voice feature)
VOR..... VHF omni-directional range
W..... Without voice facilities
Z..... VHF station location marker at a range station

AIRWAY RADIO COMMUNICATIONS

GENERAL

All radio range stations (class RA, RL, MRA, MRL, ML) emit directional signals (type A2 emission) 1020 cycles per second modulation.

All radio beacon stations (class H and MH) emit non-directional signals (type A2 emission) 1020 cycles per second modulation. Unless otherwise noted, all stations, other than class MH, operate continuously within their assigned hours of service except during interruptions for voice transmission on the same frequencies where simultaneous transmission is not available and during shutdowns for maintenance purposes. Unless otherwise cited, the voice features of Class MH facilities are available continuously, and the homing features are operated on request. The effective range of an MH facility is ordinarily 25 miles.

Compass locators are low-powered non-directional facilities operating in the 200-415 kc. band. They are installed near airports to make it easier for pilots to make instrument approaches. When holding is required, they also help the pilot follow a more precise holding pattern. Compass locators, however, should not be depended upon as long range navigational aids since they are rarely useful at distances of over 15 or 20 miles. These are now shown as "MHW" facilities.

Voice communications facilities are available unless "W" (without voice) is included in the classification. Examples: SMRAW, MRLW, HW, HWT. Transmission of voice on a frequency other than the range frequency is indicated as MRLW-V. When no "W" is included in station class, the "V" indicates voice feature on two frequencies, namely, range frequency, and generally, VHF of 116.1 and/or 111.1 mcs. 116.1 mcs. is used for transmission to Army aircraft, 111.1 mcs. to civil aircraft.

The classification designation "B" denotes that the station broadcasts meteorological and notice to airmen information on a scheduled basis at 15 & 45 minutes past each hour unless otherwise cited.

All Civil Aeronautics Administration stations equipped for voice communications with aircraft stand continuous listening watches on the frequencies of 3105, 4495, and 6210 kcs., unless otherwise cited.

AIRPORT DATA

LEGEND

CLASS

SIZE

40: Length of longest landing strip (unpaved) in hundreds of feet
40h: Length of longest hard-surfaced runway in hundreds of feet (Seaplane landing areas over 5 miles in length are classified as unlimited.)

RADIO

R1: Voice availability via tower, range (or homing device), or voice station
R2: Range (or homing device) and tower
R3: Range (or homing device), tower, and instrument landing system

LIGHTS

L: Incomplete lighting, either flood or portable runway lights
L1: Beacon only
L2: Beacon and boundary
L3: Beacon, boundary, and obstruction
L4: Beacon, boundary, obstruction, and flood
L5: Beacon, boundary, obstruction, flood, and runway contact
(L5): Identical to L5 except that runway contact lights are high intensity
L6: Beacon, boundary, obstruction, flood, runway contact, and instrument approach
(L6): Identical to L6 except that instrument approach lights are high intensity.

(The class always indicates the highest element available, but does not necessarily include all intermediate elements)

SERVICING

S1: Fuel
S2: Fuel, storage
S3: Fuel, storage, minor aircraft repairs
S4: Fuel, storage, minor aircraft, and minor engine repairs
S5: Fuel, storage, major aircraft, and minor engine repairs
S6: Fuel, storage, major aircraft, and major engine repairs

N.B. Very often small civilian fields (particularly in non-metropolitan areas) will have no full-time attendant. Frequently, servicing at such fields in isolated communities is available only by circling the town to attract the operator's attention.

NOTES

1. "Effingham Int.. 10, L8-D" indicates that the airport is Effingham CAA Intermediate Field, Site 10, on the St. Louis-Indianapolis Airway. Municipal airports where the lights are maintained by the CAA are listed similarly except that there is no "Int."
2. "CLOSED" indicates closed to all civil aircraft and all transient military aircraft except on official business this station or in emergency.
3.(a) "TEMP INACTIVE. NO FACS." indicates AAF airfields used either exclusively by the AAF or municipal airfields used jointly by the AAF and civil interests at which both the Army and the civil interests are inactive. Such airfields will be available to military aircraft at the discretion of the Commanding Officer of the organization to which the aircraft is assigned.
(b) "ARMY TEMP INACTIVE. CIVIL FACS." indicates municipal airfields used jointly by the AAF and civil interests at which the Army facilities are inactive but civil facilities are available. Such fields may be used by military aircraft, however, only commercial service is available.
4. "Fld lgts on prior req." indicates field lights are available only by previous phone call, telegram, or letter. It must be remembered that most fields do not have 24-hour operation. When an airport classification indicates a lighted field, without the above modification, the field lights burn all night or will be turned on when a radio request is made or a plane circles the fld.

Homestead, Fla.-Homestead Arpt	*109.5 (W)*		*332.6*						

GCA AVAILABLE: How and Where

GROUND CONTROLLED APPROACH (GCA) AVAILABLE TO CIVIL PILOTS AS WELL AS ARMY AND NAVY: All GCA facilities (Army,Navy, or CAA) are available to any plane in emergency. To secure **GCA** assistance pilots should call the associated control tower for instructions.

In addition to the working frequencies listed below, **Army and Navy GCA emergency VHF transmissions are made on** 140.58 mcs. **Simplex service on 3117.5 kcs will be provided at all Army and Navy installations to provide an alternate means of communications for scheduled air carrier aircraft. Army and Navy towers will relay GCA instructions on 200-400 kcs band to civil aircraft not equipped to receive VHF or HF.**

A minimum of 30 **minutes will generally be required to assemble a GCA crew and** prepare the equipment **for operation AFTER an alert has been received at those locations not providing continuous** service.

NOTICES TO AIRMEN
SPECIAL NOTICES

ARMY SPECIAL NOTICES

ARMY DATA: Advice covering Army fields or Army operations on civil lds, or Army radio facilities, and also Air National Guard fields and facili- s should be forwarded to Commanding General, Air Transport Command, TN.: Flight Operations Division, A-3. Requests for approval of the closing Army airfields or restrictions in airfield facilities to transient military air- ift for over 10 days should be forwarded to the same address for submittal Headquarters Army Air Forces, as required. Restrictions in Air National ard Fields or facilities will be forwarded to the National Guard Bureau ough the State Adjutant General for approval. That Bureau will forward proved restrictions to the above address for publishing. Information to be olished will be coordinated and submitted to the Civil Aeronautics Adminis- tion.

ARMY OFFICIAL BUSINESS: Within the meaning of AAF Regulation -2 is interpreted as the necessity for personnel aboard an aircraft to contact sonnel, units, or organizations at or near the airfield selected for landing the purpose of conducting transactions in the service of, and in the interest the United States Government. This does not include the use of an airfield transient aircraft for the purpose of obtaining clearance, service, or other ns attendant with itinerant operations. Cross country flights for the pur- e of maintaining flying proficiency are not considered to be official business hin the meaning of this regulation.

ARMY FOREIGN CLEARING STATIONS: Under the authority of AAF gulation 61-4, Army aircraft with destinations listed below or returning refrom to the United States will clear through the stations indicated: RICA AND AZORES - Brookley Field, Ala., MacDill Field, Fla., Washington ional Airport, D.C., or Westover Field, Mass. ALASKA - McChord Field, sh., or Great Falls AAF, Mont. BERMUDA - Mitchel Field, N.Y., Brookley ld, Ala., MacDill Field, Fla., Washington National Airport, D.C., or West- r Field, Mass. CANADA - Great Falls AAF, Mont., Brookley Field, Ala., Chord Field, Wash., Washington National Airport., D.C., Selfridge Field, h., or Westover Field, Mass. CANAL ZONE, CENTRAL AMERICA, XICO, AND SOUTH AMERICA - March Field, Calif., MacDill Field, Fla., ly Field, Tex., or Brookley Field, Ala. CARIBBEAN - Brookley Field, Ala., ly Field, Tex., or MacDill Field, Fla. ENGLAND, GREENLAND, ICELAND, NORTH IRELAND - Washington National Airport, D.C., or Westover Field, s. NOVA SCOTIA AND NEWFOUNDLAND - Washington National Airport, ., Westover Field, Mass., Selfridge Field, Mich., or Brookley Field, Ala. WAII - Fairfield-Suisun AAF, Calif. EUROPEAN THEATER - Brookley ld, Ala., MacDill Field, Fla., Washington National Airport, D.C., or West- r Field, Mass.

✓ Indicates new or revised Special Notices

✓ CLEARANCE OF AAF AIRCRAFT IN NEW YORK CITY AREA: In accordance with notification from Headquarters, Army Air Forces, July 2nd AAF Letter 63-9 has been rescinded and the following instructions will govern the clearance of AAF aircraft in the New York City Area: For clear ance purposes into or from the New York City Area (encompassed by a 25 mile radius from the southern tip of Manhattan) CFR is defined as ceiling at least 2000' and the visibility 3 miles or more; IFR when the visibility is not less than one mile and the ceiling is unlimited, or when the ceiling is not less than 5000' and the visibility not less than 2 miles. AAF aircraft flying into the New York City Area may be cleared to any authorized field therein provided weather conditions are not less than those defined above. In all cases in-flight approval from Olmsted Flight Service Center by contacting Olmsted Airways, Rome Airways, Westover Airways, Mitchel Airways, or Ft. Dix Airways must be obtained prior to proceeding to the field of destination. All pilots whose destination is an airfield within the area will indicate on the AAF Form 23 that their flight plan to the field of destination is via any of the 5 stations listed. Flights for which the point of first in- tended landing is Mitchel Field may be made using normal clearance pro- cedure and restrictions outlined herein are not applicable to that station. Appropriate clearance may be made from a field at which weather condi- tions meet above specifications even though weather in other sections is below specified minimums. AAF aircraft engaged in regularly scheduled transport flights under the operational control of the Air Transport Com- mand are exempt from these restrictions.

SELECTION OF WEATHER ALTERNATES BY ARMY PILOTS: In accordance with policy stated by the CG, AAF, April 7, 1947, Army pilots are not to be refused IFR clearances because of selection of other than "A,N,NG, or P" fields as an alternate. The selection of an alternate air- port is a planned procedure to be resorted to in case of emergency and any suitable airport, military, or civilian, will be accepted for clearance purposes. Concerning this policy, it is pointed out that pilots who do utilize other than "A, N, NG, or P" fields under such circumstances may be called upon to justify their use of same.

V.H.F. CHANNEL ASSIGNMENTS: The following are Army assign- ments:

Channel	Frequencies	Channel	Frequencies
A	116.1	H	134.10
B	126.18	U	108.3
C	137.88	V	108.7
D	140.58	W	109.1
G	137.70		

REVISION TO ARMY FLIGHT CLEARANCE PROCEDURE: Effective August 15, 1947, within the continental limits of the U.S., flight clearance ✓

procedure is revised as follows: (Conflicting portions of AAF Regulation 15-23 and 60-16 are being rescinded): All written weather data will be eliminated from Form 23. Forecaster will indicate on Form 23 whether the flight should be conducted under IFR or CFR conditions. A verbal briefing consisting of at least the following factors will be given: (1) Existing synoptic situation and terminal forecast for destination, and if required, for alternate. (2) Existing route weather. (3) Location of pertinent hazardous weather areas and recommended procedures for avoiding them. The pilot will certify on Form 23 as follows: "I have been adequately briefed on the current and forecast weather affecting my flight and I understand the weather situation". A written or cross section forecast will be furnished only upon request submitted two hours in advance. At non-AAF bases and AAF bases where no forecaster is on duty, the appropriate Flight Service Center forecaster will brief the pilot verbally over the interphone system or telephone. The Flight Service dispatches will monitor receipt of pilots acknowledgments of adequate weather briefing.

✓ CORRECTIONS FOR AND ADDITIONS TO ARMY T.O.-08-15-1:

(1) Correct page 103, AN/CPN-6 (YM) Beacons (X-Band) Domestic by adding the following: (a) Los Alamitos, Calif., Lat. 33-47-30 N, long. 118-03-15 W; Code: 1-2; Operating Agency: USN; Angular coverage: 000-360; Operating hours: Cont.; Remarks: Alt. 118'. On control tower.

(b) Key West, Fla., Lat. 24-33-55 N, long. 81-48-00 W, Code: 2-1; Operating Agency: USCG; Angular coverage: 000-360; Operating hours: Cont.

(c) Atlantic City, N.J., NAS, Lat.39-27-21N, long.74-34-31W;Code: 1-2; Operating agency: USN; Operating hours: Cont.; Remarks: At field.

(d) Chincoteague, Va., Lat. 37-54-31 N, long. 75-23-52 W, Code: 2-2; Operating agency: USN; Operating hours: Cont. except from 1200-1300 on Sundays.

(e) Norfolk, Va., Lat. 36-57-12 N, long. 76-16-00 W; Code: 1-2-1; Operating agency: USN; Operating hours: Cont. except from 1200-1300 on Suns.

(f) El Toro MCAS, Calif., Lat. 33-40-09 N, long. 117-43-07 W; Code: 1-2-1; Operating hours: Cont.; Remarks: Antenna elevation 367'; Operating agency: USMC.

(g) Atlanta, Ga., NAS, Lat. 33-52-45 N, long. 84-18-25 W; Code: 1-2; Operating hours: Cont.

(h) Seattle NAS, Wash., Lat. 47-41-30 N, long. 122-15-20 W; Code: 1-1-1; Operating agency: USN.

(i) Whidbey Island NAS, Wash., Lat. 48-19-22 N, long. 122-39-49 W; Code: 1-2-2; Operating agency: USN; Angular coverage: 000-360; Operating hours: Cont.; Remarks: Altitude 340'.

(2) Correct page 104, by showing operating agency for Jacksonville as USN rather than USCG.

(3) Correct page 102, X-Band Radar Beacons by adding Los Alamitos, Calif., and Atlantic City, N.J., by deleting entirely Point St. George, Calif., and Banana River, Fla., and by deleting Temp suspended after Key West, Fla., Chincoteague, Va., and Norfolk, Va.

(4) Correct page 101, Tonopah AAF, Nev., by showing page no. as 48 rather than 50. (5) Page 3, by showing elevation for Armstrong, Ont., as 1058'.

(6) Navy GCA facility is in operatoin at Atlanta NAS, Ga. 0800-1600 Mon. Friday or on 45 minutes notice on standard Navy GCA frequencies

(7) Correct Danger Areas in accordance with recommendations of Air Space Subcommittee in Meetings 74 and 75: Rescind the following:

(a) Danger Area in the vicinity of Pinecastle, Fla., - Beginning at lat. 28-25-20, long. 81-05-15, thence southerly along Fla. E. Coast RR to lat. 28-00-00, long. 81-01-30, thence W to long. 81-30-00, thence N to lat. 28-23-00, thence to lat. 28-30-30, long. 81-17-20, thence to lat. 28-25-20, long. 81-05-15, point of beginning.

(b) Danger Area in the vicinity of Zillah, Wash. - N boundary - lat. 46-30-30; E boundary - long. 119-58-30; S boundary - lat. 46-25-10; W boundary - long. 120-14-00.

(c) Circular Danger Area in the vicinity of Cherry Point, N.C. centered at lat. 35-19-00, long. 76-16-00

(d) Danger Area in the vicinity of Cadiz Lake, Calif. - N boundary - lat. 34-21-00; S boundary - lat. 34-12-30; E boundary - long. 115-20-00; W boundary - long. 115-28-15. Circular areas with 2 mile radius centered at: #1 Lat. 34-03-30, long. 115-18-30; #2 Lat. 34-07-00, long. 115-00-45; #3 Lat. 34-14-00, long. 115-13-00; #4 Lat. 34-23-45, long. 115-23-00; #5 Lat. 34-30-00, long. 115-31-15; #6 Lat. 34-19-45, long. 115-38-45; #7 Lat. 33-57-00, long. 114-53-45; #8 Lat. 34-05-00, long. 114-42-00; #9 Lat. 34-07-00, long. 114-53-45.

(e) Danger Areas in the vicinity of Coolidge, Ariz. - Area #1- N boundary - Lat. 32-48-00, S boundary - lat. 32-40-30, E boundary - long. 111-09-00, W boundary - long. 111-15-00; Area #2 - N boundary - Lat. 33-02-00, S boundary - lat. 32-56-00, E boundary - long. 111-10-00, W boundary - long. 111-15-30.

(f) Danger Area in the vicinity of Hunter Liggett, Calif. - Beginning at lat. 36-03-30, long. 121-12-13, thence SE to lat. 35-53-00, long. 121-00-30 thence due S to lat. 35-51-53, thence WSW to lat. 35-50-20, long. 121-10-40, thence WNW to lat. 35-54-07, long. 121-24-00, thence due N to lat. 36-00-00, thence N northeasterly to lat. 36-05-00, long. 121-22-00, thence E southeast to lat. 36-03-30, long. 121-12-13, point of beginning.

(g) Revise the following: Danger Area over Aerial Gunnery Range for use by Eleventh Naval District, in the vicinity of Chocolate Mtn, Calif. as follows: Beginning at lat. 33-32-50, long. 115-34-10, thence SE along a road to lat. 33-25-50, long. 115-14-30, thence to lat. 33-24-15, long. 115-17-00, thence SE and NE along a road to lat. 33-22-50, long. 115-09-58, thence to lat. 33-07-30, long. 114-55-35, thence SW along a road to lat. 33-00-00, long. 115-04-00, thence NW along the RR to lat. 33-09-40, long. 115-19-30, thence to lat. 33-12-55, long. 115-24-00, thence to lat. 33-29-20, long. 115-28-00, thence to lat. 33-32-50, long. 115-34-10, point of beginning.

(h) Danger Area over Aerial Gunnery, Strafing and Bombing Range for use by Tactical Air Command in the vicinity of Guadalupe Mtns, N.M. - N boundary - lat. 32-18-00, E boundary - long. 104-52-00, S boundary - lat. 32-00-00, W boundary - long. 105-33-00

(i) Danger Area over Aerial Gunnery Range for use by Commander Fleet Air and Naval Air Station Tillamook along the Oregon Coast - N boundary - lat. 46-06-00, E boundary - long. 124-05-00, S boundary - lat. 45-26-00, W boundary - long. 124-35-00.

(8) Page 106, Procedure for GCA, by showing Paragraph F as listing 6640 kcs. rather than 6440 kcs. Paragraph E, to read: "For Army clearance purposes, weather minimums as prescribed by AAF Regulation 60-16 will apply.

NAVY SPECIAL NOTICES

NAVY DATA: In accordance with Hydrographic Office Memorandum for Aviators No. 9, July 29, 1946, Hydrographic Office information concerning naval and marine corps air stations and facilities, including changes in field facilities, operation rules, air/ground communications facilities, instrument approach procedures and navigational aids, should be directed to: The Division of Air Navigation, Hydrographic Office, Washington 25, D.C., for transmittal to the Civil Aeronautics Administration. In accordance with Aviation Circular Letter No. 96-46 of June 13, 1946, approval for the closing of any naval or marine corps air station or facility to transient military aircraft for a period in excess of 10 days must be obtained from the Chief of Naval Operations. Also, approval is to be obtained from the Chief of Naval Operations before relocation or modification of any aid to air navigation, such as reorientation of radio ranges.

V.H.F. CHANNEL ASSIGNMENTS: The following are Navy assignments:

Channel	Navy Frequency	Channel	Navy Frequency
1	116.1	6	134.64
2	142.56	7	143.64
3	126.18	8	142.02
4	128.70	9	142.74
5	143.28	GUARD	140.58

CIVIL SPECIAL NOTICES

CIVIL USAGE OF MILITARY FIELDS: Army and Navy fields are open to civil fliers only in emergency or with prior permission of the commanding officers thereof.

REISSUANCE OF EXPIRED PILOTS CERTIFICATES: 20.550 Reissuance. Any person who on June 30, 1947, held a valid private or commercial certificate and who failed to exchange such certificate in accordance with Section 20.55 of the Civil Air Regulations, may, notwithstanding such failure and without other showing, obtain a pilot certificate with appropriate ratings upon application to the Administrator.

PERSONAL POSSESSION OF PILOT CERTIFICATE: No person shall pilot a civil aircraft within the U.S. unless he holds a valid pilot certificate with appropriate ratings issued by the Administrator or an appropriate and valid foreign pilot certificate. Such certificate shall be in the personal possession of the pilot at all times while piloting aircraft and shall be presented for examination to any inspector of the Administration or State or local law enforcement officer upon the request of such inspector or enforcement officer.

ISSUANCE OF STUDENT PILOT CERTIFICATES AND TEMPORARY STUDENT PILOT CERTIFICATES. DURATION OF PILOT CERTIFICATES WITH PRIVATE OR COMMERCIAL RATING: The purpose of this regulation is to provide that (1) an authorized representative of the Administrator, as well as the Administrator, may issue student pilot certificates, (2) temporary student pilot certificates as well as pilot certificates with private or commercial rating may be issued by the Administrator or his authorized representative, and (3) pilot certificates with a private or commercial rating shall not have a prescribed expiration date. Effective July 22, 1947, Part 20, of the C.A.R. was amended to read in part as follows: "20.00 Issuance. A student pilot certificate will be issued by the Administrator or his authorized representative to an applicant who meets the applicable requirements." "20.51 Duration. (a) A student pilot certificate shall expire 24 calendar months after the month of issuance. (b) A pilot certificate with a private or commercial rating shall remain in effect unless it is suspended or revoked, or a general termination date for such certificate is fixed by the Board". "20.52 Temporary certificates. The Administrator or his authorized representative may issue a temporary student pilot certificate or a temporary pilot certificate with a private or commercial rating for a period of not to exceed 90 days, subject to the terms and conditions specified therein by the Administrator." 20.53, Reinstatement, repealed.

NOTICE TO ALL FLYING PERSONNEL: Because of the increase in aircraft operations, both civil and military, in recent months the number of complaints regarding airplane noise nuisance has reached such proportions that the advancement of aviation and development of new airports are in danger of being severely retarded. To reduce the number of such complaints, it is requested that the following practices be put into effect by all fliers:

(1) Discontinue all unnecessary low flying.

(2) When weather and traffic volume permit, increase altitudes of all traffic patterns that require flight over inhabited areas.

(3) Re-route channels of approach and departure to avoid residential and business districts whenever possible.

(4) If the airport is located near inhabited areas, reduce power and increase pitch of propellers as quickly as possible during take-off so as to keep engine and propeller noises at a minimum.

(5) Keep rpm's set at a minimum required operational setting when low flying over populated areas is necessary.

SEAPLANE BASE DIRECTORY: A new Seaplane Base Directory, dated June 15, 1947, has been mailed to all seaplane base operators and seaplane owners on record. It is obvious from correspondence received that not all operators and owners received their copies. This is notice, therefore, that any qualified non-recipient may have a copy upon request to: Office of Aviation Information, Attention: A-258, C.A.A., Department of Commerce, Washington 25, D. C.

RADIO TELEPHONE-OPERATION AUTHORIZATION: This is the simple way in which an authorization to operate a radio telephone transmitter in an aircraft is obtained: the applicant appears in any of the Federal Communications Commission Field Offices, or before any CAA flight examiner of the CAA, who has been designated by the FCC to issue the permits, proves he is a U.S. citizen, that he has need of such an authorization, and that he understands the few simple rules and regulations. He is given a card granting the authorization then and there. FCC offices are listed under U.S. Government in phone books, and there are some 30 of them throughout the country. Mostly, they are in downtown offices. There are more than 1,000 CAA designated flight examiners. Mostly they are located at airports. The "examination", if it may be so described, consists of a few questions establishing the ability of the applicant to transmit and understand spoken messages in English, and to understand the simple rules governing the use of such equipment. He is also given simple, printed instructions for its use.

V.H.F. IFR FLIGHTS: Until further notice, Air Traffic Control will be exercised on the assumption that aircraft are utilizing intermediate frequency radio ranges. If a pilot desires to conduct IFR flight using VHF ranges over all or a portion of the route, his flight plan should so indicate. Further, flight should not be conducted on civil airways in IFR weather using VHF ranges unless the ATC clearances so authorize.

NEW PRIVATE FLIER VHF FREQUENCIES: All CAA Communications Stations and Towers are discontinuing receiving watches on 131.7 and 131.9 mcs as new equipment becomes available to guard the new private flier frequencies of 122.1 mcs for transmission to CAA Communications Stn. and 122.5 mcs. for transmission to CAA operated towers. Practically all CAA towers now guard 122.5 mcs. but the communications stations program is not fully effective yet because of non-receipt of the new receivers. CAA Communications Stations normally reply to itinerant aircraft on the voice feature of the range, low frequency or VHF, whichever is applicable. Replies are made on 111.1 mcs, if VHF reply has been requested on other than range frequency. CAA airport control towers will reply to itinerant aircraft on one of the frequencies 118.3, 118.5, 118.7, or 118.9 mcs., in addition to towers' low frequencies.

U.S. WEATHER BROADCASTS AND TRANSMISSIONS: The time of observation for all weather reports is 30 minutes after the hour, unless otherwise announced. Pilots enroute are requested to avoid, if possible, calling airway communications stations at or about 15 and 45 minutes past the hour (which are the scheduled broadcast times) to request weather information, as such calls may delay starting of scheduled broadcasts and cause inconvenience to other persons who are dependent on the broadcasts for weather reports.

RADIOTELEPHONE COMMUNICATIONS: The word ROGER in radiotelephone communications means "I have received all of your last transmission", and its use in any other sense by CAA stations and towers is not authorized. In order to avoid confusion, it is suggested that pilots engaging in air-ground contacts also limit the use of ROGER to acknowledgments of transmissions.

INSTRUMENT FLIGHT, NEW YORK METROPOLITAN AREA: Revised arrival, departure, holding instrument approach and control procedures utilizing new radio aids were placed in effect in New York Metropolitan Area. Non-air carrier pilots proposing instrument flight through this area or to or from Newark, Mitchel, or La Guardia Fields should write the Chief Controller, New York Air Traffic Control Center, Box 575, La Guardia Field, New York, for copies of applicable Operations Letters describing these procedures.

CFR FLIGHT PLANS AND ARRIVAL REPORTS: CFR flight plans may be filed with any CAA airways communication station or airway traffic control center. One hour after E.T.A., if no notice of arrival is received, queries are sent out over CAA communications systems. If the arrival report is not received within three hours, search and rescue operations are initiated. Inasmuch as the Government may be put to considerable expense in determining the location of aircraft when an arrival report is not filed, it is vitally necessary that all pilots using this service make certain that notice of arrival is filed with the CAA communications station at the termination of the flight. To reduce radio congestion, pilots should file CFR flight plans, when required, in person or by telephoning the airways communication station or airway traffic control center. CAA control towers have discontinued accepting CFR flight plans for transmission and will not normally file arrival reports except upon the specific request of the pilot. Whenever practicable, however, it is desired that arrival reports be filed in the same manner as flight plans.

✓ AERONAUTICAL CHART AND PUBLICATION CORRECTIONS: Correct Flight Information Manual, Vol. 2, No. 1, dated July 1, 1947:

(1) Chapter IX, page 114, under heading of "Handling of CFR Flight Plans and Arrival Reports", erroneously states that CFR flight plans are forwarded in the same manner that IFR flight plans are. CFR flight plans are not transmitted. Upon termination of a CFR flight, the pilot should close out his flight plan. Notice of arrival is then sent over the CAA communication system to the station holding the original flight plan.

(2) Chapter VI, page 28, Direction Finding D/F and Loran Station Data, FCC can take bearings on any transmission between 2 and 30 mcs., and The Coast Guard has 3 direction-finding stations in this country equipped to take bearings on any transmission between 2 and 10 mcs.

(3) Chapter XI, page 126, by adding the following Canadian Airports of Entry: *Chester, N.S. (Water); *Digby, N.S. (Water); *St.John,N.B.;

*St. Andrews, N.B. (Water); *Cross Point, Que. (Customs Port-Campbellton, N.B.) (Water); *Grindstone, Que. (Magdalen Islands) (Water); *Britt, Ont. (Water); *Brockville, Ont. (Water); *Owen Sound, Ont. (Water); *Sarnia, Ont. (Water); *Waterton Lakes, Alta. (Water); Medicine Hat, Alta.; *Grand Forks, B.C. (Customs Office-Carson); Prince Rupert, B.C. (Water) *Stickeen, B.C. (Water); Old Crow, Yukon Territory (Water).

(4) Correct Cincinnati (T-7) Sectional Aeronautical Chart, by relocating the Cincinnati Seaplane Base to position 2 miles S of Cincinnati, at bend of Ohio River.

(5) Correct New York Sectional Aeronautical Chart, by showing the frequency of "Navy Johnsville" as 284 kcs. rather than 203 kcs.

(6) Correct Regional Chart #310, by adding "Navy Johnsville", transmitting on 284 kcs.

TELETYPE NOTAMS: Throughout the year climatic conditions (snow storms, floods, etc.) render many fields temporarily unusable or unsafe. In addition, there are intermittent maintenance operations in progress on many fields. Radio facilities suffer temporary power failures or course misalignments and lighting facilities are temporarily inoperative. Because these temporary conditions cannot be given immediate coverage in the Airman's Guide, full cognizance must be taken of Teletype Notam service which gives the desired coverage on any facility or field at which teletype transmitting stations are based. Cross-country pilots, accordingly, should consult these Teletype Notams for latest available data on air navigation aids. These teletype notams are posted in CAA Communications Stations and in all Army Air Field and Naval Air Station Operations Offices having teletype drops.

AIRPORT TRAFFIC CONTROL PROCEDURES: (a) Planes with 2-way radio should establish communication with control tower when 15 miles from the airport of destination and before taxiing or taking off.

(b) Planes without receivers, when approaching tower-controlled fields, and before taxiing and taking off, should be on the alert for and be guided by light gun signals. (See AAF Regulation 100-4, dated March 4, 1944, and CAR Digest or Manual 60).

(c) Flashing tetrahedron lights, as well as the daylight operation of rotating beacons, indicate suspension of CFR traffic.

AIRPORT AND RADIO NOTICES

LEGEND

** - New or revised airport, danger area, or miscellaneous data to be added to records.

★ - New or revised radio data to be added to records.

FOREIGN SPECIAL NOTICES

FOREIGN ENTRY PROCEDURES; AIRPORTS OF ENTRY, CUSTOMS REPORTS, CIVIL AIRCRAFT CLEARANCE FOR FOREIGN COUNTRIES: These procedures and regulations were all incorporated into the Flight Information Manual, Vol. 2, No. 1, dated July 1, 1947. Only amendments to the data contained in the Manual will hereafter be carried in the Airman's Guide.

FRECUENCIES GUARDED BY U.S. OPERATED OCEAN STATION VESSELS: Effective Aug. 5, 1947, all U.S. operated ocean station vessels in the North Atlantic will guard 118.1 mcs for routine VHF communications with aircraft in lieu of 116.1 mcs. Continuous guard of 140.58 mcs. distress frequency remains unchanged.

UNITED KINGDOM MILITARY AIR BASE USAGE: The following United Kingdom Military Air Bases are available to civil air carriers of only U.S. and United Kingdom and to aircraft which were purchased in either the U.S., or the United Kingdom and are in ferry status.

(a) for regular use: Kindley Field, Bermuda; Beane Field, St. Lucia; Coolidge Field, Antigua; and Atkinson Field, British Guiana.

(b) for alternate use: Waller Field, Trinidad; Vernam Field, Jamaica; and Carlsen Field, Trinidad.

Even though the above fields are open to civil air carriers and ferry status planes it is mandatory that the operators of such aircraft secure approval for use of these military air bases from Headquarters, AAF, Washington, D.C., prior to the departure of each flight or series of flights.

INTERNATIONAL RADIOTELETYPE CIRCUITS: Effective May 16, 1947, WFM Lagens, Azores permanently decommissioned. The following radioteletype circuits are established and in operation at CSY Santa Maria; WSY New York; DIP Shannon; FXO Paris; NHY Port Lyautey. Inter-island radioteletype link CSY Santa Maria to WYOY Lagens will be continued until further advised. All above circuits are operating in accordance with ICAO Communications Procedures.

✓ NAVAL COMMUNICATIONS WITH COMMERCIAL AIRCRAFT IN CARIBBEAN AREA: Effective March 24, 1947, and until further notice, Trinidad NAS, and Guantanamo NAS, guard 6515 kcs voice continuously, transmitting and receiving, for communications with commercial aircraft.

✓ LORAN RATE 2H3 ON PACIFIC COAST: Effective Sept. 1, 1947, Loran Rate 2H3 on Pacific Coast will be placed in continuous operation and signals on this rate may be used for navigational purposes.

NORTH ATLANTIC ROUTE B FREQUENCIES: Effective Aug. 15, 1947, WSY New York activated ICAO North Atlantic Route B frequencies with the exception of 333 kcs and 8485 kcs. Frequencies guarded are as follows: 6543 kcs. cont. 2912 kcs. between hours of 0000Z and 0800Z, on request other times. 11306 kcs. on req. Transmits same all frequencies. Advice on activation 333 kcs and 8485 kcs. will be furnished at later date. Guarding of Route A and C unchanged.

PACIFIC OCEAN WEATHER STATION COMMUNICATIONS: Effective July 1, 1947, Pacific Ocean Weather Station FOX discontinued use of 4220 kcs for voice communications with trans-Pacific aircraft and substituted 5165 kcs for this purpose. The following paragraphs of SOP-1-A should be changed in accordance with the above: Section IV: 4 (a); 4 (b); 5 (a) (5); 5 (b); 5 (c) (1); 7 (a).

PACIFIC ICAO PROCEDURES: International Civil Aviation Organization Airway Traffic Control and Communication Procedures were placed into effect in the Eastern Pacific effective Aug. 1, 1947.

FOREIGN DATA

AFRICA-Casablanca: The following established circuits are now in operation at CNO Casablanca Aeronautical Communications Station: CSZ Lisbon, FXW Bordeau, FOO Paris, CNC Tangier, CNS Gaercife, CNA Fez; CNV Oujda, CNU Meknes, FOR Oran, FNA Algiers, CNN Taza, CNZ Fort Trinquet, CNY Tindouf, CND Agadir, CNX Marrekech, FOK Dakar. Landing teletype to FFAG Algiers and CNPL Port Lyautey. Guards Route C radiotelegraph frequencies 3248, 6563, 8538, and 12776 kcs. Additional air ground 333, 336, 6510, 4195 kcs. Radio range and beacon identification "KR", 222 and 403 kcs respectively. Tower voice VHF 116.1 mcs and 6440 kcs.

Dakar: Effective May 15, 1947, Overseas Foreign Aeronautical Communications Station WFG, Yoff Airport, Dakar FWA, were combined by FOK under call sign FOK. Following CAA circuits are being operated and supervised by French Nationals: A/G 3285, 6563 kcs. cont., 11319 kcs daylight hours, point-to-point circuits, FOK/WFH Port Lyautey, FOK/ELPA Roberts Field, FOK/ZVJ Recife, FOK/ZNT Accra. Following principal circuits operation and supervision French Nationals: Point-to-point, FOK with following stations: CNB Casablanca, X08 Natal, FOO Paris, FGS Abidjan, FNA Algiers, FSP Port Etienne, FMW Fort Au France, FHK Amsterdam, Yoff Tower, range and beacon operation and supervision French Nationals, frequencies unchanged.

Dakar Weather Broadcast: Effective 0820Z GCT, March 24, 1947, station WFG commenced broadcasting Dakar METAR hourly at 20 minutes past each hour on 3285 kcs., A1 emission.

Port Lyautey Communications: Effective June 11, 1947, circuit operations NHY Port Lyautey to FOK Dakar and CSZ Lisbon were transferred to station CNO Casablanca. Following civil circuit functions remain in operation NHY Port Lyautey: Circuit 207T Port Lyautey-Santa Maria. Circuit 224 Port Lyautey-Roberts Field, Liberia. 24 hour landline teletype operations connecting NHY Port Lyautey and CNO Casablanca facilitates E and W traffic movements via 207T. Port Lyautey maintains continuous civil air ground guards 3285, 6563 kcs., 11319 kcs. from 0700 until 2200 GCT. Additional civil air ground guards 8554, 6543, 6523 kcs. upon request.

AZORES-Fayal-Radio: Radio beacon call sign CTN. Operates on 333 kcs. days and on request. Air to ground call sign CTN for emergency use only on 6563 and 6577 kcs.

Florez-Radio: Radio beacon call sign CF operates from 00 to 05, from 20 to 25 and from 40 to 45. Reliable for homing.

Lagens-Radio: Tower operating on 116.1,126.18 mcs., and 2834, 2993 kcs. for continuous transmitting and receiving. Tower on 4220 kcs. for emergency and on 5000 kcs. on request. GP range on 341 kcs. in continuous operation with legs of 343° and 163° magnetic reliable for instrument letdowns if caution is used. DK radio range on 288 kcs. on continuous operation with legs of 343° and 163° magnetic reliable for instrument letdowns if caution is used. Z markers are operating on both ranges. Racon beacon inoperative until further notice. SCS-51 operates continuously between 1730 and 0900Z and on 30 minutes request thereafter on channel Y for runway 16 and channel X for runway 34 if no glide path operating on channel Y. Localizers not modified in accordance with T.O. 16-1-62. Long range DF on 6563 kcs. day and night transmitting and receiving and receives fixing signal on 6210 kcs, call sign is CSE9. Short range DF call sign is CSE7 on 4575 kcs. operating on request from Lagens Tower or CSY at Santa Maria. GCA operates on one hour request on all voice frequencies. Field: Crews inbound to Lagens will be cautioned of high terrain on E and W sides of rnwy 34. Due to repairs being made on 2700' on N end of rnwys 16/34, no GCA landing will be made on runway 16 until further notice.

Santa Ana-Radio: Radio beacon call sign is BB7, operates continuously on 308 kcs.

Santa Maria-Radio: Tower transmits and receives on 116.8 and 126.18 mcs., and 2834 kcs. Tower transmits on 278 kcs. and guards 6440 kcs. Radio range operates continuously on 249 kcs. Call sign WY. Radio beacon operates on 329 kcs., call sign WY. No Z marker on WY range. SCS-51 localizer on channel X on rnwy 19 operates continuously. Glide path has resumed operation. Localizer not modified in accordance with T.O.16-1-62. Santa Airways operates on 3993 kcs. continuously and 4220 kcs. in emergency. Air to ground call sign CSY operates cont. on 6563, 12776, 3248, 8538 kcs. on CW. CSY is ICAO control center for the Azores. All letdowns are to be made on the N and S legs of the WY range.

BELGIUM-Brussels: ONBU reports as from July 1, 1947, the Cueen Code ICAO document 2560 will be used by all the Belgian Stations. Effective April 1, 1947, list of Belgian Airfields abbreviations in PICAO Document COM/126 are corrected and completed as follows: ONBR Brussels Airfield instead of ONMB; ONGD Ghent; ONVA Negiedes Voies Aeriennes; ONVI Vitron.

BRITISH HONDURAS-Belize, Landing of Private Aircraft: Aircraft intending to land at Belize Airport or on the Belize waterfront should give the Director of Aviation, Belize, at least 4 hours' advance notice of their intended arrival. Flight plans may be filed for transmission to Belize between the hours of 1400Z and 2400Z through MIAMI CAA-operated overseas foreign aeronautical communication station.

BRITISH WEST INDIES-Kingston, Jamaica-Montego Bay Airport: Montego Bay Airport is a British Controlled Airport now under limited operation by Pan American Airways. It is necessary for all flights departing from Montego Bay for points in the United States to file flight plans with the Kingston ATC through the Kingston Communications Station - call letters: MRX. Flight plans also must be filed for all flights departing from the United States for Montego Bay. They may be filed for transmission to Montego Bay through the CAA-operated Overseas Foreign Aeronautical Communications Station at Miami - call letters: WBR, or New Orleans - call letters: WEK.

Kingston, Jamaica-Palisadoes Airport Facilities: The Palisadoes Airport is a British Government controlled airport. The Government controlled tower transmits on 397 kcs. only, and guards 2870, 6210, 3105 kcs. It is necessary for all ttinerant flights coming to Palisadoes to file a Flight Plan from point of departure to the Communications Station at Kingston - call letters MRX. This Flight Plan should be marked for Information: Palisadoes Airway Traffic Control. The route frequency of 6515 kcs. A3 emission is guarded at MRX. They have a good signal on this frequency and can be read consistently throughout the day and night in the Caribbean Area. Flight Plans may be filed for transmission to Palisadoes through the CAA-operated Overseas Foreign Aeronautical Communications Station, WBR,Miami

Trinidad NAS: Effective June 16, 1947, Navy Squadron commenced conducting aerial gunnery from 1300Z to 2000Z daily, except Sat. and Sun. until further notice. Surface craft and aircraft remain clear of area, 10° N, 60° 45' W, 10° 30', 60° 45', 10° N, 60° W, 10° 30', 60°.
The marine radiobeacon at Trinidad was discontinued July 10, 1947.

✓ CANADA-Montreal, Quebec: Effective September 5, 1947, operation of ICAO Group C air ground air frequencies by stations CYB Dorval will be suspended in favor of Group B. All 4 groups B frequencies 2912, 6543, 8485, and 11306 kcs. will be manned continuously by CYB.

✓ Point Petre, Ont.: Anti-aircraft firing is being conducted periodically during the months of May, June, Aug. and September, 1947, at Point Petre, Ont. (approximate position: 43° 50' 15'' N lat., and 77° 9' W long. The danger area extends from the firing point S over water only, and will not exceed 24,000 yds at any point from the firing source. Projectiles will be fired up to a height of 40,000', and during firing periods a black ball of 5' diameter will be hoisted to a height of 25'.

✓ CARRIBEAN AREA-Swan Island: On or soon after Sept. 9, 1947, the Swan Island radio range will be shut down for conversion to class H Facility. Range and broadcast inop. on 260 kcs. Z marker inoperative. (8-23)

CUBA-Havana, Rancho Boyeros Airport: Effective May 19, 1947, and until further notice, all aircraft operating into and out of the Rancho Boyeros Airport must file a flight plan prior to entering the area. This applies to both IFR and CFR flights. Form of flight plan as follows: Identification; type, route of flight, time of flight departure, time of minutes, altitude, CFR or IFR indicated by C or N respectively and alternate if necessary. Example: NC60459 DC3 Miami Havana 1230 92/60N KW. For trial period and until further advised all flight plans except Expreso and those presently using PAA communications facilities may be forwarded through WBR addressed to OAHAV at no charge.

✓ EIRE-Shannon: Shannon will not bring new B group of frequencies into operation until additional transmitters, at present being installed, are available. Will continue to guard A and C groups and transmit on Group A. Notice will be issued upon completion of transmitter installation. Tele EINN.

✓ ENGLAND-Blackbushe Airport: Blackbushe Airport has been approved as a Customs Aerodrome in concurrence of the Commissioners of Customs and Excise.

✓ Hurn Airport: Customs facilities are not now continuously available at Hurn Airport. (This corrects the Air Navigation Directions, 1946 - A.N.D. 16)

✓ London Airport: SCS51 and SBA facilities to be considered out of service as navigational or landing aids. They can be used for holding and letdown procedures only until further notice. Because of the possible presence of vehicles within the restricted area of the SCS51 and SBA sites the accuracy of these installations is questionable.

GREECE-Athens, Hassani Airport Radio Call: Effective April 30, 1947, call sign WWJC replaced Army call sign WUCW on all circuits formerly using call signs at this station.

✓ GREENLAND-Bluie West Eight Airport: No aviation fuel is available at Blue West Eight Airport until further notice. No aircraft will be cleared into Blue West Eight Airport without sufficient fuel aboard for return flight.

✓ HAWAII-GUAM ROUTE: On and after September 5, 1947, it is desired to confine all civil air traffic between Honolulu and Guam to only one route, the Midway-Wake Route. Communications, petroleum and ground services will be available on this route after the above date.

ICELAND-Keflavik: After flight check VT range legs inbound magnetic found to be as follows: W 114°, NW 169°, E 299°, SE 349°.

✓ LABRADOR-Goose Bay: Effective Sept. 5, 1947, operation of ICAO group C air ground air frequencies by station VOGB at Goose Bay will be suspended in favor of ICAO Group B. All 4 Group B frequencies 2912, 6543, 8485, 11306 kcs. will be manned continuously by VOGB. In addition, ICAO Group A frequencies, 3285, 6577, 8485, 11306 kcs. are available on request. (8-25) Effective July 15, 1947, the following changes apply to air ground services offered by station VOAV Goose Bay: Goose Bay VOAV will maintain continuous watch and transmit on freqs. 3248, 6563, 8538, 12776 kcs., but with frequencies 3285,6577, 8554 kcs. (receive and transmit) available on request.

✓ NEWFOUNDLAND-Military and Naval Landings: All military and naval aircraft landing in Newfoundland should use Harmon Field at Stephenville or Naval Operating Base at Argentia. Gander has very limited military facilities and is reserved for commercial and weather diverted military aircraft or those on official business.

✓ Gander: Gander Metar weather broadcast now in operation on 363 and 5410 kcs. simultaneously at hour plus 20 minutes and hour plus 50 mins. Reeeption reports on 5410 kcs. requested. Gander Arpt

clsd to Army acft except for emerg.,off.bus. & weather diversions. Effective immediately the dewpoint will be added as a remark at the end of the Metar for Gander, Stephenville, Sydney, and Moncton broadcast by VOAC on 5410 and 363 kcs. at hour plus 20 and hour plus 50. Example: D.P. 47. Tele VOGA.

Torbay Airport: Torbay Airport open to traffic between hrs. of 1030Z and 0230Z. No aircraft will be dispatched to arrive at Torbay between hours of 0230Z and 1030Z. No traffic will be available between landing and takeoff minimums of 1930Z and 1030Z. Landings and takeoff minimums as published in ATLD Amedment #16 "Mile visibility, take off night 500' 1 mi. visibility, landing day 800' 1 mile visibility, landing night 800' 3 mile visibility".

✓ PUERTO RICO-Aguadilla, Borinquen Field: Effective immediately Army Borinquen Field, requests flight plans and other communications on traffic departing from the Washington and New York Control Areas destined WZC/Borinquen be transmitted to WSY/New York for relay to WRW/San Juan.

Arecibo-Santana Airport: Airport operated by Aviation Division, Puerto Rico Transportation Authority. Restricted to daylight CFR operations only. Caution advised for occasional cattle on runway.

Mayaguez-El Mani Airport: Airport operated by Aviation Division, Puerto Rico Transportation Authority. Restricted to CFR daylight operations. Taxiway W of Terminal Bldg closed. Caution advised for taxiing aircraft and persons on runway.

Ponce-Losey Field: Airport operated by Aviation Division, Puerto Rico Transportation Authority. Repairs to E/W runway completed. NW/SE closed except in emergency. Airport restricted to daylight CFR operations only.

San Juan: The San Juan Civil Air Terminal located on the former U.S. NAS at the Isla Grande Airport, San Juan, P.R. All civil operations are handled by the Aviation Division, Puerto Rico Transportation Authority. Flight Plans are required for over water flights to the airport. Cable address "Autoritan".

San Juan: Effective Aug. 17, 1947, radio station Naui NAF discontinued the handling of all communications for civil aircraft both air to ground and point to point except field control tower which will continue operations as heretofore. The CAA began operation of a civil Overseas Foreign Aeronautical Communications Station on the 2nd Floor of Hangar 20 located on the S side of Isla Grande Airport, San Juan. OFACS Air ground freqs. guarded receiving 2870,3105,3117.5,4495,6210,6515 kcs. voice, 3285,6515,6523,8546,11319 kcs. CW. Transmitting 254,2870,6515 kcs. voice, 3285, 6515, 6523, 8546, 11319 kcs. CW. Call signs "San Juan Radio" voice, and WRW CW. WRW will handle all authorized communications in the operation of civil aircraft both air to ground and point to point.

✓ San Juan NAF-Radio: Effective Aug. 17, 1947, San Juan NAF discontinued guard of 6515 kcs.

URUGUAY-Carrasco, National Airport: Effective June 15, 1947, Air Traffic Control Tower at National Airport, Carrasco discontinued its frequency of 2870 kcs., and new frequency of 278 kcs. was commissioned. (6-3)

ALABAMA

ALEXANDER CITY-RUSSELL FLD: Washes on S edge near W and E/W strip, mrkd. (5-22)
ANDALUSIA-ANDALUSIA ARPT-Bare in spots. Ctn in wet weather. (5-22)
ANNISTON-ANNISTON ARPT-Ends of strips soft in wet weather. (4-29)
ATHENS-ATHENS ARPT-Ctn in wet weather. (5-22)
ATMORE-ATMORE FLYING SERVICE-1800' strip muddy when wet. (7-18)
BIRMINGHAM-BIRMINGHAM ARPT: Closed to civil acft not equipped with operating rcvr. Landing on sod areas approved by twr in dry weather, unsafe in wet weather. Ctn ngts or under IFR, plant S of fld has long taxi and parking strips resembling rnwys. (8-5)
BIRMINGHAM-CENTRAL PARK ARPT: Avail. lgt acft in all weather.(5-22)

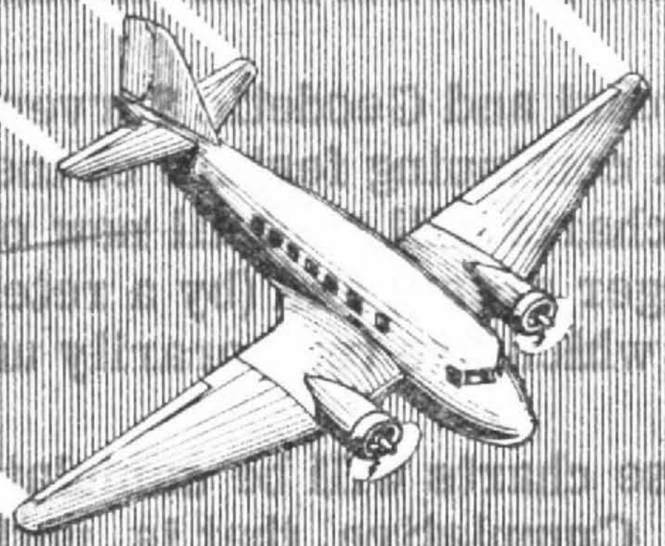
AIRMAN'S GUIDE



NOTICES TO AIRMEN

VOL. 2, NO. 13 . . . SEPTEMBER 16, 1947

This issue includes all data on record as of 0001 E.S.T. on the date above. For later information consult teletype NOTAMS.

U. S. DEPARTMENT OF COMMERCE
CIVIL AERONAUTICS ADMINISTRATION
OFFICE OF AVIATION INFORMATION

SPECIAL NOTICE

NOTAM CHARTS

When the discontinuance of the AIRMAN'S GUIDE Flight Planning Charts and facing Data Pages was announced, personal flying interests demanded compromise charts that would serve as notams to correct the less frequently issued sectionals.

Resultantly, the Coast and Geodetic Survey developed the series of notam charts which will be a continuing feature of the Guide.

These six notam charts will spot all new or discontinued airports, radio navigational aids, danger areas, and (by a retention of the Ⓡ symbol) all such airports or aids which are temporarily unusable or usable only with extreme caution.

Furthermore, these charts will be cumulative in nature as far as danger areas are concerned. Cumulative, that is, until a sectional chart is revised semi-annually.

Other features, such as new airports or radio aids, will be retained on the notam charts only as long as they are cited in the Notices to Airmen. Such citations are normally carried in only one issue of the Guide. Continuing very hazardous conditions, however, (such as field closed because of construction or radio range inoperative) will be charted as long as they are effective.

LEGEND

● **New airport.**

✕ **New radio navigational aid.**

Ⓡ **Discontinued airport or radio aid, or one usable only with extreme caution.**

AIR NAVIGATION RADIO AIDS

RADIO CLASS DESIGNATIONS

AC..... Approach Control Tower, CAA
B..... Scheduled Broadcast Station (broadcasts weather reports at 15 and 45 minutes after the hour unless otherwise cited).
C..... Control Tower, CAA
CA..... Control Tower, Army
CI..... Control Tower (City, County, Private, etc.)
CN..... Control Tower, Navy
D..... Distantly controlled
FM..... VHF fan type marker (100 watts)
FMHW..... Non-directional radio beacon when combined with fan marker.
GCA..... Ground Controlled Approach Unit
H..... Non-directional radio beacon (homing), power 50 watts or more
ILS..... Instrument Landing System(voice on localizer channel)
IM..... VHF boundary marker
K..... Independent Compass Locator Station
LFM..... VHF fan type marker, low powered (5 watts-not over 10 miles from range)
LOR..... Low frequency omni directional range
MH..... Non-directional radio-beacon (homing), power less than 50 watts
ML..... Range (loop radiators), power less than 50 watts
MM..... VHF middle marker
MMK..... Compass locator station when combined with middle marker of Instrument Landing System
MRA..... Range (Adcock,vertical radiators), power more than 50 less than 150 watts.
MRL..... Range (loop radiators), power more than 50-less than 150 watts
OM..... VHF outer marker
OMK..... Compass locator when installed at outer marker site or within 5.5 miles of middle marker
P..... Point to point radio
RA..... Range (Adcock,vertical radiators), power 150 watts or more
RL..... Range (loop radiators), power 150 watts or more
S..... Simultaneous (range signals and voice) type of transmitter
T..... Teletype
TX..... Principal teletype
V..... Additional voice feature on VHF
VAR..... Visual-aural VHF range (every VAR has simultaneous voice feature)
VOR..... VHF omni-directional range
W..... Without voice facilities
Z..... VHF station location marker at a range station

AIRWAY RADIO COMMUNICATIONS

GENERAL

All radio range stations (class RA, RL, MRA, MRL, ML) emit directional signals (type A2 emission) 1020 cycles per second modulation.

All radio beacon stations (class H and MH) emit non-directional signals (type A2 emission) 1020 cycles per second modulation. Unless otherwise noted, all stations, other than class MH, operate continuously within their assigned hours of service except during interruptions for voice transmission on the same frequencies where simultaneous transmission is not available and during shutdowns for maintenance purposes. Unless otherwise cited, the voice features of Class MH facilities are available continuously, and the homing features are operated on request. The effective range of an MH facility is ordinarily 25 miles.

Compass locators are low-powered non-directional facilities operating in the 200-415 kc. band They are installed near airports to make it easier for pilots to make instrument approaches. When holding is required, they also help the pilot follow a more precise holding pattern. Compass locators, however, should not be depended upon as long range navigational aids since they are rarely useful at distances of over 15 or 20 miles. These are now shown as "MHW" facilities.

Voice communications facilities are available unless "W" (without voice) is included in the classification. Examples: SMRAW, MRLW, HW, HWT. Transmission of voice on a frequency other than the range frequency is indicated as MRLW-V. When no "W" is included in station class, the "V" indicates voice feature on two frequencies, namely, range frequency, and generally, VHF of 116 1 and/or 111.1 mcs. 116.1 mcs. is used for transmission to Army aircraft, 111.1 mcs. to civil aircraft.

The classification designation "B" denotes that the station broadcasts meteorological and notice to airmen information on a scheduled basis at 15 & 45 minutes past each hour unless otherwise cited.

All Civil Aeronautics Administration stations equipped for voice communications with aircraft stand continuous listening watches on the frequencies of 3105, 4495, and 6210 kcs., unless otherwise cited.

AIRPORT DATA

LEGEND

CLASS

SIZE

40: Length of longest landing strip (unpaved) in hundreds of feet
40h. Length of longest hard-surfaced runway in hundreds of feet (Seaplane landing areas over 5 miles in length are classified as unlimited.)

RADIO

R1: Voice availability via tower, range (or homing device), or voice station
R2: Range (or homing device) and tower
R3 Range (or homing device), tower, and instrument landing system

LIGHTS

L. Incomplete lighting, either flood or portable runway lights
L1: Beacon only
L2 Beacon and boundary
L3: Beacon, boundary, and obstruction
L4. Beacon, boundary, obstruction, and flood
L5. Beacon, boundary, obstruction, flood, and runway contact
(L5) Identical to L5 except that runway contact lights are high intensity
L6. Beacon, boundary, obstruction, flood, runway contact, and instrument approach
(L6): Identical to L6 except that instrument approach lights are high intensity.

(The class always indicates the highest element available, but does not necessarily include all intermediate elements)

SERVICING

S1: Fuel
S2: Fuel, storage
S3: Fuel, storage, minor aircraft repairs
S4. Fuel, storage, minor aircraft, and minor engine repairs
S5: Fuel, storage, major aircraft, and minor engine repairs
S6: Fuel, storage, major aircraft, and major engine repairs

N.B. Very often small civilian fields (particularly in non metropolitan areas) will have no full-time attendant. Frequently, servicing at such fields in isolated communities is available only by circling the town to attract the operator's attention.

NOTES

1. "Effingham Int., 10, LS-ID" indicates that the airport is Effingham CAA Intermediate Field, Site 10, on the St. Louis-Indianapolis Airway. Municipal airports where the lights are maintained by the CAA are listed similarly except that there is no "Int."

2. "CLOSED" indicates closed to all civil aircraft and all transient military aircraft except on official business this station or in emergency.

3.(a) "TEMP INACTIVE. NO FACS." indicates AAF airfields used either exclusively by the AAF or municipal airfields used jointly by the AAF and civil interests at which both the Army and the civil interests are inactive. Such airfields will be available to military aircraft at the discretion of the Commanding Officer of the organization to which the aircraft is assigned.

(b) "ARMY TEMP INACTIVE. CIVIL FACS." indicates municipal airfields used jointly by the AAF and civil interests at which the Army facilities are inactive but civil facilities are available. Such fields may be used by military aircraft, however, only commercial service is available.

"Fld lgts on prior req." indicates field lights are available only by previous phone call, telegram, or letter. It must be remembered that most fields do not have 24-hour operation. When an airport classification indicates a lighted field, without the above modification, the field lights burn all night or will be turned on when a radio request is made or a plane circles the fld.

GCA AVAILABLE: How and Where

GROUND CONTROLLED APPROACH (GCA) AVAILABLE TO CIVIL PILOTS AS WELL AS ARMY AND NAVY: All GCA facilities (Army, Navy, or CAA) are available to any plane in emergency. To secure GCA assistance pilots should call the associated control tower for instructions.

In addition to the working frequencies listed below, Army and Navy GCA emergency VHF transmissions are made on 140.58 mcs. Simplex service on 3117.5 kcs will be provided at all Army and Navy installations to provide an alternate means of communications for scheduled air carrier aircraft. Army and Navy towers will relay GCA instructions on 200-400 kcs band to civil aircraft not equipped to receive VHF or HF.

A minimum of 30 minutes will generally be required to assemble a GCA crew and prepare the equipment for operation AFTER an alert has been received at those locations not providing continuous service.

ARMY SPECIAL NOTICES

ARMY DATA: Advice covering Army fields or Army operations on civil fields, or Army radio facilities, and also Air National Guard fields and facilities should be forwarded to Commanding General, Air Transport Command, ATTN.: Flight Operations Division, A-3. Requests for approval of the closing of Army airfields or restrictions in airfield facilities to transient military aircraft for over 10 days should be forwarded to the same address for submittal to Headquarters Army Air Forces, as required. Restrictions in Air National Guard Fields or facilities will be forwarded to the National Guard Bureau through the State Adjutant General for approval. That Bureau will forward approved restrictions to the above address for publishing. Information to be published will be coordinated and submitted to the Civil Aeronautics Administration.

ARMY OFFICIAL BUSINESS: Within the meaning of AAF Regulation 85-2 is interpreted as the necessity for personnel aboard an aircraft to contact personnel, units, or organizations at or near the airfield selected for landing for the purpose of conducting transactions in the service of, and in the interest of, the United States Government. This does not include the use of an airfield by transient aircraft for the purpose of obtaining clearance, service, or other items attendant with itinerant operations. Cross country flights for the purpose of maintaining flying proficiency are not considered to be official business within the meaning of this regulation.

ARMY FOREIGN CLEARING STATIONS: Under the authority of AAF Regulation 61-4, Army aircraft with destinations listed below or returning therefrom to the United States will clear through the stations indicated: AFRICA AND AZORES - Brookley Field, Ala., MacDill Field, Fla., Washington National Airport, D.C., or Westover Field, Mass. ALASKA - McChord Field, Wash., or Great Falls AAF, Mont. BERMUDA - Mitchel Field, N.Y., Brookley Field, Ala., MacDill Field, Fla., Washington National Airport, D.C., or Westover Field, Mass. CANADA - Great Falls AAF, Mont., Brookley Field, Ala., McChord Field, Wash., Washington National Airport., D.C., Selfridge Field, Mich., or Westover Field, Mass. CANAL ZONE, CENTRAL AMERICA, MEXICO, AND SOUTH AMERICA - March Field, Calif., MacDill Field, Fla., Kelly Field, Tex., or Brookley Field, Ala. CARIBBEAN - Brookley Field, Ala., Kelly Field, Tex., or MacDill Field, Fla. ENGLAND, GREENLAND, ICELAND, AND NORTH IRELAND - Washington National Airport, D.C., or Westover Field, Mass. NOVA SCOTIA AND NEWFOUNDLAND - Washington National Airport, D.C., Westover Field, Mass., Selfridge Field, Mich., or Brookley Field, Ala. HAWAII - Fairfield-Suisun AAF, Calif. EUROPEAN THEATER - Brookley Field, Ala., MacDill Field, Fla., Washington National Airport, D.C., or Westover Field, Mass.

✓ Indicates new or revised Special Notices

✓ CLEARANCE OF AAF AIRCRAFT IN NEW YORK CITY AREA: In accordance with notification from Headquarters, Army Air Forces, July 2nd AAF Letter 63-9 has been rescinded and the following instructions will govern the clearance of AAF aircraft in the New York City Area: For clearance purposes into or from the New York City Area (encompassed by a 25 mile radius from the southern tip of Manhattan) CFR is defined as ceiling at least 2000' and the visibility 3 miles or more; IFR when the visibility is not less than one mile and the ceiling is unlimited, or when the ceiling is not less than 5000' and the visibility not less than 2 miles. AAF aircraft flying into the New York City Area may be cleared to any authorized field therein provided weather conditions are not less than those defined above. In all cases in-flight approval from Olmsted Flight Service Center by contacting Olmsted Airways, Rome Airways, Westover Airways, Mitchel Airways, or Ft. Dix Airways must be obtained prior to proceeding to the field of destination. All pilots whose destination is an airfield within the area will indicate on the AAF Form 23 that their flight plan to the field of destination is via any of the 5 stations listed. Flights for which the point of first intended landing is Mitchel Field may be made using normal clearance procedure and restrictions outlined herein are not applicable to that station. Appropriate clearance may be made from a field at which weather conditions meet above specifications even though weather in other sections is below specified minimums. AAF aircraft engaged in regularly scheduled transport flights under the operational control of the Air Transport Command are exempt from these restrictions.

SELECTION OF WEATHER ALTERNATES BY ARMY PILOTS: In accordance with policy stated by the CG, AAF, April 7, 1947, Army pilots are not to be refused IFR clearances because of selection of other than "A,N,NG, or P" fields as an alternate. The selection of an alternate airport is a planned procedure to be resorted to in case of emergency and any suitable airport, military, or civilian, will be accepted for clearance purposes. Concerning this policy, it is pointed out that pilots who do utilize other than "A, N, NG, or P" fields under such circumstances may be called upon to justify their use of same.

V.H.F. CHANNEL ASSIGNMENTS: The following are Army assignments:

Channel	Frequencies	Channel	Frequencies
A	116.1	H	134.10
B	126.18	U	108.3
C	137.88	V	108.7
D	140.58	W	109.1
G	137.70		

REVISION TO ARMY FLIGHT CLEARANCE PROCEDURE: Effective August 15, 1947, within the continental limits of the U.S., flight clearance

✓

procedure is revised as follows: (Conflicting portions of AAF Regulation 15-23 and 60-16 are being rescinded): All written weather data will be eliminated from Form 23. Forecaster will indicate on Form 23 whether the flight should be conducted under IFR or CFR conditions. A verbal briefing consisting of at least the following factors will be given: (1) Existing synoptic situation and terminal forecast for destination, and if required, for alternate (2) Existing route weather. (3) Location of pertinent hazardous weather areas and recommended procedures for avoiding them. The pilot will certify on Form 23 as follows: "I have been adequately briefed on the current and forecast weather affecting my flight and I understand the weather situation". A written or cross section forecast will be furnished only upon request submitted two hours in advance. At non-AAF bases and AAF bases where no forecaster is on duty, the appropriate Flight Service Center forecaster will brief the pilot verbally over the interphone system or telephone. The Flight Service dispatches will monitor receipt of pilots acknowledgments of adequate weather briefing.

✓ CORRECTIONS FOR ANDADDITIONSTO ARMY T.O.-08-15-1:

(1) Correct page 108, Navy GCA facility at El Toro MCAS, Calif., by adding 290 kcs. (Emergency Communications)

(2) Correct page 45, AAF Air Rescue Service, 5th Rescue Squadron, MacDill Field, Fla., by changing telephone number to Tampa H-8811, Ext. 628.

(3) Correct page 106, Mitchel Field, N.Y., by showing GCA facility in operation: Cont. during IFR; 0830-2300 EST daily for CFR practice; or on 40 min. request other hours.

(4) Correct page 107, (a) by showing operation of Maxwell Field, Ala. GCA as 0700-1600 daily except Sat., Sun., and holidays and within 40 mins notice in extreme emergency. (b) by showing hours of operation of Smoky Hill, Kans. GCA as 0700-1200; 1300-1600 daily and 0700-1200 Sat. (c) by adding under McChord Field, Wash., Emergency Communications: 190 to 400 kcs. (d) by adding a Navy GCA facility operating at Los Alamitos, Calif. on standard Navy GCA freqs. (e) by showing GCA facility at Olathe NAS, Kans. now operating on 201 kcs. (Emergency Communications) in addition to freqs. previously listed. (f) by showing Navy GCA hours of operation of facilities as follows: (1) Jacksonville NAS, Fla. 0800-1130; on 15 min. notice for all expected arrivals during IFR; and on 30 mins. notice for unexpected arrivals; (2) Miramar MCAS, Calif., 30 mins notice; scheduled training periods 0900-1100 Mon. thru Fri. and 1330-1530 Mon., Tues., Thurs., Fri.; (3) Patuxent River NAS, Md., cont. during IFR; 0800-1630 Mon. thru Fri. except Thurs.; (4) Saufley Field NAAS, Fla. 2200-0600; training 1600-1800; on 30 minutes notice IFR.

(5) Correct page 103,(a)by deleting X-band radar beacon at Clovis, N.M., as operation has been suspended. (b) by changing Jacksonville NAS, Fla., X-Band radar beacon identification to 1-1-1. (c) by changing Key West, Fla., X-Band radar beacon identification to 2-1-2. (d) by changing New York City, N.Y., X-Band radar beacon identification to 1-2-1. (e) by changing Moffett Field, Calif., X-Band radar beacon identification to 2-1.

(6) Correct page 94, by still showing U.S. Coast Guard H.F. D/F Facilities as inactive.

(7) Correct Danger Area over Aerial Gunnery Range in vicinity of Pensacola, Fla. See Danger Area item under Pensacola, Fla. for revision.

✓ CORRECTIONS FOR ARMY T.O.-08-15-3: Correct Instrument Approach Procedure for Brookley Field, Mobile, Ala., as follows: Initial approach: NE-1400' (Int. NW leg Joplin, Mo.); SE-1300' (Int. SW leg Joplin, Mo.); SW-1400' (Biloxi, Miss. Range); NW-1400' (Int. NE leg Biloxi, Miss.) Final approach course: NW; Procedure turn minimums: 10 mi.-1400' W side NW leg; 15 mi.-1400' W side NW leg; 20 mi.-1500' W side NW leg; 25 mi.-1500' W side NW leg. Min. alt. over range - final approach: 900'. Min. letdown alt. over arpt: 526'. If contact not estab. over airport: Climb to 1300' on SE leg.

NAVY SPECIAL NOTICES

NAVY DATA: In accordance with Hydrographic Office Memorandum for Aviators No. 9, July 29, 1946, Hydrographic Office information concerning naval and marine corps air stations and facilities, including changes in field facilities, operation rules, air/ground communications facilities, instrument approach procedures and navigational aids, should be directed to: The Division of Air Navigation, Hydrographic Office, Washington 25, D.C., for transmittal to the Civil Aeronautics Administration. In accordance with Aviation Circular Letter No. 96-46 of June 13, 1946, approval for the closing of any naval or marine corps air station or facility to transient military aircraft for a period in excess of 10 days must be obtained from the Chief of Naval Operations. Also, approval is to be obtained from the Chief of Naval Operations before relocation or modification of any aid to air navigation, such as reorientation of radio ranges.

V.H.F. CHANNEL ASSIGNMENTS: The following are Navy assignments:

Channel	Navy Frequency	Channel	Navy Frequency
1	116.1	6	134.64
2	142.56	7	143.64
3	126.18	8	142.02
4	128.70	9	142.74
5	143.28	GUARD	140.58

CIVIL SPECIAL NOTICES

CIVIL USAGE OF MILITARY FIELDS: Army and Navy fields are open to civil fliers only in emergency or with prior permission of the commanding officers thereof.

REISSUANCE OF EXPIRED PILOTS CERTIFICATES: 20,550 Reissuance. Any person who on June 30, 1947, held a valid private or commercial certificate and who failed to exchange such certificate in accordance with Section 20.55 of the Civil Air Regulations, may, notwithstanding such failure and without other showing, obtain a pilot certificate with appropriate ratings upon application to the Administrator.

PERSONAL POSSESSION OF PILOT CERTIFICATE: No person shall pilot a civil aircraft within the U.S. unless he holds a valid pilot certificate with appropriate ratings issued by the Administrator or an appropriate and valid foreign pilot certificate. Such certificate shall be in the personal possession of the pilot at all times while piloting aircraft and shall be presented for examination to any inspector of the Administration or State or local law enforcement officer upon the request of such inspector or enforcement officer.

NOTICE TO ALL FLYING PERSONNEL: Because of the increase in aircraft operations, both civil and military, in recent months the number of complaints regarding airplane noise nuisance has reached such proportions that the advancement of aviation and development of new airports are in danger of being severely retarded. To reduce the number of such complaints, it is requested that the following practices be put into effect by all fliers:

(1) Discontinue all unnecessary low flying.

(2) When weather and traffic volume permit, increase altitudes of all traffic patterns that require flight over inhabited areas.

(3) Re-route channels of approach and departure to avoid residential and business districts whenever possible.

(4) If the airport is located near inhabited areas, reduce power and increase pitch of propellers as quickly as possible during take-off so as to keep engine and propeller noises at a minimum.

(5) Keep rpm's set at a minimum required operational setting when low flying over populated areas is necessary.

SEAPLANE BASE DIRECTORY: A new Seaplane Base Directory, dated June 15, 1947, has been mailed to all seaplane base operators and seaplane owners on record. It is obvious from correspondence received that not all operators and owners received their copies. This is notice, therefore, that any qualified non-recipient may have a copy upon request to: Office of Aviation Information, Attention: A-258, C.A.A., Department of Commerce, Washington 25, D. C.

RADIO TELEPHONE-OPERATION AUTHORIZATION: This is the simple way in which an authorization to operate a radio telephone transmitter in an aircraft is obtained: the applicant appears in any of the Federal Communications Commission Field Offices, or before any CAA flight examiner of the CAA, who has been designated by the FCC to issue the permits, proves he is a U.S. citizen, that he has need of such an authorization, and that he understands the few simple rules and regulations. He is given a card granting the authorization then and there. FCC offices are listed under U.S. Government in phone books, and there are some 30 of them throughout the country. Mostly, they are in downtown offices. There are more than 1,000 CAA designated flight examiners. Mostly they are located at airports. The "examination", if it may be so described, consists of a few questions establishing the ability of the applicant to transmit and understand spoken messages in English, and to understand the simple rules governing the use of such equipment. He is also given simple, printed instructions for its use.

WAIVER OF VHF REQUIREMENT FOR AIRDROME CONTROL STATIONS: The F.C.C. on August 29, 1947, waived the requirement that all airdrome control stations operated under its authority provide a very high frequency service effective September 1, 1947. The waiver was granted because manufacturing difficulties and delays in obtaining materials, caused by factors beyond the control of the Commission and those participating in the oral argument, have materially hindered the procurement program for the equipment necessary to implement this plan. The equipment aspects of this matter must be considered further before a date for complete implementation can be set.

CONTROL TOWER TUNING PRECAUTION: On some aircraft receivers, the channel of 278 kcs. is identified as "tower" on the tuning control nameplates. This is not always correct as many towers transmit on freqs. other than 278 kcs. Reports indicate that some confusion is being created by the failure of pilots to tune their receiver to the tower transmitting freq. when such freq. is other than 278 kcs. It is suggested that pilots use care and make certain that they are tuned to the transmitting freq. of the tower with which they desire to communicate.

V.H.F. IFR FLIGHTS: Until further notice, Air Traffic Control will be exercised on the assumption that aircraft are utilizing intermediate freq. radio ranges. If a pilot desires to conduct IFR flight using VHF ranges over all or a portion of the route, his flight plan should so indicate. Further, flights should not be conducted on civil airways in IFR weather using VHF ranges unless the A.T.C. clearances so authorize.

PRIVATE FLIER V.H.F. FREQUENCIES: All C.A.A. Communications Stations and Towers are discontinuing receiving watches on 131.7 and

131.9 mcs as new equipment becomes available to guard the new private flier frequencies of 122.1 mcs for transmission to CAA Communications Stn. and 122.5 mcs. for transmission to CAA operated towers. Practically all CAA towers now guard 122.5 mcs. but the communications stations program is not fully effective yet because of non-receipt of the new receivers. CAA Communications Stations normally reply to itinerant aircraft on the voice feature of the range, low frequency or VHF, whichever is applicable. Replies are made on 111.1 mcs, if VHF reply has been requested on other than range frequency. CAA airport control towers will reply to itinerant aircraft on one of the frequencies 118.3, 118.5, 118.7, or 118.9 mcs., in addition to towers' low frequencies.

U.S. WEATHER BROADCASTS AND TRANSMISSIONS: The time of observation for all weather reports is 30 minutes after the hour, unless otherwise announced. Pilots enroute are requested to avoid, if possible, calling airway communications stations at or about 15 and 45 minutes past the hour (which are the scheduled broadcast times) to request weather information, as such calls may delay starting of scheduled broadcasts and cause inconvenience to other persons who are dependent on the broadcasts for weather reports.

RADIO TELEPHONE COMMUNICATIONS: The word ROGER in radiotelephone communications means "I have received all of your last transmission", and its use in any other sense by CAA stations and towers is not authorized. In order to avoid confusion it is suggested that pilots engaging in air-ground contacts also limit the use of ROGER to acknowledgment of transmissions.

✓ VFR(Formerly CFR)FLGT PLANS & ARRIVAL REPORTS: VFR flgt plans may be filed with any CAA airways communication station or airway traffic control center. One hour after E.T.A., if no notice of arrival is received, queries are sent out over CAA communication systems. If the arrival report is not received within three hours, search and rescue operations are initiated. Inasmuch as the Government may be put to considerable expense in determining the location of aircraft when an arrival report is not filed, it is vitally necessary that all pilots using this service make certain that notice of arrival is filed with the C.A.A. communications station at the termination of the flight.

To reduce radio congestion, pilots should file VFR flight plans, when required, in person or by telephoning the airways communication station or airway traffic control center. CAA control towers have discontinued accepting VFR flight plans for transmission & will not normally transmit arrival reports except upon the specific request of the pilot. Whenever practicable, however, it is desired that arrival reports be filed in the same manner as flight plans.

✓ CLEARANCE PROCEDURES FOR IFR FLIGHT: Effective Oct.8,1947, and concurrent with effective date of C.A.R. 60 as revised, new clearance procedures for IFR flights will be isued in the control of Air Traffic.

1. No Air Traffic Control clearance will be issued for flights operated in accordance with visual flight rules except for flights within a control zone as prescribed in C.A.R. 60.2

2. Flight plans specifying flight in accordance with VFR for a portion of a flight will be accepted at the point of departure. If VFR flight is proposed for the first portion of the flight, the pilot will be advised to request IFR clearance from the appropriate communications station along the route of flight. The pilot must remain in VFR weather conditions until the clearance is received.

3. When a flight plan indicates IFR flight for the first portion of flight and VFR for the latter portion, the aircraft will be cleared to the point at which VFR flight is planned, inasmuch as no clearance is necessary for VFR flight. The pilot is expected to continue his flight without further contact with Air Traffic Control.

4. Standard separation from other IFR traffic will be provided aircraft on IFR flight plans except, (1) when "at least 500' on top" has been assigned or authorized by ATC in lieu of a cruising altitude, (2) when VFR operation is specified by ATC during climb to cruising altitude, descent from cruising altitude, or change of altitude enroute. If the flight cannot be conducted under VFR conditions when such clearance is received, it is the pilot's responsibility to secure an amended clearance before proceeding IFR.

5. Pilots may cancel IFR flight plans at any time by so notifying ATC provided they are operating in VFR weather conditions when they take such action. Where conditions indicate that the remainder of a flight can be conducted in accordance with VFR, a pilot should avail himself of this procedure to lift the restrictions on his own flight and to simplify the general traffic situation. Caution should be exercized, however, that flight plans not be cancelled when IFR conditions are expected in some subsequent portion of a flight. When a flight plan is cancelled and a new instrument clearance is later requested, priority of handling will be based upon the time of filing the new flight plan.

6. When a flight plan is filed indicating altitude change beyond the control area of the center controlling the point of departure, the flight will be cleared to destination with instructions to maintain the altitude at which the aircraft enters the next control area. The pilot should request further altitude changes enroute. Better service can be given the pilot if an altitude change is requested at the time the change is desired.

This procedure cancels and supersedes the Altitude/CFR procedure now contained in the Flight Information Manual.

✓ AIRPORT LIGHT SIGNALS: Effective October 8, 1947, the following special light signals are prescribed by the Administrator for use at airports in accordance with C.A.R. 60.108 (e): (1) A white rotating airport beacon lighted during daylight hours, or flashing lights on a tetrahedron during the hours of darkness, shall mean the official ground visibility at the airport is less than three miles, and that if the airport is within an airport control zone,

a traffic clearance is required for landing, takeoff or flight in the traffic pattern. (2) A flashing amber light at an airport shall mean clockwise flow. of traffic is in effect and that right turns shall be made unless otherwise authorized by Air Traffic Control. These special light signals are in addition to those prescribed in the Flight Information Manual for use with a directed portable traffic signal light, and will be included in the next edition.

✓ REDESIGNATION OF CIVIL AIRWAYS: Effective September 15,1947, Part 600 of the Regulations of the Administrator were amended to read in whole or in part as follows:

(1) 600.4 (a) (4) Green Civil Airway #4 (Los Angeles, Calif., to Philadelphia, Pa.). . .Amarillo, Tex., range station; the intersection of the E course of Amarillo, Tex., and the SW course of Gage, Okla.; Gage, Okla. rng station.

(2) 600.4 (a) (6) Green Civil Airway #6 (Laredo, Tex., to Norfolk, Va.) From Laredo, Tex. range stn., via Alice, Tex. rng stn.; Corpus Christi, Tex. rng stn; Palacios, Tex. rng stn. . .

(3) 600.4(b) (1) Amber Civil Airway #1 (United States-Mexican Border to Nome, Alaska). . . Skwentna, Alaska rng stn.; the intersection of the NW course of Skwentna, Alaska and the SE course of Farewell, Alaska; Farewell, Alaska rng stn. . .

(4) 600.4(b) (6) Amber Civil Airway #6 (Jacksonville, Fla., to U.S.-Canadian Border). . . Louisville, Ky., rng stn.; the intersection of the SW course of Cincinnati, Ohio and the SW course of Dayton, Ohio, to Dayton, Ohio rng stn. . .

(5) 600.4(b) (8) Amber civil Airway #8 (Los Angeles, Calif., to The Dalles, Ore.). From Los Angeles, Calif. VHF rng stn, via the intxn of the W course of Los Angeles, Calif. VHF rng stn and the SE course of Santa Barbara, Calif. VHF rdo rng;; Santa Barbara, Calif. VHF rng stn.; the intxn of the NW course of Santa Barbara, Calif. VHF rdo rng and the SE course of Paso Robles, Calif. VHF rdo rng; Paso Robles, Calif., VHF rng stn.; the intxn of the NW course of Paso Robles, Calif., VHF rdo rng and the SE course of Salinas, Calif. VHF rdo rng; Salinas, Calif. VHF rng stn.; the intxn of the NW course of Salinas, Calif., VHF rdo rng and the SW course of Fairfield-Suisun, Calif. rdo rng; Fairfield-Suisun, Calif., rng stn., to the intxn of the NE course of Fairfield-Suisun, Calif., and the NW course of Sacramento, Calif. From Red Bluff, Calif. rng stn, via Whitmore, Calif. rng stn; the intxn of the NE course of Whitmore, Calif. and the S course of Klamath Falls, Ore.; Klamath Falls, Ore. rng stn; the intxn of the N course of Klamath Falls, Ore., and the SW course of Redmond, Ore., and Redmond, Ore. rng stn, to The Dalles, Ore. rng stn.

(6) 600.4(c) (11) Red Civil Airway #11 (Tulsa, Okla., to Boston, Mass.). . .Boston, Mass, rng stn to the intxn of the E course of Boston, Mass, and the NE course of Squantum, Mass. (Navy).

(7) 600.4(c) (21) Red Civil Airway #21 (Lansing, Mich., to Boston, Mass.). . .From the intxn of the E course of New York, N.Y. (LaGuardia) and the SW course of Bridgeport, Conn., via Bridgeport, Conn. rng stn, to the intxn of the NE course of Bridgeport, Conn., and the SE course of Hartford, Conn. From Providence, R.I. rng stn, via Squantum, Mass. (Navy) rng stn, excluding that portion which lies more than 4 mi. E of the SW course of Squantum, Mass. (Navy) between Providence, R.I. rng stn and a point 5 mi. NE to the intxn of the NE course of Squantum, Mass. (Navy) and the E course of Boston, Mass.

(8) 600.4(c) (23) Red Civil Airway #23 (U.S.-Canadian Border to N.Y., N.Y.) From the intxn of the SE course of Ft. William, Ont., Can., and the U.S.-Canadian Border via Houghton, Mich. rng stn; Grand Marais, Mich. rng stn; Sault Ste. Marie, Mich. rng stn. to the intxn of the SE course of Sault Ste. Marie, Mich. and the U.S.-Canadian Border. . .

(9) 600.4(c) (38) Red Civil Airway #38 (Big Spring, Tex., to San Antonio, Tex.). . . From the intxn of the NW course of San Antonio, Tex. (Kelly) and the W course of San Antonio, Tex. (Alamo) to San Antonio, Tex. (Alamo) rng stn.

(10) 600.4(c) (46) Red Civil Airway #46 (Aberdeen, S.D., to Watertown, S.D.) From Aberdeen, S.D., rng stn to Watertown, S.D. rng stn.

(11) 600.4(c) (56) Red Civil Airway #56 (Red Bluff, Calif., to Whitmore, Calif.). From the intxn of the NW course of Red Bluff, Calif. and the NW course of Whitmore, Calif., to Whitmore, Calif. rng stn.

(12) 600.4(c) (62) Red Civil Airway #62 (Toledo, Ohio to Akron, Ohio). From the intxn of the SE course of Romulus, Mich., and the W course of Cleveland, Ohio via Wellington, Ohio VHF rng stn to Akron, Ohio rng stn.

(13) 600.4(d) (7) Blue Civil Airway #7 (Paso Robles, Calif., to Hamilton Field, Calif.). From Paso Robles, Calif., VHF rng stn via the intxn of the NW course of Paso Robles, Calif. VHF and the SE course of Oakland, Calif. to the intxn of the SE course of Oakland, Calif., and the NW course of Fresno, Calif. . .

(14)600.4(d)(10)Blue Civil Airway #10 (Fresno, Calif., to Williams, Calif.) From Fresno, Calif. rng stn, via Sacramento, Calif. rng stn to Williams, Calif. rng stn.

(15) 600.4(d) (14) Blue Civil Airway #14 (El Centro, Calif., to Williams, Calif.). . . Palmdale, Calif. rng stn. to the intxn of the NW course of Palmdale, Calif. and the S course of Bakersfield, Calif. From the intxn of the SE course of Sacramento, Calif. and the SE course of Stockton, Calif., via Stockton, Calif. rng stn to the intxn of the NW course of Stockton, Calif., and the S course of Williams, Calif.

(16) 600.4(d) (24) Blue Civil Airway #24 (El Centro, Calif., to Riverside, Calif.). From El Centro, Calif. rng stn, via the intxn of the NW course of El Centro, Calif., and the SE course of Indio, Calif.; Indio, Calif. rng stn to the intxn of the NW course of Indio, Calif. and the E course of Riverside, Calif.

(17) 600.4(d) (29) Blue Civil Airway #29 (Raleigh, N.C., to Lynchburg, Va.). From the intxn of the NE course of Raleigh, N.C., and the SE course of Lynchburg, Va., to Lynchburg, Va. rng stn.

(18) 600.4(d) (30) Blue Civil Airway #30 (Brownsville, Tex., to Big Spring, Tex.). From the intxn of the SE course of Alice, Tex., and the SW course of Corpus Christi, Tex., via Corpus Christi, Tex. rng stn, excluding that portion which lies more than 2 miles SE of the SW course of Corpus Christi, Tex.; the intxn of the NW course of Corpus Christi, Tex., and the SE course of San Antonio, Tex. (Kelly); San Antonio, Tex. (Kelly) rng station;

the intxn of the NW course of San Antonio, Tex. (Kelly) and the SE course of Big Spring, Tex. to Big Spring, Tex. rng stn.

(19) 600.4(d) (38) Blue Civil Airway #38 (Annette Island, Alaska to U.S.-Canadian Border). From Annette Island, Alaska rng stn via Petersburg, Alaska rng stn; the intxn of the NW course of Petersburg, Alaska and the SE course or Gustavus, Alaska; Gustavus, Alaska rng stn; Haines, Alaska rng stn. to the intxn of the NE course of Haines, Alaska and the U.S.-Canadian Border.

(20) 600.4(d) (39) Blue Civil Airway #39 (Knoxville, Tenn., to U.S.-Canadian Border). . .From Syracuse, N.Y., rng stn via the intxn of the N course of Syracuse, N.Y. and the SW course of Watertown, N.Y. VHF rdo rng; Watertown, N.Y. VHF rng stn; the intxn of the NE course of Watertown, N.Y. VHF rdo rng and the SW course of Massena, N.Y. VHF rng stn to the intxn of the NE course of Massena, N.Y. VHF rdo rng and the U.S.-Canadian Border.

(21) 600.4(d) (45) Blue Civil Airway #45 (Lake Charles, La., to Baton Rouge, La.). From the intxn of the W course of New Orleans, La., and the SW course of Baton Rouge, La., to Baton Rouge, La. rng stn.

(22) 600.4(d) (48) Blue Civil Airway #48 (New York, N.Y., to New Hackensack, N.Y.). From the intxn of the NE course of Newark, N.J. and the SE course of Stewart Field, N.Y., to the intxn of the SE course of Stewart Field, N.Y., and the S course of New Hackensack, N.Y.

(23) 600.4(d) (49) Blue Civil Airway #49 (Millville, N.J., to Philadelphia, Pa.). From the intxn of the NE course of Millville, N.J. and the SE course of Philadelphia, Pa., to Philadelphia, Pa. rng stn.

(24) 600.4(d) (50) Blue Civil Airway #50 (Bangor, Me., to U.S.-Canadian Border). From the intxn of the NE course of Bangor, Me. and the SW course of Pennfield Ridge, N.B., Canada to the intxn of the SW course of Pennfield Ridge, N.B., Canada and the U.S.-Canadian Border.

✓ AIRWAY TRAFFIC CONTROL AREAS: Effective September 15,1947, Part 601.4 of the Regulations of the Administrator were amended to read as follows:

(1) 601.4(a) (6) Green Civil Airway #6 Airway Traffic Control Areas (Laredo, Tex., to Norfolk, Va.). All of Green Civil Airway #6.

(2) 601.4(b) (8) Amber Civil Airway #8 Airway Traffic Control Areas (Los Angeles, Calif., to The Dalles, Ore.). All of Amber Civil Airway #8.

(3) 601.4(c) (21) Red Civil Airway #21 Airway Traffic Control Areas (Lansing, Mich., to Boston, Mass.). All of Red Civil Airway #21.

(4) 601.4(c) (23) Red Civil Airway #23 Airway Traffic Control Areas (U.S.-Canadian Border to N.Y.) All of Red Civil Airway #23 between the intxn of the SE course of Toronto, Ont., Can., and the U.S.-Canadian Border and the intx of the E course of N.Y., N.Y. (LaGuardia) and the NE course of Mitchel Field, N.Y.(Army).

(5) 601.4(c) Red Civil Airway #46 Airway Traffic Control Areas (Aberdeen, S.D., to Watertown, S.D.). All of Red Civil Airway #46.

(6) 601.4(d) (7) Blue Civil Airway #7 Airway Traffic Control Areas (Paso Robles, Calif., to Hamilton Field, Calif.). All of Blue Civil Airway #7.

(7) 601.4(d) (14) Blue Civil Airway #14 Airway Traffic Control Areas (El Centro, Calif., to Williams, Calif.). All of Blue Civil Airway #14.

(8) 601.4(d) (30) Blue Civil Airway #30 Airway Traffic Control Areas (Brownsville, Tex., to Big Spring, Tex.). All of Blue Civil Airway #30.

(9) 601.4(d) (39) Blue Civil Airway #39 Airway Traffic Control Areas (Knoxville, Tenn., to U.S.-Canadian Border). All of Blue Civil Airway #39 from Tri-City, Tenn. rng stn to a line extended at right angles across such airway through a point 25 mi. NE of Tri-City, Tenn. rng stn; from a line extended at right angles across such airway through a point 25 mi. S of Charleston, W.Va. to Charleston, W.Va. rng stn; from the intxn of the W course of Elkins, W.Va. and the SW course of Morgantown, W.Va. to the U.S.-Canadian Border.

The following Airway Traffic Control Areas were added to Part 601.4 of the Regulations of the Administrator effective September 15, 1947:

(1) 601.4(c) (56) Red Civil Airway #56 Airway Traffic Control Areas (Red Bluff, Calif., to Whitmore, Calif.). All of Red civil Airway #56.

(2) 601.4(c) (62) Red Civil Airway #62 Airway Traffic Control Areas (Toledo, Ohio, to Akro, Ohio). All of Red Civil Airway #62.

(3) 601.4(d) (24) Blue Civil Airway #24 Airway Traffic Control Areas (El Centro, Calif., to Riverside, Calif.). All of Blue Civil Airway #24.

(4) 601.4(d) (29) Blue Civil Airway #29 Airway Traffic Control Areas (Raleigh, N.C., to Lynchburg, Va.). All of Blue Civil Airway #29.

(5) 601.4(d) (45) Blue Civil Airway #45 Airway Traffic Control Areas (Lake Charles, La., to Baton Rouge, La.). No control areas designation.

(6) 601.4(d) (48) Blue Civil Airway #48 Airway Traffic Control Areas (New York, N.Y., to New Hackensack, N.Y.). All of Blue Civil Airway #48.

(7) 601.4(d) Blue Civil Airway #49 Airway Traffic Control Areas (Millville, N.J., to Philadelphia, Pa.). All of Blue Civil Airway #49.

(8) 601.4(d) (50) Blue Civil Airway #50 Airway Traffic Control Areas (Bangor, Me., to U.S.-Canadian Border). All of Blue Civil Airway #50 between the intxn of the NE course of Bangor, Me., and the SW course of Pennfield Ridge, N.B., Can and the intxn of the SW course of Pennfield Ridge, N.B., Can. and the U.S.-Canadian Border.

✓ AIRPORT TRAFFIC ZONES: Effective September 15, 1947, Part 601.8 of the Regulations of the Administrator were amended to read as follows:

(1) The following arpts will be added to Section 601.8(a)(3-mile radius): Baton Rouge, La., East Baton Rouge Parish Airport; Cochise, Ariz., CAA Int.Fld.; Daggett, Calif., Daggett Mun. Airport; El Dorado, Ark., Goodwin Field; New Orleans, La., New Orleans Airport; Santa Monica, Calif., Clover Field.

(2) The following arpts will be added to Section 601.8(b)(5-mile radius): Langley Field, Va., Langley Field; Mason City, Iowa, Mason City Mun. Airport.

The following Airport Traffic Zone were deleted from Section 601.8 (c)(non-standard): Mason City, Iowa.

The following Airport Traffic Zones were amended to read as follows: (1)601.8(c)(92) Detroit,Mich. Airport Traffic Zone. Within a 5 mi. radius of Detroit City Airport excluding that portion which lies outside

the continental limits of the United States.

(2) 601.8(c) (174) Burbank, Calif. Airport Traffic Zone. Within a 5 mi. radius of Lockheed Air Terminal and extending within 2 mi. either side of a line from Burbank, Ca lif. rng stn via Simi intxn (Intxn of the NW course of Burbank, Calif., and the SW course of Newhall, Calif.); Newhall, Calif. rng stn to the intxn of the SE course of Newhall, Calif., and the NW course of Burbank, Calif.

✓ REDESIGNATION OF RADIO FIXES: Effective September 15, 1947, Part 601.9 of the Regulations of the Administrator were amended to read in whole or in part as follows:

(1) 601.9(a) (3) Green Civil Airway #3 (San Francisco, Calif., to New York, N.Y.). San Francisco, Calif. rng stn; Oakland, Calif. rng stn; the intxn of the NE course of Oakland, Calif. and the SE course of Williams, Calif.; Sacramento, Calif. rng stn; Donner Summit, Calif. rng stn; Reno, Nev. rng stn; Humboldt, Nev. rng stn; Battle Mtn, Nev. rng stn; Elko, Nev. rng stn; Lucin, Utah rng sfn; Ogden, Utah rng stn; Fort Bridger, Wyo. rng stn; Rock Spring, Wyo. rng stn; Sinclair, Wyo. rng stn; Cheyenne, Wyo. rng stn; the intxn of the SE course of Scottsbluff, Nebr. and the W course of North Platte, Nebr.; North Platte, Nebr. rng stn; Grand Island, Nebr. rng stn; Omaha, Nebr. rng stn; Des Moines, Iowa rng stn; Moline, Ill. rng stn; Joliet, Ill. rng stn; Goshen, Ind.rng stn; Toledo, Ohio rng stn; the intxn of the SE course of Romulus, Mich and the W course of Cleveland, Ohio; Cleveland, Ohio rng stn; Youngstown, Ohio rng stn; Philipsburg, Pa. rng stn; the intxn of the E course of Philipsburg, Pa. and the S course of Williamsport, Pa.; Allentown, Pa. rng stn; the intxn of the SW course of New York, N.Y. (LaGuardia) and the NW course of Floyd Bennett, N.J. (Navy).

(2) 601.9(a) (4) Green Civil Airway #4 (Los Angeles, Calif., to Philadelphia, Pa). . .Harrisburg, Pa. rng stn; the intxn of the E course of Harrisburg, Pa., and the SW course of Allentown, Pa.; Philadelphia, Pa. rng stn.

(3) 601.9(a) (6) Green Civil Airway #6 (Laredo, Tex., to Norfolk, Va.) Alice, Tex. rng stn; Palacios, Tex. rng stn; the intxn of the SE course of Richmond, Tex., and the SW course of Houston, Tex.; Houston, Tex. rng stn; Beaumont, Tex. rng stn; Lake Charles, La. rng stn; New Orleans, La. rng stn; Mobile, Ala. rng stn; Maxwell Field, Ala. rng stn; Atlanta, Ga. rng stn; Spartansburg, S.C. rng stn; Greensboro, N.C. rng stn; Blackstone, Va. rng stn; Richmond, Va. rng stn.

(3) 601.9(b) (8) Amber Civil Airway #8 (Los Angeles, Calif. to The Dalles, Ore.). Santa Barbara, Calif. VHF rng stn; Paso Robles, Calif. VHF rng stn; Salinas, Calif. VHF rng stn; the intxn of the NW course of Salinas, Calif. VHF rng and the SW course of San Francisco, Calif. rng; Fairfield-Suisun, Calif. rng stn; Whitmore, Calif. rng stn; Klamath Falls, Ore. rng stn; Redmond, Ore. rng stn; The Dalles, Ore. rng stn.

(4) 601.9(c) (6) Red Civil Airway #6 (Las Vegas, Nev., to Omaha, Nebr.). Grand Junction, Colo. VHF rng stn; Eagle, Colo. VHF rng stn; Akron, Colo. rng stn; Hayes Center, Nebr. rng stn; Lincoln, Nebr. rng stn.

(5) 601.9(c) (13) Red Civil Airway #13 (Sunbury, Pa., to Boston, Mass) Wilkes-Barre, Pa. rng stn; Stewart Field, N.Y. rng stn; Providence, R.I. rng stn.

(6) 601.9(c) (17) Red Civil Airway #17 (Ft. Wayne, Ind., to Baltimore, Md.). Findlay, Ohio non-directional marker beacon; Hayesville, Ohio non-directional marker beacon; Baltimore, Md. rng stn.

(7) 601.9(c) (21) Red Civil Airway #21 (Lansing, Mich., to Boston, Mass.). The intxn of the NE course of Pittsburgh, Pa. and the N course of Altoona, Pa.; the intxn of the SE course of Boston, Mass., and the NE course of Squantum, Mass. (Navy).

(8) 601.9(c) (46) Red Civil Airway #46 (Aberdeen, S.D., to Watertown, S.D.). No radio fix designation.

(9) 601.9(c) (56) Red Civil Airway #56 (Red Bluff, Calif., to Whitmore, Calif.). No radio fix designation.

(10) 601.9(c) (62) Red Civil Airway #62 (Toledo, Ohio to Akron, Ohio). Wellington, Ohio VHF rng stn.

(11) 601.9(d) (7) Blue Civil Airway #7 (Paso Robles, Calif., to Hamilton Field, Calif.). Hamilton Field, Calif. non-directional marker beacon.

(12) 601.9(d) (14) Blue Civil Airway #14 (El Centro, Calif., to Williams, Calif.). No radio fix designation.

(13) 601.9(d) (24) Blue Civil Airway #24 (El Centro, Calif., to Riverside, Calif.). Indio, Calif. rng stn.

(14) 601.9(d)(29) Blue Civil Airway #29 (Raleigh, N.C., to Lynchburg, Va.) No radio fix designation.

(15) 601.9(d) (30) Blue Civil Airway #30 (Brownsville, Tex., to Big Spring, Tex.). The intxn of the W course of San Antonio, Tex. (Alamo), and the NW course of San Antonio, Tex. (Kelly).

(16) 601.9(d) (39) Blue Civil Airway #39 (Knoxville, Tenn., to U.S.-Canadian Border). No radio fix designation.

(17) 601.9(d) (48) Blue Civil Airway #48 (New York, N.Y., to New Hackensack, N.Y.). No radio fix designation.

(18) 601.9(d) (49) Blue Civil Airway #49 (Millville, N.J., to Philadelphia, Pa.). No radio fix designation.

(19) 601.9(d) (50) Blue Civil Airway #50 (Bangor, Me., to U.S.-Canadian Border). No fadio fix designation.

✓ REPORTING POINTS: The following intersections have been designated as "On Request" reporting points:

(1) DOWNERS GROVE-The intxn of the W course of Chicago Range with the NE course of the Joliet, Range.

(2) EVANSTON-The intxn of the N course of the Harvey Range with the SE course of the Glenview Range.

(3) HARMON-The intxn of the N course of Peoria Range with the E course of the Moline Range.

(4) HIGHLAND PARK-The intxn of the E course of the Rockford Range with the N course of the Harvey Range.

(5) HOWELL-The intxn of the N course of the Harvey Range with the E course of the Joliet Range.

(6) LOCKPORT-The intxn of the W course of the Harvey Range with the E course of the Joliet Range.

(7) MOMENCE-The intxn of the S course of the Harvey Range with the SE course of the Rockford Range.

(8) PLAINFIELD-The intxn of the W course of the Harvey Range with the NE course of the Joliet Range.

(9) RENSSELAER-The intxn of the NE course of the Chanute Range with the SE course of the Chicago Range.

The following intersection has been designated a non-compulsory reporting point in lieu of the present Eudora Intersection:

DESOTO-SW leg of Kansas City and the N leg of the Olathe Radio Range.

FLIGHT INFORMATION MANUAL CORRECTION: Correct Chapter IX, page 114, of the July 1, 1947 issue, under the heading of "Handling of CFR Flight Plans and Arrival Reports", which erroneously states that CFR flight plans are forwarded in the same manner that IFR flight plans are. CFR flight plans are not transmitted. Upon termination of a CFR flight, the pilot should close out his flight plan. Notice of arrival is then sent over the CAA communications system to the station holding the original flight plan.

AERONAUTICAL CHART AND PUBLICATION CORRECTIONS:

(1) Correct Coast and Geodetic Survey's Radio Facility Chart 13, (a) by showing Lebanon, N.H. transmitting on 116.1 mcs instead of 111.1 mcs. Delete remarks. Radio beacon operates on request 24 hrs. daily; (b) Chart 29, by showing the mileage from Fairview Fan Marker to Nashville range station as 28 miles instead of 21 miles.

(2) Correct Airman's Guide, Vol. 2, No. 10, Aug. 5, 1947, Louisville Flight Planning Chart, by showing the identification of the Louisville Range as "LV" instead of FV.

WEATHER REPORTING SERVICE

Weather Reporting Location	Type of Report	Lat. Long.	Elevation	Action Taken
Olathe, Kans.	Raob			Discont.
Arcata, Calif.	Raob			Begun
Savannah Lightship	6-hourly	31-57 80-40		Inaug'd.
St. Johns Lightship	6-hourly	30-24 81-18		Inaug'd.
Diamond Shoals Lightship	6-hourly	35-05 75-20		Inaug'd.
Frying Pan Shoals Lightship	6-hourly	33-28 77-34		Inaug'd.
Los Alamitos, Calif.	Supplemen.	33-48 118-03	27'	Inaug'd.
San Nicolas, Calif.	Pibal	33-15 119-31	893'	Begun

Lakeview, Ore.	Supplemen.	42-11 120-21	4764'	Begun

NOTE: Airway terminal forecasts inaugurated for Kinross and Traverse City, Mich. Airway terminal forecasts discontinued for Sault Ste. Marie, Michigan.

TELETYPE NOTAMS: Throughout the year climatic conditions (snow storms, floods, etc.) render many fields temporarily unusable or unsafe. In addition, there are intermittent maintenance operations in progress on many fields. Radio facilities suffer temporary power failures or course misalignments and lighting facilities are temporarily inoperative. Because these temporary conditions cannot be given immediate coverage in the Airman's Guide, full cognizance must be taken of Teletype Notam service which gives the desired coverage on any facility or field at which teletype transmitting stations are based. Cross-country pilots, accordingly, should consult these Teletype Notams for latest available data on air navigation aids. These teletype notams are posted in CAA Communications Stations and in all Army Air Field and Naval Air Station Operations Offices having teletype drops.

AIRPORT TRAFFIC CONTROL PROCEDURES: (a) Planes with 2-way radio should establish communication with control tower when 15 miles from the airport of destination and before taxiing or taking off.

(b) Planes without receivers, when approaching tower-controlled fields, and before taxiing and taking off, should be on the alert for and be guided by light gun signals. (See AAF Regulation 100-4, dated March 4, 1944, and CAR Digest or Manual 60).

(c) Flashing tetrahedron lights, as well as the daylight operation of rotating beacons, indicate suspension of CFR traffic.

AIRPORT AND RADIO NOTICES

LEGEND

** - New or revised airport, danger area, or miscellaneous data to be added to records.

★ - New or revised radio data to be added to records.

FOREIGN SPECIAL NOTICES

FOREIGN ENTRY PROCEDURES; AIRPORTS OF ENTRY, CUSTOMS REPORTS, CIVIL AIRCRAFT CLEARANCE FOR FOREIGN COUNTRIES: These procedures and regulations were all incorporated into the Flight Information Manual, Vol. 2, No. 1, dated July 1, 1947. Only amendments to the data contained in the Manual will hereafter be carried in the Airman's Guide.

✓ FRECUENCIES GUARDED BY U.S. OPERATED OCEAN STATION VESSELS: Effective Aug. 5, 1947, all U.S. operated ocean station vessels in the North Atlantic will guard 118.1 mcs for routine VHF communications with aircraft in lieu of 116.1 mcs. Continuous guard of 140.58 mcs. distress frequency remains unchanged. (9-11)

UNITED KINGDOM MILITARY AIR BASE USAGE: The following United Kingdom Military Air Bases are available to civil air carriers of only U.S. and United Kingdom and to aircraft which were purchased in either the U.S., or the United Kingdom and are in ferry status.

(a) for regular use: Kindley Field, Bermuda; Beane Field, St. Lucia; Coolidge Field, Antigua; and Atkinson Field, British Guiana.

(b) for alternate use: Waller Field, Trinidad; Vernam Field, Jamaica; and Carlsen Field, Trinidad.

Even though the above fields are open to civil air carriers and ferry status planes it is mandatory that the operators of such aircraft secure approval for use of these military air bases from Headquarters, AAF, Washington, D.C., prior to the departure of each flight or series of flights.

✓ INTERNATIONAL RADIOTELETYPE CIRCUITS: Effective May 16, 1947, the following radioteletype circuits were established and in operation at CSY Santa Maria, Azores, WSY New York; EIP Shannon; FXO Paris; NHY Port Lyautey. Inter-island radioteletype link CSY Santa Maria, Azores to WYQY Lagens, Azores, will be continued until further advised. All above circuits are operating in accordance with ICAO Communications Procedures. (9-11)

NAVAL COMMUNICATIONS WITH COMMERCIAL AIRCRAFT IN CARIBBEAN AREA: Effective March 24, 1947, and until further notice, Trinidad NAS, and Guantanamo NAS, guard 6515 kcs voice continuously, transmitting and receiving, for communications with commercial aircraft.

✓ LORAN RATE 2H3 ON PACIFIC COAST: Effective Sept. 1, 1947, Loran Rate 2H3 on Pacific Coast was placed in continuous operation and signals on this rate may be used for navigational purposes.

✓ NORTH ATLANTIC ROUTE B FREQUENCIES: Effective Aug. 15, 1947, WSY New York activated ICAO North Atlantic Route B frequencies with the exception of 333 kcs. Frequencies guarded are as follows: 6543 kc. cont., 2912 kc between hours of 0000Z and 0800 Z, on request other times, 11306, 8485 kc. on request. Transmits on same frequencies. Advice on activation of 333 kc will be furnished at a later date. Guarding of Route A and C unchanged. (9-4)

PACIFIC OCEAN WEATHER STATION COMMUNICATIONS: Effective July 1, 1947, Pacific Ocean Weather Station FOX discontinued use of 4220 kcs for voice communications with trans-Pacific aircraft and substituted 5165 kcs for this purpose. The following paragraphs of SOP-1-A should be changed in accordance with the above: Section IV: 4 (a); 4 (b); 5 (a) (5); 5 (b); 5 (c) (1); 7 (a).

✓ PACIFIC ICAO PROCEDURES: International Civil Aviation Organization Airway Traffic Control and Communication Procedures were placed into effect in the Eastern Pacific effective Aug. 1, 1947. (9-9)

FOREIGN DATA

AFRICA-Casablanca: The following established circuits are now in operation at CNO Casablanca Aeronautical Communications Station: CSZ Lisbon, FXW Bordeau, FOO Paris, CNC Tangier, CNS Gaercife, CNA Fez; CNV Oujda, CNU Meknes, FOR Oran, FNA Algiers, CNN Taza, CNZ Fort Trinquet, CNY Tindouf, CND Agadir, CNX Marrekech, FOK Dakar. Landing teletype to FFAG Algiers and CNPL Port Lyautey. Guards Route C radiotelegraph frequencies 3248, 6563, 8538, and 12776 kcs. Admi air ground guards 333, 336, 6510, 4195 kcs. Radio range and beacon identification "KR", 222 and 403 kcs respectively. Tower voice VHF 116.1 mcs and 6440 kcs.

✓ Dakar: Effective May 15, 1947, Overseas Foreign Aeronautical Communications Station WFG, Yoff Airport, Dakar FWA, were combined by FOK under call sign FOK. Following CAA circuits are being operated and supervised by French Nationals: A/G 3285, 6563 kcs. cont., 11319 kcs daylight hours, point-to-point circuits, FOK/NHY Port Lyautey, FOK/ELPA Roberts Field, FOK/ZVJ Recife, FOK/ZNT Accra. Following principal circuits operation and supervision French Nationals: Point-to-point, FOK with following stations: CNB Casablanca, X08 Natal, FOO Paris, FGS Abidjan, FNA Algiers, FSP Port Etienne, FMW Port Au France, FHK Amsterdam, Yoff Tower, range and beacon operation and supervision French Nationals, frequencies unchanged. (9-11)

Dakar Weather Broadcast: Effective 0820Z GCT, March 24, 1947, station WFG commenced broadcasting Dakar METAR hourly at 20 minutes past each hour on 3285 kcs., A1 emission.

✓ Port Lyautey Communications: Effective June 11, 1947, circuit operations NHY Port Lyautey to FOK Dakar and CSZ Lisbon were transferred to station CNO Casablanca. Following civil circuit functions remain

in operation NHY Port Lyautey: Circuit 207T Port Lyautey-Santa Maria. Circuit 224 Port Lyautey-Roberts Field, Liberia. 24 hour landline teletype operations connecting NHY Port Lyautey and CNO Casablanca facilitates E and W traffic movements via 207T. Port Lyautey maintains continuous civil air/ground guards on 3285,6563 cont., 11319 kcs. from 0600 until 2200 GMT, 8554,6543,6523 kcs. on request. (9-11)

✓ ALASKAN AIRMAN'S GUIDE CORRECTIONS-Minimum altitudes between Fixes:

Page No.	FIX	MIN.ALT.	FIX
17	Naknek Range	9500'	Rocky Point Int.
17	Anchorage Range	7000'	Wasilla Int.
19	Aniak Range	2500'	Bethel Range
19	Naknek Range	9500'	Rocky Point Int.
19	Port Heiden Range	10,000'	Randall Range
21	Galena Range	5000'	Galtan Int.
21	Nome Range	2000'	Unalakleet Range
25	Port Heiden Range	10,000'	Randall Range
25	North Shore Range	8000'	Randall Range
25	North Shore Range	8000'	Atka Range
25	Amchitka Range	5000'	Shemya Range

N.B. Alaskan Airman's Guide dated June 15, 1947.
(See Supplement for revisions to Alaskan Instrument Approach Procedures)

AZORES-Fayal-Radio: Radio beacon call sign CTN. Operates on 333 kcs. days and on request. Air to ground call sign CTN for emergency use only on 6563 and 6577 kcs.

Florez-Radio: Radio beacon call sign CF operates from 00 to 05, from 20 to 25 and from 40 to 45. Reliable for homing.

Lagens-Radio: Tower operating on 116.1,126.18 mcs., and 2834, 2993 kcs. for continuous transmitting and receiving. Tower on 4220 kcs. for emergency and on 5000 kcs. on request. GP range on 341 kcs. in continuous operation with legs of 343° and 163° magnetic reliable for instrument letdowns if caution is used. DK radio range on 288 kcs. on continuous operation with legs of 343° and 163° magnetic reliable for instrument letdowns if caution is used. Z markers are operating on both ranges. Racon beacon inoperative until further notice. SCS-51 operates continuously between 1730 and 0900Z and on 30 minutes request thereafter on channel Y for runway 16 and channel X for runway 34 if no glide path operating on channel Y. Localizers not modified in accordance with T.O. 16-1-62. Long range DF on 6563 kcs. day and night transmitting and receiving and receives fixing signal on 6210 kcs, call sign is CSE9. Short range DF call sign is CSE7 on 4575 kcs. operating on request from Lagens Tower or CSY at Santa Maria. GCA operates on one hour request on all voice frequencies. Field: Crews inbound to Lagens will be cautioned of high terrain on E and W sides of rnwy 34. Due to repairs being made on 2700' on N end of rnwy 16/34, no GCA landing will be made on runway 16 until further notice.

Santa Ana-Radio: Radio beacon call sign is BB7, operates continuously on 308 kcs.

✓ Santa Maria-Radio: Tower transmits and receives on 116.8 and 126.18 mcs. and 2834 kcs. Tower transmits on 278 kcs, and 118.1 mcs. and guards 6440 kcs. Radio range operates cont. on 249 kcs., call sign: WY. Radio beacon operates on 329 kcs, call sign: WY. No Z marker on WY rng. SCS-51 localizer on channel X on rnwy 19 operates cont. Glide path has resumed operation. Localizer not modified in accordance with T.O.-16-1-62. Santa Airways operates on 3993 kcs cont. and on 4220 kcs. for emergency. Air to ground call sign CSY operates cont. on 6563,12776,3248,and 8538 kcs. on CW. CSY is ICAO control center for the Azores. All letdowns are to be made on the N and S legs of the WY range. (9-1) Fld: 600 meters of S end of Santa Maria N/S rnwy 01/19 under repairs. Santa Maria NW/SE rnwy 33/15 closed effective from Aug. 29 for repairs. The unserviceable portions marked by red flags and rnwy lights crossing the N/S rnwy on the beginning of the serviceable part. (8-29)

✓ BAHAMAS-Flight Clearance: ICAO type flight plans required for all international flights dispatched to Oakes Field Airport and seaplane ports of entry Bahamas. IFR flight plans required all flights at night.

✓ BRITISH HONDURAS-Belize, Landing of Private Aircraft: Aircraft intending to land at Belize Airport or on the Belize waterfront should give the Director of Aviation, Belize, British Honduras, at least 4 hours' advance notice of their intended arrival. Flight plans may be filed for transmission to Belize between the hours of 1400Z and 2400Z through MIAMI CAA-operated overseas foreign aeronautical communications station. Seaplanes obtain permission prior to departure. Airport open 1300 to 2400Z. No lighting facilities. (9-9)

BRITISH WEST INDIES-Kingston, Jamaica-Montego Bay Airport: Montego Bay Airport is a British-controlled airport now under limited operation by Pan American Airways. It is necessary for all flights departing from Montego Bay for points in the U.S. to file flight plans with the Kingston ATC through the Kingston Communication Station - call letters MRX. Flight plans also must be filed for all flights departing from the U.S. for Montego Bay. They may be filed for transmission to Montego Bay through the CAA-operated Overseas Foreign Aeronautical Communications Station at Miami call letters WBR, or New Orleans - call letters WEK.

✓ Kingston, Jamaica, Palisadoes Airport Facilities: The Palisadoes Airport is a British Government controlled airport. The Government controlled tower transmits on 397 kcs. only, and guards 4495,2870,3105,6210 kc. It is necessary for all itinerant flights coming to Palisadoes to file flight plans from point of departure to the communication station at Kingston - call letters MRX. This flight plan should be marked for Information: Palisadoes Airway Traffic Control. The route frequency 6515 kcs. A3 emission is guarded daily between 1200 and 2400Z and on req. between 0000 and 1200Z at MRX. They have a good signal on this frequency and can be read consistently throughout the day and night in the Caribbean Area. Flight Plans may be filed for transmission to Palisadoes through the CAA operated Overseas Foreign Aeronautical Communications Station, WBR, Miami. (9-9)

✓ Trinidad NAS: Effective June 16, 1947, Navy Squadron commenced conducting aerial gunnery from 1300Z to 2000Z daily except Sat. and Sun. until further notice. Surface craft and aircraft remain clear of area, 10° N, 60°45' W, 10°30', 60°45', 10°N, 60° W, 10°30', 60°. (9-9). The marine radiobeacon at Trinidad was discontinued July 10, 1947.

CANADA-Lethbridge Airport, Alberta: Elev. 3030'. (9-8)

Montreal, Quebec: Effective September 5, 1947, operation of ICAO Group C air ground air frequencies by stations CYB Dorval were suspended in favor of Group B. All 4 group B frequences 2912,6543,8485,11306 kcs. manned continuously by CYB.

Point Petre, Ontario: Anti-aircraft firing is being conducted periodically during the month of September 1947, at Point Petre, Ont. (approx. position: 43-50-15N lat., and 77-9W long.). The danger area extends from the firing point S over water only, and will not exceed 24,000 yds at any point from the firing source. Projectiles will be fired up to a height of 40,000' and during firing periods a black ball of 5' will be hoisted to a height of 25'.

CARRIBEAN AREA-Swan Island: On or soon after Sept. 9, 1947, the Swan Island radio range will be shut down for conversion to a class H facility. Range and broadcast inoperative on 260 kcs. Z marker inoperative. (8-23)

CUBA-Rancho Boyeros Airport, Havana, Cuba: Effective May 19, 1947, and until further notice, all aircraft operating into and out of the Rancho Boyeros Airport must file a flight plan prior to entering the area. This applies to both IFR and CFR flights. Form of flight plan as follows: Identification; type, route of flight, time of flight departure, time of minutes, altituide, CFR or IFR indicated by C or N respectively and alternate if necessary. Example: NC60459 DC3 Miami Havana 1230 92/60N KW. For trial period and until further advised all flight plans except Expreso and those presently using PAA communications facilities may be forwarded through WBR addressed to OAHAV at no charge. (9-9)

EIRE-Shannon: Shannon will not bring new B group of frequencies into operation intil additional transmitters, at present being installed, are available. Will continue to guard A and C groups and transmit on Group A. Notice will be issued upon completion of transmitter installation. Tele EINN.

ENGLAND-Blackbushe Airport: Blackbushe Airport has been approved as a Customs Aerodrome in concurrence with the Commissioners of Customs and Excise.

Hurn Airport: Customs facilities are not now continuously available at Hurn Airport. (This corrects the Air Navigation Directions, 1946 - A.N.D. 16).

London Airport: SCS51 and SBA facilities to be considered out of service as navigational or landing aids. They can be used for holding and letdown procedures only until further notice. Because of the possible presence of vehicles within the restricted area of the SCS51 and SBA sites the accuracy of these installations is questionable.

FRANCE-Orly Field, Paris: Orly Tower: Delete 137.88 and add 118.1 mcs cont. Air ground CW, Call sign: FXO on 6577 kcs cont., 3285 kcs. night and 11319 kcs. day on req. Delete 8280 kcs. air ground voice, call sign Orly Control on 126.18, 116.1 mcs, 140.58, mcs.,and 3298.5 kcs. cont. Delete 4220 kcs. VHF/DF call sign Orly D/F on 119.1 mcs. on request. Delete weather frequencies of 3365 and 6625 kcs. (9-2)

GREECE-Athens, Hassani Airport Radio Call: Effective April 30, 1947, call sign WWJC, replaced Army call sign WUCW on all circuits formerly using call signs at this station.

GREENLAND-Bluie West Eight Airport: No aviation fuel is available at Bluie West Eight Airport until further notice. No aircraft will be cleared into Bluie West Eight Airport without sufficient fuel aboard for return flight.

HAWAII-GUAM ROUTE: On and after September 5, 1947, it is desired to confine all civil air traffic between Honolulu and Guam to only one route, the Midway-Wake Route. Communications, petroleum and ground services are now avail. ; on this route after the above date.

ICELAND-Keflavik: After flight check VT range legs inbound magnetic found to be as follows: W 114°, NW 169°, E 299°, SE 349°.

IRAN-Flight Over: The Iranian Government has made the following announcement effective July 15, 1947: (a) Foreign aircraft flying over Iran from the Western border towards Tehran or back must follow Flight Corridor (A). In case of adverse weather on that corridor, corridor (Aa) may be used as an adverse weather on that corridor, corridor (Aa) may be used as an alternate.

(b) Foreign aircraft flying in transit over the Southern coast of Iran must follow Flight Corridor (B).

(c) Flight Corridors: Corridor (A) Mandali (Iran/Irak Border) Kermanshah - Hamadan - Tehran. Corridor (Aa) Khurramabad - Sultanabad - Qum - Tehran. Corridor (B) Abadan - Bushire - Lingeh - Jask - Chahbar.

(d) Flight of foreign aircraft on any other route over Iranian Territory is prohibited except by special permission from the Director of Civil Aviation.

LABRADOR-Goose Bay: Effective Sept. 5, 1947, operation of ICAO Group C air ground air frequencies by Station, VOGB at Goose Bay suspended in favor of ICAO Group B. All 4 Group B freqs. 2912, 6543, 8485, 11306 kcs. manned continuously by VOGB. In addition, ICAO Group A freqs 3285,6577, 8485, 11306 kcs are available on request. (8-25). Effective July 15, 1947, VOAV Goose Bay maintains continuous watch and transmits on frequencies 3248, 6563, 8538, 12776 kcs., but with freqs. 3285,6577,8554 (receive and transmit) available on request.

NEWFOUNDLAND-Military and Naval Landings: All military and naval aircraft landing in Newfoundland should use Harmon Field at Stephenville or Naval Operating Base at Argentia. Gander has very limited military facilities and is reserved for commercial and weather diverted military aircraft, or those on official business.

Gander: Gander Metar weather broadcast now in operation on 363 and 5410 kcs simultaneously at hour plus 20 min. and hour plus 50 min. Reception reports on 5410 kcs requested. Effective immediately the dewpoint will be added as a remark at the end of the Metar for Gander, Stephenville, Sydney, and Moncton broadcast by VOAC on 5410 and 363 kcs. at hour plus 20 and hour plus 50. Example: D.P. 47. Tele VOGA.

Gander Airport: Closed to Army aircraft except for emergencies, official business, and weather diversions.

Torbay Airport: Open to traffic between hours of 1030Z and 0230Z No aircraft will be dispatched to arrive at Torbay between hours of 0230Z and 1030Z. No traffic will be available between landing and take off minimums of 1930Z and 1030Z. Landings and take off minimums as published in ATLD Amendment #16 "Mile visibility, take off night 500' 1 mi. visibility. landing day 800' 1 mi. visibility, landing night 800' 3 mi. visibility".

PUERTO RICO-Aguadilla, Borinquen Field: Effective immediately Army Borinquen Field, requests flight plans and other communications on traffic departing from the Washington and New York Control Areas destined WZO/Borinquen be transmitted to WSY/New York for relay to WRW/San Juan

Arecibo-Santana Airport: Airport operated by Aviation Division, P.R. Transportation Authority. Restricted to daylight CFR operations only. Caution advised for occasional cattle on runway.

Mayaguez-El Mani Airport: Airport operated by Aviation Division, P.R. Transportation Authority. Restricted to CFR daylight operations. Taxiway W of Terminal Bldg closed. Caution advised for taxiing aircraft and persons on runway.

Ponce-Losey Field: Airport operated by Aviation Division, P.R. Transportation Authority. E/W runway 5000 x 150'. No lighting facilities. Estimated wheel load 20,800 lbs. NW/SE runway closed. No servicing facilities. 80 oct. fuel available in drums. A & E mechanics for minor repairs on field.

San Juan: The San Juan Civil Air Terminal located on the former U.S. NAS at the Isla Grande Airport, San Juan, P.R. All civil operations are handled by the Aviation Division, P.R. Transportation Authority. Flight Plans are required for over water flights to the airport. Cable address "Autoritan". Effective Aug. 17, 1947, radio station Naui NAF discontinued the handling of all communications for civil aircraft both air to ground and point to point except field control tower which will continue operations as heretofore. The CAA began operation of a civil Overseas Foreign Aeronautical Communications Station on the 2nd Floor of Hangar 20 located on the S side of Isla Grande Airport, San Juan. OFACS air ground freqs guar ded receiving 2870,3105,3117.5,4495,6210,6515 kcs. voice, 3285,6515,6523, 8546,11319 kcs. CW. Transmitting 254, 2870,6515 kcs. voice, 3285,6515, 6523,8546,11319 kcs. CW. Call signs "San Juan Radio ' voice, and WRW CW. WRW will handle all authorized communications in the operation of civil aircraft both air to ground and point to point.

San Juan-Seadrome Landing Lights: Effective June 9, 1947, the seadrome landing lights were discontinued and the landing light buoys were removed from the bay of San Juan at the NAS, San Juan.

San Juan NAF: Effective Aug. 17, 1947, San Juan NAF discont guard of 6515 kcs.

SCOTLAND-Prestwick: Effective Sept. 5; 1947, Prestwick changed to ICAO North Atlantic Group B air ground freqs. as follows:. 2912,6543, 8485,11306 kcs. Watch continuing on Group C 3248, transmitting and receiving. Group A receiving only on 3285,6577 kcs. 333 kcs not being activated at the present time.

URUGUAY-Carrasco, National Airport: Effective June 15, 1947, Air Traffic Control Tower at National Airport, Carrasco discontinued its freq. of 2870 kcs., and new freq. of 278 kcs. was commissioned. (6-3)

REGULATIONS GOVERNING AIR NAVIGATION INTO, WITHIN, OR THRCUGH THE CANAL ZONE MILITARY AIR SPACE RESERVATION

1. By virtue of Canal Zone Order No. 3, signed by the Secretary of War, January 21, 1947, filed with the Federal Register on February 6, 1947, and effective April 7, 1947, the provisions of Executive Order No. 8251, September 12, 1939 (as amended) and previous regulations governing air navigation into, within, or through the Canal Zone Military Airspace Reservation, are no longer operative. The new order provides a more simplified procedure for procuring authorization for entry of aircraft into the area. Succeeding paragraphs constitute a Standing Operating Procedure for your guidance and use.

2. FLIGHT AUTHORIZATION - HOW PROCURED:

(a) DOMESTIC AIR CARRIERS OPERATING UNDER CERTIFICATES OF PUBLIC CONVENIENCE AND NECESSITY: Domestic air carriers desiring to operate scheduled services for traffic purposes through the Canal Zone may make application directly to the Civil Aeronautics Board for authorization to conduct such scheduled operations into, within, or through the Canal Zone Military Airspace Reservation. Approval of such applications will be coordinated between the War Department and the Civil Aeronautics Board; Civil Aeronautics Board to notify the carrier, and the War Department to notify the Caribbean Defense Command of action taken.

(b) FOREIGN AIR CARRIERS OPERATING UNDER FOREIGN AIR CARRIER PERMITS: Foreign air carriers desiring to operate scheduled services for traffic purposes through the Canal Zone may make application to the Civil Aeronautics Board through the particular foreign country's embassy in Washington and the Department of State, in turn. Approval of such applications will be coordinated between the War Department and the Civil Aeronautics Board; Civil Aeronautics Board to notify State Department (State to notify embassy concerned, etc.). War Department to notify the Caribbean Defense Command of action taken.

(c) ALL OTHER CIVIL AIRCRAFT, DOMESTIC AND FOREIGN: Operators of all other civil aircraft, domestic and foreign, may apply for authorization for each separate flight into, within, or through the Canal Zone Military Airspace Reservation, either to the War Department (Commanding General, Army Air Forces, Attn: Air Installations Division) or directly to the Commanding General, Caribbean Defense Command. As a matter of facility and expedition, applications emanating from territory south of continental United States should, but need not necessarily, be submitted directly to the Commanding General, Caribbean Defense Command or as a further convenience, such applications may be submitted to the senior United States military representative in the country from which the flight is to originate, who will transmit such requests to the Commanding General, Caribbean Defense Command, for authorization. Aircraft of this category should not depart from the point of origin of flight prior to receipt of confirmation of authorization. Routine requests received by the War Department will, ordinarily, be approved immediately, and Headquarters, Caribbean Defense Command, so informed. In unusual or irregular cases, the War Department will refer such application to this Headquarters for comment prior to approval

(d) FOREIGN MILITARY AIRCRAFT: Authority having been delegated by the Secretary of State to heads of United States Diplomatic Missions in certain Central and South American countries to grant the necessary authorizations, representatives of the governments of those countries may secure authorization for each separate flight, by aircraft deemed to be a part of the armed forces of those countries, into, within, or through the Canal Zone Military Airspace Reservation, by making application to the heads of United States Diplomatic Missions in their respective countries, who, after obtaining approval from the Commanding General, Caribbean Defense Command, may issue the flight authorization.

3. DATA TO BE FURNISHED WITH APPLICATION FOR FLIGHT AUTHORIZATION: For the convenience of the applicant, applications for flight authorization into, within, or through the Canal Zone Military Airspace Reservation may be accomplished in triplicate on a form similar to that which follows A supply of mimeographed copies of such a form have been furnished to United States Military Attaches and other representatives in all Latin American countries and to the War Department. If supply is inadequate, form may be reproduced locally:

APPLICATION FOR AUTHORIZATION TO NAVIGATE TRANSIENT AIRCRAFT INTO, WITHIN OR FROM THE CANAL ZONE MILITARY AIRSPACE RESERVATION

TO THE COMMANDING GENERAL, ARMY AIR FORCES, ATTN: AIR INSTALLATIONS DIVISION, or COMMANDING GENERAL, CARIBBEAN DEFENSE COMMAND.

Application is made for authorization to navigate a transient aircraft into, within, or from the Canal Zone Military Airspace Reservation for a flight to _____ leaving _____ on or about _____ and to return on or about _____

(a) Purpose of flight (tourist, survey, charter, etc., give details) _____

(b) Name and address of financial sponsor of flight _____

(c) Name of country in which aircraft is registered _____

(d) Aircraft: Registered owner _____; Address _____; Manufacturer _____; Model _____; Serial No. _____, Identification Mark _____; Expiration Date of Aircraft Airworthiness Certificate _____; Authorized gross weight standard _____ lbs., provisional _____ lbs.; Authorized No. of Passengers _____ Authorized No. of Crew _____; Radio Call Letters _____; Describe Radio Equipment Installed _____; Receiving Frequencies _____; Transmitting Frequencies _____

(e) Special Apparatus, Equipment, or Cargo (Description of the following: Cameras _____; Firearms _____; Cargo (except personal baggage) _____.

(f) Itinerary and Landing Points: Lv. _____ Arr. _____ Lv. _____ Arr. _____ etc. (Give approximate dates - not times).

(g) Passengers _____.

(i) _____, hereinafter referred to as the Carrier, in consideration of permission granted by the United States to use Albrook Field in connection with its flight operations, hereby does agree as follows:

1. The Carrier, for itself, its successors and assigns, by operation of law or otherwise, does hereby forever release and discharge the United States, its agencies, agents, and/or military, civilian or contract personnel, their heirs, successors, executors, administrators or assigns from any and all liabilities, claims, demands, actions or causes of action, of every nature and character whatsoever arising out of or from any act, omission, negligence, quality of supplies, services rendered or manner of performance of services rendered, or any cause whatsoever in connection with the use of Albrook Field or of any United States Government facilities by the Carrier or from the sale of services or supplies by the United States military authorities to the Carrier excepting such liabilities, claims, demands, action or causes of action as result from the willful misconduct of any agency, agent, military, civilian or contract personnel of or under contract with the United States.

2. The Carrier, for itself, its successors and assigns, by operation of law or otherwise, assumes and agrees to defend, pay or otherwise settle any and all present or future liabilities or claims of liabilities, demands, actions or causes of action of every nature and character whatsoever by or in favor of third persons or parties, their heirs, successors, executors, administrators and assigns (including any government or agencies thereof) against the United States, its agencies, agents, and/or military, civilian or contract personnel, their heirs, successors, executors, administrators or assigns, arising out of or from any act, omission, negligence, quality of supplies, services rendered or manner of performance of services rendered, or any cause whatsoever in connection with the use of Albrook Field or of any United States Government facilities by the Carrier or from the sale of services or supplies by the United States military authorities to the Carrier and the Carrier will hold the United States and such other agencies, agents or persons harmless and defend them against any such liabilities, claims, demands, actions, causes of action of every nature and character whatsoever hereafter asserted or brought by third persons or parties (including any government or agencies thereof) including costs of suit, attorneys' fees or other expenses in connection therewith, excepting such liabilities, claims, demands, actions or causes of action as result from the willful misconduct of any agencies, agents, military, civilian or contract personnel of or under contract with the United States.

3. The Carrier, for itself, its successors and assigns, by operation of law or otherwise, assumes, and agrees to pay or otherwise settle any and all present or future liabilities for loss, damage, or injury to personnel, equipment or installations of or under the control of the United States caused by or resulting from the operation of aircraft by the Carrier in connection with the use of Albrook Field, or of any United States Government facilities excepting such loss, damage, or injury as result from the negligence or willful

misconduct of any agencies, agents, military, civilian or contract personnel of or under contract with the United States.

4. Signature hereon by_____, who represents himself as an authorized representative of the Carrier on this_____day of_____, 19____, constitutes formal agreement by the Carrier to all conditions and terms hereinabove set forth.

(j) Person to Whom Permit Should be Mailed:

Name and Address_____

The foregoing information is, to the best of my knowledge and belief, correct and complete.

Date_____194_____ _____

Sponsor or Pilot in Command

To be accomplished only by office issuing permit

Serial No._____ _____194__

Location Date

Application is hereby approved and is valid from_____194_____

denied

to_____194_____. Landings in Canal Zone are authorized, except in case of proven emergency, only at Albrook Field.

By order of the Commanding General, CDC

or By order of the Secretary of War

United States military or other representatives receiving such applications should transmit to this Headquarters, by radiogram or other suitable means of communication, the following pertinent information, extracted from the subject form, with request for flight authorization:

a. Type, number and ownership of aircraft
b. Complete itinerary.
c. Name of pilot.
d. Number of additional crewmen and passengers of United States citizenship.
e. Full name, citizenship, and sex of each air crewman and passenger, if other than of United States citizenship.
f. Purpose of flight.

Upon receipt of confirmation from this Headquarters, the permit at the end of the subject form should be appropriately completed and the original supplied to the applicant as his authority for the flight. Duplicate should be mailed to Commanding General, Caribbean Defense Command, and triplicate filed by the sender

4. INSTRUCTIONS TO PILOTS OR AIRCRAFT COMMANDERS:

a. Except in an emergency, or unless otherwise directed, the terminal point of all flights into the Canal Zone shall be Albrook Field.

b. Pilots or Aircraft Commanders will be instructed to familiarize themselves and comply with restrictions contained in Caribbean Air Command Manual 55-1 "Panama Air Traffic Control, Manual of Operations", or such other publications as may, from time to time, be substituted therefor. Copies of the aforementioned manual have been supplied to all United States Military Air Attaches in South and Central American countries, as well as to interested agencies in continental United States.

c. Immediately after landing at Albrook Field, the Pilot or Aircraft Commander of any foreign military aircraft will report in person to the Base Operations Officer for instructions. Pilots or Aircraft Commanders of all other aircraft will, immediately upon landing, report to the Chief, Aeronautics Section, the Panama Canal. All shall observe the instructions received.

5. CAMERAS, FIREARMS, AND EXPLOSIVES: Personnel aboard aircraft entering, operating within, or through the Canal Zone Military Airspace Reservation shall be denied possession of all cameras while within such airspace or on the ground within the borders of the Canal Zone. Taking of photographs from the air or on the ground is prohibited. Unless especially authorized, no arms, ammunitions, or explosives, except small arms, shall be carried aboard aircraft entering, operating within, or through the Canal Zone Military Airspace Reservation.

6. REPORTS: Monthly reports, compiled by the Commanding General, Caribbean Air Command, covering foreign military aircraft, and by The Governor, the Panama Canal, in the cases of all other aircraft, will be submitted to reach this Headquarters not later than the fifth day of each month following the month covered by the report. Such reports will list in chronological order all aircraft entering, operating within, or through the Canal Zone Military Airspace Reservation. Necessary data will be extracted, consolidated, and reported to the War Department by this Headquarters on or before the tenth of each month.

7. UNITED STATES GOVERNMENT OWNED AIRCRAFT: Nothing in the foregoing shall be construed to be applicable to military, naval or other aircraft owned or operated by the United States Government.

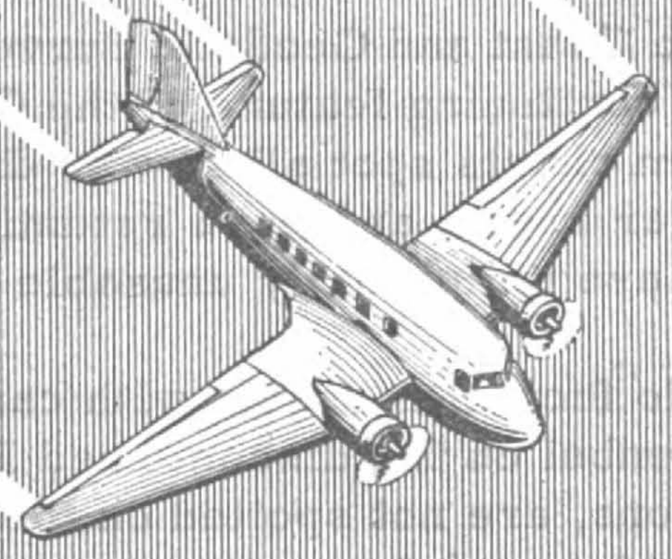
AIRMAN'S GUIDE



NOTICES TO AIRMEN

VOL. 2, NO. 14 . . . SEPTEMBER 30, 1947

This issue includes all data on record as of 0001 E.S.T. on the date above. For later information consult teletype NOTAMS.

U. S. DEPARTMENT OF COMMERCE
CIVIL AERONAUTICS ADMINISTRATION
OFFICE OF AVIATION INFORMATION

SPECIAL NOTICE

NOTAM CHARTS

When the discontinuance of the AIRMAN'S GUIDE Flight Planning Charts and facing Data Pages was announced, personal flying interests demanded compromise charts that would serve as notams to correct the less frequently issued sectionals.

Resultantly, the Coast and Geodetic Survey developed the series of notam charts which will be a continuing feature of the Guide.

These six notam charts spot all new or discontinued airports, radio navigational aids, danger areas, and (by a retention of the Ⓡ symbol) all such airports or aids which are temporarily unusable or usable only with extreme caution.

Airport or radio facilities usable with caution (formerly identified by the Ⓞ, or caution symbol on the discontinued Flight Planning Charts), because of space limitations, are not spotted on the charts. Such facilities are cited in the Notices to Airmen only.

Furthermore, these charts will be cumulative in nature as far as danger areas are concerned. Cumulative, that is, until a sectional chart is revised semi-annually.

Other features, such as new airports or radio aids, will be retained on the notam charts only as long as they are cited in the Notices to Airmen. Such citations are normally carried in only one issue of the Guide. Continuing very hazardous conditions, however, (such as field closed because of construction or radio range inoperative) will be charted as long as they are effective.

LEGEND

● New airport.

✕ New radio navigational aid.

Ⓡ Discontinued airport or radio aid, or one usable only with extreme caution.

AIR NAVIGATION RADIO AIDS

RADIO CLASS DESIGNATIONS

AC..... Approach Control Tower, CAA
B..... Scheduled Broadcast Station (broadcasts weather reports at 15 and 45 minutes after the hour unless otherwise cited).
C..... Control Tower, CAA
CA..... Control Tower, Army
CI..... Control Tower (City, County, Private, etc.)
CN..... Control Tower, Navy
D..... Distantly controlled
FM..... VHF fan type marker (100 watts)
FMHW..... Non-directional radio beacon when combined with fan marker.
GCA ..... Ground Controlled Approach Unit
H..... Non-directional radio-beacon (homing), power 50 watts or more
ILS..... Instrument Landing System (voice on localizer channel)
IM..... VHF boundary marker
K..... Independent Compass Locator Station
LFM..... VHF fan type marker, low-powered (5 watts-not over 10 miles from range)
LOR..... Low frequency omni-directional range
MH..... Non-directional radio-beacon (homing), power less than 50 watts
ML ..... Range (loop radiators), power less than 50 watts
MM..... VHF middle marker
MMK..... Compass locator station when combined with middle marker of Instrument Landing System
MRA..... Range (Adcock, vertical radiators), power more than 50 less than 150 watts.
MRL ..... Range (loop radiators), power more than 50-less than 150 watts
OM..... VHF outer marker
OMK ..... Compass locator when installed at outer marker site or within 5.5 miles of middle marker
P..... Point to point radio
RA..... Range (Adcock, vertical radiators), power 150 watts or more
RL..... Range (loop radiators), power 150 watts or more
S ..... Simultaneous (range signals and voice) type of transmitter
T..... Teletype
TX..... Principal teletype
V..... Additional voice feature on VHF
VAR ..... Visual-aural VHF range (every VAR has simultaneous voice feature)
VOR..... VHF omni-directional range
W..... Without voice facilities
Z..... VHF station location marker at a range station

AIRWAY RADIO COMMUNICATIONS

GENERAL

All radio range stations (class RA, RL, MRA, MRL, ML) emit directional signals (type A2 emission) 1020 cycles per second modulation.

All radio beacon stations (class H and MH) emit non-directional signals (type A2 emission) 1020 cycles per second modulation. Unless otherwise noted, all stations, other than class MH, operate continuously within their assigned hours of service except during interruptions for voice transmission on the same frequencies where simultaneous transmission is not available and during shutdowns for maintenance purposes. Unless otherwise cited, the voice features of Class MH facilities are available continuously, and the homing features are operated on request. The effective range of an MH facility is ordinarily 25 miles.

Compass locators are low-powered non-directional facilities operating in the 200-415 kc. band. They are installed near airports to make it easier for pilots to make instrument approaches. When holding is required, they also help the pilot follow a more precise holding pattern. Compass locators, however, should not be depended upon as long range navigational aids since they are rarely useful at distances of over 15 or 20 miles. These are now shown as "MHW" facilities.

Voice communications facilities are available unless "W" (without voice) is included in the classification. Examples: SMRAW, MRLW, HW, HWT. Transmission of voice on a frequency other than the range frequency is indicated as MRLW-V. When no "W" is included in station class, the "V" indicates voice feature on two frequencies, namely, range frequency, and generally, VHF of 116.1 and/or 111.1 mcs. 116.1 mcs. is used for transmission to Army aircraft, 111.1 mcs. to civil aircraft.

The classification designation "B" denotes that the station broadcasts meteorological and notice to airmen information on a scheduled basis at 15 & 45 minutes past each hour unless otherwise cited.

All Civil Aeronautics Administration stations equipped for voice communications with aircraft stand continuous listening watches on the frequencies of 3105, 4495, and 6210 kcs., unless otherwise cited.

AIRPORT DATA

LEGEND

CLASS

SIZE

40: Length of longest landing strip (unpaved) in hundreds of feet
40h: Length of longest hard-surfaced runway in hundreds of feet (Seaplane landing areas over 5 miles in length are classified as unlimited.)

RADIO

R1: Voice availability via tower, range (or homing device), or voice station
R2: Range (or homing device) and tower
R3: Range (or homing device), tower, and instrument landing system

LIGHTS

L: Incomplete lighting, either flood or portable runway lights
L1: Beacon only
L2: Beacon and boundary
L3: Beacon, boundary, and obstruction
L4: Beacon, boundary, obstruction, and flood
L5: Beacon, boundary, obstruction, flood, and runway contact
(L5): Identical to L5 except that runway contact lights are high intensity
L6: Beacon, boundary, obstruction, flood, runway contact, and instrument approach
(L6): Identical to L6 except that instrument approach lights are high intensity.

(The class always indicates the highest element available, but does not necessarily include all intermediate elements)

SERVICING

S1: Fuel
S2: Fuel, storage
S3: Fuel, storage, minor aircraft repairs
S4: Fuel, storage, minor aircraft, and minor engine repairs
S5: Fuel, storage, major aircraft, and minor engine repairs
S6: Fuel, storage, major aircraft, and major engine repairs

N.B. Very often small civilian fields (particularly in non-metropolitan areas) will have no full-time attendant. Frequently, servicing at such fields in isolated communities is available only by circling the town to attract the operator's attention.

NOTES

1. "Effingham Int., 10, L3-ID" indicates that the airport is Effingham CAA Intermediate Field, Site 10, on the St. Louis-Indianapolis Airway. Municipal airports where the lights are maintained by the CAA are listed similarly except that there is no "Int."
2. "CLOSED" indicates closed to all civil aircraft and all transient military aircraft except on official business this station or in emergency.
3.(a) "TEMP INACTIVE. NO FACS." indicates AAF airfields used either exclusively by the AAF or municipal airfields used jointly by the AAF and civil interests at which both the Army and the civil interests are inactive. Such airfields will be available to military aircraft at the discretion of the Commanding Officer of the organization to which the aircraft is assigned.
(b) "ARMY TEMP INACTIVE. CIVIL FACS." indicates municipal airfields used jointly by the AAF and civil interests at which the Army facilities are inactive but civil facilities are available. Such fields may be used by military aircraft, however, only commercial service is available.
4. "Fld lgts on prior req." indicates field lights are available only by previous phone call, telegram, or letter. It must be remembered that most fields do not have 24-hour operation. When an airport classification indicates a lighted field, without the above modification, the field lights burn all night or will be turned on when a radio request is made or a plane circles the fld.

GCA AVAILABLE: How and Where

GROUND CONTROLLED APPROACH (GCA) AVAILABLE TO CIVIL PILOTS AS WELL AS ARMY AND NAVY: All GCA facilities (Army, Navy, or CAA) are available to any plane in emergency. To secure GCA assistance pilots should call the associated control tower for instructions.

In addition to the working frequencies listed below, Army and Navy GCA emergency VHF transmissions are made on 140.58 mcs. Simplex service on 3117.5 kcs will be provided at all Army and Navy installations to provide an alternate means of communications for scheduled air carrier aircraft. Army and Navy towers will relay GCA instructions on 200-400 kcs band to civil aircraft not equipped to receive VHF or HF.

A minimum of 30 minutes will generally be required to assemble a GCA crew and prepare the equipment for operation AFTER an alert has been received at those locations not providing continuous service.

NOTICES TO AIRMEN
SPECIAL NOTICES

ARMY SPECIAL NOTICES

ARMY DATA: Advice covering Army fields or Army operations on civil fields, or Army radio facilities, and also Air National Guard fields and facilities should be forwarded to Commanding General, Air Transport Command, ATTN.: Flight Operations Division, A-3. Requests for approval of the closing of Army airfields or restrictions in airfield facilities to transient military aircraft for over 10 days should be forwarded to the same address for submittal to Headquarters Army Air Forces, as required. Restrictions in Air National Guard Fields or facilities will be forwarded to the National Guard Bureau through the State Adjutant General for approval. That Bureau will forward approved restrictions to the above address for publishing. Information to be published will be coordinated and submitted to the Civil Aeronautics Administration.

ARMY OFFICIAL BUSINESS: Within the meaning of AAF Regulation 85-2 is interpreted as the necessity for personnel aboard an aircraft to contact personnel, units, or organizations at or near the airfield selected for landing for the purpose of conducting transactions in the service of, and in the interest of, the United States Government. This does not include the use of an airfield by transient aircraft for the purpose of obtaining clearance, service, or other items attendant with itinerant operations. Cross country flights for the purpose of maintaining flying proficiency are not considered to be official business within the meaning of this regulation.

ARMY FOREIGN CLEARING STATIONS: Under the authority of AAF Regulation 61-4, Army aircraft with destinations listed below or returning therefrom to the United States will clear through the stations indicated: AFRICA AND AZORES - Brookley Field, Ala., MacDill Field, Fla., Washington National Airport, D.C., or Westover Field, Mass. ALASKA - McChord Field, Wash., or Great Falls AAF, Mont. BERMUDA - Mitchel Field, N.Y., Brookley Field, Ala., MacDill Field, Fla., Washington National Airport, D.C., or Westover Field, Mass. CANADA - Great Falls AAF, Mont., Brookley Field, Ala., McChord Field, Wash., Washington National Airport., D.C., Selfridge Field, Mich., or Westover Field, Mass. CANAL ZONE, CENTRAL AMERICA, MEXICO, AND SOUTH AMERICA - March Field, Calif., MacDill Field, Fla., Kelly Field, Tex., or Brookley Field, Ala. CARIBBEAN - Brookley Field, Ala., Kelly Field, Tex., or MacDill Field, Fla. ENGLAND, GREENLAND, ICELAND, AND NORTH IRELAND - Washington National Airport, D.C., or Westover Field, Mass. NOVA SCOTIA AND NEWFOUNDLAND - Washington National Airport, D.C., Westover Field, Mass., Selfridge Field, Mich., or Brookley Field, Ala. HAWAII - Fairfield-Suisun AAF, Calif. EUROPEAN THEATER - Brookley Field, Ala., MacDill Field, Fla., Washington National Airport, D.C., or Westover Field, Mass.

✓ Indicates new or revised Special Notices

CLEARANCE OF AAF AIRCRAFT IN NEW YORK CITY AREA: In accordance with notification from Headquarters, Army Air Forces, July 2nd AAF Letter 63-9 has been rescinded and the following instructions will govern the clearance of AAF aircraft in the New York City Area: For clearance purposes into or from the New York City Area (encompassed by a 25 mile radius from the southern tip of Manhattan) CFR is defined as ceiling at least 2000' and the visibility 3 miles or more; IFR when the visibility is not less than one mile and the ceiling is unlimited, or when the ceiling is not less than 5000' and the visibility not less than 2 miles. AAF aircraft flying into the New York City Area may be cleared to any authorized field therein provided weather conditions are not less than those defined above. In all cases in-flight approval from Olmsted Flight Service Center by contacting Olmsted Airways, Rome Airways, Westover Airways, Mitchel Airways, or Ft. Dix Airways must be obtained prior to proceeding to the field of destination. All pilots whose destination is an airfield within the area will indicate on the AAF Form 23 that their flight plan to the field of destination is via any of the 5 stations listed. Flights for which the point of first intended landing is Mitchel Field may be made using normal clearance procedure and restrictions outlined herein are not applicable to that station. Appropriate clearance may be made from a field at which weather conditions meet above specifications even though weather in other sections is below specified minimums. AAF aircraft engaged in regularly scheduled transport flights under the operational control of the Air Transport Command are exempt from these restrictions.

SELECTION OF WEATHER ALTERNATES BY ARMY PILOTS: In accordance with policy stated by the CG, AAF, April 7, 1947, Army pilots are not to be refused IFR clearances because of selection of other than "A,N,NG, or P" fields as an alternate. The selection of an alternate airport is a planned procedure to be resorted to in case of emergency and any suitable airport, military, or civilian, will be accepted for clearance purposes. Concerning this policy, it is pointed out that pilots who do utilize other than "A, N, NG, or P" fields under such circumstances may be called upon to justify their use of same.

V.H.F. CHANNEL ASSIGNMENTS: The following are Army assignments:

Channel	Frequencies	Channel	Frequencies
A	116.1	H	134.10
B	126.18	U	108.3
C	137.88	V	108.7
D	140.58	W	109.1
G	137.70		

REVISION TO ARMY FLIGHT CLEARANCE PROCEDURE: Effective August 15, 1947, within the continental limits of the U.S., flight clearance

procedure is revised as follows: (Conflicting portions of AAF Regulation 15-23 and 60-16 are being rescinded): All written weather data will be eliminated from Form 23. Forecaster will indicate on Form 23 whether the flight should be conducted under IFR or CFR conditions. A verbal briefing consisting of at least the following factors will be given: (1) Existing synoptic situation and terminal forecast for destination, and if required, for alternate. (2) Existing route weather. (3) Location of pertinent hazardous weather areas and recommended procedures for avoiding them. The pilot will certify on Form 23 as follows: "I have been adequately briefed on the current and forecast weather affecting my flight and I understand the weather situation". A written or cross section forecast will be furnished only upon request submitted two hours in advance. At non-AAF bases and AAF bases where no forecaster is on duty, the appropriate Flight Service Center forecaster will brief the pilot verbally over the interphone system or telephone. The Flight Service dispatches will monitor receipt of pilots acknowledgments of adequate weather briefing.

✓ CORRECTIONS FOR AND ADDITIONS TO ARMY T.O. 08-15-1:

(1) Correct page 101, by showing Tonopah AAF, Nev. on page 48 rather than 50.

(2) Correct page 103, X-Band radar beacons listing, by showing the operating agency for Atlanta NAS as USN and under remarks, "On Tower. Altitude 120'; 1,122' asl.", by showing the geographical position of the Seattle facility as 47-44-20 N, 122-13-49W and adding to remarks: "At field. Alt. 145'."

(3) Correct page 48, Tonopah AAF, Nev., by showing class of station as SBRAZ and scheduled weather broadcast from 0700-2300 PST daily.

(4) Correct Danger Area over aerial gunnery, dive bombing and rocket firing range in the vicinity of Ajo, Ariz. See Danger Area item under Ajo, Ariz. for revision.

(5) A circular Danger Areas has been established within a radius of 5 miles centered on glide and dive bombing, strafing and rocket firing target in the vicinity of New Orleans, La., at lat. 30-23, long. 89-34 for use by NAS, New Orleans, La.

NAVY SPECIAL NOTICES

NAVY DATA: In accordance with Hydrographic Office Memorandum for Aviators No. 9, July 29, 1946, Hydrographic Office information concerning naval and marine corps air stations and facilities, including changes in field facilities, operation rules, air/ground communications facilities, instrument approach procedures and navigational aids, should be directed to: The Division of Air Navigation, Hydrographic Office, Washington 25, D.C., for transmittal to the Civil Aeronautics Administration. In accordance with Aviation Circular Letter No. 96-46 of June 13, 1946, approval for the closing of any naval or marine corps air station or facility to transient military aircraft for a period in excess of 10 days must be obtained from the Chief of Naval Operations. Also, approval is to be obtained from the Chief of Naval Operations before relocation or modification of any aid to air navigation, such as reorientation of radio ranges.

V.H.F. CHANNEL ASSIGNMENTS: The following are Navy assignments:

Channel	Navy Frequency	Channel	Navy Frequency
1	116.1	6	134.64
2	142.56	7	143.64
3	126.18	8	142.02
4	128.70	9	142.74
5	143.28	GUARD	140.58

CIVIL SPECIAL NOTICES

CIVIL USAGE OF MILITARY FIELDS: Army and Navy fields are open to civil fliers only in emergency or with prior permission of the commanding officers thereof.

REISSUANCE OF EXPIRED PILOTS CERTIFICATES: 20.550 Reissuance. Any person who on June 30, 1947, held a valid private or commercial certificate and who failed to exchange such certificate in accordance with Section 20.55 of the Civil Air Regulations, may, notwithstanding such failure and without other showing, obtain a pilot certificate with appropriate ratings upon application to the Administrator.

PERSONAL POSSESSION OF PILOT CERTIFICATE: No person shall pilot a civil aircraft within the U.S. unless he holds a valid pilot certificate with appropriate ratings issued by the Administrator or an appropriate and valid foreign pilot certificate. Such certificate shall be in the personal possession of the pilot at all times while piloting aircraft and shall be presented for examination to any inspector of the Administration or State or local law enforcement officer upon the request of such inspector or enforcement officer.

NOTICE TO ALL FLYING PERSONNEL: Because of the increase in aircraft operations, both civil and military, in recent months the number of complaints regarding airplane noise nuisance has reached such proportions that the advancement of aviation and development of new airports are in danger of being severely retarded. To reduce the number of such complaints, it is requested that the following practices be put into effect by all fliers:

(1) Discontinue all unnecessary low flying.

(2) When weather and traffic volume permit, increase altitudes of all traffic patterns that require flight over inhabited areas.

(3) Re-route channels of approach and departure to avoid residential and business districts whenever possible.

(4) If the airport is located near inhabited areas, reduce power and increase pitch of propellers as quickly as possible during take-off so as to keep engine and propeller noises at a minimum.

(5) Keep rpm's set at a minimum required operational setting when low flying over populated areas is necessary.

SEAPLANE OPERATIONS: Because of the possibility of local ordinances or restrictions prohibiting seaplane operations in resort or congested areas, the Administrator has issued the following advice to seaplane operators: (1) Take off as far out from the shore as possible.

(2) Cut the take off run as short as safety permits.

(3) Fly high enough to avoid criticism from residents below, or arrange the flight plan so that you pass over as few houses as possible.

(4) Avoid unecessary " gunning" or racing of the engine.

(5) Explain carefully to those who complain what you are doing to make your airplane a good neighbor.

In the CAA Federal-aid Airport program, we are promoting the use of seaplanes by assisting communities in establishing inexpensive docking and servicing facilities. In view of the high utility value of the seaplane or amphibian, we believe this to be a definite step in the advancement of personal flying in general, Hence, if we are to find acceptance of such facilities, it is up to those pilots who now operate seaplanes to assist us to the utmost by safe and considerate operation of their aircraft.

N.B. The Administrator's admonition was occasioned by numerous complaints received from lake-side residents and vacationists.

SEAPLANE BASE DIRECTORY: A new Seaplane Base Directory, dated June 15, 1947, has been mailed to all seaplane base operators and seaplane owners on record. It is obvious from correspondence received that not all operators and owners received their copies. This is notice, therefore, that any qualified non-recipient may have a copy upon request to: Office of Aviation Information, Attention, A-258, C.A.A., Department of Commerce, Washington 25, D. C.

RADIO TELEPHONE-OPERATION AUTHORIZATION: This is the simple way in which an authorization to operate a radio telephone transmitter in an aircraft is obtained: the applicant appears in any of the Federal Communications Commission Field Offices, or before any CAA flight examiner of the CAA, who has been designated by the FCC to issue the permits, proves he is a U.S. citizen, that he has need of such an authorization, and that he understands the few simple rules and regulations. He is given a card granting the authorization then and there. FCC offices are listed under U.S. Government in phone books, and there are some 30 of them throughout the country. Mostly, they are in downtown offices. There are more than 1,000 CAA designated flight examiners. Mostly they are located at airports. The "examination", if it may be so described, consists of a few questions establishing the ability of the applicant to transmit and understand spoken messages in English, and to understand the simple rules governing the use of such equipment. He is also given simple, printed instructions for its use.

WAIVER OF VHF REQUIREMENT FOR AIRDROME CONTROL STATIONS: The F.C.C. on August 29, 1947, waived the requirement that all airdrome control stations operated under its authority provide a very high frequency service effective September 1, 1947. The waiver was granted because manufacturing difficulties and delays in obtaining materials, caused by factors beyond the control of the Commission and those participating in the oral argument, have materially hindered the procurement program for the equipment necessary to implement this plan. The equipment aspects of this matter must be considered further before a date for complete implementation can be set.

CONTROL TOWER TUNING PRECAUTION: On some aircraft receivers, the channel of 278 kcs. is identified as "tower" on the tuning control nameplates. This is not always correct as many towers transmit on freqs. other than 278 kcs. Reports indicate that some confusion is being created by the failure of pilots to tune their receiver to the tower transmitting freq. when such freq. is other than 278 kcs. It is suggested that pilots use care and make certain that they are tuned to the transmitting freq. of the tower with which they desire to communicate.

V.H.F. IFR FLIGHTS: Until further notice, Air Traffic Control will be exercised on the assumption that aircraft are utilizing intermediate freq. radio ranges. If a pilot desires to conduct IFR flight using VHF ranges over all or a portion of the route, his flight plan should so indicate. Further, flights should not be conducted on civil airways in IFR weather using VHF ranges unless the A.T.C. clearances so authorize.

PRIVATE FLIER V.H.F. FREQUENCIES: All C.A.A. Communications Stations and Towers are discontinuing receiving watches on 131.7 and 131.9 mcs as new equipment becomes available to guard the new private flier frequencies of 122.1 mcs for transmission to CAA Communications Stn. and 122.5 mcs. for transmission to CAA operated towers. Practically all CAA towers now guard 122.5 mcs. but the communications stations program is not fully effective yet because of non-receipt of the new receivers. CAA Communications Stations normally reply to itinerant aircraft on the voice feature of the range, low frequency or VHF, whichever is applicable. Replies are made on 111.1 mcs, if VHF reply has been requested on other than range frequency. CAA airport control towers will reply to itinerant aircraft on one of the frequencies 118.3, 118.5, 118.7, or 118.9 mcs., in addition to towers' low frequencies.

U.S. WEATHER BROADCASTS AND TRANSMISSIONS: The time of observation for all weather reports is 30 minutes after the hour, unless otherwise announced. Pilots enroute are requested to avoid, if possible, calling airway communications stations at or about 15 and 45 minutes past the hour (which are the scheduled broadcast times) to request weather information, as such calls may delay starting of scheduled broadcasts and cause inconvenience to other persons who are dependent on the broadcasts for weather reports.

RADIO TELEPHONE COMMUNICATIONS: The word ROGER in radiotelephone communications means "I have received all of your last transmission", and its use in any other sense by CAA stations and towers is not authorized. In order to avoid confusion it is suggested that pilots engaging in air-ground contacts also limit the use of ROGER to acknowledgment of transmissions.

VFR(Formerly CFR)FLGT PLANS & ARRIVAL REPORTS: VFR flgt plans may be filed with any CAA airways communication station or airway traffic control center. One hour after E.T.A., if no notice of arrival is received, queries are sent out over CAA communication systems. If the arrival report is not received within three hours, search and rescue operations are initiated. Inasmuch as the Government may be put to considerable expense in determining the location of aircraft when an arrival report is not filed, it is vitally necessary that all pilots using this service make certain that notice of arrival is filed with the C.A.A. communications station at the termination of the flight.

To reduce radio congestion, pilots should file VFR flight plans, when required, in person or by telephoning the airways communication station or airway traffic control center. CAA control towers have discontinued accepting VFR flight plans for transmission & will not normally transmit arrival reports except upon the specific request of the pilot. Whenever practicable, however, it is desired that arrival reports be filed in the same manner as flight plans.

✓ CLEARANCE PROCEDURES FOR IFR FLIGHT: Effective Oct. 8, 1947, and concurrent with effective date of C.A.R. 60 as revised, new clearance procedures for IFR flights will be used in the control of Air Traffic.

1. No Air Traffic Control clearance will be issued for flights operated in accordance with visual flight rules except for flights within a control zone as prescribed in C.A.R. 60.2.

2. Flight plans specifying flight in accordance with VFR for a portion of a flight will be accepted at the point of departure. If VFR flight is proposed for the first portion of the flight, the pilot will be advised to request IFR clearance from the appropriate communications station along the route of flight. The pilot must remain in VFR weather conditions until the clearance is received.

3. When a flight plan indicates IFR flight for the first portion of flight and VFR for the latter portion, the aircraft will be cleared to the point at which VFR flight is planned, inasmuch as no clearance is necessary for VFR flight. The pilot is expected to continue his flight without further contact with Air Traffic Control.

4. Standard separation from other IFR traffic will be provided aircraft on IFR flight plans, except (1) when "at least 500' on top" has bee been assigned or authorized by ATC in lieu of a cruising altitude if frequent pilot reports indicate a generally unlimited ceiling on top and a forward visibility of at least three miles. (2) when VFR operation is specified by ATC during climb to cruising altitude, descent from cruising altitude, or change of altitude enroute. If the flight cannot be conducted under VFR conditions when such clearance is received, it is the pilot's responsibility to secure an amended clearance before proceeding IFR. (This revises paragraph carried in Sept. 16th issue, Vol. 2, No. 13)

5. Pilots may cancel IFR flight plans at any time by so notifying ATC provided they are operating in VFR weather conditions when they take such action. Where conditions indicate that the remainder of a flight can be conducted in accordance with VFR, a pilot should avail himself of this procedure to lift the restrictions on his own flight and to simplify the general traffic situation. Caution should be exercized, however, that flight plans not be cancelled when IFR conditions are expected in some subsequent portion of a flight. When a flight plan is cancelled and a new instrument clearance is later requested, priority of handling will be based upon the time of filing the new flight plan.

6. When a flight plan is filed indicating altitude change beyond the control area of the center controlling the point of departure, the flight will be cleared to destination with instructions to maintain the altitude at which the aircraft enters the next control area. The pilot should request further altitude changes enroute. Better service can be given the pilot if an altitude change is requested at the time the change is desired.

This procedure cancels and supersedes the Altitude/CFR procedure now contained in the Flight Information Manual.

AIRPORT LIGHT SIGNALS: Effective October 8, 1947, the following special light signals are prescribed by the Administrator for use at airports in accordance with C.A.R. 60.108 (e): (1) A white rotating airport beacon lighted during daylight hours, or flashing lights on a tetrahedron during the hours of darkness, shall mean the official ground visibility at the airport is less than three miles, and that if the airport is within an airport control zone, a traffic clearance is required for landing, takeoff or flight in the traffic pattern. (2) A flashing amber light at an airport shall mean clockwise flow of traffic is in effect and that right turns shall be made unless otherwise authorized by Air Traffic Control. These special light signals are in addition to those prescribed in the Flight Information Manual for use with a directed portable traffic signal light, and will be included in the next edition.

✓ AIRWAY TRAFFIC CONTROL AREA BOUNDARY REVISIONS:

(1) Effective Oct. 15, 1947, the control boundary between the Minneapolis-Great Falls Area will be relocated to 50 miles E of Miles City on Green Airway #2.

(2) Effective Oct. 15, 1947, the Ft. Worth control boundary on Blue Airway #5 will be extended to 50 miles N of Oklahoma City, Okla.

(3) Effective Oct. 13, 1947, the Denver-Great Falls Control boundary on Amber Airway #3 will be relocated from a point 25 miles SE of Sheridan, Wyo. range station to a point 50 miles SE of Billings, Mont. range station.

✓ FLIGHT ADVISORY AREA BOUNDARY REVISIONS:

(1) Effective Oct. 15, 1947, the Ft. Worth Flight Advisory Area will be extended from 25 miles NE of Gage, Okla to 50 mi. N of Oklahoma City, Okla. thence in a southeasterly direction joining the St. Louis Flight Advisory Area at Ripley, Okla.

(2) Effective Oct. 13, 1947, the Great Falls-Minneapolis Flight Advisory Area Boundary will be relocated as follows: From the U.S.-Canadian Border at 105° 30'W; thence SE through Green Airway #2 at a point 50 miles E of the Miles City, Mont. rng station; thence SW to 105°30'W, 45°N.

(3) Effective Oct. 13, 1947, the Great Falls-Denver Flight Advisory Area Boundary will be relocated as follows: From 105°30'W, 45°N; thence NW through Amber Airway #3 at a point 50 mi. SE of Billings, Mont. rng stn; thence SW to 108°W, 44°N.

✓ FLIGHT INFORMATION MANUAL CORRECTION: Correct Chapter IX, page 114, of the July 1, 1947 issue, under the heading of "Handling of CFR Flight Plans and Arrival Reports", which erroneously states that CFR flight plans are forwarded in the same manner that IFR flight plans are. CFR flight plans are not transmitted.

Upon termination of a CFR flight, the pilot should close out his flight plan. Notice of arrival is then sent over the CAA communications system to the station holding the original flight plan.

✓ AERONAUTICAL CHART AND PUBLICATION CORRECTIONS:

(1) Correct Coast and Geodetic Survey's Radio Facility Chart 16, dated Aug. 19, 1947, by adding 122.1 mcs. to listing for Interstate Airway Communications Station at Strevell, Idaho.

(2) Correct Grand Junction Sectional Aeronautical Chart, by showing the correct spelling of Kanosn as KANOSH.

(3) Correct Denver Sectional Chart, dated Sept. 12, 1947, by showing Thurman VHF range on 108.7 mcs. rather than 188.7 mcs.

TELETYPE NOTAMS: Throughout the year climatic conditions (snow storms, floods, etc.) render many fields temporarily unusable or unsafe. In addition, there are intermittent maintenance operations in progress on many fields. Radio facilities suffer temporary power failures or course misalignments, and lighting facilities are temporarily inoperative. Because these temporary conditions cannot be given immediate coverage in the Airman's Guide, full cognizance must be taken of Teletype Notam service which gives the desired coverage on any facility or field at which teletype transmitting stations are based. Cross-country pilots, accordingly, should consult these Teletype Notams for latest available data on air navigation aids. These teletype notams are posted in CAA Communications Stations and in all Army Air Field and Naval Air Station Operations Offices having teletype drops.

AIRPORT TRAFFIC CONTROL PROCEDURES: (a) Planes with 2-way radio should establish communication with control tower when 15 miles from the airport of destination and before taxiing or taking off.

(b) Planes without receivers, when approaching tower-controlled fields, and before taxiing and taking off, should be on the alert for and be guided by light gun signals. (See AAF Regulation 100-4, dated March 4, 1944, and CAR Digest or Manual 60)

(c) Flashing tetrahedron lights, as well as the daylight operation of rotating beacons, indicate suspension of CFR traffic.

AIRPORT AND RADIO NOTICES

LEGEND

** - New or revised airport, danger area, or miscellaneous data to be added to records.

★ - New or revised radio data to be added to records.

FOREIGN SPECIAL NOTICES

FOREIGN ENTRY PROCEDURES; AIRPORTS OF ENTRY; CUSTOMS REPORTS; CIVIL AIRCRAFT CLEARANCE FOR FOREIGN COUNTRIES: These procedures and regulations were all incorporated into the Flight Information Manual, Vol 2, No. 1, dated July 1, 1947. Only amendments to the data contained in the Manual will hereafter be carried in the Airman's Guide.

FREQUENCIES GUARDED BY U.S. OPERATED OCEAN STATION VESSELS: Effective Aug. 5, 1947, all U.S. operated ocean station vessels in the North Atlantic will guard 118.1 mcs for routine VHF communications with aircraft in lieu of 116.1 mcs. Continuous guard of 140.58 mcs. distress frequency remains unchanged. (9-11)

UNITED KINGDOM MILITARY AIR BASE USAGE: The following United Kingdom Military Air Bases are available to civil air carriers of only U.S. and United Kingdom and to aircraft which were purchased in either the U.S. or the United Kingdom and are in ferry status.

(a) for regular use: Kindley Field, Bermuda; Beane Field, St. Lucia; Coolidge Field, Antigua; and Atkinson Field, British Guiana.

(b) for alternate use· Waller Field, Trinidad; Vernam Field, Jamaica; and Carlsen Field, Trinidad.

Even though the above fields are open to civil air carriers and ferry status planes it is mandatory that the operators of such aircraft secure approval for use of these military air bases from Headquarters, AAF, Washington, D.C., prior to the departure of each flight or series of flights.

INTERNATIONAL RADIOTELETYPE CIRCUITS: Effective May 16, 1947, the following radioteletype circuits were established and in operation at CSY Santa Maria, Azores; WSY New York; EIP Shannon; FXO Paris; NHY Port Lyautey. Inter-island radioteletype link CSY Santa Maria to WYQY Lagens will be continued until further advised. All above circuits are operating in accordance with ICAO Communications Procedures. (9-11)

NAVAL COMMUNICATIONS WITH COMMERCIAL AIRCRAFT IN CARIBBEAN AREA: Effective March 24, 1947, and until further notice, Trinidad NAS, Guantanamo NAS, guard 6515 kcs voice continuously, transmitting and receiving, for communications with commercial aircraft.

LORAN RATE 2H3 on PACIFIC COAST: Effective Sept. 1, 1947, Loran Rate 2H3 on Pacific Coast was placed in continuous operation and signals on this rate may be used for navigational purposes.

NORTH ATLANTIC ROUTE B FREQUENCIES: Effective Aug. 15, 1947, WSY New York activated ICAO North Atlantic Route B frequencies with the exception of 333 kcs. Frequencies guarded are as follows: 6543 kcs. cont., 2912 kcs. between hrs of 0000Z and 0800Z, on request other times, 11306 and 8485 kcs. on request. Transmits on same frequencies. Advice on activation of 333 kcs will be furnished at a later date. Guarding of Route A and C unchanged. (9-4)

PACIFIC OCEAN-Weather Station Communications: Effective July 1, 1947, Pacific Ocean Weather Station FOX discontinued use of 4220 kcs for voice communications with trans-Pacific aircraft and substituted 5165 kcs for this purpose. The following paragraphs of SOP-1-A should be changed in accordance with the above: Section IV: 4 (a); 4 (b); (5) (a)(5); 5 (b); 5 (c)(1); 7 (a).

PACIFIC ICAO PROCEDURES: International Civil Aviation Organization Airway Traffic Control and Communication Procedures were placed into effect in the Eastern Pacific effective Aug. 1, 1947. (9-9)

FOREIGN DATA

AFRICA-Casablanca: Aeronautical fixed telecommunication radio circuits to CNX Marrakech; CND Agadir; CNA Fez; CNC Tangier; CNK Sale; CNU Touhar; FOR Oran; CUZ Lisbon; FNA Algiers; FNW Biscarosua; FOK Dakar; FXO Orly; MRO Bathurst. Landline teletype to CNPL Port Lyautey. CW metar broadcast twice hourly on the hour and half hour on 289 kcs. Guards Route C frequencies plus 333 and 6517 kcs. Transmits Route C freqs plus 327 and 6505 kcs. Direction finding service receives on 333 kcs and transmits on 327 kcs. Radio range and beacon identification "KR", 222 and 403 kc respectively. Tower voice VHF 116.1 mc and 6440 kcs. (9-24).

Dakar: Aeronautical fixed telecommunication radio circuits to ZNT Accra; CNO Casablanca; FXO Orly; CSZ Lisbon. Transmits and receives air-ground freqs. 3285,6510.6563,11319 kcs. Range and beacon identification "YF", freqs. 305, 400 kcs respectively. Direction finding service transmits on 336 kcs, receives on 333 kcs. Tower reported inoperative. (9-24)

Dakar Weather Broadcast: Effective March 24, 1947, station WFG commenced broadcasting Dakar metar hourly at 20 minutes past each hour on 3285 kcs., A1 emission.

Port Lyautey Communications: Effective June 11, 1947, circuit operations NHY Port Lyautey to FOK Dakar and CSZ Lisbon were transferred to station CNO Casablanca. Following civil circuit functions remain in operation NHY Port Lyautey: Circuit 207T Port Lyautey-Santa Maria. Circuit 224 Port Lyautey-Roberts Field, Liberia. 24 hour landline teletype operations connecting NHY Port Lyautey and CNO Casablanca facilitates E and W traffic movements via 207T. Port Lyautey maintains continuous civil air/ground guards on 3285,6563 kcs cont., 11319 kcs from 0600 GMT to 2200 GMT, 8554,6543,6523 kcs. on req. (9-11)

ALASKA-Barter Island: Barter Island MRLW radio range power 50 watts, commissioned Sept. 18th. Ident. "BTI"; frequency 239 kcs. Courses magnetic and towards station, 54°, 144°, 234°, 324°. Distance from range to end of rnwy 5000'; course from range to rnwy 54°. Range operates continuously. Range tower 54' high, obst lgtd, altitude of range bldg. 50'. Courses flight checked Sept. 18th. Altitude of rnwy 8', length 2800', surface gravel. (9-19)

AZORES-Fayal-Radio: Radio beacon call sign CTN. Operates on 333 kcs. days and on req. Air to ground call sign CTN for emergency use only on 6563 and 6577 kcs. (7-3)

Florez-Radio: Radio beacon call sign CF operates from 00 to 05, from 20 to 25 and from 40 to 45. Reliable for homing. (7-3)

Lagens-Radio: Tower operates on 116.1, 126.18 mcs, 2834, 2993 kcs. for cont. transmitting and receiving. Tower on 4220 kcs for emergency and on 5000 kc on req. GP range on 341 kc in cont. operation with legs of 343° and 163° mag., reliable for instrument letdowns if caution is used. DK radio range on 288 kc on cont. operation with legs of 343° and 163° mag., reliable for instrument letdowns if caution is used. Z markers are operating on both ranges. Racon beacon inoperative until further notice. SCS-51 operates cont. between 1730 and 0900Z and on 30 minute request

thereafter on channel Y for rnwy 16 if no glide path operating on channel Y. Localizers not modified in accordance with T.O. 16-1-62. Long range DF on 6543 kc day and ngt transmitting and receiving and receives fixing signal on 6210 kc, call sign: CSE9. Short range DF call sign: CSE7 on 4575 kc operating on req from Lagens tower or CSY at Santa Maria. GCA operates on one hour req on all voice freqs. Crews inbound to Lagens will be cautioned of high terrain on E and W sides of rnwy 34. (9-26) Fld: Due to repairs being made on 2700' on the N end of rnwy 16/34 no GCA landing will be made on rnwy 16 until further notice. (7-3)

Santa Ana-Radio: Radio beacon call sign: BB7, operates cont. on 308 kcs. (7-3)

Santa Maria-Radio: Tower transmits and receives on 116.8 and 126.18 mcs and 2834 kcs. Tower transmits on 278 kc and 118.1 mc. and guards 6440 kc. Radio range operates cont. on 249 kc, call sign: WY. Radio beacon operates on 329 kc., call sign WY. No Z marker on WY range. SCS-51 localizer on channel X on rnwy 19 operates cont. Glide path has resumed operation. Localizer not modified in accordance with T.O. 16-1-62. Santa Airways operates on 3993 kc cont., and on 4220 kc for emerg. Air to ground call sign CSY operates cont. on 6563,12776,3248 and 8538 kc on CW. CSY is ICAO control center for the Azores. All letdowns are to be made on the N and S legs of the WY range. (9-1). Fld: 600 meters of S end of Santa Maria N/S rnwy 01/19 under repairs. Santa Maria NW/SE rnwy 33/15 will be closed effective from Aug. 29 for repairs. The unserviceable portions will be marked by red flags and rnwy lgts crossing the N/S rnwy on the beginning of the serviceable part. (8-29).

BAHAMAS-Flight Clearance: ICAO type flight plans required for all international flights dispatched to Oakes Field Airport and seaplane ports of entry in the Bahamas. IFR flight plans required all flights at night. (9-11)

BRITISH HONDURAS-Belize, Landing of Private Aircraft in Belize: Aircraft intending to land at Belize Airport or on the Belize waterfront should give the Director of Aviation, Belize, B.H., at least 4 hours' advance notice of their intended arrival. Flight plans may be filed for transmission to Belize between the hours of 1400Z and 2400Z through MIAMI-CAA-operated overseas foreign aeronautical communications station. Seaplanes obtain permission prior to departure. Airport open 1300 to 2400Z. No lighting facilities. (9-9)

BRITISH WEST INDIES-Kingston, Jamaica-Montego Bay Airport: Montego Bay Airport is a British-controlled airport now under limited operation by Pan American Airways. It is necessary for all flights departing from Montego Bay for points in the U.S. to file flight plans with the Kingston ATC through the Kingston Communication Station - call letters MRX. Flight plans also must be filed for all flights departing from the U.S. for Montego Bay. They may be filed for transmission to Montego Bay through the CAA-operated Overseas Foreign Aeronautical Communications Station at Miami - call letters WBR, or New Orleans - call letters WEK.

✓ Kingston, Jamaica, Palisadoes Airport Facilities: The Palisadoes Airport is a British Government controlled airport. The Government controlled tower transmits on 397 kcs only, and guards 4495,2870, 3105, and 6210 kcs. It is necessary for all itinerant flights coming to Palisadoes to file Flight Plans from point of departure to the Communication Station at Kingston - call letters MRX. This Flight Plan should be marked for information: Palisadoes Airway Traffic Control. The route frequency 6515 kc, A-1, A-2, A-3 emission off air until further notice. All aircraft guard provided on 6513 kc from 1200-2400 and 3495 kc from 0000-1200Z, A1 emission only. They have good signals on these frequencies and can be read consistently throughout the day and night in the Caribbean Area. Flight Plans may be filed for transmission to Palisadoes through the CAA operated Overseas Foreign Aeronautical Communications Station, WBR, Miami. (9-25)

Trinidad NAS: Effective June 16, 1947, Navy Squadron commenced conducting aerial gunnery from 1300Z to 2000Z daily except Sat. and Sun., until further notice. Surface craft and aircraft remain clear of area, 10° N, 60°45'W, 10°30', 60°45', 10°N, 60°W, 10°30', 60°. (9-9). The marine radiobeacon at Trinidad was discontinued July 10, 1947.

✓ CANADA-Air Harbor #40, Manitoulin Island, Ontario: Marked with International 25' orange triangle, 4' wide. Location: lat. 45°45'00" long. 81°48'30". S end of Manitowaning Bay extending N therefrom. All facilities for visiting aircraft refueling, ramp, etc. (9-11)

✓ Montreal, Quebec: Effective Sept. 5, 1947, operation of ICAO Group C air ground air freqs by stations CYB Dorval were suspended in favor of Group B. All 4 group B freqs. 2912, 6543, 8485, and 11306 kcs manned cont. by CYB. (9-24)

Point Petre, Ontario: Anti-aircraft firing is being conducted periodically during the month of Sept. 1947, at Point Petre, Ont. (approx. position: 43-50-15 N lat., and 77-9 W long.). The danger area extends from the firing point S over water only, and will not exceed 24,000 yds at any point from the firing source. Projectiles will be fired up to a height of 40,000' and during firing periods a black ball of 5' diameter will be hoisted to a height of 25'.

✓ CARRIBEAN AREA-Swan Island: Marine/aeronautical interim signals frequency distress freq. of 7280 kc activated at this station Sept. 23. Radio call: WSG, using A1 transmission with maximum power 3 kw. Continuous guard on this freq. Swan Island H facility operation normal. Swan Island radio range has been converted to Class H facility. Station location marker discontinued. (9-24) Both red course lgts on arwy bcn discontinued. (9-27)

✓ CUBA: Effective Sept. 25, 1947, form of flight plan for aircraft operating into and out of Cuba shall be in accordance with ICAO Standard Flight Plan as follows: Aircraft identification, CMA; type of aircraft, pilots name, point of departure, cruising altitude or altitudes and route, point of first intended landing, TAS, transmitting and receiving frequencies, proposed or actual time of departure, ETE to first landing, alternate or alternates, fuel in hours, any other information necessary for control purposes. (9-23)

✓ Havana, Rancho Boyeros Airport: Effective May 19, 1947, and until further notice, all aircraft operating into and out of the Rancho Boyeros Airport must file a flight plan prior to entering the area. This applies to both IFR and CFR flights. Form of flight plan as follows: Identification; type, route of flight, time of flight departure, time of minutes, altitude, CFR or IFR indicated by C or N respectively and alternate if necessary. Example: NC60459 DC3 Miami Havana 1230 92/60N KW. For trial period and until further advised all flight plans except Expreso and those presently using PAA communications facilities may be forwarded thru

WBR addressed to OAHAV at no charge. (9-9). Effective Sept. 25, 1947, all northbound and southbound traffic departing from or arriving at Rancho Boyeros Airport under IFR conditions shall fly at minimum altitude of 3000' while over the City of Havana. (9-23)

Havana-Columbia Field: Effective Sept. 25, 1947, all eastbound and westbound traffic departing from or arriving at Columbia Field shall observe maximum altitude of 2000' while over Havana under IFR conditions. (9-23)

EIRE-Shannon: Shannon will not bring new B Group of freqs. into operation until additional transmitters, at present being installed, are available. Will continue to guard A and C Groups and transmit on Group A. Notice will be issued upon completion of transmitter installation. Tele EINN.

ENGLAND-Blackbushe Airport: Blackbushe Airport has been approved as a Customs Aerodrome in concurrence with the Commissioners of Customs and Excise.

Hurn Airport: Customs facilities are not now cont. available at Hurn Airport. (This corrects the Air Navigation Directions, 1946 - A.N.D. 16).

London Airport: SCS51 and SBA facilities to be considered out of service as navigational or landing aids. They can be used for holding and let down procedures only until further notice. Because of the possible presence of vehicles within the restricted area of the SCS51 and SBA sites the accuracy of these installations is questionable.

FRANCE-Orly Field, Paris: Orly Tower: Delete 137.88 mc and add 118.1 mc cont. Air ground CW. Call sign: FXO on 6577 kc cont., 3285 kc night and 11319 kc days on req. Delete 8280 kc air ground voice, call sign. Orly Control on 126.18, 116.1 mc., 140.58 mc and 3298.5 kc cont. Delete 4220 kc. VHF/DF call sign Orly D/F on 119.1 mc on req. Delete weather freqs of 3365 and 6625 kc. (9-2)

GREECE-Hassani Airport, Athens, Radio Call: Effective April 30. 1947, call sign WWJC replaced Army call sign WUCW on all circuits formerly using call signs at this station. (9-11)

GREENLAND-Bluie West Eight Airport: No aviation fuel is available at Bluie West Eight Airport until further notice. No aircraft will be cleared into Bluie West Eight Airport without sufficient fuel aboard for return flight.

HAWAII-GUAM ROUTE: It is desired to confine all civil air traffic between Honolulu and Guam to only one route, the Midway-Wake Route. Communications, petroleum and ground services are now available on this route a

ICELAND-Keflavik, Meeks Field: After flight check VT range legs inbound magnetic found to be as follows: W 114°, NW 169°, E 299°, SE 349°.

IRAN-Flight Over: The Iranian Government has made the following announcement effective July 15, 1947: (a) Foreign aircraft flying over Iran from the Western border towards Tehran or back must follow Flight Corridor (A). In case of adverse weather on that corridor, corridor (Aa) may be used as an alternate.

(b) Foreign aircraft flying in transit over the Southern coast of Iran must follow Flight Corridor (B).

(c) Flight Corridors: Corridor (A) Mandali (Iran/Irak Border) Kermanshah - Hamadan - Tehran. Corridor (Aa) Khurramabad - Sultanabad - Qum - Tehran. Corridor (B) Abadan - Bushire - Lingeh - Jask - Chahbar.

(d) Flight of foreign aircraft on any other route over Iranian Territory is prohibited except by special permission from the Director of Civil Aviation. (7-15)

LABRADOR-Goose Bay: Effective Sept. 5, 1947, operation of ICAO Group C air ground air frequencies by Station VOAV at Goose Bay suspended in favor of ICAO Group B. All 4 Group B frequencies 2912, 6543, 8485, 11306 kcs. manned continuously by VOAV. In addition, ICAO Group A freqs. 3285, 6577, 8485, 11319 kcs. are avail. on req. (9-24)

VOAV Goose Bay maintains continuous watch and transmit on freqs. 3248, 6563, 8538, 12776 kcs., but with freqs. 3285,6577, 8554 (receive and transmit) available on request. (9-24)

NETHERLANDS: 49/9 Netherlands Ocean Station Vessel now on Station K position 47.00 N lat., 15.00 W long. Call sign: PIWK. Freqs 333, 500, 6210, 6543, 8485 kcs. guarded cont., 2912 at night only, 11306 kcs. on req. MF/DF non-directional beacon 260 kcs hour plus 5/10 hour plus 20/25 hour plus 35/40 hour plus 50/55. Call sign: BNOS when ship on stn. Airaph Faam. (9-19)

NEWFOUNDLAND-Military and Naval Landings: All military and naval aircraft landing in Newfoundland should use Harmon Field at Stephenville or Naval Operating Base at Argentia. Gander has very limited military facilities and is reserved for commercial and weather diverted military aircraft, or those on official business.

Gander: Gander Metar weather broadcast now in operation on 363 and 5410 kcs simultaneously at hour plus 20 min. and hour plus 50 min. Reception reports on 5410 kcs requested. Effective immediately the dewpoint will be added as a remark at the end of the Metar for Gander, Stephenville, Sydney, and Moncton broadcast by VOAC on 5410 and 363 kcs. at hour plus 20 and hour plus 50. Example: D.P. 47. Tele VOGA.

Gander Airport: Closed to Army aircraft except for emergencies, official business, and weather diversions.

PUERTO RICO-Aguadilla, Borinquen Field: Effective immediately Army Borinquen Field, requests flight plans and other communications on traffic departing from the Washington and New York Control Areas destined WZO, Borinquen be transmitted to WSY, New York for relay to WRW/San Juan.

Arecibo, Santana Airport: Airport operated by Aviation Division, P.R. Transportation Authority. Restricted to daylight CFR operations only. Caution advised for occasional cattle on rnwy. (8-5)

Guyama: Lighted 100' tower has been erected at the following insular police station: Guyama, P.R., at lat. 17-59-06, long. 66-06-39. (9-17)

Humacao: Lighted 100' tower has been erected at the following insular police station: Humacao, P.R., at lat. 18-09-10, long. 65-49-29.(9-17)

Mayaguez, El Mani Airport: Airport operated by Aviation Division, P.R. Transportation Authority Restricted to CFR daylight operations. Taxiway W of terminal bldg closed. Caution advised for taxiing aircraft and persons on rnwy. (8-5)

Ponce, Losey Field: Airport operated by Aviation Division,

P.R. Transportation Authority. E/W rnwy 5000 x 150'. No lighting facs. Estimated wheel load 20,800 lbs. NW/SE rnwy closed. No servicing facs. 80 oct. fuel available in drums. A & E mechanics for minor repairs on fld. (9-12)

San Juan: Effective Aug. 17, 1947, radio station Naui NAF discont. the handling of all communications for civil aircraft both air to ground and point to point except field control tower which will continue operations as heretofore. The CAA began operation of a Civil Overseas Foreign Aeronautical Communications Station on the 2nd Floor of Hangar 20 located on the S side of Isla Grande Airport, San Juan. OFACS air ground freqs. receiving 2870, 3105, 6210, 3117.5,4495,6515 kcs. voice, 3285,6515,6523,8546,11319 kc. CW. Transmitting . 254, 2870,6515 kcs. voice, 3285,6515,6523,8546,11319 kc CW. Call signs: "San Juan Radio". Voice and WRW CW. WRW will handle all authorized communications in the operation of civil aircraft both air to ground and point to point.

San Juan: Vacia Talega Fan Marker, 18 mi. E of San Juan range resumed operation Sept. 24. (9-24)

San Juan-Isla Grande Airport (Formerly U.S. Naval Air Station) Isla Grande Airport. All civil operations are handled by the Aviation Division, P.R. Transportation Authority. Flight plans are required for over water flights to the airport. Cable address: "Autoritan '. (8-5) 80,91,100 oct. avail. Limited storage at present. Repair service by rated A & E mechanics. Spare parts avail. Avail. 24 hrs. daily. (9-23)

San Juan NAF-Radio: Effective Aug. 17, 1947, San Juan NAF discont. guard of 6515 kcs.

San Juan Seadrome Landing Lights: Effective June 9, 1947, the seadrome landing lights were discont. and the landing light buoys were removed from the bay of San Juan at Isla Grande Airport. (8-5)

SCOTLAND-Prestwick: Effective Sept. 5, 1947, Prestwick changed to ICAO North Atlantic Group B air ground freqs as follows: 2912,6543,8485, 11306 kcs. Watch continuing on Group C 3248, transmitting and receiving. Group A receiving only on 3285,6577 kcs. 333 kc not being activated at the present time. (8-29)

URUGUAY-National Airport, Carrasco: Effective June 15, 1947, Air Traffic Control Tower at National Airport, Carrasco discont. its freq. of 2870 kcs., and new freq. of 278 kcs was commissioned. (6-3)

DOMESTIC DATA

ALABAMA

ALEXANDER CITY-RUSSELL FLD: Washes on S edge near W end E/W strip, mrkd. (5-22)

ANDALUSIA-ANDALUSIA ARPT: Bare in spots. Ctn in wet weather. (5-22)

ANNISTON-ANNISTON ARPT: Ends of strips soft in wet weather. (4-29)

ATHENS-ATHENS ARPT: Ctn in wet weather. (5-22)

AERONAUTICAL CHARTS OF THE U. S. COAST AND GEODETIC SURVEY

New editions of the charts listed below will be published in about one month, making former prints obsolete for use in aviation. Orders for these particular charts should be kept to a minimum for immediate requirements. As soon as the charts are available for distribution a second notice will appear in this publication.

Birmingham	Nashville	WAC 406
Chattanooga	Shreveport	FC 188
Cincinnati	Tulsa	FC 220
Kansas City	WAC 361	
Little Rock	WAC 362	

A new edition (or new chart) of the charts listed below which make former prints obsolete is now available for use. Former prints should be destroyed or stamped "OBSOLETE FOR USE IN AVIATION."

NEW EDITIONS

Austin	August 7, 1947.	WAC 468.	July 23, 1947.
Corpus Christi	August 1, 1947.	WAC 469	July 22, 1947.
Denver	September 12, 1947.	WAC 522	July 23, 1947.
Jacksonville	August 15, 1947.	WAC 525	August 11, 1947.
Miami	August 14, 1947.	Miami local	August 23, 1947.
Mobile	August 15, 1947.	Seattle local	August 13, 1947.
Orlando	August 7, 1947.	RF 13	September 5, 1947.
Sacramento	August 22, 1947.	RF 13A	September 5, 1947.
San Diego	August 13, 1947.	RF 20	September 5, 1947.
San Francisco	August 15, 1947.	RF 20A	September 5, 1947.
WAC 466	August 5, 1947.	RF 22	September 5, 1947.
WAC 467	July 31, 1947.	RF 33	September 5, 1947.

NEW CHART

Atlanta local	Atlanta, Georgia	August 14, 1947.

CANCELLED CHART

AL 221

When ordering charts from the U. S. Coast and Geodetic Survey, correct remittances should accompany all orders. Sectional charts, price 25 cents each, should be ordered by name; World Air charts, 25 cents each, by number with prefix (WAC); Approach and Landing charts, 5 cents each, by number with the prefix (AL); Flight charts 25 cents each, by number with the prefix (FC); Direction Finding Charts, 40 cents each, by number and with the suffix as in 22 DF; Local Charts, 25 cents each, by name as Miami Local; and Obstruction Plans, 40 cents each, by number with the prefix (OP). Consult the monthly Dates of Latest Prints of Instrument Approach and Landing Charts for further information concerning I A & L charts and Obstruction Plans.

AERONAUTICAL CHARTS

U. S. Coast and Geodetic Survey

Dates of Latest Prints

Dates in small type indicate minor changes which are not of sufficient importance to make the previous print obsolete. All charts carrying dates older than those shown in large type on this list are obsolete for use in flight.

SPECIAL NOTICE

INTERNATIONAL NOTAMS

Because of the inadequacy of the international notam service given in the Airman's Guide (an inadequacy that stems from a lack of compilation personnel and a coordinated communications round-up system), it will be necessary to discontinue this coverage effective next issue.

Accordingly, until the ICAO notam service is fully implemented the only source of international notams will be the C.A.A. Overseas-Foreign Aeronautical Communications Stations at the following locations:[1]

New York, New York

Miami, Florida

New Orleans, Louisiana

Balboa, Canal Zone

San Francisco, California

Seattle, Washington

Honolulu, Hawaii

Anchorage, Alaska

After this issue the Airman's Guide, under its Foreign Data Section, will cite only special notices or notams of outstanding importance.

[1] These International Notam Offices will cover the areas outlined in the accompanying map.

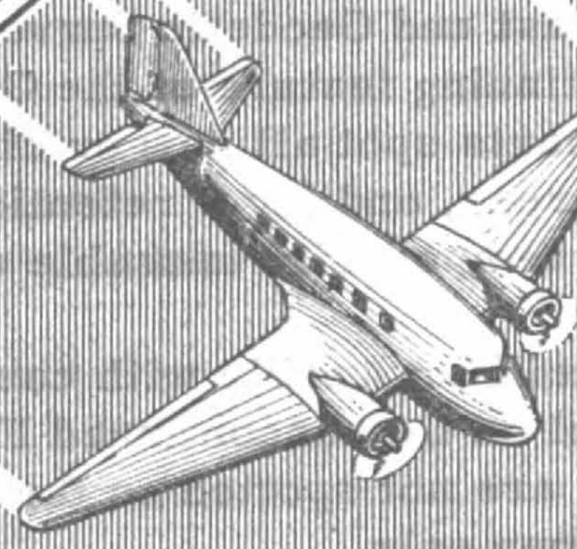
SPECIAL NOTICE

THIS ISSUE CONTAINS A SUPPLEMENT TO THE FLIGHT INFORMATION MANUAL. THE SUPPLEMENT IS ENTITLED "MINIMUM ENROUTE IN-STRUMENT ALTITUDES", WHICH ARE TO BE-COME EFFECTIVE NOVEMBER 29, 1947.



AIR GUIDE

NOTICES TO AIRMEN

VOL. 2, NO. 15. . OCTOBER 14, 1947

This issue includes all data on record as of 0001 E.S.T. on the date above. For later information consult teletype NOTAMS.

U. S. DEPARTMENT OF COMMERCE
CIVIL AERONAUTICS ADMINISTRATION
OFFICE OF AVIATION INFORMATION

SPECIAL NOTICE

NOTAM CHARTS

When the discontinuance of the AIRMAN'S GUIDE Flight Planning Charts and facing Data Pages was announced, personal flying interests demanded compromise charts that would serve as notams to correct the less frequently issued sectionals.

Resultantly, the Coast and Geodetic Survey developed the series of notam charts which will be a continuing feature of the Guide.

These six notam charts spot all new or discontinued airports, radio navigational aids, danger areas, and (by a retention of the Ⓡ symbol) all such airports or aids which are temporarily unusable or usable only with extreme caution.

Airport or radio facilities usable with caution (formerly identified by the Ⓞ, or caution symbol on the discontinued Flight Planning Charts), because of space limitations, are not spotted on the charts. Such facilities are cited in the Notices to Airmen only.

Furthermore, these charts will be cumulative in nature as far as danger areas are concerned. Cumulative, that is, until a sectional chart is revised semi-annually.

Other features, such as new airports or radio aids, will be retained on the notam charts only as long as they are cited in the Notices to Airmen. Such citations are normally carried in only one issue of the Guide. Continuing very hazardous conditions, however, (such as field closed because of construction or radio range inoperative) will be charted as long as they are effective.

LEGEND

● New airport.

✕ New radio navigational aid.

Ⓡ Discontinued airport or radio aid, or one usable only with extreme caution.

AIR NAVIGATION RADIO AIDS

RADIO CLASS DESIGNATIONS

AC..... Approach Control Tower, CAA
B..... Scheduled Broadcast Station (broadcasts weather reports at 15 and 45 minutes after the hour unless otherwise cited).
C..... Control Tower, CAA
CA..... Control Tower, Army
CI..... Control Tower (City, County, Private, etc.)
CN..... Control Tower, Navy
D..... Distantly controlled
FM..... VHF fan type marker (100 watts)
FMHW.... Non-directional radio beacon when combined with fan marker.
GCA..... Ground Controlled Approach Unit
H..... Non-directional radio-beacon (homing), power 50 watts or more
ILS..... Instrument Landing System (voice on localizer channel)
IM..... VHF boundary marker
K..... Independent Compass Locator Station
LFM..... VHF fan type marker, low-powered (5 watts-not over 10 miles from range)
LOR..... Low frequency omni-directional range
MH..... Non-directional radio-beacon (homing), power less than 50 watts
ML..... Range (loop radiators), power less than 50 watts
MM..... VHF middle marker
MMK..... Compass locator station when combined with middle marker of Instrument Landing System
MRA..... Range (Adcock, vertical radiators), power more than 50 less than 150 watts.
MRL..... Range (loop radiators), power more than 50-less than 150 watts
OM..... VHF outer marker
OMK..... Compass locator when installed at outer marker site or within 5.5 miles of middle marker
P..... Point to point radio
RA..... Range (Adcock, vertical radiators), power 150 watts or more
RL..... Range (loop radiators), power 150 watts or more
S..... Simultaneous (range signals and voice) type of transmitter
T..... Teletype
TX..... Principal teletype
V..... Additional voice feature on VHF
VAR..... Visual-asral VHF range (every VAR has simultaneous voice feature)
VOR..... VHF omni-directional range
W..... Without voice facilities
Z..... VHF station location marker at a range station

AIRWAY RADIO COMMUNICATIONS

GENERAL

All radio range stations (class RA, RL, MRA, MRL, ML) emit directional signals (type A2 emission) 1020 cycles per second modulation.

All radio beacon stations (class H and MH) emit non-directional signals (type A2 emission) 1020 cycles per second modulation. Unless otherwise noted, all stations, other than class MH, operate continuously within their assigned hours of service except during interruptions for voice transmission on the same frequencies where simultaneous transmission is not available and during shutdowns for maintenance purposes. Unless otherwise cited, the voice features of Class MH facilities are available continuously, and the homing features are operated on request. The effective range of an MH facility is ordinarily 25 miles.

Compass locators are low-powered non-directional facilities operating in the 200-415 kc. band. They are installed near airports to make it easier for pilots to make instrument approaches. When holding is required, they also help the pilot follow a more precise holding pattern. Compass locators, however, should not be depended upon as long range navigational aids since they are rarely useful at distances of over 15 or 20 miles. These are now shown as "MHW" facilities.

Voice communications facilities are available unless "W" (without voice) is included in the classification. Examples: SMRAW, MRLW, HW, HWT. Transmission of voice on a frequency other than the range frequency is indicated as MRLW-V. When no "W" is included in station class, the "V" indicates voice feature on two frequencies, namely, range frequency, and generally, VHF of 116.1 and/or 111.1 mcs. 116.1 mcs. is used for transmission to Army aircraft, 111.1 mcs. to civil aircraft.

The classification designation "B" denotes that the station broadcasts meteorological and notice to airmen information on a scheduled basis. At 15 minutes past each hour airways reports are broadcast, while at 45 minutes past each hour area reports are broadcast.

All Civil Aeronautics Administration stations equipped for voice communications with aircraft stand continuous listening watches on the frequencies of 3105, 4495, and 6210 kcs., unless otherwise cited.

AIRPORT DATA

LEGEND

CLASS

SIZE

40: Length of longest landing strip (unpaved) in hundreds of feet
40h: Length of longest hard-surfaced runway in hundreds of feet (Seaplane landing areas over 5 miles in length are classified as unlimited.)

RADIO

R1: Voice availability via tower, range (or homing device), or voice station
R2: Range (or homing device) and tower
R3: Range (or homing device), tower, and instrument landing system

LIGHTS

L: Incomplete lighting, either flood or portable runway lights
L1: Beacon only
L2: Beacon and boundary
L3: Beacon, boundary, and obstruction
L4: Beacon, boundary, obstruction, and flood
L5: Beacon, boundary, obstruction, flood, and runway contact
(L5): Identical to L5 except that runway contact lights are high intensity
L6: Beacon, boundary, obstruction, flood, runway contact, and instrument approach
(L6): Identical to L6 except that instrument approach lights are high intensity.

(The class always indicates the highest element available, but does not necessarily include all intermediate elements)

SERVICING

S1: Fuel
S2: Fuel, storage
S3: Fuel, storage, minor aircraft repairs
S4: Fuel, storage, minor aircraft, and minor engine repairs
S5: Fuel, storage, major aircraft, and minor engine repairs
S6: Fuel, storage, major aircraft, and major engine repairs

N.B. Very often small civilian fields (particularly in non-metropolitan areas) will have no full-time attendant. Frequently, servicing at such fields in isolated communities is available only by circling the town to attract the operator's attention.

NOTES

1. "Effingham Int., 10, L5-ID" indicates that the airport is Effingham CAA Intermediate Field, Site 10, on the St. Louis-Indianapolis Airway. Municipal airports where the lights are maintained by the CAA are listed similarly except that there is no "Int."
2. "CLOSED" indicates closed to all civil aircraft and all transient military aircraft except on official business this station or in emergency.
3.(a) "TEMP INACTIVE. NO FACS." indicates AAF airfields used either exclusively by the AAF or municipal airfields used jointly by the AAF and civil interests at which both the Army and the civil interests are inactive. Such airfields will be available to military aircraft at the discretion of the Commanding Officer of the organization to which the aircraft is assigned.
(b) "ARMY TEMP INACTIVE. CIVIL FACS." indicates municipal airfields used jointly by the AAF and civil interests at which the Army facilities are inactive but civil facilities are available. Such fields may be used by military aircraft, however, only commercial service is available.
4. "Fld lgts on prior req." indicates field lights are available only by previous phone call, telegram, or letter. It must be remembered that most fields do not have 24-hour operation. When an airport classification indicates a lighted field, without the above modification, the field lights burn all night or will be turned on when a radio request is made or a plane circles the fld.

GCA AVAILABLE: How and Where

GROUND CONTROLLED APPROACH (GCA) AVAILABLE TO CIVIL PILOTS AS WELL AS ARMY AND NAVY: All GCA facilities (Army, Navy, or CAA) are available to any plane in emergency. To secure GCA assistance pilots should call the associated control tower for instructions.

In addition to the working frequencies listed below, Army and Navy GCA emergency VHF transmissions are made on 140.58 mcs. Simplex service on 3117.5 kcs will be provided at all Army and Navy installations to provide an alternate means of communications for scheduled air carrier aircraft. Army and Navy towers will relay GCA instructions on 200-400 kcs band to civil aircraft not equipped to receive VHF or HF.

A minimum of 30 minutes will generally be required to assemble a GCA crew and prepare the equipment for operation AFTER an alert has been received at those locations not providing continuous service.

NOTICES TO AIRMEN
SPECIAL NOTICES

ARMY SPECIAL NOTICES

ARMY DATA: Advice covering Army fields or Army operations on civil fields, or Army radio facilities, and also Air National Guard fields and facilities should be forwarded to Commanding General, Air Transport Command, ATTN.: Flight Operations Division, A-3. Requests for approval of the closing of Army airfields or restrictions in airfield facilities to transient military aircraft for over 10 days should be forwarded to the same address for submittal to Headquarters Army Air Forces, as required. Restrictions in Air National Guard Fields or facilities will be forwarded to the National Guard Bureau through the State Adjutant General for approval. That Bureau will forward approved restrictions to the above address for publishing. Information to be published will be coordinated and submitted to the Civil Aeronautics Administration.

ARMY OFFICIAL BUSINESS: Within the meaning of AAF Regulation 85-2 is interpreted as the necessity for personnel aboard an aircraft to contact personnel, units, or organizations at or near the airfield selected for landing for the purpose of conducting transactions in the service of, and in the interest of, the United States Government. This does not include the use of an airfield by transient aircraft for the purpose of obtaining clearance, service, or other items attendant with itinerant operations. Cross country flights for the purpose of maintaining flying proficiency are not considered to be official business within the meaning of this regulation.

ARMY FOREIGN CLEARING STATIONS: Under the authority of AAF Regulation 61-4, Army aircraft with destinations listed below or returning therefrom to the United States will clear through the stations indicated: AFRICA AND AZORES - Brookley Field, Ala., MacDill Field, Fla., Washington National Airport, D.C., or Westover Field, Mass. ALASKA - McChord Field, Wash., or Great Falls AAF, Mont. BERMUDA - Mitchel Field, N.Y., Brookley Field, Ala., MacDill Field, Fla., Washington National Airport, D.C., or Westover Field, Mass. CANADA - Great Falls AAF, Mont., Brookley Field, Ala., McChord Field, Wash., Washington National Airport., D.C., Selfridge Field, Mich., or Westover Field, Mass. CANAL ZONE, CENTRAL AMERICA, MEXICO, AND SOUTH AMERICA - March Field, Calif., MacDill Field, Fla., Kelly Field, Tex., or Brookley Field, Ala. CARIBBEAN - Brookley Field, Ala., Kelly Field, Tex., or MacDill Field, Fla. ENGLAND, GREENLAND, ICELAND, AND NORTH IRELAND - Washington National Airport, D.C., or Westover Field, Mass. NOVA SCOTIA AND NEWFOUNDLAND - Washington National Airport, D.C., Westover Field, Mass., Selfridge Field, Mich., or Brookley Field, Ala. HAWAII - Fairfield-Suisun AAF, Calif. EUROPEAN THEATER - Brookley Field, Ala., MacDill Field, Fla., Washington National Airport, D.C., or Westover Field, Mass.

✓ Indicates new or revised Special Notices

CLEARANCE OF AAF AIRCRAFT IN NEW YORK CITY AREA: In accordance with notification from Headquarters, Army Air Forces, July 2nd AAF Letter 63-9 has been rescinded and the following instructions will govern the clearance of AAF aircraft in the New York City Area: For clearance purposes into or from the New York City Area (encompassed by a 25 mile radius from the southern tip of Manhattan) CFR is defined as ceiling at least 2000' and the visibility 3 miles or more; IFR when the visibility is not less than one mile and the ceiling is unlimited, or when the ceiling is not less than 5000' and the visibility not less than 2 miles. AAF aircraft flying into the New York City Area may be cleared to any authorized field therein provided weather conditions are not less than those defined above. In all cases in-flight approval from Olmsted Flight Service Center by contacting Olmsted Airways, Rome Airways, Westover Airways, Mitchel Airways, or Ft. Dix Airways must be obtained prior to proceeding to the field of destination. All pilots whose destination is an airfield within the area will indicate on the AAF Form 23 that their flight plan to the field of destination is via any of the 5 stations listed. Flights for which the point of first intended landing is Mitchel Field may be made using normal clearance procedure and restrictions outlined herein are not applicable to that station. Appropriate clearance may be made from a field at which weather conditions meet above specifications even though weather in other sections is below specified minimums. AAF aircraft engaged in regularly scheduled transport flights under the operational control of the Air Transport Command are exempt from these restrictions.

SELECTION OF WEATHER ALTERNATES BY ARMY PILOTS: In accordance with policy stated by the CG, AAF, April 7, 1947, Army pilots are not to be refused IFR clearances because of selection of other than "A,N,NG, or P" fields as an alternate. The selection of an alternate airport is a planned procedure to be resorted to in case of emergency and any suitable airport, military, or civilian, will be accepted for clearance purposes. Concerning this policy, it is pointed out that pilots who do utilize other than "A, N, NG, or P" fields under such circumstances may be called upon to justify their use of same.

V.H.F. CHANNEL ASSIGNMENTS: The following are Army assignments:

Channel	Frequencies	Channel	Frequencies
A	116.1	H	134.10
B	126.18	U	108.3
C	137.88	V	108.7
D	140.58	W	109.1
G	137.70		

CORRECTIONS FOR AND ADDITIONS TO ARMY T.O. 08-15-1:

(1) Correct page 101, by deleting "(Temp inop for relocation)" after Richmond, Fla., Coast Guard station. This station is now in operation.

(2) Correct page 52, by deleting reference to DF net under MacDill and Morrison Fields. Any other references to this DF net should be deleted.

(3) Correct page 88, Navy GCA. See Navy GCA page 6 of the Airman's Guide for hours of operation of all Navy GCA units.

(4) Correct Danger Areas in the vicinity of Jacksonville, Fla., Minneapolis, Minn. See Danger Area items under Jacksonville, Fla., and Minneapolis, Minn. for rescisions and establishment.

CORRECTION FOR ARMY T.O.-08-15-3: Correct Instrument Appch. Procedure for Brookley Field, Mobile, Alabama, as follows: Initial appch: NE - 1400' (Int. NW leg Pensacola, Fla.); SE - 1300' (Int. SW leg Pensacola, Fla.); SW - 1400' (Biloxi, Miss. Range); NW - 1400' (Int. NE leg Biloxi,Miss.) Final appch course: NW; Procedure turn minimums: 10 mi. 1400' W side NW leg; 15 mi. 1400' W side NW leg; 20 mi.-1500' W side NW leg; 25 mi. 1500' W side NW leg. Min. alt. over range - final approach: 900'; Min. letdown alt. over arpt: 526'; If contact not estab. over arpt: Climb to 1300' on SE leg. (This corrects Airman's Guide, Vol. 2, No. 13, dated September 16, 1947).

NAVY SPECIAL NOTICES

NAVY DATA: In accordance with Hydrographic Office Memorandum for Aviators No. 9, July 29, 1946, Hydrographic Office information concerning naval and marine corps air stations and facilities, including changes in field facilities, operation rules, air/ground communications facilities, instrument approach procedures and navigational aids, should be directed to: The Division of Air Navigation, Hydrographic Office, Washington 25, D.C., for transmittal to the Civil Aeronautics Administration. In accordance with Aviation Circular Letter No. 96-46 of June 13, 1946, approval for the closing of any naval or marine corps air station or facility to transient military aircraft for a period in excess of 10 days must be obtained from the Chief of Naval Operations. Also, approval is to be obtained from the Chief of Naval Operations before relocation or modification of any aid to air navigation, such as reorientation of radio ranges.

VHF CHANNEL ASSIGNMENTS: The following are Navy assignments:

Channel	Navy Frequency	Channel	Navy Frequency
1	116.1	6	134.64
2	142.56	7	143.64
3	126.18	8	142.02
4	128.70	9	142.74
5	143.28	GUARD	140.58

CIVIL SPECIAL NOTICES

CIVIL USAGE OF MILITARY FIELDS: Army and Navy fields are open to civil fliers only in emergency or with prior permission of the commanding officers thereof.

REISSUANCE OF EXPIRED PILOTS CERTIFICATES: 20.550 Reissuance. Any person who on June 30, 1947, held a valid private or commercial certificate and who failed to exchange such certificate in accordance with Section 20.55 of the Civil Air Regulations, may, notwithstanding such failure and without other showing, obtain a pilot certificate with appropriate ratings upon application to the Administrator.

PERSONAL POSSESSION OF PILOT CERTIFICATE: No person shall pilot a civil aircraft within the U.S. unless he holds a valid pilot certificate with appropriate ratings issued by the Administrator or an appropriate and valid foreign pilot certificate. Such certificate shall be in the personal possession of the pilot at all times while piloting arcft and shall be presented for examination to any inspector of the Administration or State or local law enforcement officer. upon the request of such inspector or enforcement officer.

NOTICE TO ALL FLYING PERSONNEL: Because of the increase in aircraft operations, both civil and military, in recent months the number of complaints regarding airplane noise nuisance has reached such proportions that the advancement of aviation and development of new airports are in danger of being severely retarded. To reduce the number of such complaints, it is requested that the following practices be put into effect by all fliers:

(1) Discontinue all unnecessary low flying.

(2) When weather and traffic volume permit, increase altitudes of all traffic patterns that require flight over inhabited areas.

(3) Re-route channels of approach and departure to avoid residential and business districts whenever possible.

(4) If the airport is located near inhabited areas, reduce power and increase pitch of propellers as quickly as possible during take-off so as to keep engine and propeller noises at a minimum.

(5) Keep rpm's set at a minimum required operational setting when low flying over populated areas is necessary.

SEAPLANE OPERATIONS: Because of the possibility of local ordinances or restrictions prohibiting seaplane operations in resort or congested areas, the Administrator has issued the following advice to seaplane operators: "(1) Take off as far out from the shore as possible.

(2) Cut the take off run as short as safety permits.

(3) Fly high enough to avoid criticism from residents below, or arrange the flight plan so that you pass over as few houses as possible.

(4) Avoid unecessary " gunning" or racing of the engine.

(5) Explain carefully to those who complain what you are doing to make your airplane a good neighbor.

In the CAA Federal-aid Airport program, we are promoting the use of seaplanes by assisting communities in establishing inexpensive docking and servicing facilities. In view of the high utility value of the seaplane or amphibian, we believe this to be a definite step in the advancement of personal flying in general, Hence, if we are to find acceptance of such facilities, it is up to those pilots who now operate seaplanes to assist us to the utmost by safe and considerate operation of their aircraft.

N.B. The Administrator's admonition was occasioned by numerous complaints received from lake-side residents and vacationists.

SEAPLANE BASE DIRECTORY: A new Seaplane Base Directory, dated June 15, 1947, has been mailed to all seaplane base operators and seaplane owners on record. It is obvious from correspondence received that not all operators and owners received their copies. This is notice, therefore, that any qualified non-recipient may have a copy upon request to: Office of Aviation Information, Attention, A-258, C.A.A., Department of Commerce, Washington 25, D. C.

RADIO TELEPHONE-OPERATION AUTHORIZATION: This is the simple way in which an authorization to operate a radio telephone transmitter in an aircraft is obtained: the applicant appears in any of the Federal Communications Commission Field Offices, or before any CAA flight examiner of the CAA, who has been designated by the FCC to issue the permits, proves he is a U.S. citizen, that he has need of such an authorization, and that he understands the few simple rules and regulations. He is given a card granting the authorization then and there. FCC offices are listed under U.S. Government in phone books, and there are some 30 of them throughout the country. Mostly, they are in downtown offices. There are more than 1,000 CAA designated flight examiners. Mostly they are located at airports. The "examination ', if it may be so described, consists of a few questions establishing the ability of the applicant to transmit and understand spoken messages in English, and to understand the simple rules governing the use of such equipment. He is also given simple, printed instructions for its use.

CONTROL TOWER TUNING PRECAUTION: On some aircraft receivers, the channel of 278 kcs. is identified as "tower" on the tuning control nameplates. This is not always correct as many towers transmit on freqs. other than 278 kcs. Reports indicate that some confusion is being created by the failure of pilots to tune their receiver to the tower transmitting freq. when such freq. is other than 278 kcs. It is suggested that pilots use care and make certain that they are tuned to the transmitting freq. of the tower with such they desire to communicate.

V.H.F. IFR FLIGHTS: Until further notice, Air Traffic Control will be exercised on the assumption that aircraft are utilizing intermediate frequency radio ranges. If a pilot desires to conduct IFR flight using VHF ranges over all or a portion of the route, his flight plan should so indicate. Further, flights should not be conducted on civil airways in IFR weather using VHF ranges unless the A.T.C. clearances so authorize.

PRIVATE FLIER V.H.F. FREQUENCIES: All C.A.A. Communications Stations and Towers are discontinuing receiving watches on 131.7 and 131.9 mcs. as new equipment becomes available to guard the new private flier frequencies of 122.1 mcs for transmission to CAA Communications Stations and 122.5 mcs for transmission to CAA operated towers. Practically all CAA towers now guard 122.5 mcs but the communications stations program is not fully effective yet because of non-receipt of the new receivers. CAA Communications Stations normally reply to itinerant aircraft on the voice feature of the range, low frequency or VHF, whichever is applicable. Replies are made on 111.1 mcs, if VHF reply has been requested on other than range frequency. CAA airport control towers will reply to itinerant aircraft on one of the frequencies 118.3, 118.5, 118.7, or 118.9 mcs., in addition to towers' low frequencies.

U.S. WEATHER BROADCASTS AND TRANSMISSIONS: The time of observation for all weather reports is 30 minutes after the hour, unless otherwise announced. Pilots enroute are requested to avoid, if possible, calling airway communications stations at or about 15 and 45 minutes past the hour (which are the scheduled broadcast times) to request weather information, as such calls may delay starting of scheduled broadcasts and cause inconvenience to other persons who are dependent on the broadcasts for weather reports.

RADIO TELEPHONE COMMUNICATIONS: The word ROGER in radiotelephone communications means "I have received all of your last transmission", and its use in any other sense by CAA stations and towers is not authorized. In order to avoid confusion it is suggested that pilots engaging in air-ground contacts also limit the use of ROGER to acknowledgment of transmissions.

TWO-WAY RADIO FAILURE PROCEDURES: In the event of failure of two-way radio communication between an aircraft and the ground, the pilot will observe one of the following procedures:

(a) If operating under VFR conditions, proceed under VFR and land as soon as practicable, or

(b) Proceed according to the latest air traffic clearance.

If the pilot proceeds according to the latest traffic clearance but has not received and acknowledged a clearance to the tower and if other instructions to the contrary are not received, he shall be expected to observe the following

and control will be effected accordingly:

(1) If the pilot has received and acknowledged a clearance to the destination airport or the radio facility serving that point, he shall continue flight at the altitude (s) last assigned by Air Traffic Control, or the minimum instrument altitude, whichever is the higher, to the radio facility serving the destination airport.

(2) If the pilot has received and acknowledged a clearance to a point other than the destination airport or the radio facility serving the destination airport, he shall continue flight at the altitude(s) last assigned by Air Traffic Control or the minimum instrument altitude, whichever is the higher, to the radio facility serving the destination airport.

(3) If holding instructions have been received, the pilot shall comply with these instructions until such time as it will be necessary to continue flgt. so as to arrive at the radio facility serving the destination airport at the expected approach time last received and acknowledged, maintaining the last assigned altitude or the minimum instrument altitude, whichever is the higher

(4) If holding instructions have been received, but no expected appch time has been received, the pilot shall comply with these instructions until the time Air Traffic Control has specified that further clearance may be expected. He shall then continue, maintaining the last assigned altitude or the minimum instrument altitude, whichever is the higher.

NOTE: The minimum instrument altitude referred to is the minimum established for that portion of the route over which the operation is conducted regardless of the direction of flight.

Approach: Descent from the altitude maintained to the radio facility serving the destination airport shall be made on the final approach course and shall start at the expected approach time last received. If no expected approach time was received, descent shall be started at the last estimated arvl time specified by the pilot, or as soon as possible thereafter. A full standard instrument approach should be executed unless a VFR approach can be made.

If a clearance to the tower at the airport of intended landing has been received and acknowledged, the pilot shall be expected to comply with any special instructions contained in the clearance and make normal descent for landing.

NOTE: Air Traffic Control may issue appropriate instructions to be broadcast "blind" over air carrier radio facilities (for air carrier aircraft), and over suitable radio range facilities. Instructions must not be broadcast unless Air Traffic Control authorizes such broadcast.

VFR (Formerly CFR) FLIGHT PLANS AND ARRIVAL REPORTS: VFR flight plans may be filed with any CAA airways communication station or airway traffic control center. One hour after E.T.A., if no notice of arrival is received, queries are sent out over CAA communications systems. If the arrival report is not received within 3 hours, search and rescue operations are initiated. Inasmuch as the Government may be put to considerable expense in determining the location of aircraft when an arrival report is not filed, it is vitally necessary that all pilots using this service make certain that notice of arrival is filed with the CAA communications station at the termination of the flight.

To reduce radio congestion, pilots should file VFR flight plans, when required, in person or by telephoning the airways communication station or airway traffic control center. CAA control towers have discontinued accepting VFR flight plans for transmission & will not normally transmit arrival reports except upon the specific request of the pilot. Whenever practicable, however, it is desired that arrival reports be filed in the same manner as flight plans.

CLEARANCE PROCEDURES FOR IFR FLIGHT: Effective Oct. 8, 1947, and concurrent with effective date of C.A.R. 60 as revised, new clearance procedures for IFR flgts are being used in the control of Air Traffic.

1. No Air Traffic Control clearance will be issued for flights operated in accordance with visual flight rules except for flights within a control zone as prescribed in C.A.R. 60.2.

2. Flight plans specifying flight in accordance with VFR for a portion of a flight will be accepted at the point of departure. If VFR flight is proposed for the first portion of the flight, the pilot will be advised to request IFR clearance from the appropriate communications station along the route of flight. The pilot must remain in VFR weather conditions until the clearance is received.

3. When a flight plan indicates IFR flight for the first portion of flight and VFR for the latter portion, the aircraft will be cleared to the point at which VFR flight is planned, inasmuch as no clearance is necessary for VFR flight. The pilot is expected to continue his flight without further contact with Air Traffic Control.

4. Standard separation from other IFR traffic will be provided aircraft on IFR flight plans, except (1) when "at least 500' on top" has been assigned or authorized by ATC in lieu of a cruising altitude if frequent pilot reports indicate a generally unlimited ceiling on top and a forward visibility of at least three miles. (2) when VFR operation is specified by ATC during climb to cruising altitude, descent from cruising altitude, or change of altitude enroute. If the flight cannot be conducted under VFR conditions when such clearance is received, it is the pilot's responsibility to secure an amended clearance before proceeding IFR. (This revises paragraph carried in Sept. 16th issue, Vol. 2, No. 13)

5. Pilots may cancel IFR flight plans at any time by so notifying ATC provided they are operating in VFR weather conditions when they take such action. Where conditions indicate that the remainder of a flight can be conducted in accordance with VFR, a pilot should avail himself of this procedure to lift the restrictions on his own flight and to simplify the general traffic situation. Caution should be exercized, however, that flight plans not be cancelled when IFR conditions are expected in some subsequent portion of a flight. When a flight plan is cancelled and a new instrument clearance is later requested, priority of handling will be based upon the time of filing the new flight plan.

6. When a flight plan is filed indicating altitude change beyond the

control area of the center controlling the point of departure, the flight will be cleared to destination with instructions to maintain the altitude at which the arcft enters the next control area. The pilot should request further altitude changes enroute. Better service can be given the pilot if an altitude change is requested at the time the change is desired.

This procedure cancels and supersedes the Altitude/CFR procedure now contained in the Flight Information Manual.

✓ JACKSONVILLE AIR ROUTE TRAFFIC CONTROL CENTER: Jacksonville Air Route Traffic Control Center will be responsible for that portion of the New York Ocean Area lying within the following limits: from the E coast of the U.S. at 34°30' N lat., E along 34°30' N lat., to a point 100 nautical miles from the shore line; thence along a southward line measured 100 nautical miles equi-distance from the shore line to its intersection with the 78th meridian; thence S along the 78th meridian to the 30th parallel; thence W along the 30th parallel to the E coast of the U.S., and thence N along the eastern shore line of the U.S. to 34°30' N lat. Flight plans for and position reports on aircraft enroute to or operating in this area shall include "ATC KJXE" as address for Jacksonville Air Route Control Center in addition to other required addressee. (10-7)

✓ RELOCATION OF AIR ROUTE TRAFFIC CONTROL AREA BOUNDARIES: (1) Effective Oct. 13, 1947, the relocation of the Oakland-Seattle Air Route Traffic Control Area boundary on Amber Airway #1 from a point 25 miles S to a point 10 mi. S of Ft. Jones, Calif. range stn was approved.

(2) Effective Oct. 15, 1947, the location of control boundaries between the following Air Route Traffic Control Areas will be changed as follows:

(a) Denver-Albuquerque boundary to 25 mi. N of Trinidad range stn on Amber Airway #3.

(b) Denver-Great Falls boundary to 50 mi. SE of Billings, Mont. on Amber Airway #3

(c) Kansas City-Denver boundary to 50 mi. NW of Salina, Kans. range station on Red Airway #1.

(d) Kansas City-Denver boundary to 75 mi. E of La Junta, Colo. range stn on Red Airway #35.

(e) St. Louis-Kansas City boundary to 50 miles N of Joplin, Mo. range stn on Blue Airway #13.

(f) New Orleans-Jacksonville boundary to 50 mi. E of Crestview, Fla. range stn on Red Airway #30.

(g) New Orleans-Atlanta boundary to 50 mi. SW of Maxwell Field, Ala. range stn on Green Airway #6.

✓ FLIGHT ADVISORY AREA BOUNDARY RELOCATIONS:

(1) Effective Oct. 13, 1947, the Oakland-Seattle Flight Advisory Area boundary was relocated and described as follows: From the Pacific coastline at 41°N; thence E through Amber Airway #1 at a point 10 mi SSE of Ft. Smith, Calif. range stn; thence E through Amber Airway #8 at a point 25 mi. NNE of Whitmore, Calif. range stn; thence E to a point at 117°30'W-41°N.

(2) Effective Oct. 15, 1947, the New Orleans-Jacksonville Flight Advisory Area boundary will be relocated and described as follows: From the Fla. coast at long. 86°W to 50 mi. E of Crestview, Fla. on Red Airway #30 thence to 25 mi. NW of Dothan, Ala. on Blue Airway #3.

(3) Effective Oct. 15, 1947, the New Orleans-Atlanta Flight Advisory Area boundary will be relocated and described as follows: From a point 25 miles NW of Dothan, Ala. on Blue Airway #3 to 50 miles S of Maxwell Fld. on the proposed direct airway, Maxwell Field-Crestview, thence to 50 mi. SW of Maxwell Field on Green Airway #6, thence to long. 87°30' W on a direct line to a point 25 mi. S of Jackson, Miss., thence to 25 mi. SW of Birmingham Ala., on Red Airway #10.

(4) Memphis and New Orleans: Change to coincide with those outlined above.

✓ AERONAUTICAL CHART AND PUBLICATION CORRECTIONS:

(1) Correct Coast and Geodetic Survey's Radio Facility Chart Legend page by describing the Radio Fixes as follows:

(Green dot) DESIGNATED REPORTING POINT - Flight progress report is required.

(Red dot) ON-REQUEST REPORTING POINT - Report when cleared to or instructed to hold at this point by ATC. Report at other times upon request.

(2) Correct WAC 649, dated June 1947, by changing the identification for Vacia Talega Fan Marker to two dashes; identification for Barceloneta Fan Marker four dashes.

(3) Correct Coast and Geodetic's Radio Facility Chart 8, dated June 26, 1947, by showing Helena, Mont. Tower as guarding 3105,3117.5,4495,6210 kc.

(4) Correct Coast and Geodetic's Radio Facility Chart 13A, dated Sept. 5, 1947, and Boston Sectional Aeronautical Chart, dated July 23, 1947, by adding the following data: Boston, Mass., Logan Tower equipped to transmit and guard frequency of 121.9 mcs.

(5) Correct Coast and Geodetic's Radio Facility Chart 31, under Aids to Navigation, by adding the following: Lynchburg INSAC guards 122.1 mcs.; under Tower show Lynchburg, Preston Glenn Airport transmitting on 121.9 mcs. and guarding 122.5 mcs.

WEATHER REPORTING SERVICE

Chesapeake Lightship	6-Hourly	36-59,75-42		Inaug'd.

NOTE: Airway terminal forecasts inaugurated for Muskogee, Oklahoma.

TELETYPE NOTAMS: Throughout the year climatic conditions (snow storms, floods, etc.) render many fields temporarily unusable or unsafe. In addition, there are intermittent maintenance operations in progress on many fields. Radio facilities suffer temporary power failures or course misalignments, and lighting facilities are temporarily inoperative. Because these temporary conditions cannot be given immediate coverage in the Airman's Guide, full cognizance must be taken of Teletype Notam service which gives the desired coverage on any facility or field at which teletype transmitting stations are based. Cross-country pilots, accordingly, should consult these teletype notams for latest available data on air navigation aids. These teletype notams are posted in CAA Communications Stations and in all Army Air Field and Naval Air Station Operations Offices having teletype drops.

AIRPORT TRAFFIC CONTROL PROCEDURES: (a) Planes with 2-way radio should establish communication with control tower when 15 miles from the airport of destination and before taxiing or taking off.

(b) Planes without receivers, when approaching tower-controlled fields, and before taxiing and taking off, should be on the alert for and be guided by light gun signals. (See AAF Regulation 100-4, dated March 4, 1944, and CAR Digest or Manual 60).

(c) Flashing tetrahedron lights, as well as the daylight operation of rotating beacons, indicate suspension of CFR traffic.

AIRPORT AND RADIO NOTICES

LEGEND

** - New or revised airport, danger area, or miscellaneous data to be added to records.

★ - New or revised radio data to be added to records.

FOREIGN SPECIAL NOTICES

✓ INTERNATIONAL NOTAMS: The only source of international notams is the C.A.A. Overseas Foreign Aeronautical Communications Stations at the following locations: New York, N.Y.; Miami, Fla.; New Orleans, La.; Balboa, Canal Zone; San Francisco, Calif.; Seattle, Wash.; Honolulu, Hawaii; Anchorage, Alaska.

FOREIGN ENTRY PROCEDURES; AIRPORTS OF ENTRY; CUSTOMS REPORTS; CIVIL AIRCRAFT CLEARANCE FOR FOREIGN COUNTRIES: These procedures and regulations were all incorporated into the Flight Information Manual, Vol 2, No. 1, dated July 1, 1947. Only amendments to the data contained in the Manual will hereafter be carried in the Airman's Guide.

UNITED KINGDOM MILITARY AIR BASE USAGE: The following United Kingdom Military Air Bases are available to civil air carriers of only U.S. and United Kingdom and to aircraft which were purchased in either the U.S. or the United Kingdom and are in ferry status. (a) for regular use: Kindley Field, Bermuda; Beane Field, St. Lucia; Coolidge Field, Antigua; and Atkinson Field, British Guiana.

(b) for alternate use: Waller Field, Trinidad; Vernam Field, Jamaica; and Carlsen Field, Trinidad.

Even though the above fields are open to civil air carriers and ferry status planes it is mandatory that the operators of such aircraft secure approval for use of these military air bases from Headquarters, AAF, Washington, D.C., prior to the departure of each flight or series of flights.

DOMESTIC DATA

ALABAMA

ALEXANDER CITY-RUSSELL FLD: Washes on S edge near W end E/W strip mrkd. (5-22)
ANDALUSIA-ANDALUSIA ARPT: Bare in spots. Ctn in wet weather.(5-22)
ANNISTON-ANNISTON ARPT-Ends of strips sbft in wet weather. (4-29)
ATHENS-ATHENS ARPT: Ctn in wet weather. (5-22)
BARIN NAAS EAST AND WEST FLDS (FOLEY): Closed to trans. (5-6)
BIRMINGHAM-BIRMINGHAM ARPT: Closed to civil acft not equipped with operating rcvr. Landing on sod areas approved by twr in dry weather, unsafe in wet weather. Ctn ngts or under IFR, plant S of fld has long taxi and parking strips resembling rnwys. Soon, Bartow type N approach lgt lane will be comm beginning at N end of N/S rnwy and extending 1800' to the N to be operated on req or when considered necessary by arpt traffic controller. (10-2)
BIRMINGHAM-CENTRAL PARK ARPT-Avail. lgt acft in all weather.(5-22)
BIRMINGHAM-ROBERTS FLD: S side fld avail. during wet weather.(5-22)
BREWTON-BREWTON ARPT, new-Cattle on fld. (5-22)
BRIDGEPORT-ALA-TENN-GA ARPT: Ctn in wet weather. (5-22)
BROOKLEY FLD (MOBILE): Soft-use rnwys, taxi strips only. Ltd gas avail. trans acft on off. bus. destination Brookley Fld on written orders, others orders not accepted. (8-27)
CENTRE-CENTRE ARPT: NNW/SSE strip closed. N side E/W strip rough in wet weather. Avail. lgt acft only. (4-29)
CRAIG FLD (SELMA): Bndry lgts inop. (5-29)
CULLMAN-CULLMAN ARPT: Soft in wet weather. (5-22)
DECATUR-BEAVER DAM FLD-Soft after rainy weather. (5-22)

ALABAMA

DECATUR-FLINT CREEK ARPT: Soft after rainy weather. (5-22)
DECATUR-PRYOR FLD: Rough spots around wind sock, mrkd. (5-22)
DEMOPOLIS-BOYKIN FLD-Cattle on fld. (5-22)
**DOTHAN-DOTHAN ARPT: Ctc lgts avail. on req only. (10-5). 310' obst lgtd rdo twr erected 12 mi NW (299° true) at lat. 31-19-05, long. 85-37-00 (9-19)
DOTHAN-NAPIER FLD: Avail. civil acft in emerg only. (7-3)
EUFAULA-WEEDON FLD: Trees in W approach. (5-22)
EUTAW-EUTAW ARPT: Use only NW/SE strip. (4-17)
FAYETTE-FAYETTE ARPT: Avail. only lgt acft during wet weather. Trees and fone line at W end. (5-22)
FOLEY-OAK ARPT: W end E/W, N end N/S strips soft in wet weather. (5-22)
FORT PAYNE-DAVENPORT ARPT: Muddy in wet weather. S end rough. (5-22)
GADSDEN-GOODYEAR FLD: Soft in wet weather. Lgt acft land with ctn. (5-22)
GASTONBURG-STROTHER FLD: PRIVATE. Cattle on fld. (5-22)
GREENVILLE-GREENVILLE ARPT, SITE 24, NO-AG: Soft after rains around arpt circle on N/S strip. (5-22)
GUNTER FLD (MONTGOMERY): Closed to all trans acft. Use Maxwell Fld. (6-24)
GUNTERSVILLE-GUNTERSVILLE DAM ARPT: Soft spots at ends. (5-22)
HARTSELLE-HARTSELLE ARPT: Use W side fld. Avoid E side. E half of strip has small depressions extending from S end for approx 600' toward the N. Small area at SW portion fld soft after rains. (5-22)
HUNTSVILLE-HUNTSVILLE ARPT: Sod strip rough at rnwy crossings. Ngt approaches use ctn-hills NE,S,E. (4-29)
JACKSON-McKEE FLD: Soft after rains. Not licensed. Use at own risk. (5-22)
JASPER-WALKER CO. ARPT: Land inside of bndry mrkrs. Avoid new landing strip now being graded. (5-22)
LANETT-VALLEY AIR SERVICE: Soft after rains. (5-22)
LIVINGSTON-JACKSON FLD: Rolling and slightly rough. Soft spots along N side at SW end. (5-22)
LUVERNE-LUVERNE ARPT: Ctn in wet weather. (5-22)
MAXWELL FLD (MONTGOMERY)-RADIO: Army GCA unit is operational, subject to completion of final check and concurrence of base commander. Check NOTAMS for effective date. (10-13) FLD: At ngt or under IFR conditions large depot 1 mi S looks like arpt and lgts give impression of parallel rnwys. (10-17)
MOBILE-BATES FLD: N/S rnwy lgts inop. (8-26)
MONROEVILLE-LEGION FLD: Do not confuse golf course fairways with landing strips. (5-22)
MONTGOMERY-ALLENPORT ARPT: Muddy after rains-ctn. (5-22)
MONTGOMERY-NORMAN BRIDGE ARPT: Muddy after rainy weather. (5-22)
★MUSCLE SHOALS-RADIO: Stn now grds 3105,4495,6210,3117.5 kcs, 116.1, 122.1 mcs. (10-2)
ONEONTA-ONEONTA ARPT: N 800' strip soft, wet, rough. Unserviceable in wet weather. (4-29)
PRICHARD-CHASTAIN'S ARPT: Soft after rains. Shallow dip near center of E/W strip. (5-22)
RUSSELLVILLE-WOOD-DEARING ARPT: Muddy in wet weather: lgt acft land with ctn. (5-22)
SCOTTSBORO-NORTH SAUTY BASE: SSE end soft in wet weather. (5-22)
SCOTTSBORO-SCOTTSBORO FLYING SERVICE: Soft in extremely wet weather. Rough spots on SE corner. (5-22)
TALLADEGA-TALLADEGA ARPT: N 700' N/S strip soft in wet weather. (5-22)
TUSCALOOSA-VAN DE GRAAFF ARPT, SITE 59, FV-AG: Heavy acft avoid extreme NW and SW corners of fld after heavy rains. (6-3)
TUSKEGEE-MOTON FLD: Use with ctn in wet weather. Soft and rutted spots along E side. (5-22)
WINFIELD-WINFIELD ARPT: S end N/S strip soft in wet weather. (5-22)

ARIZONA

★DAVIS-MONTHAN FLD (TUCSON)-RADIO: Army GCA training fac is now in oper from 0800 - 1700 Mon thru Fri on VHF commun channels A,B,C, D,G,H. Transmits on 3475, 4890, 6640, 3105, 6210, 4495 kcs. Rcvs 1500-18000 kcs on req and will guard 4495, 6210 kcs. Emerg. commun freq 3117.5 kcs is avail. (10-13). These data rvcd too late for inclusion on GCA page. FLD: E fld closed-acft parked on rnwys. Blinding ceilometer W end fld between ends of NW/SE, E/W rnwys. SAC acft under off. orders will be given full svcg; acft of other commands will be given sufficient fuel for flgt to next fuel stop plus rqrd reserve. Obst lgt inop on 75' pole SE control twr. Former taxi strips 12R and 30L are now open as Rnwys 12R and 30L to be used by lgt acft and rstd to day opers only. (9-24)
**GILA BEND AAF (GILA BEND): Correct coordinates: lat 32-53-15, long. 112-43-15. (10-7) Maj obsts S fld lgtd. (7-21)
GILBERT-GILBERT AUX FLD #1: Closed to all acft-used for tow target dropping. Hazardous objects on fld. (7-31)
GOODYEAR-GOODYEAR AUX FLD #2: Closed to all acft-used for tow target dropping. Hazardous object on fld. (10-9)
KINGHAM AAF (KINGMAN): Closed to all flying. No obst lgts atop Haulpai Mtn. 8500' MSL, 11 mi S. (7-3)
LITCHFIELD PARK NAF (LITCHFIELD): No landings permitted later than one half hr before sunset without prior approval from C.O. No ngt opers. (3-13)
LUKE FLD (PHOENIX): Traffic direction indicator on second hangar from N inop. Traffic direction indicator S end N/S fnwy free-swinging. (1-7)
MESA-OASIS ARPT: W end E/W, SW end NE/SW strips unsafe for a distance of 500' (ditches across ends)(7-24)
PHOENIX-RADIO: Visual courses of VHF rng not monitored. (8-18). Freq. 108.3 mcs, ident. "PH".
PHOENIX: Inst. training on Phoenix Rng between 5500' and 9500'.
PHOENIX-SKY HARBOR ARPT: Local ngt flying acft must be equipped with 2-way rdo. Equip. near Rnwy 12. Installation of ILS in progress off end of Rnwys 26 and 8. (5-25)
PHOENIX-THUNDERBIRD ARPT #2: Use strips only (parked acft).
SALOME-SALOME INT, SITE 27B, LA-PH: E/W strip hazardous, but usable

[redacted]

with ctn. Sides washed by hvy rains. Damaged portions mrkd. N/S strip avail. (8-11)

TEMPLE BAR-TEMPLE BAR ARPT: Unsafe (soft). (6-25)

TUCSON-DOWNTOWN ARPT: Rnwy 30 lgtd ngts for 2 weeks per month from 1900 to 2300 for pilot training. Only obst lgts are those in line with lgtd rnwy. All ngt training figts will operate S of arpt. (5-27)

TUCSON-GILPIN ARPT: Acft desiring to use this arpt after dark shall notify office 2 hrs in advance in order that lgts may be made avail. (9-15)

TUCSON-RYAN FLD: Suitable for landing by all lgt acft up to and including Twin Engine Cessna, AT6, etc. Hvy acft use rnwys in wet weather.(4-28)

WILLIAMS FLD (CHANDLER)-RADIO: Army rng unreliable and to be used for training only. (9-12) FLD: Use rnwys only. Exten rnwy repairs being conducted. All acft use ctn from 1200M Fri until 0800M Mon each week. No fuel avail. trans acft. (8-20)

WINSLOW-RADIO: Visual-aural rng stn operates unattended or without means of remote monitor. Freq. 108.7 mcs, ident. "WO".

**WINSLOW-WINSLOW ARPT: 80,91,100 oct. (10-10) Acft with rdo ctc Winslow Rdo for lgts. Non-rdo equipped acft circle arpt and flash navigation lgts when rnwy lgts rqrd. Neon approach lgts inop. (9-29)

YUMA-YUMA CO. ARPT: Bndry lgts inop. (9-23)

[redacted]

ALMYRA-PRAIRIEVILLE ARPT: Ctn on taxiways.

**ARKADELPHIA-ARKADELPHIA ARPT: 165' obst lgtd twr rdo stn KVRC erected 2 mi SW (225° true) at lat 34-06-39, long. 93-03-01. (9-30)

BIGGERS-BIGGERS ARPT: Use strips only - cattle on fld. (4-25)

EL DORADO-EL DORADO ARPT-GOODWIN FLD: Lgts avail. emerg only. (1-10)

FORT SMITH-FORT SMITH ARPT: W end NW/SE rnwy from intxn W clsd. Use rnwys only during wet weather. (10-8)

HELENA-THOMPSON-ROBBINS FLD: Use rnwys only-soft,rough. (3-17)

HOPE-HOPE ARPT: Use rnwys only. (4-9)

HOT SPRINGS-HOT SPRINGS MEMORIAL FLD: Use ctn when landing and taking off. Soft sod in wet weather. (5-15)

JONESBORO-JONESBORO ARPT: Use rnwys, taxi strips only. (1-10)

**LITTLE ROCK-RADIO: Stn grds 3117.5 kcs on req. only. (10-1)

★LITTLE ROCK-ADAMS FLD-RADIO: Effect. Oct. 1, CAA twr operates 24 hrs daily.

LUXORA-LUXORA INT, SITE 39, NO-LS-30' unlgtd pole line being erected S end N/S rnwy. (9-27)

MANILA-MANILA ARPT: Use SW quarter of fld only. (4-25)

McGEHEE-McGEHEE ARPT: Cattle on fld intermittently. (9-6)

NEWPORT-ERWIN FLD: Use rnwys only-cattle on fld. (4-25)

NEWPORT-MILLTOWN ARPT: Use rnwys only-cattle on fld. (4-25)

PINE BLUFF-GRIDER FLD: Closed ngts. (3-11)

**TEXARKANA-TEXARKANA ARPT: (P) designation assigned. Army contract fuel is no longer available at this fld. (10-6)

WALNUT RIDGE AAF (WALNUT RIDGE): Acft parked all areas fld and ramp. Use rnwys only. Equip. on fld. Closed 1730 to 0800. NE/SW rnwy closed. (3-17)

[redacted]

WALNUT RIDGE-WALCOTT FLD #3: Use rnwys only-cattle on fld. Soft-heavy acft use ctn. (4-25)

WEST MEMPHIS-LEVEE FLD: Ctn when wet. (9-23)

[redacted]

ALAMEDA NAS (ALAMEDA): Maintain high approach on Rnwys 26L and 21. Hvy acft parked these areas. 175' unlgtd cranes 2000' from NE corner fld-ctn ngts and during low visibility. Equip. adj to and on rnwys. Fld on positive control. (4-16)

ARCATA-RADIO: Rng courses unreliable, use for homing only. (9-5)

ARCATA-ARCATA ARPT: Closed to acft without 2-way rdo. Use surfaced areas only. (3-25)

AVALON CATALINA ARPT: Private arpt. Scheduled Airline opers only. Use by acft other than UAL absolutely prohibited. (3-20)

★BAKERSFIELD-BAKERSFIELD-KERN CO. ARPT-RADIO: CAA ILS opers during IFR weather conditions only. (10-7) FLD: Unlgtd 92' pwr line 1/2 mi N of bndry. (7-8)

BECKWOURTH-PLUMAS CO. ARPT: Use rnwys, taxi strips only-turf rough. (6-2)

**BELMONT-BELMONT ARPT: Pole line E; SE blkd. (4-23)

BLYTHE AAF (BLYTHE)-Obst lgts atop control twr inop. (2-28)

BLYTHE-BRESSON ARPK: Soft spot W side N/S strip. (5-30)

BOCA, BCN SITE 17A, SF-SL: Bcn inop. (9-22)

BRAWLEY-BRAWLEY ARPT: Holes in extreme NW corner fld. (1-10)

BRAWLEY-O'CONNELL BROTHERS ARPT: N/S strip avail. for taxiing only, muddy when wet. (5-19)

BURBANK-LOCKHEED AIR TERMINAL-RADIO: About Oct. 16, CAA twr freq will be changed to 272 kcs, 118.3, 126.18 mcs. (9-20) FLD: Closed to all trans P-80 acft except on special projects for modification that stn. Right traffic Rnwys 7, 15; left traffic Rnwys 25, 33. Approach lgts Rnwy 7 changed to red. 2-way rdo rqrd all acft. Rnwy 13-31 closed (parked acft). No NG facs. (7-9)

CASTLE FLD (MERCED): No opers office. (3-24)

CEDARVILLE-CEDARVILLE ARPT: CLOSED. (9-10)

CHATSWORTH-RADIO: About Oct. 16, freq of H fac will be changed to 382 kcs. (9-20)

AERONAUTICAL-CHARTS OF THE U. S. COAST AND GEODETIC SURVEY

New editions of the charts listed below will be published in about one month, making former prints obsolete for use in aviation. Orders for these particular charts should be kept to a minimum for immediate requirements. As soon as the charts are available for distribution a second notice will appear in this publication.

Charlotte	Winston-Salem	25 DF

CANCELLED CHARTS

AL 2, 53, 199, 243, 764.

When ordering charts from the U. S. Coast and Geodetic Survey, correct remittances should accompany all orders. Sectional charts, price 25 cents each, should be ordered by name; World Air charts, 25 cents each, by number with prefix (WAC); Approach and Landing charts, 5 cents each, by number with the prefix (AL); Flight charts 25 cents each, by number with the prefix (FC); Direction Finding Charts, 40 cents each, by number and with the suffix as in 22 DF; Local Charts, 25 cents each, by name as Miami Local; and Obstruction Plans, 40 cents each, by number with the prefix (OP). Consult the monthly Dates of Latest Prints of Instrument Approach and Landing Charts for further information concerning I A & L charts and Obstruction Plans.

SPECIAL NOTICE

INTERNATIONAL NOTAMS

Because of the inadequacy of the international notam service given in the Airman's Guide (an inadequacy that stems from a lack of compilation personnel and a coordinated communications round-up system), it will be necessary to discontinue this coverage effective next issue.

Accordingly, until the ICAO notam service is fully implemented the only source of international notams will be the C.A.A. Overseas-Foreign Aeronautical Communications Stations at the following locations:[1]

New York, New York

Miami, Florida

New Orleans, Louisiana

Balboa, Canal Zone

San Francisco, California

Seattle, Washington

Honolulu, Hawaii

Anchorage, Alaska

After this issue the Airman's Guide, under its Foreign Data Section, will cite only special notices or notams of outstanding importance.

[1] These International Notam Offices will cover the areas outlined in the accompanying map.

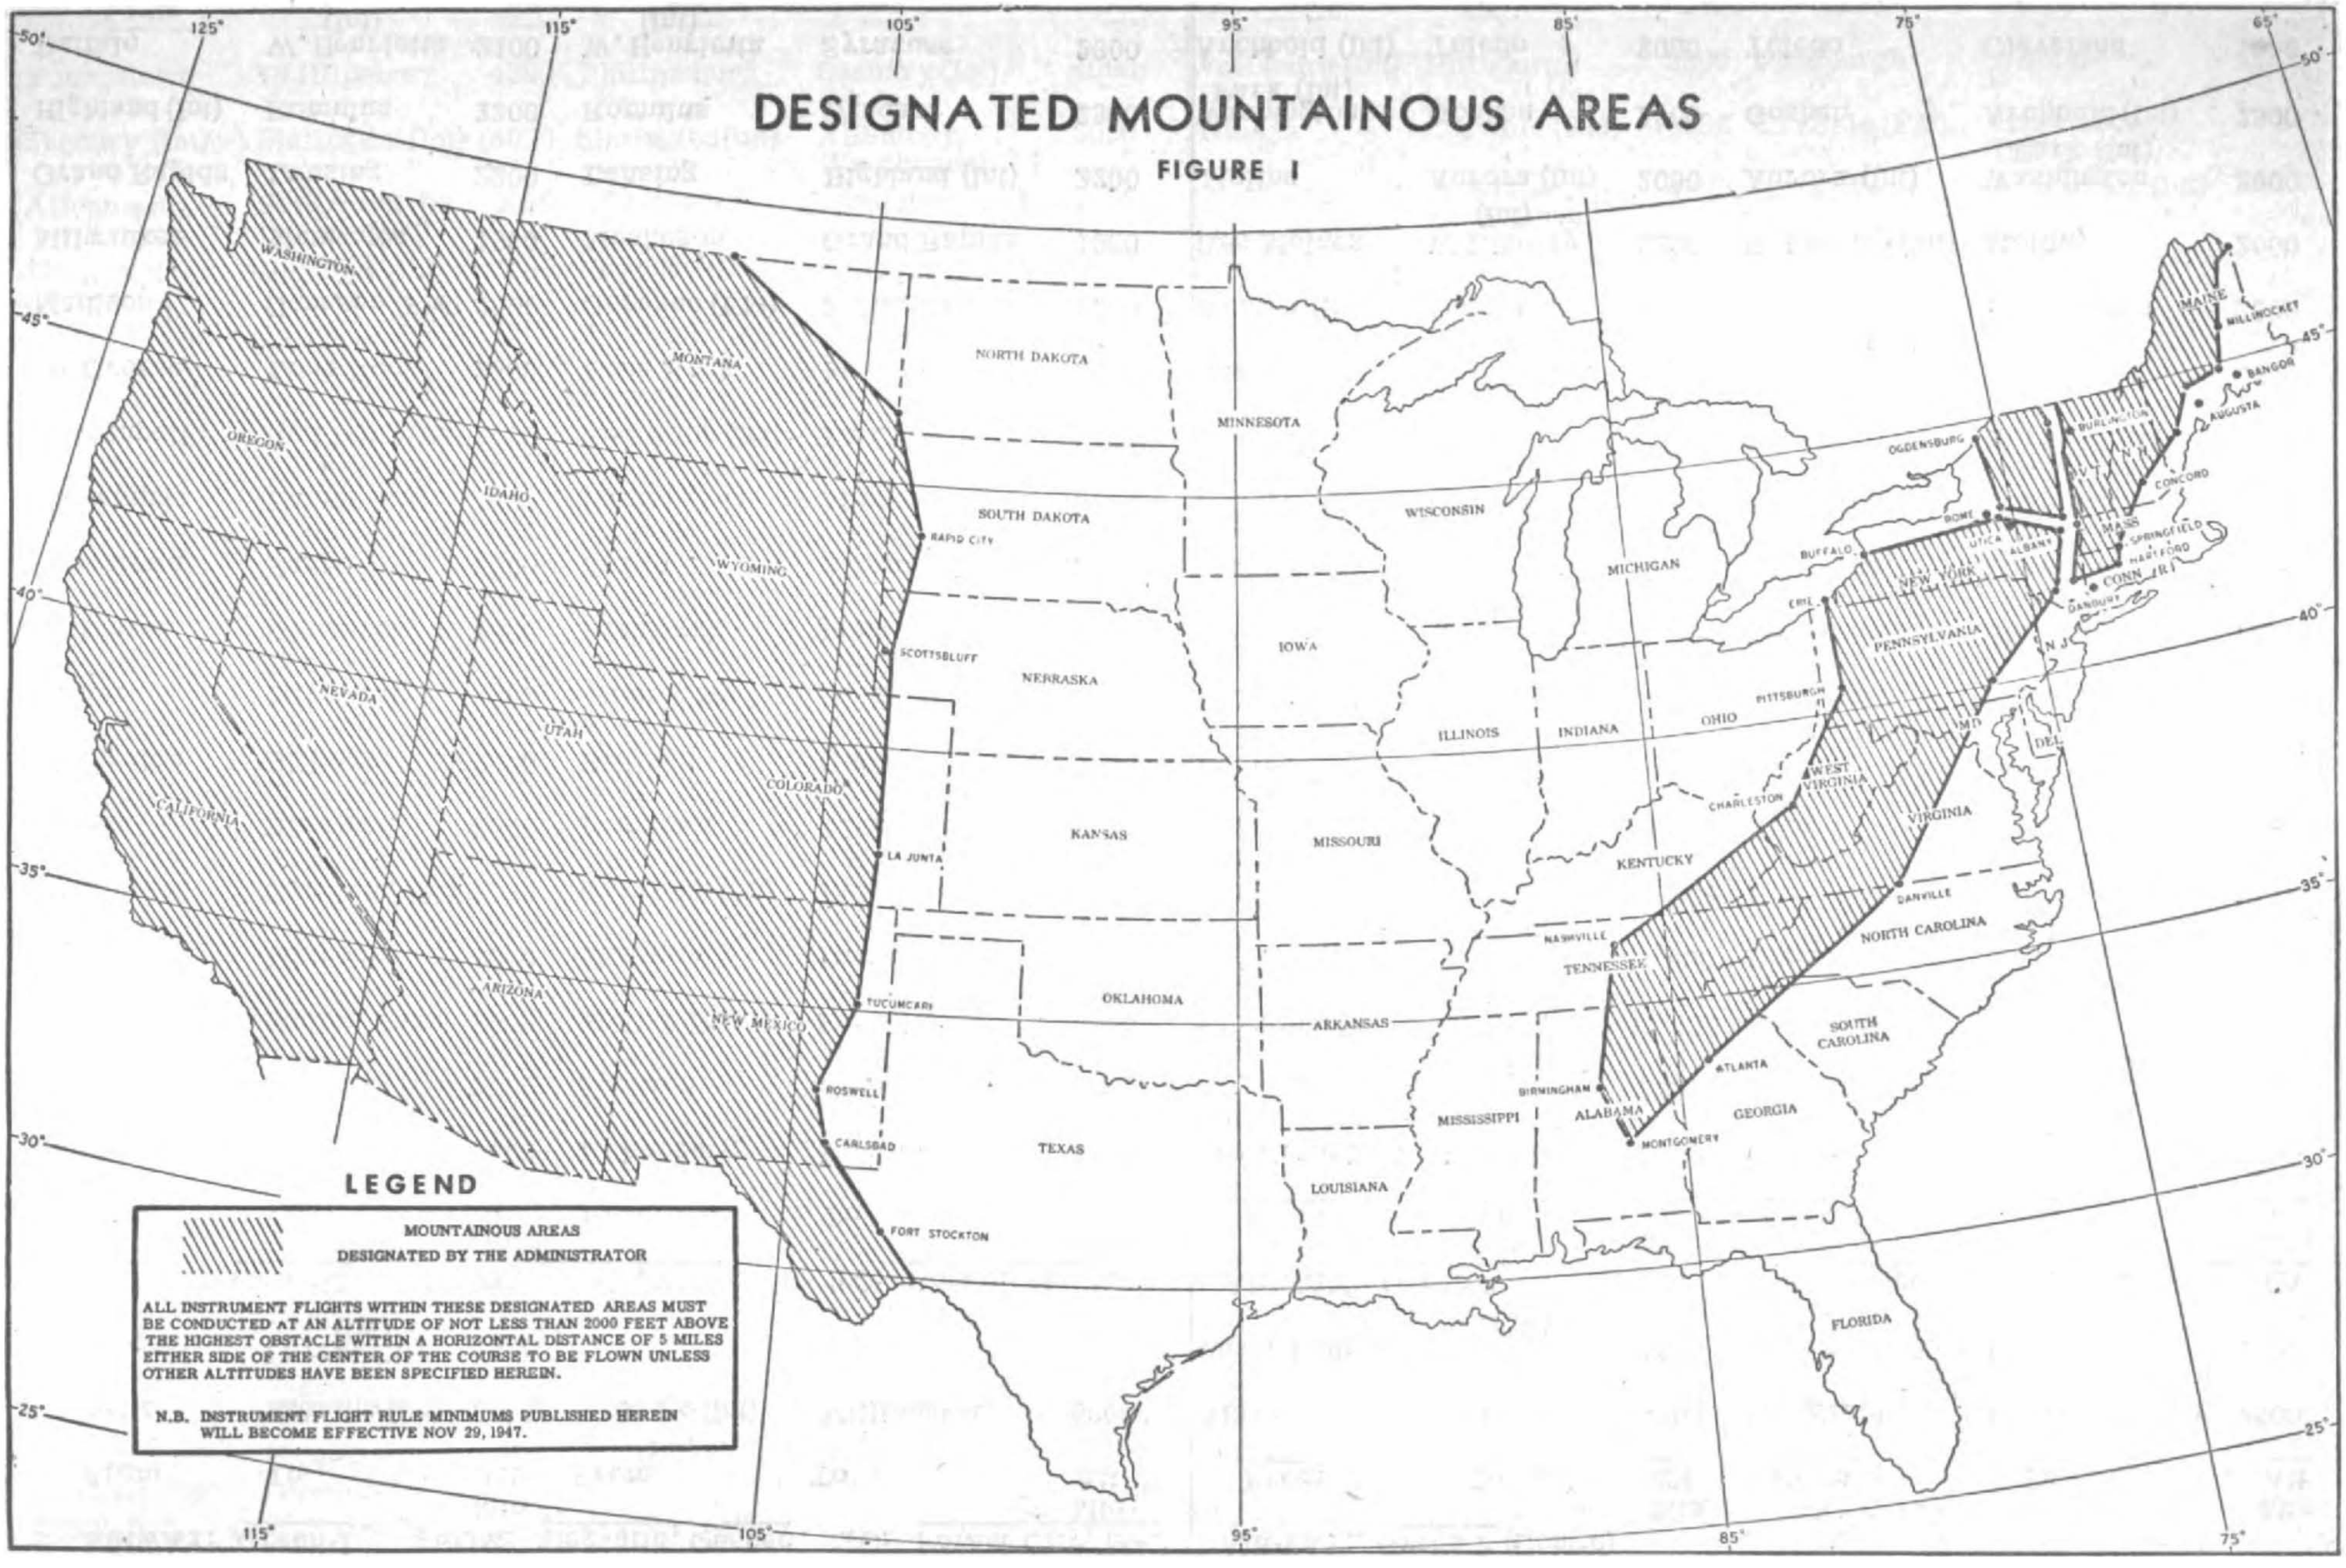
FLIGHT INFORMATION MANUAL Supplement

MINIMUM ENROUTE INSTRUMENT ALTITUDES

Pursuant to the provisions of section 60.107(d) of the Civil Air Regulations adopted by the Civil Aeronautics Board, the following minimum IFR altitudes are established by the Administrator of Civil Aeronautics to become effective November 29, 1947, for the principal routes or portions thereof within the continental United States. Provided that: IFR flight over any route or portion thereof not listed herein, but within those mountainous areas shown on the map designated as Figure No. 1, shall be conducted at an altitude of not less than 2,000 feet above the highest obstacle within a horizontal distance of 5 miles either side of the center of the course to be flown.

DESIGNATED MOUNTAINOUS AREAS

FIGURE 1



LEGEND

MOUNTAINOUS AREAS
DESIGNATED BY THE ADMINISTRATOR

ALL INSTRUMENT FLIGHTS WITHIN THESE DESIGNATED AREAS MUST BE CONDUCTED AT AN ALTITUDE OF NOT LESS THAN 2000 FEET ABOVE THE HIGHEST OBSTACLE WITHIN A HORIZONTAL DISTANCE OF 5 MILES EITHER SIDE OF THE CENTER OF THE COURSE TO BE FLOWN UNLESS OTHER ALTITUDES HAVE BEEN SPECIFIED HEREIN.

N.B. INSTRUMENT FLIGHT RULE MINIMUMS PUBLISHED HEREIN WILL BECOME EFFECTIVE NOV 29, 1947.

AIRWAY: Green 1 FROM: Megantic, Quebec TO: Forest City, Me.

VOL. 2, NO. 16 . . . OCTOBER 28, 1947

This issue includes all data on record as of 0001 E.S.T. on the date above. For later information consult teletype NOTAMS.

U. S. DEPARTMENT OF COMMERCE
CIVIL AERONAUTICS ADMINISTRATION
OFFICE OF AVIATION INFORMATION

SPECIAL NOTICE

NOTAM CHARTS

When the discontinuance of the AIRMAN'S GUIDE Flight Planning Charts and facing Data Pages was announced, personal flying interests demanded compromise charts that would serve as notams to correct the less frequently issued sectionals.

Resultantly, the Coast and Geodetic Survey developed the series of notam charts which will be a continuing feature of the Guide.

These six notam charts spot all new or discontinued airports, radio navigational aids, danger areas, and (by a retention of the Ⓡ symbol) all such airports or aids which are temporarily unusable or usable only with extreme caution.

Airport or radio facilities usable with caution (formerly identified by the Ⓞ, or caution symbol on the discontinued Flight Planning Charts), because of space limitations, are not spotted on the charts. Such facilities are cited in the Notices to Airmen only.

Furthermore, these charts will be cumulative in nature as far as danger areas are concerned. Cumulative, that is, until a sectional chart is revised semi-annually.

Other features, such as new airports or radio aids, will be retained on the notam charts only as long as they are cited in the Notices to Airmen. Such citations are normally carried in only one issue of the Guide. Continuing very hazardous conditions, however, (such as field closed because of construction or radio range inoperative) will be charted as long as they are effective.

LEGEND

● New airport.

✕ New radio navigational aid.

Ⓡ Discontinued airport or radio aid, or one usable only with extreme caution.

AIR NAVIGATION RADIO AIDS

RADIO CLASS DESIGNATIONS

AC..... Approach Control Tower, CAA
B..... Scheduled Broadcast Station (broadcasts weather reports at 15 and 45 minutes after the hour unless otherwise cited).
C..... Control Tower, CAA
CA..... Control Tower, Army
CI..... Control Tower (City, County, Private, etc.)
CN..... Control Tower, Navy
D..... Distantly controlled
FM..... VHF fan type marker (100 watts)
FMHW..... Non-directional radio beacon when combined with fan marker.
GCA..... Ground Controlled Approach Unit
H..... Non-directional radio-beacon (homing), power 50 watts or more
ILS..... Instrument Landing System (voice on localizer channel)
IM..... VHF boundary marker
K..... Independent Compass Locator Station
LFM..... VHF fan type marker, low-powered (5 watts-not over 10 miles from range)
LOR..... Low frequency omni-directional range
MH..... Non-directional radio-beacon (homing), power less than 50 watts
ML..... Range (loop radiators), power less than 50 watts
MM..... VHF middle marker
MMK..... Compass locator station when combined with middle marker of Instrument Landing System
MRA..... Range (Adcock, vertical radiators), power more than 50 less than 150 watts.
MRL..... Range (loop radiators), power more than 50-less than 150 watts
OM..... VHF outer marker
OMK..... Compass locator when installed at outer marker site or within 5.5 miles of middle marker
P..... Point to point radio
RA..... Range (Adcock, vertical radiators), power 150 watts or more
RL..... Range (loop radiators), power 150 watts or more
S..... Simultaneous (range signals and voice) type of transmitter
T..... Teletype
TX..... Principal teletype
V..... Additional voice feature on VHF
VAR..... Visual-aural VHF range (every VAR has simultaneous voice feature)
VOR..... VHF omni-directional range
W..... Without voice facilities
Z..... VHF station location marker at a range station

AIRWAY RADIO COMMUNICATIONS

GENERAL

All radio range stations (class RA, RL, MRA, MRL, ML) emit directional signals (type A2 emission) 1020 cycles per second modulation.

All radio beacon stations (class H and MH) emit non-directional signals (type A2 emission) 1020 cycles per second modulation. Unless otherwise noted, all stations, other than class MH, operate continuously within their assigned hours of service except during interruptions for voice transmission on the same frequencies where simultaneous transmission is not available and during shutdowns for maintenance purposes. Unless otherwise cited, the voice features of Class MH facilities are available continuously, and the homing features are operated on request. The effective range of an MH facility is ordinarily 25 miles.

Compass locators are low-powered non-directional facilities operating in the 200-415 kc. band. They are installed near airports to make it easier for pilots to make instrument approaches. When holding is required, they also help the pilot follow a more precise holding pattern. Compass locators, however, should not be depended upon as long range navigational aids since they are rarely useful at distances of over 15 or 20 miles. These are now shown as "MHW" facilities.

Voice communications facilities are available unless "W" (without voice) is included in the classification. Examples: SMRAW, MRLW, HW, HWT. Transmission of voice on a frequency other than the range frequency is indicated as MRLW-V. When no "W" is included in station class, the "V" indicates voice feature on two frequencies, namely, range frequency, and generally, VHF of 116.1 and/or 111.1 mcs. 116.1 mcs. is used for transmission to Army aircraft, 111.1 mcs. to civil aircraft.

The classification designation "B" denotes that the station broadcasts meteorological and notice to airmen information on a scheduled basis. At 15 minutes past each hour airways reports are broadcast, while at 45 minutes past each hour area reports are broadcast.

All Civil Aeronautics Administration stations equipped for voice communications with aircraft stand continuous listening watches on the frequencies of 3105, 4495, and 6210 kcs., unless otherwise cited.

AIRPORT DATA

LEGEND

CLASS

SIZE

40: Length of longest landing strip (unpaved) in hundreds of feet
40h: Length of longest hard-surfaced runway in hundreds of feet (Seaplane landing areas over 5 miles in length are classified as unlimited.)

RADIO

R1: Voice availability via tower, range (or homing device), or voice station
R2: Range (or homing device) and tower
R3: Range (or homing device), tower, and instrument landing system

LIGHTS

L: Incomplete lighting, either flood or portable runway lights
L1: Beacon only
L2: Beacon and boundary
L3: Beacon, boundary, and obstruction
L4: Beacon, boundary, obstruction, and flood
L5: Beacon, boundary, obstruction, flood, and runway contact
(L5): Identical to L5 except that runway contact lights are high intensity
L6: Beacon, boundary, obstruction, flood, runway contact, and instrument approach
(L6): Identical to L6 except that instrument approach lights are high intensity.

(The class always indicates the highest element available, but does not necessarily include all intermediate elements)

SERVICING

S1: Fuel
S2: Fuel, storage
S3: Fuel, storage, minor aircraft repairs
S4: Fuel, storage, minor aircraft, and minor engine repairs
S5: Fuel, storage, major aircraft, and minor engine repairs
S6: Fuel, storage, major aircraft, and major engine repairs

N.B. Very often small civilian fields (particularly in non-metropolitan areas) will have no full-time attendant. Frequently, servicing at such fields is available only by circling the town to attract the operator's attention.

NOTES

1. "Effingham Int., 10, LS-ID" indicates that the airport is Effingham CAA Intermediate Field, Site 10, on the St. Louis-Indianapolis Airway. Municipal airports where the lights are maintained by the CAA are listed similarly except that there is no "Int."

2. "CLOSED" indicates closed to all civil aircraft and all transient military aircraft except on official business this station or in emergency.

3.(a) "TEMP INACTIVE. NO FACS." indicates AAF airfields used either exclusively by the AAF or municipal airfields used jointly by the AAF and civil interests at which both the Army and the civil interests are inactive. Such airfields will be available to military aircraft at the discretion of the Commanding Officer of the organization to which the aircraft is assigned.

(b) "ARMY TEMP INACTIVE. CIVIL FACS." indicates municipal airfields used jointly by the AAF and civil interests at which the Army facilities are inactive but civil facilities are available. Such fields may be used by military aircraft, however, only commercial service is available.

4. "Fld lgts on prior req." indicates field lights are available only by previous phone call, telegram, or letter. It must be remembered that most fields do not have 24-hour operation. When an airport classification indicates a lighted field, without the above modification, the field lights burn all night or will be turned on when a radio request is made or a plane circles the fld.

GCA AVAILABLE: How and Where

GROUND CONTROLLED APPROACH (GCA) AVAILABLE TO CIVIL PILOTS AS WELL AS ARMY AND NAVY: All GCA facilities (Army, Navy, or CAA) are available to any plane in emergency. To secure GCA assistance, pilots should call the associated control tower for instructions.

In addition to the working frequencies listed below, Army and Navy GCA emergency VHF transmissions are made on 140.58 mcs. Simplex service on 3117.5 kcs will be provided at all Army and Navy installations to provide an alternate means of communications for scheduled air carrier aircraft. Army and Navy towers will relay GCA instructions on 200-400kcs band to civil aircraft not equipped to receive VHF or HF.

A minimum of 30 minutes will generally be required to assemble a GCA crew and prepare the equipment for operation AFTER an alert has been received at those locations not providing continuous service.

NOTICES TO AIRMEN

ARMY SPECIAL NOTICES

ARMY DATA: Advice covering Army fields or Army operations on civil fields, or Army radio facilities, and also Air National Guard fields and facilities should be forwarded to Commanding General, Air Transport Command, Attn.: Flight Operations Division, A-3. Requests for approval of the closing of Army airfields or restrictions in airfield facilities to transient military aircraft for over 10 days should be forwarded to the same address for submittal to Headquarters Army Air Forces, as required. Restrictions in Air National Guard Fields or facilities will be forwarded to the National Guard Bureau through the State Adjutant General for approval. That Bureau will forward approved restrictions to the above address for publishing. Information to be published will be coordinated and submitted to the Civil Aeronautics Administration.

ARMY OFFICIAL BUSINESS-within the meaning of AAF Regulation 85-2 is interpreted as the necessity for personnel aboard an aircraft to contact personnel, units, or organizations at or near the airfield selected for landing for the purpose of conducting transactions in the service of, and in the interest of, the United States Government. This does not include the use of an airfield by transient aircraft for the purpose of obtaining clearance, service, or other items attendant with itinerant operations. Cross country flights for the purpose of maintaining flying proficiency are not considered to be official business within the meaning of this regulation.

✓ ARMY FOREIGN CLEARING STATIONS: Under the authority of AAF Regulation 61-4, Army aircraft with destinations listed below or returning therefrom to the United States will clear through the stations indicated: AFRICA AND AZORES - Brookley Field, Ala., MacDill Field, Fla., Washington National Airport, D.C., or Westover Field, Mass. ALASKA - McChord Field, Wash., or Great Falls AAF, Mont. BERMUDA - Mitchel Field, N.Y., Brookley Field, Ala., MacDill Field, Fla., Washington National Airport, D.C., Westover Field, Mass., or Fairfield-Suisun AAF, Calif. CANADA - Great Falls AAF, Mont., Brookley Field, Ala., McChord Field, Wash., Washington National Airport, D. C., Selfridge Field, Mich., or Westover Field, Mass. CANAL ZONE, CENTRAL AMERICA, MEXICO, AND SOUTH AMERICA - March Field, Calif., MacDill Field, Fla., Kelly Field, Tex., or Brookley Fld, Ala. CARIBBEAN - Brookley Field, Ala., Kelly Field, Tex., or MacDill Fld, Fla. ENGLAND, GREENLAND, ICELAND, AND NORTH IRELAND - Washington National Airport, D.C., or Westover Field, Mass. NOVA SCOTIA, AND NEWFOUNDLAND - Washington National Airport, D. C., Westover Field, Mass, Selfridge Field, Mich., or Brookley Field, Ala. HAWAII - Fairfield-Suisun,AAF, Calif. EUROPEAN THEATER - Brookley Field, Ala., MacDill Field; Fla., Washington National Airport, D. C., or Westover Field, Mass.

✓ Indicates new or revised Special Notices

SPECIAL NOTICES

CLEARANCE OF AAF AIRCRAFT IN NEW YORK CITY AREA: In accordance with notification from Headquarters, Army Air Forces, July 2nd AAF Letter 63-9 has been rescinded and the following instructions will govern the clearance of AAF aircraft in the New York City Area: For clearance purposes into or from the New York City Area (encompassed by a 25 mile radius from the southern tip of Manhattan) CFR is defined as ceiling at least 2000' and the visibility 3 miles or more; IFR when the visibility is not less than one mile and the ceiling is unlimited, or when the ceiling is not less than 5000' and the visibility not less than 2 miles. AAF aircraft flying into the New York City Area may be cleared to any authorized field therein provided weather conditions are not less than those defined above. In all cases in-flight approval from Olmsted Flight Service Center by contacting Olmsted Airways, Rome Airways, Westover Airways, Mitchel Airways, or Ft. Dix Airways must be obtained prior to proceeding to the field of destination. All pilots whose destination is an airfield within the area will indicate on the AAF Form 23 that their flight plan to the field of destination is via any of the 5 stations listed. Flights for which the point of first intended landing is Mitchel Field may be made using normal clearance procedure and restrictions outlined herein are not applicable to that station. Appropriate clearance may be made from a field at which weather conditions meet above specifications even though weather in other sections is below specified minimums. AAF aircraft engaged in regularly scheduled transport flights under the operational control of the Air Transport Command are exempt from these restrictions.

SELECTION OF WEATHER ALTERNATES BY ARMY PILOTS: In accordance with policy stated by the CG, AAF, April 7, 1947, Army pilots are not to be refused IFR clearances because of selection of other than "A,N,NG, or P" fields as an alternate. The selection of an alternate airport is a planned procedure to be resorted to in case of emergency and any suitable airport, military, or civilian, will be accepted for clearance purposes. Concerning this policy, it is pointed out that pilots who do utilize other than "A, N, NG, or P" fields under such circumstances may be called upon to justify their use of same.

V.H.F. CHANNEL ASSIGNMENTS: The following are Army assignments:

Channel	Frequencies	Channel	Frequencies
A	116.1	H	134.10
B	126.18	U	108.3
C	137.88	V	108.7
D	140.58	W	109.1
G	137.70		

MINIMUM SAFE ALTITUDES ON AIRWAYS: Under AAF Regulation 60-16 and policy of USAF, minimum safe altitudes for flight along airways will be identical with those established by the Civil Aeronautics Administration. Action is being taken to amend pertinent USAF flight information publications to show these minimums.

CORRECTIONS AND ADDITIONS TO ARMY T.O. 08-15-1:

(1) Correct page 82, by deleting designation of Ellington Field as a Flight Service Center.

(2) Correct Legend, pages 82 and 83, by deleting word "Military" in defining Legend for Flight Service Centers and Flight Service Control Area Boundaries.

(3) Correct page 24, by showing Patuxent River NAS, Md., radio range frequency as 215 kcs.

(4) Correct Directory of Airfields available to Military Aircraft data, as follows: (a) Lockheed Air Terminal, Calif.: Delete (N) designation.

(b) Oroville, Calif.: Class: P60M-L5-S6.

(c) Salida, Colo.: Add (P) designation; 7500; U38-S4; Use strips.

(d) Pratt Kans., Mun. Airport: Class: P80H-S4.

(e) New Orleans, La., NAS.: Fuel; AB--

(f) Easton, Md.: Remarks: Port rnwy lgts on req.

(g) Orange, Mass.: Class: P50-L5-S2

(h) Crookston, Minn.: Add (P) designation; 875; U30-S6; Obsts sur fld.

(i) Bradley, Mo.: Remarks: Poles NW,SW,S,SE; trees NE.

(j) Engle Int. 10, EO-PU, N. M.: Class: U45-L3.

(k) Valley City, 71, HL-Twin Cities, N.D.: Change name to Valley City

(l) Zanesville, Ohio: Class: P50-L5-S1

(m) Aiken, S.C.: Class: P50M.

(n) Belle Fourche, S.D.: Class: U50-S2

(o) Preston (Houston), Tex.: Change name to LaPorte. (This is location also). Class: U40M-S6.

(p) Easton, Wash., Int. 5B, SA-HL: Class: U30-L5.

(q) Ephrata, Wash.: Class: P73V-L-S6. Add to Remarks: Port rnwy lgts prior req.

(r) Lind, Wash.: Class: U33-L2-S6.

(s) Mason Co., Wash.: Add location (Shelton): Class: P50-L5-S6. Remarks: No Navy facs. Bcn on req. Fld lgts prior req.

(t) Paine (Everett), Wash.: Remarks: Fld lgts on req.

(u) Add *La Crosse Int, 28B,PD-SM, Wash.: 1459; U37-L3S4.

(v) Brees (Laramie), Wyo.: Add (P) designation; 7270; P63-L5-S6.

CORRECTIONS AND ADDITIONS TO ARMY T.O. 08-15-2:

(1) Correct page 32, AN/CPN-6 (YM) Beacons (X-Band) Domestic by showing Patuxent River, Md., X-Band Beacon identification as 1-2-2-1.

(2) Correct page 32, by showing the location of South Weymouth facility in Mass., rather than Va.

(3) Correct page 32, by adding an X-band radar beacon at Westover Field, Mass.: Geographical Position: lat. 42-11-53.75 N, long. 72-32-03.33W; Code: 2; Operating Agency: USAF; Angular Coverage: 000-360; Operating hours: Cont.; Remarks: Atop lookout tower on W side field.

(4) Correct page 51, by adding and changing telephone numbers of each Air Rescue Service Unit as follows: Air Rescue Detachment #5, Scott Field, Belleville, Ill.: Belleville 4000, Ext. 331-253; Air Rescue Detachment #6, Biggs Field, El Paso, Texas: El Paso East 3181, Ext. 412-3991; Air Rescue Squadron "B", Hamilton Field, Calif.: San Rafael 5800, Ext. 3227-4202-3228; Air Rescue Detachment #8, McChord Field, Tacoma, Wash.: Lakewood 2121; Ext. 5144-5126; Air Rescue Detachment #9, March Field, Riverside, Calif.: March Field-Morono LD20, Ext. 4206-4203; Air Rescue Detachment #11, Great Falls AAB, Mont.: Great Falls 7651, Ext. 302; Air Rescue Detachment #12, Lowry Field, Denver, Colo.: Denver - Freemont 8861, Ext. 820; 5th Rescue Squadron, MacDill Field, Tampa, Fla.: Tampa H-8821, Ext. 628; Flight "C", 5th Rescue Sqdn, Pope Field, Fort Bragg, N.C.: Fayetteville 4151, Ext. 2-7204 - 2-4244; Flight "D", 5th Rescue Squadron, Westover Field, Chicopee Falls, Mass.: Chicopee 1740, Ext. 655-657.

(5) Correct page 32, by showing X-Band Radar Beacon, Chincoteague NAAS, Va. as operating continuously except from 1200-1300R on Sundays. This has resumed normal operation.

NAVY SPECIAL NOTICES

NAVY DATA: In accordance with Hydrographic Office Memorandum for Aviators No. 9, July 29, 1946, Hydrographic Office information concerning naval and marine corps air stations and facilities, including changes in field facilities, operation rules, air/ground communications facilities, instrument approach procedures and navigational aids, should be directed to: The Division of Air Navigation, Hydrographic Office, Washington 25, D.C., for transmittal to the Civil Aeronautics Administration. In accordance with Aviation Circular Letter No. 96-46 of June 13, 1946, approval for the closing of any naval or marine corps air station or facility to transient military aircraft for a period in excess of 10 days must be obtained from the Chief of Naval Operations. Also, approval is to be obtained from the Chief of Naval Operations before relocation or modification of any aid to air navigation, such as reorientation of radio ranges.

VHF CHANNEL ASSIGNMENTS: The following are Navy assignments:

Channel	Navy Frequency	Channel	Navy Frequency
1	116.1	6	134.64
2	142.56	7	143.64
3	126.18	8	142.02
4	128.70	9	142.74
5	143.28	GUARD	140.58

CIVIL SPECIAL NOTICES

CIVIL USAGE OF MILITARY FIELDS: Army and Navy fields are open to civil fliers only in emergency or with prior permission of the commanding officers thereof.

REISSUANCE OF EXPIRED PILOTS CERTIFICATES: 20.550 Reissuance. Any person who on June 30, 1947, held a valid private or commercial certificate and who failed to exchange such certificate in accordance with Section 20.55 of the Civil Air Regulations, may, notwithstanding such failure and without other showing, obtain a pilot certificate with appropriate ratings upon application to the Administrator.

PERSONAL POSSESSION OF PILOT CERTIFICATE: No person shall pilot a civil aircraft within the U.S. unless he holds a valid pilot certificate with appropriate ratings issued by the Administrator or an appropriate and valid foreign pilot certificate. Such certificate shall be in the personal possession of the pilot at all times while piloting arcft and shall be presented for examination to any inspector of the Administration or State or local law enforcement officer. upon the request of such inspector or enforcement officer.

---

vised part reads as follows: 43.52 Flight area limitations: A student shall not pilot an aircraft outside a local flying area designated by his flight instructor until: (a) he has had at least 10 solo flight hours, or if enrolled in and receiving flying instruction from an approved air agency, he is deemed competent by such agency, and (b) his student pilot certificate has been appropriately endorsed by a flight instructor.

NOTICE TO ALL FLYING PERSONNEL: Because of the increase in aircraft operations, both civil and military, in recent months the number of complaints regarding airplane noise nuisance has reached such proportions that the advancement of aviation and development of new airports are in danger of being severely retarded. To reduce the number of such complaints, it is requested that the following practices be put into effect by all fliers:

(1) Discontinue all unnecessary low flying.

(2) When weather and traffic volume permit, increase altitudes of all traffic patterns that require flight over inhabited areas.

(3) Re-route channels of approach and departure to avoid residential and business districts whenever possible.

(4) If the airport is located near inhabited areas, reduce power and increase pitch of propellers as quickly as possible during take-off so as to keep engine and propeller noises at a minimum.

(5) Keep rpm's set at a minimum required operational setting when low flying over populated areas is necessary.

SEAPLANE OPERATIONS: Because of the possibility of local ordinances or restrictions prohibiting seaplane operations in resort or congested areas, the Administrator has issued the following advice to seaplane operatbrs: "(1) Take off as far out from the shore as possible.

(2) Cut the take off run as short as safety permits.

(3) Fly high enough to avoid criticism from residents below, or arrange the flight plan so that you pass over as few houses as possible.

(4) Avoid unnecessary "gunning" or racing of the engine.

(5) Explain carefully to those who complain what you are doing to make your airplane a good neighbor.

In the CAA Federal-aid Airport program, we are promoting the use of seaplanes by assisting communities in establishing inexpensive docking and servicing facilities. In view of the high utility value of the seaplane or amphibian, we believe this to be a definite step in the advancement of personal flying in general. Hence, if we are to find acceptance of such facilities, it is up to those pilots who now operate seaplanes to assist us to the utmost by safe and considerate operation of their aircraft".

N.B. The Administrator's admonition was occasioned by numerous complaints received from lake-side residents and vacationists.

SEAPLANE BASE DIRECTORY: A new Seaplane Base Directory will go to press December 1, 1947. The current directory, dated June 15, 1947, is available to any qualified operator or owner upon request to: Office of Aviation Information, Attention: A-258, C.A.A., Department of Commerce, Washington 25, D. C.

RADIO TELEPHONE-OPERATION AUTHORIZATION: This is the simple way in which an authorization to operate a radio telephone transmitter in an aircraft is obtained: the applicant appears in any of the Federal Communications Commission Field Offices, or before any CAA flight examiner of the CAA, who has been designated by the FCC to issue the permits, proves he is a U.S. citizen, that he has need of such an authorization, and that he understands the few simple rules and regulations. He is given a card granting the authorization then and there. FCC offices are listed under U.S. Government in phone books, and there are some 30 of them throughout the country. Mostly, they are in downtown offices. There are more than 1,000 CAA designated flight examiners. Mostly they are located at airports. The "examination", if it may be so described, consists of a few questions establishing the ability of the applicant to transmit and understand spoken messages in English, and to understand the simple rules governing the use of such equipment. He is also given simple, printed instructions for its use.

CONTROL TOWER TUNING PRECAUTION: On some aircraft receivers, the channel of 278 kcs. is identified as "tower" on the tuning control nameplates. This is not always correct as many towers transmit on freqs. other than 278 kcs. Reports indicate that some confusion is being created by the failure of pilots to tune their receiver to the tower transmitting freq. when such freq. is other than 278 kcs. It is suggested that pilots use care and make certain that they are tuned to the transmitting freq. of the tower with which they desire to communicate.

V.H.F. IFR FLIGHTS: Until further notice, Air Traffic Control will be exercised on the assumption that aircraft are utilizing intermediate frequency radio ranges. If a pilot desires to conduct IFR flight using VHF ranges over all or a portion of the route, his flight plan should so indicate. Further, flights should not be conducted on civil airways in IFR weather using VHF ranges unless the A.T.C. clearances so authorize.

PRIVATE FLIER V.H.F. FREQUENCIES: All C.A.A. Communications Stations and Towers are discontinuing receiving watches on 131.7 and 131.9 mcs. as new equipment becomes available to guard the new private flier frequencies of 122.1 mcs for transmission to CAA Communications Stations and 122.5 mcs for transmission to CAA operated towers. Practically all CAA towers now guard 122.5 mcs but the communications stations program is not fully effective yet because of non-receipt of the new receivers. CAA Communications Stations normally reply to itinerant aircraft on the voice feature of the range, low frequency or VHF, whichever is applicable. Replies are made on 111.1 mcs, if VHF reply has been requested on other than range frequency. CAA airport control towers will reply to itinerant aircraft on one of the frequencies 118.3, 118.5, 118.7, or 118.9 mcs., in addition to towers' low frequencies.

U.S. WEATHER BROADCASTS AND TRANSMISSIONS: The time of observation for all weather reports is 30 minutes after the hour, unless otherwise announced. Pilots enroute are requested to avoid, if possible, calling airway communications stations at or about 15 and 45 minutes past the hour (which are the scheduled broadcast times) to request weather information, as such calls may delay starting of scheduled broadcasts and cause inconvenience to other persons who are dependent on the broadcasts for weather reports.

RADIO TELEPHONE COMMUNICATIONS: The word ROGER in radiotelephone communications means "I have received all of your last transmission", and its use in any other sense by CAA stations and towers is not authorized. In order to avoid confusion it is suggested that pilots engaging in air-ground contacts also limit the use of ROGER to acknowledgment of transmissions.

TWO-WAY RADIO FAILURE PROCEDURES: In the event of failure of two-way radio communication between an aircraft and the ground, the pilot will observe one of the following procedures:

(a) If operating under VFR conditions, proceed under VFR and land as soon as practicable, or

(b) Proceed according to the latest air traffic clearance.

If the pilot proceeds according to the latest traffic clearance but has not received and acknowledged a clearance to the tower and if other instructions to the contrary are not received, he shall be expected to observe the following and control will be effected accordingly:

(1) If the pilot has received and acknowledged a clearance to the destination airport or the radio facility serving that point, he shall continue flight at the altitude (s) last assigned by Air Traffic Control, or the minimum instrument altitude, whichever is the higher, to the radio facility serving the destination airport.

(2) If the pilot has received and acknowledged a clearance to a point other than the destination airport or the radio facility serving the destination airport, he shall continue flight at the altitude(s) last assigned by Air Traffic Control or the minimum instrument altitude, whichever is the higher, to the radio facility serving the destination airport.

(3) If holding instructions have been received, the pilot shall comply with these instructions until such time as it will be necessary to continue flgt. so as to arrive at the radio facility serving the destination airport at the expected approach time last received and acknowledged, maintaining the last assigned altitude or the minimum instrument altitude, whichever is the higher;

(4) If holding instructions have been received, but no expected appch time has been received, the pilot shall comply with these instructions until the time Air Traffic Control has specified that further clearance may be expected. He shall then continue, maintaining the last assigned altitude or the minimum instrument altitude, whichever is the higher.

NOTE: The minimum instrument altitude referred to is the minimum established for that portion of the route over which the operation is conducted regardless of the direction of flight.

Approach: Descent from the altitude maintained to the radio facility serving the destination airport shall be made on the final approach course and shall start at the expected approach time last received. If no expected approach time was received, descent shall be started at the last estimated arvl time specified by the pilot, or as soon as possible thereafter. A full standard instrument approach should be executed unless a VFR approach can be made.

If a clearance to the tower at the airport of intended landing has been received and acknowledged, the pilot shall be expected to comply with any special instructions contained in the clearance and make normal descent for landing.

NOTE: Air Traffic Control may issue appropriate instructions to be broadcast "blind" over air carrier radio facilities (for air carrier aircraft), and over suitable radio range facilities. Instructions must not be broadcast unless Air Traffic Control authorizes such broadcast.

VFR (Formerly CFR) FLIGHT PLANS AND ARRIVAL REPORTS: VFR flight plans may be filed with any CAA airways communication station or airway traffic control center. One hour after E.T.A., if no notice of arrival is received, queries are sent out over CAA communications systems. If the arrival report is not received within 3 hours, search and rescue operations are initiated. Inasmuch as the Government may be put to considerable expense in determining the location of aircraft when an arrival report is not filed, it is vitally necessary that all pilots using this service make certain that notice of arrival is filed with the CAA communications station at the termination of the flight.

To reduce radio congestion, pilots should file VFR flight plans, when required, in person or by telephoning the airways communication station or airway traffic control center. CAA control towers have discontinued accepting VFR flight plans for transmission and will not normally transmit arrival reports except upon the specific request of the pilot. Whenever practicable, however, it is desired that arrival reports be filed in the same manner as flight plans.

CLEARANCE PROCEDURES FOR IFR FLIGHT: Effective Oct. 8, 1947, and concurrent with effective date of C.A.R. 60 as revised, new clearance procedures for IFR flights are being used in the control of Air Traffic.

(1) No Air Traffic Control clearance will be issued for flights operated in accordance with visual flight rules except for flights within a control zone as prescribed in C.A.R. 60.2

(2) Flight plans specifying flight in accordance with VFR for a portion of a flight will be accepted at the point of departure. If VFR flight is proposed for the first portion of the flight, the pilot will be advised to request IFR clearance from the appropriate communications station along the route of flight. The pilot must remain in VFR weather conditions until the clearance is received.

(3) When a flight plan indicates IFR flight for the first portion of flight and VFR for the latter portion, the aircraft will be cleared to the point at which VFR flight is planned, inasmuch as no clearance is necessary for VFR flight. The pilot is expected to continue his flight without further contact with Air Traffic Control.

(4) Standard separation from other IFR traffic will be provided aircraft on IFR flight plans, except (1) when "at least 500' on top" has been assigned or authorized by ATC in lieu of a cruising altitude if frequent pilot reports indicate a generally unlimited ceiling on top and a forward visibility of at least three miles. (2) When VFR operation is specified by ATC during climb to cruising altitude, descent from cruising altitude, or change of altitude enroute. If the flight cannot be conducted under VFR conditions when such clearance is received, it is the pilot's responsibility to secure an amended clearance before proceeding IFR.

(5) Pilots may cancel IFR flight plans at any time by so notifying ATC provided they are operating in VFR weather conditions when they take such action. Where conditions indicate that the remainder of a flight can be conducted in accordance with VFR, a pilot should avail himself of this procedure to lift the restrictions on his own flight and to simplify the general traffic situation. Caution should be exercised, however, that flight plans not be cancelled when IFR conditions are expected in some subsequent portion of a flight. When a flight plan is cancelled and a new instrument clearance is later requested, priority of handling will be based upon the time of filing the new flight plan.

(6) When a flight plan is filed indicating altitude change beyond the control area of the center controlling the point of departure, the flight will be cleared to destination with instructions to maintain the altitude at which the aircraft enters the next control area. The pilot should request further altitude changes enroute. Better service can be given the pilot if an altitude change is requested at the time the change is desired.

This procedure cancels and supersedes the Altitude/CFR procedure now contained in the Flight Information Manual.

✓ AIRPORT LIGHT SIGNALS: Effective October 8, 1947, the following special light signals were prescribed by the Administrator for use at airports in accordance with C.A.R. 60.108(e): (1) A white rotating airport beacon lighted during daylight hours, or flashing lights on a tetrahedron during the hours of darkness, shall mean the official ground visibility at the airport is less than 3 miles, and that if the airport is within an airport control zone, a traffic clearance is required for landing, takeoff or flight in the traffic pattern. (2) A flashing amber light at an airport shall mean clockwise flow of traffic is in effect and that right turns shall be made unless otherwise authorized by Air Traffic Control. These special light signals are in addition to those prescribed in the Flight Information Manual for use with a directed portable traffic signal light, and will be included in the next edition.

✓ MINIMUM ENROUTE ALTITUDES: Correct Minimum Enroute Altitudes, carried in Airman's Guide, Vo. 2, No. 15, dated October 14, 1947, as follows: Red Airway #46 - Aberdeen, S.D., to Watertown, S.D. - 3000'; Amber Airway #8 - Richmond (Int.) to Fairfield-Suisun, Calif. - 4000'; Fairfield-Suisun, Calif. to Sacramento, Calif. - 2500'.

✓ RELOCATION OF AIR ROUTE TRAFFIC CONTROL AREA AND ~~FLIGHT~~ FLIGHT ADVISORY AREA BOUNDARIES:

Effective Nov. 10, 1947, the following relocations of Air Route Traffic Control Area and Flight Advisory Area boundaries will be effective:

(1) Cincinnati-St. Louis control area boundary on Red Airway #11, relocated from 25 mi. to 50 mi. W of Evansville, Ind. range station.

(2) Cincinnati-St. Louis control area boundary on Green Airway #4, relocated from 25 mi. W of Terre Haute, Ind. range station to 25 mi. E of Effingham, Ill. range station.

(3) Minneapolis-Kansas City control area boundary on Blue Airway #9, relocated from 25 mi. S to 55 mi. S of Mason City, Iowa, radio beacon station

(4) Minneapolis-Denver control area boundary on Red Airway #31, relocated from 25 mi. E to 70 mi. E of Rapid City, S.D. range station.

(5) Minneapolis-Great Falls control area boundary on Green Airway #2, relocated from 25 mi. to 55 mi. E of Miles City, Mont. range station.

(6) Cincinnati-Pittsburgh control area boundary on Blue Airway #39, relocated from 25 mi. NE of Sutton Intxn (Intxn of the W course of Elkins and the SW course of Morgantown, W.Va. radio ranges) to 25 mi. SW of Morgantown, W.Va. range station.

(7) Concurrent with the above, the Flight Advisory Area Boundaries will be relocated to conform with the relocated control area boundaries.

(8) Correct Airman's Guide, Vo. 2, No. 15, dated Oct. 14, 1947, page 11, by changing the New Orleans-Atlanta Flight Advisory Area Boundaries will read as follows: From a point 25 mi. NW of Dothan, Ala., on Blue Airway #3 to 50 miles S of Maxwell Field on the proposed direct airway, Maxwell Field-Crestview, thence to 50 miles SW of Maxwell Field on Green Airway #6 to lat. 32-10, long. 87-30.

FLIGHT INFORMATION MANUAL CORRECTION: Correct Chapter IX, page 114, of the July 1, 1947 issue, under the heading of "Handling of CFR Flight Plans and Arrival Reports", which erroneously states that CFR (now VFR) flight plans are forwarded in the same manner that IFR flight plans are. CFR (now VFR) flight plans are not transmitted.

Upon termination of a VFR flight, the pilot should close out his flight plan. Notice of arrival is then sent over the CAA communications system to the station holding the original flight plan.

WEATHER REPORTING SERVICE

Weather Reporting Location	Type of Report	Lat., Long.	Elev.	Action Taken
Lake City, Fla.	SW	30-11, 82-35	200'	Established
Sanford, Fla. (Mun. Arpt.)	SW	28-47, 81-14	57'	"
Deland, Fla. (Mun. Arpt.)	SW	29-05, 81-17	80'	"
Palatka, Fla. (Kay Larkin Airport)	SW	29-39, 81-41	56'	"
St. Augustine, Fla., Arpt.	SW	29-57, 81-20	10'	"

TELETYPE NOTAMS: Throughout the year climatic conditions (snow storms, floods, etc.) render many fields temporarily unusable or unsafe. In addition, there are intermittent maintenance operations in progress on many fields. Radio facilities suffer temporary power failures or course misalignments, and lighting facilities are temporarily inoperative. Because these temporary conditions cannot be given immediate coverage in the "Airman's Guide", full cognizance must be taken of Teletype Notam service which gives the desired coverage on any facility or field at which teletype transmitting stations are based. Cross-country pilots, accordingly, should consult these Teletype Notams for latest available data on air navigation aids. These teletype notams are posted in CAA Communs. Stns and in all Army Air Field and Naval Air Station Operations Offices having teletype drops.

AIRPORT AND RADIO NOTICES

LEGEND

** - New or revised airport, danger area, or miscellaneous data to be added to records.

★ - New or revised radio data to be added to records.

FOREIGN SPECIAL NOTICES

INTERNATIONAL NOTAMS: The only source of international notams is the C.A.A. Overseas Foreign Aeronautical Communications Stations at the following locations: New York, N.Y.; Miami, Fla.; New Orleans, La.; Balboa, Canal Zone; San Francisco, Calif.; Seattle, Wash.; Honolulu, Hawaii; Anchorage, Alaska.

FOREIGN ENTRY PROCEDURES; AIRPORTS OF ENTRY; CUSTOMS REPORTS; CIVIL AIRCRAFT CLEARANCE FOR FOREIGN COUNTRIES: These procedures and regulations were all incorporated into the Flight Information Manual, Vol 2, No. 1, dated July 1, 1947. Only amendments to the data contained in the Manual will hereafter be carried in the Airman's Guide.

UNITED KINGDOM MILITARY AIR BASE USAGE: The following United Kingdom Military Air Bases are available to civil air carriers of only U.S. and United Kingdom and to aircraft which were purchased in either the U.S. or the United Kingdom and are in ferry status. (a) for regular use: Kindley Field, Bermuda; Beane Field, St. Lucia; Coolidge Field, Antigua; and Atkinson Field, British Guiana.

(b) for alternate use: Waller Field, Trinidad; Vernam Field, Jamaica; and Carlsen Field, Trinidad.

Even though the above fields are open to civil air carriers and ferry status planes it is mandatory that the operators of such aircraft secure approval for use of these military air bases from Headquarters, AAF, Washington, D.C., prior to the departure of each flight or series of flights.

ALBERTVILLE-ALBERTVILLE ARPT: Use NW/SE strip only. S side NW/SE strip rough in spots. (10-14)

**ANDALUSIA-ANDALUSIA ARPT: Port rnwy lgts avail. (6-23) Bare in spots. Ctn in wet weather. (10-14)

ANNISTON-ANNISTON ARPT: Ends of strips soft in wet weather.(10-14)

ATHENS-ATHENS ARPT: E/W strip soft in wet weather. (10-14)

BARIN NAAS EAST AND WEST FLDS (FOLEY): Closed to trans acft.(5-6)

★BIRMINGHAM-RADIO: VHF omni-directional rng without voice placed in oper on test basis, fac unmonitored, and subject to interruptions; not to be used for navigational purposes. Lat. 33-38-39, long. 86-41-18, freq. 116.3 mcs, ident. "BH". Class: VORW.

BIRMINGHAM-BIRMINGHAM ARPT: Closed to civil acft not equipped with operating rcvr. Landing on sod areas approved by twr in dry weather, unsafe in wet weather. Ctn ngts or under IFR, plant S of fld has long taxi and parking strips resembling rnwys. Soon, Bartow type N approach lgt lane will be comm beginning at N end of N/S rnwy and extending 1800' to the N to be operated on req or when considered necessary by arpt traffic controller. (10-13)

BIRMINGHAM-ROBERTS FLD: S side fld avail. in wet weather. N side rough. (10-14)

BRIDGEPORT-ALA-TENN-GA ARPT-Ctn in wet weather. (10-14)

BROOKLEY FLD (MOBILE): Soft-use rnwys, taxi strips only. Ltd gas avail. trans acft on off. bus. destination Brookley Fld on written orders, opers orders not accepted. (8-27)

CENTRE-CENTRE ARPT: NNW/SSE strip closed. N side E/W strip rough (10-14)

COLUMBIANA-COLUMBIANA MUN. ARPT: Use N/S strip only. (10-14)

CRAIG FLD (SELMA): Bndry lgts inop. (5-29)

**DEATSVILLE-DEATSVILLE AUX. FLD: Formerly carried under Prattville. ABANDONED. (7-14)

DEMOPOLIS-BOYKIN FLD: Cattle on fld. (10-14)

DOTHAN-NAPIER FLD: Use rnwys only. (10-14)

EUFAULA-WEEDON FLD: Trees in W approach. (10-14)

EUTAW-EUTAW ARPT: Use only NW/SE strip. (10-14)

**FLOMATON-FLOMATON ARPT: Strip and rng lgts prior req. No bcn. (7-17)

FOLEY-OAK ARPT: W end E/W, N end N/S strips soft in wet weather. (10-14)

**FT. PAYNE-FT. PAYNE ARPT: Flood and blinker lgts operating on schedule. (4-23)

GADSDEN-GOODYEAR FLD: Soft in wet weather. Lgt acft land with ctn. (10-14)

GUNTER FLD (MONTGOMERY): Closed to all trans acft. Use Maxwell Field. (6-24)

HARTSELLE-HARTSELLE ARPT: Inactive. No base operator. Emerg use only. (10-14)

HUNTSVILLE-HUNTSVILLE ARPT: Sod strip rough at rnwy crossings. Ngt approaches use ctn-hills NE,S,E. (10-14)

JASPER-WALKER CO. ARPT: Land inside of bndry mrkrs. Avoid new landing strip now being graded. (10-14)

LANETT-VALLEY AIR SERVICE: Soft after rains. (10-14)

LIVINGSTON-JACKSON FLD: Rolling and slightly rough. Soft spots along N side at SW end. (10-14)

MAXWELL FLD (MONTGOMERY): At ngt or under IFR conditions large depot 1 mi S looks like arpt and lgts give impression of parallel rnwys. (10-17)

MOBILE-BATES FLD: N/S rnwy lgts inop. (8-26)

**MOBILE-DAVIS ARPT: Rng, flood and strip lgts prior req. No bcn. (7-16)

MONROEVILLE-LEGION FLD: Do not confuse golf course fairways with landing strips. (10-14)

**MONTGOMERY-ALLENPORT ARPT: Long. 87-16-45. Rng, flood lgts prior req. (8-5) Muddy after rains-ctn. (10-14)

MONTGOMERY NORMAN BRIDGE ARPT: Muddy after rainy weather (10-14)

**ONEONTA-MOODY FLD: Formerly Oneonta Arpt. (10-14) N end strip soft, wet and rough. (10-14)

**PRICHARD-CHASTAIN'S ARPT: S appch blkd by pwr line. (10-14) Soft after rains. Shallow dip near center of E/W strip. (10-14).

**SELMA-SELFIELD ARPT: Pwr line N,NE,SW. No svcg avail. (10-14)

**SUMMERDALE OLF (SUMMERDALE): ABANDONED. (10-14)

**SYLACAUGA-SYLACAUGA ARPT: Rng and strip lgts on prior req.(7-28)

TALLADEGA-TALLADEGA ARPT: N 700' N/S strip soft in wet weather. (10-14)

TUSCALOOSA-VAN DE GRAAFF ARPT, SITE 59, FV-AG: Heavy acft avoid extreme NW and SW corners of fld after heavy rains. (6-3)

**TUSKEGEE AAF (TUSKEGEE): Delete from charts and records. (10-15)

TUSKEGEE-MOTON FLD: Use with ctn in wet weather. (10-14)

WINFIELD-WINFIELD ARPT: S end N/S strip soft in wet weather. (10-14)

**CHLORIDE-SHEP'S PLACE ARPT: Lat 35-24-30, long. 114-15-45. (7-8)

DAVIS MONTHAN FLD (TUCSON): E fld closed-acft parked on rnwys. Blinding ceilometer W end fld between ends of NW/SE, E/W rnwys. SAC acft under off. orders will be given full svcg; acft of other commands will be given sufficient fuel for flgt to next fuel stop plus rqrd reserve. Obst lgt inop on 75' pole SE control twr. Former taxi strips 12R and 30L are now open as rnwys 12R and 30L to be used by lgt acft and rstd to day opers only. (9-24)

GILA BEND AAF (GILA BEND): Maj obsts S fld lgtd. (7-21)

GILBERT-GILBERT AUX. FLD #1: Closed to all acft-used for tow target dropping. Hazardous objects on fld. (7-31)

GOODYEAR-GOODYEAR AUX FLD #2: Closed to all acft-used for tow target dropping. Hazardous object on fld. (10-9)

**HEREFORD AAF (HEREFORD): Delete from charts and records. (10-15)

**HOLBROOK-HOLBROOK INT, SITE 51B, LA-AQ: Formerly carried as Site 50, LA-AQ: Bcn, bndry, rng, obst lgts. (4-25)

KINGMAN AAF (KINGMAN): Closed to all flying. No obst lgts atop Haulpai Mtn 8500' MSL, 11 mi. S. (7-3)

**KINGMAN-MOHAVE COUNTY ARPT: ABANDONED. (5-9)

LITCHFIELD PARK NAF (LITCHFIELD): No landings permitted later than one half hr before sunset without prior approval from C.O. No ngt opers. (10-3)

ARIZONA

LUKE FLD (PHOENIX): Traffic direction indicator on 2nd hangar from N not operating. (10-15)
MESA-OASIS ARPT: W end E/W, SW end NE/SW strips unsafe for a distance of 500' (ditches across ends)(7-24)
PHOENIX-Inst training on Phoenix Rng between 5500 and 9500'.
PHOENIX-RADIO: Visual courses of VHF rng not monitored. (8-18). Freq 108.3 mcs, ident. "PH".
PHOENIX-SKY HARBOR ARPT: Local ngt flying acft must be equipped with 2-way rdo. Equip, near Rnwy 12. Installation of ILS in progress off end of Rnwys 26 and 8. (10-3)
SALOME-SALOME INT, SITE 27B, LA-PH: E/W strip hazardous, but usable with ctn. Sides washed by hvy rains. Damaged portions mrkd. N/S strip avail. (8-11)
**SHOW LOW-SHOW LOW ARPT: Smoke pots avail. (4-24)
TEMPLE BAR-TEMPLE BAR ARPT: Unsafe (soft)(6-25)
TUCSON-DOWNTOWN ARPT: Oper of lgts depends on student training, no fixed scheduled. (10-3)
TUCSON-GILPIN ARPT: Circle fld for lgts. (10-24)
**TUCSON-RYAN FLD: Suitable for landing by all lgt acft up to and including Twin Engine Cessna, AT6, etc. Heavy acft use rnwys in wet weather. (10-3)
WILLIAMS FLD (CHANDLER)-RADIO: Army rng unreliable and to be, used for training only. (9-12) FLD: Use rnwys only. Exten rnwy repairs being conducted. All acft use ctn from 1200M Fri until 0800M Mon each week. No fuel avail. trans acft. (8-20)
WINSLOW-RADIO: Visual-aural rng stn operates unattended or without means of remote monitor. Freq. 108.7 mcs, ident. "WO"
WINSLOW-WINSLOW ARPT: Acft with rdo ctc Winslow Rdo for lgts. Non-rdo equipped acft circle arpt and flash navigation lgts when rnwy lgts rqrd. Neon approach lgts inop. (9-29)
YUMA-YUMA CO. ARPT: Bndry lgts inop. (10-3)

[redacted]

**ALMYRA-ALMYRA ARPT: Formerly Prairieville Aux. Fld. Lat. 34-24-30, long. 91-27-30. (6-30) Ctn on taxiways.
BATESVILLE-BATESVILLE ARPT: N/S strip and E end E/W strip under const-unusable. Taxiway to fuel pump hazardous. (10-17)
BIGGERS-BIGGERS ARPT: Use strips only-cattle on fld. (4-25)
EL DORADO-EL DORADO ARPT-GOODWIN FLD: Lgts avail. emerg only. (1-10)
FORT SMITH-FORT SMITH ARPT: W end NW/SE rnwy from intersection W closed. Use rnwys only during wet weather. (10-8)
**HAZEN-HAZEN FLD: Delete (A) and CLOSED designations. (10-17)
HELENA-THOMPSON-ROBBINS FLD: Use rnwys only-soft, rough. (3-17)
HOPE-HOPE ARPT: Use rnwys only. (4-9)
HOT SPRINGS-HOT SPRINGS MEMORIAL FLD: Use ctn when landing and taking off. Soft sod in wet weather. (5-15)
JONESBORO-JONESBORO ARPT: Use rnwys, taxi strips only. (1-10)
LUXORA-LUXORA INT, SITE 39, NO-LS-30' unlgtd pole line being erected S end N/S rnwy. (9-27)
MANILA-MANILA ARPT: Use SW quarter of fld only. (4-25)

ARKANSAS

McGEHEE-McGEHEE ARPT: Cattle on fld intermittently. (9-6)
NEWPORT-ERWIN FLD: Use rnwys only-cattle on fld. (4-25)
NEWPORT-MILLTOWN ARPT: Use rnwys only-cattle on fld. (4-25)
**OLA-NORMAN ARPT: ABANDONED. (6-30)
PINE BLUFF-GRIDER FLD: Closed ngts. (3-11)
WALNUT RIDGE-RADIO: Rng flgt-checked Oct. 24, courses correctly aligned. (10-24)
WALNUT RIDGE AAF (WALNUT RIDGE): Acft parked all areas fld and ramp. Use rnwys only. Equip. on fld. Closed 1730 to 0800. NE/SW rnwy closed. (3-17)
WALNUT RIDGE-WALCOTT FLD #3: Use rnwys only-cattle on fld. Soft-heavy acft use ctn. (4-25)
WEST MEMPHIS-LEVEE FLD: Ctn when wet. (9-23)

CALIFORNIA

ALAMEDA NAS (ALAMEDA): Maintain high approach on Rnwys 26L and 21. Hvy acft parked these areas. 175' unlgtd cranes 2000' from NE corner fld-ctn ngts and during low visibility. Equip. adj to and on rnwys. Fld on positive control. (10-3)
ARCATA-RADIO: Rng courses unreliable, use for homing only. (9-5)
ARCATA-ARCATA ARPT: Closed to acft without 2-way rdo. Use surfaced areas only. (10-3)
**AVALON-CATALINA ARPT: Private arpt. Scheduled Airline opers only. Use by acft other than UAL absolutely prohibited. (10-3)
BAKERSFIELD-BAKERSFIELD-KERN CO. ARPT: Unlgtd 92' pwr line 1/2 mi N of bndry. Obst lgts atop 60' water tank 1/2 mi NE of intersection of NW/SE and N/S rnwys inop. (10-24)
BECKWOURTH-PLUMAS CO. ARPT: Use rnwys, taxi strips only-turf rough. (6-2)
**BENECIA-BENECIA AIR HARBOR: Formerly South Hampton Bay Air Harbor. (5-26)
BLYTHE AAF (BLYTHE): Obst lgts atop control twr inop. (2-28)
BLYTHE-BRESSON ARPK: Soft spot W side N/S strip. (10-3)
BOCA, BCN SITE 17A, SF-SL: Bcn inop. (9-22)
BRAWLEY-O'CONNELL BROTHERS ARPT: N/S strip avail. for taxiing only, muddy when wet. (10-3)
★BURBANK-LOCKHEED AIR TERMINAL-RADIO: Oct, 16, CAA twr freq changed to 272 kcs, 118.3, 126.18 mcs. FLD: Closed to all trans P-80 acft except on special projects for modification that stn. Right traffic Rnwys 7,15; left traffic Rnwys 25,33. Approach lgts Rnwy 7 changed to red. 2-way rdo rqrd all acft. Rnwy 13-31 closed (parked acft). No NG facs. (7-9)
★CASTLE FLD (MERCED)-RADIO: Army grnd/air stn operates on 4765 kcs. in addition to other freqs listed (10-17) FLD: No opers office.(3-24)
CEDARVILLE-CEDARVILLE ARPT: CLOSED. (9-10)
★CHATSWORTH-RADIO: Oct. 16, freq of H fac changed to 382 kcs. About Nov. 4, ident. of H fac will be changed to "U". (10-22)
CHINO-CAL AERO ARPT: Use rnwys only-parked acft. (10-3)

STATUS OF CIVIL AIR REGULATIONS

21 October 1947

HOW TO OBTAIN PARTS, AMENDMENTS, AND MANUALS

The following tabulation carries all Civil Air Regulations, Regulations of the Administrator and Civil Aeronautics Manuals. Most of these regulations are available from the Superintendent of Documents, Government Printing Office, Washington 25, D. C. (shown as GPO). Those carrying the remark CAA (Civil Aeronautics Administration) and CAB (Civil Aeronautics Board) may be obtained from the agency indicated. All part numbers not shown are obsolete or unassigned.

Regulations furnished by the CAA and CAB will include all effective amendments. Amendments for Regulations purchased from GPO must be requested separately from the CAA or CAB. When requesting Amendments, be sure to state Part or Manual numbers for which they are desired.

The Government Printing Office, the official sales agency for all government publications, requires that remittances be made in advance of shipment of publications, by check or money order payable to the Superintendent of Documents, Government Printing Office. Currency is sent at sender's risk. Postage stamps, foreign money, and smooth coins are not acceptable. For shipment to foreign countries an additional amount of about 1/3 of the purchase price is required for postage. Remittances should be by International Money Order payable to the Superintendent of Documents or draft on an American bank. A discount of 25 percent is allowable to book dealers and quantity purchasers of 100 or more publications, on condition that the purchasers will adhere to the public sales price set by the Superintendent of Documents and that publications shall not be over-printed with any advertising matter.

AS THEY ARE RELEASED, ALL AMENDMENTS, AND NOTICE OF THE ISSUANCE OF NEW PARTS AND MANUALS, ARE PRINTED IN THE MONTHLY CAA JOURNAL. AVAILABLE FROM THE GPO AT 75 CENTS PER YEAR.

CIVIL AERONAUTICS ADMINISTRATION

REGULATIONS OF THE ADMINISTRATOR

CAA RATINGS AND PARTS AND MANUALS RELATED THERETO

For your guidance there are listed below the parts and manuals applicable to the various airmen certificates issued.

Pilots:
Parts 20, 43, 60, Regs. 501, 503, and Manual 60.

Airline Transport Pilots:
Parts 01, 04, 21, 27, 40, 60, 61, 96, Regs. 501, 503, and Manuals 04, and 60.

Lighter-Than-Air Pilots:
Parts 22, 60, Regs. 501, 503, and Manual 60.

Aircraft Mechanics:
Parts 01, 04, 15, 18, 24, Regs. 501, 503, Sec. 43.102, and Manuals 04, 15, and 18.

Aircraft Engine Mechanics:
Parts 01, 04, 13, 14, 18, 24, Regs. 501, 503, and Manuals 04, 14, and 18.

Parachute Technicians:
Parts 15, 25, 54, 60, and Release 144.

Air-Traffic Control-Tower Operators:
Parts 26, 60, and Manual 60.

Aircraft Dispatchers:
Parts 27, 40, 60, 61, and Manual 60.

Ground Instructors (rating in Civil Air Regulations): Parts 01, 20, 31, 60, Regs. 501, 503, and Manual 60.

Flight Engineers:
Parts 18, 33, 40, 41, 42, 43, 60, 61; Manual 18.

Flight Radio Operators:
Parts 04b, 16, 39, 33, 40, 41, 42, 44, 60, 61, and Manuals 16 and 60.

Flight Navigators:
Parts 34, 43, 44, 60, 61, and Manual 60.

AERONAUTICAL CHARTS OF THE U. S. COAST AND GEODETIC SURVEY

New editions of the charts listed below will be published in about one month, making former prints obsolete for use in aviation. Orders for these particular charts should be kept to a minimum for immediate requirements. As soon as the charts are available for distribution a second notice will appear in this publication.

Bellingham	Mt. Shasta	WAC 216	Washington local
Boise	Portland	WAC 357	FC 184
Klamath Falls	Seattle	WAC 408	FC 218
Kootenai	Spokane	WAC 409	
La Grande	WAC 215	WAC 410	

New prints of the chart listed below will be published in about one month. This print WILL NOT make the former print obsolete for use in aviation.

WAC 304

A new edition (or new chart) of the charts listed below which make former prints obsolete is now available for use. Former prints should be destroyed or stamped "OBSOLETE FOR USE IN AVIATION."

When ordering charts from the U. S. Coast and Geodetic Survey, correct remittances should accompany all orders. Sectional charts, price 25 cents each, should be ordered by name; World Air charts, 25 cents each, by number with prefix (WAC); Approach and Landing charts, 5 cents each, by number with the prefix (AL); Flight charts 25 cents each, by number with the prefix (FC); Direction Finding Charts, 40 cents each, by number and with the suffix as in 22 DF; Local Charts, 25 cents each, by name as Miami Local; and Obstruction Plans, 40 cents each, by number with the prefix (OP). Consult the monthly Dates of Latest Prints of Instrument Approach and Landing Charts for further information concerning I A & L charts and Obstruction Plans.

U.S. COAST AND GEODETIC SURVEY
DEPARTMENT OF COMMERCE

INSTRUMENT APPROACH AND LANDING CHARTS

Instrument Approach and Landing Charts are available for more than 500 major airports in the United States. The charts are designed primarily for use in an approach by instruments under conditions of low visibility. They also serve as contact charts after a break-through on instruments and as airport vicinity charts. The charts combine an Approach Chart and a Landing Chart printed back to back on standard page size, 8 by 10½ inches.

The Approach Chart is published on the scale of 1:250,000 (about four miles to the inch) and portrays the region within a 10-mile or more radius of the airport. It includes the standard approach procedure when officially established.

The Landing Chart is normally at the scale of 1:31,680 (one-half mile to the inch) and portrays in greater detail the area in the immediate vicinity of the airport. The pattern of the airport is shown with length of runways and elevation of the field; obstructions, lights, and buildings are also shown.

The latest and best available source material is used in the compilation of the topographic detail appearing on the charts. Intensive field surveys by the Coast and Geodetic Survey supplemented with topographic quadrangle maps, air photographs and many other reliable sources of information form the basis of the compilation of these charts. Roads, railroads, towns, place names, spot elevations and

(OVER)

drainage appear on the charts. The aeronautical data include airports, radio and visual aids and recommended flight procedures.

These charts are revised whenever changes affecting the safety of aircraft occur and new charts are added to the series as required to meet the demands of present-day flying. Two revisions are usually made of each chart per year. A list of available Instrument Approach and Landing Charts with the latest date of revision is issued monthly and may be obtained upon request.

For those users who require charts in large quantities, an automatic distribution system on an annual subscription basis has been inaugurated to furnish without delay all revisions of a chart as they become available during a year. Under this system annual subscriptions are 5 cents per year per chart when ordered in quantities of 20 or more of any individual chart. Orders for quantities of less than 20 copies of an individual chart or a grouping of different quantities of various charts to total 20 will not be accepted as subscriptions. All subscriptions must be paid for at the time of placing the order and will not be honored unless accompanied by the proper remittance. No discount is allowed on subscriptions.

Subscription orders should be addressed to the Director, U.S. Coast and Geodetic Survey, Washington 25, D.C., and plainly marked "Subscription" in order that they will not be handled as individual orders.

Charts may also be purchased from authorized agents at 5 cents per copy. A list of agents will be furnished upon request.

AIRMAN'S GUIDE

NOTICES TO AIRMEN

VOL. 2, NO. 17 . . NOVEMBER 10, 1947

This issue includes all data on record as of 0001 E.S.T. on the date above. For later information consult teletype NOTAMS.

U. S. DEPARTMENT OF COMMERCE
CIVIL AERONAUTICS ADMINISTRATION
OFFICE OF AVIATION INFORMATION

SPECIAL NOTICE

NOTAM CHARTS

When the discontinuance of the AIRMAN'S GUIDE Flight Planning Charts and facing Data Pages was announced, personal flying interests demanded compromise charts that would serve as notams to correct the less frequently issued sectionals.

Resultantly, the Coast and Geodetic Survey developed the series of notam charts which will be a continuing feature of the Guide.

These six notam charts spot all new or discontinued airports, radio navigational aids, danger areas, and (by a retention of the Ⓡ symbol) all such airports or aids which are temporarily unusable or usable only with extreme caution.

Airport or radio facilities usable with caution (formerly identified by the Ⓘ, or caution symbol on the discontinued Flight Planning Charts), because of space limitations, are not spotted on the charts. Such facilities are cited in the Notices to Airmen only.

Furthermore, these charts will be cumulative in nature as far as danger areas are concerned. Cumulative, that is, until a sectional chart is revised semi-annually.

Other features, such as new airports or radio aids, will be retained on the notam charts only as long as they are cited in the Notices to Airmen. Such citations are normally carried in only one issue of the Guide. Continuing very hazardous conditions, however, (such as field closed because of construction or radio range inoperative) will be charted as long as they are effective.

LEGEND

● New airport.

✕ New radio navigational aid.

Ⓡ Discontinued airport or radio aid, or one usable only with extreme caution.

AIR NAVIGATION RADIO AIDS

RADIO CLASS DESIGNATIONS

AC..... Approach Control Tower, CAA
B..... Scheduled Broadcast Station (broadcasts weather reports at 15 and 45 minutes after the hour unless otherwise cited).
C..... Control Tower, CAA
CA..... Control Tower, Army
CI..... Control Tower (City, County, Private, etc.)
CN..... Control Tower, Navy
D..... Distantly controlled
FM..... VHF fan type marker (100 watts)
FMHW.... Non-directional radio beacon when combined with fan marker.
GCA..... Ground Controlled Approach Unit
H..... Non-directional radio beacon (homing), power 50 watts or more
ILS..... Instrument Landing System (voice on localizer channel)
IM..... VHF boundary marker
K..... Independent Compass Locator Station
LFM..... VHF fan type marker, low powered (5 watts-not over 10 miles from range)
MOR..... Low frequency omni-directional range
MH..... Non directional radio-beacon (homing), power less than 50 watts
ML..... Range (loop radiators), power less than 50 watts
MM..... VHF middle marker
MMK..... Compass locator station when combined with middle marker of Instrument Landing System
MRA..... Range (Adcock vertical radiators), power more than 50 less than 151 watts.
MRL..... Range (loop radiators), power more than 50-less than 150 watts
OM..... VHF outer marker
OMK..... Compass locator when installed at outer marker site or within 4-5 miles of middle marker
P..... Point to point radio
RA..... Range (Adcock, vertical radiators), power 150 watts or more
RL..... Range (loop radiators), power 150 watts or more
S..... Simultaneous (range signals and voice) type of transmitter
T..... Teletype
TX..... Principal teletype
V..... Additional voice feature on VHF
VAR..... Visual-aural VHF range (every VAR has simultaneous voice feature)
VOR..... VHF omni-directional range
W..... Without voice facilities
Z..... VHF station location marker at a range station

AIRWAY RADIO COMMUNICATIONS

GENERAL

All radio range stations (class RA, RL, MRA, MRL, ML) emit directional signals (type A2 emission) 1020 cycles per second modulation.

All radio beacon stations (class H and MH) emit non-directional signals (type A2 emission) 1020 cycles per second modulation. Unless otherwise noted, all stations, other than class MH, operate continuously within their assigned hours of service except during interruptions for voice transmission on the same frequencies where simultaneous transmission is not available and during shutdowns for maintenance purposes. Unless otherwise cited, the voice features of Class MH facilities are available continuously, and the homing features are operated on request. The effective range of an MH facility is ordinarily 25 miles.

Compass locators are low-powered non-directional facilities operating in the 200-415 kc. band. They are installed near airports to make it easier for pilots to make instrument approaches. When holding is required, they also help the pilot follow a more precise holding pattern. Compass locators, however, should not be depended upon as long range navigational aids since they are rarely useful at distances of over 15 or 20 miles. These are now shown as "MHW" facilities.

Voice communications facilities are available unless "W" (without voice) is included in the classification. Examples: SMRAW, MRLW, HW, HWT. Transmission of voice on a frequency other than the range frequency is indicated as MRLW-V. When no "W" is included in station class, the "V" indicates voice feature on two frequencies, namely, range frequency, and generally, VHF of 116.1 and/or 111.1 mcs. 116.1 mcs. is used for transmission to Army aircraft, 111.1 mcs. to civil aircraft.

The classification designation "D" denotes that the station broadcasts meteorological and notice to airmen information on a scheduled basis. At 15 minutes past each hour airways reports are broadcast, while at 45 minutes past each hour area reports are broadcast.

All Civil Aeronautics Administration stations equipped for voice communications with aircraft stand continuous listening watches on the frequencies of 3105, 4495, and 6210 kcs., unless otherwise cited.

AIRPORT DATA

LEGEND

CLASS

SIZE

40: Length of longest landing strip (unpaved) in hundreds of feet
40h: Length of longest hard-surfaced runway in hundreds of feet (Seaplane landing areas over 5 miles in length are classified as unlimited.)

RADIO

R1: Voice availability via tower, range (or homing device), or voice station
R2: Range (or homing device) and tower
R3: Range (or homing device), tower, and instrument landing system

LIGHTS

L: Incomplete lighting, either flood or portable runway lights
L1: Beacon only
L2: Beacon and boundary
L3: Beacon, boundary, and obstruction
L4: Beacon, boundary, obstruction, and flood
L5: Beacon, boundary, obstruction, flood, and runway contact
(L5): Identical to L5 except that runway contact lights are high intensity
L6: Beacon, boundary, obstruction, flood, runway contact, and instrument approach
(L6): Identical to L6 except that instrument approach lights are high intensity.

(The class always indicates the highest element available, but does not necessarily include all intermediate elements)

SERVICING

S1: Fuel
S2: Fuel, storage
S3: Fuel, storage, minor aircraft repairs
S4: Fuel, storage, minor aircraft, and minor engine repairs
S5: Fuel, storage, major aircraft, and minor engine repairs
S6: Fuel, storage, major aircraft, and major engine repairs

N.B. Very often small civilian fields (particularly in non-metropolitan areas) will have no full-time attendant. Frequently, service at such fields in isolated communities is available only by circling the town to attract the operator's attention.

NOTES

1. "Effingham Int., 10, LS-ID" indicates that the airport is Effingham CAA Intermediate Field, Site 10, on the St. Louis-Indianapolis Airway. Municipal airports' where the lights are maintained by the CAA are listed similarly except that there is no "Int."
2. "CLOSED" indicates closed to all civil aircraft and all transient military aircraft except on official business this station or in emergency.
3.(a) "TEMP INACTIVE, NO FACS." indicates AAF airfields used either exclusively by the AAF or municipal airfields used jointly by the AAF and civil interests at which both the Army and the civil interests are inactive. Such airfields will be available to military aircraft at the discretion of the Commanding Officer of the organization to which the aircraft is assigned.
(b) "ARMY TEMP INACTIVE, CIVIL FACS." indicates municipal airfields used jointly by the AAF and civil interests at which the Army facilities are inactive but civil facilities are available. Such fields may be used by military aircraft, however, only commercial service is available.
4. "Fld lgts on prior req." indicates field lights are available only by previous phone call, telegram, or letter. It must be remembered that most fields do not have 24-hour operation. When an airport classification indicates a lighted field, without the above modification, the field lights burn all night or will be turned on when a radio request is made or a plane circles the fld.

GCA AVAILABLE: How and Where

GROUND CONTROLLED APPROACH (GCA) AVAILABLE TO CIVIL PILOTS AS WELL AS ARMY AND NAVY: All GCA facilities (Army, Navy, or CAA) are available to any plane in emergency. To secure GCA assistance, pilots should call the associated control tower for instructions.

In addition to the working frequencies listed below, Army and Navy GCA emergency VHF transmissions are made on 140.58 mcs. Simplex service on 3117.5 kcs will be provided at all Army and Navy installations to provide an alternate means of communications for scheduled air carrier aircraft. Army and Navy towers will relay GCA instructions on 200-400kcs band to civil aircraft not equipped to receive VHF or HF.

A minimum of 30 minutes will generally be required to assemble a GCA crew and prepare the equipment for operation AFTER an alert has been received at those locations not providing continuous service.

N.B. Army Weather Minimums: For Army clearance purposes, weather minimums as prescribed by AAF Regulation 60-16 will apply.

N.B. GENERAL: Pilots desirous of making practice GCA approaches should make their own arrangements with the tower concerned.

NOTICES TO AIRMEN

AIR FORCE SPECIAL NOTICES

✓ AIR FORCE DATA: Advice covering Air Force fields or Air Force operations on civil fields, or Air Force radio facilities, and also Air National Guard fields and facilities should be forwarded to Commanding General, Air Transport Command, Attn.: Flight Operations Division, A-3. Requests for approval of the closing of Air Force airfields or restrictions in airfield facilities to transient military aircraft for over 10 days should be forwarded to the same address for submittal to Chief of Staff, U.S. Air Force, as required. Restrictions in Air National Guard Fields or facilities will be forwarded to the National Guard Bureau through the State Adjutant General for approval. That Bureau will forward approved restrictions to the above address for publishing. Information to be published will be coordinated and submitted to the Civil Aeronautics Administration.

✓ AIR FORCE OFFICIAL BUSINESS - within the meaning of AF Regulation 85-2 is interpreted as the necessity for personnel aboard an aircraft to contact personnel, units, or organizations at or near the airfield selected for landing for the purpose of conducting transactions in the service of, and in the interest of, the United States Government. This does not include the use of an airfield by transient aircraft for the purpose of obtaining clearance, service, or other items attendant with itinerant operations. Cross country flights for the purpose of maintaining flying proficiency are not considered to be official business within the meaning of this regulation.

✓ AIR FORCE FOREIGN CLEARING STATIONS: Under the authority of AF Regulation 61-4, USAF aircraft with destinations listed below or returning therefrom to the United States will clear through the stations indicated: AFRICA AND AZORES - Brookley Field, Ala., MacDill Field, Fla., Washington National Airport, D.C., or Westover Field, Mass. ALASKA - McChord Field, Wash., or Great Falls AAF, Mont. BERMUDA - Mitchel Field, N.Y., Brookley Field, Ala., MacDill Field, Fla., Washington National Airport, D.C., Westover Field, Mass., or Fairfield-Suisun AAF, Calif. CANADA - Great Falls AAF, Mont., Brookley Field, Ala., McChord Field, Wash., Washington National Airport, D. C., Selfridge Field, Mich., or Westover Field, Mass. CANAL ZONE, CENTRAL AMERICA, MEXICO, AND SOUTH AMERICA - March Field, Calif., MacDill Field, Fla., Kelly Field, Tex., or Brookley Fld, Ala. CARIBBEAN - Brookley Field, Ala., Kelly Field, Tex., or MacDill Fld, Fla. ENGLAND, GREENLAND, ICELAND, AND NORTH IRELAND - Washington National Airport, D.C., or Westover Field, Mass. NOVA SCOTIA, AND NEWFOUNDLAND - Washington National Airport, D. C., Westover Field, Mass, Selfridge Field, Mich., or Brookley Field, Ala. HAWAII - Fairfield-Suisun,AAF, Calif. EUROPEAN THEATER - Brookley Field, Ala., MacDill Field, Fla., Washington National Airport, D. C., or Westover Field, Mass.

✓ Indicates new or revised Special Notices

SPECIAL NOTICES

✓ CLEARANCE OF USAF AIRCRAFT IN NEW YORK CITY AREA: In accordance with notification from Chief of Staff, U.S. Air Force, July 2nd, AF Letter 63-9 has been rescinded and the following instructions will govern the clearance of USAF acft in the New York City Area: For clearance purposes into or from the New York City Area (encompassed by a 25 mile radius from the southern tip of Manhattan) VFR is defined as ceiling at least 2000' and the visibility 3 miles or more; IFR when the visibility is not less than 1 mile and the ceiling is unlimited, or when the ceiling is not less than 5000' and the visibility not less than 2 miles. USAF aircraft flying into the New York City Area may be cleared to any authorized field therein provided weather conditions are not less than those defined above. In all cases in-flight approval from Olmsted Flight Service Center by contacting Olmsted Airways, Rome Airways, Westover Airways, Mitchel Airways, or Fort Dix Airways must be obtained prior to proceeding to the field of destination. All pilots whose destination is an airfield within the area will indicate on the AF Form 23 that their flight plan to the field of destination is via any of the 5 stations listed. Flights for which the point of first intended landing is Mitchel Field may be made using normal clearance procedure and restrictions outlined herein are not applicable to that station. Appropriate clearance may be made from a field at which weather conditions meet above specifications even though weather in other sections is below specified minimums. USAF aircraft engaged in regularly scheduled transport flights under the operational control of the Air Transport Command are exempt from these restrictions.

V.H.F. CHANNEL ASSIGNMENTS: The following are USAF assignments:

Channel	Frequencies	Channel	Frequencies
A	116.1	H	134.10
B	126.18	U	108.3
C	137.88	V	108.7
D	140.58	W	109.1
G	137.70		

MINIMUM SAFE ALTITUDES ON AIRWAYS: Under AF Regulation 60-16 and policy of USAF, minimum safe altitudes for flight along airways will be identical with those established by the Civil Aeronautics Administration. Action is being taken to amend pertinent USAF flight information publications to show these minimums.

✓ CORRECTIONS AND ADDITIONS TO USAF T.O. 08-15-1:

(1) Correct page 52, by showing Melbourne NAS as Melbourne-Eau Gallie.

(2) Correct page 41, by showing Airways Route Red 27 from Cincinnati, Ohio to Knoxville, Tenn. with even altitudes going S and odd altitudes N.

CORRECTIONS AND ADDITIONS TO USAF T.O. 08-15-2:

(1) Correct page 32, AN/CPN-6 (YM) Beacons (X-Band) Domestic as follows:

(1) by showing operating hours for El Centro, Calif. as continuous;

(2) by adding under Louisiana: New Orleans; Code: 2-1; Operating agency: USN;

(3) by adding under New York: New York (La Guardia Field);Geographical position: 40-46-29N lat., 73-52-20W long.; Code: 4; Operating agency: American Airlines; Angular coverage: 000-360; Operating hours: Continuous; Remarks: On hangar 3; SW corner of field;

(4) by adding under Oklahoma: Tulsa (Municipal Airport); Geographical position: 36-11-45 N lat., 95-52-45W long.; Code: 4-1; Operating agency: American Airlines; Angular coverage: 000-360; Operating hours: Continuous; Remarks: On hanagar at NE end of field.

NAVY SPECIAL NOTICES

NAVY DATA: In accordance with Hydrographic Office Memorandum for Aviators No. 9, July 29, 1946, Hydrographic Office information concerning naval and marine corps air stations and facilities, including changes in field facilities, operation rules, air/ground communications facilities, instrument approach procedures and navigational aids, should be directed to: The Division of Air Navigation, Hydrographic Office, Washington 25, D. C., for transmittal to the C.A.A. In accordance with Aviation Circular Letter No. 96-46 of June 13, 1946, approval for the closing of any naval or marine corps air station or facility to transient military aircraft for a period in excess of 10 days must be obtained from the Chief of Naval Operations. Also, approval is to be obtained from the Chief of Naval Operations before relocation or modification of any aid to air navigation, such as reorientation of radio ranges

V.H.F. CHANNEL ASSIGNMENTS: The following are Navy assignments

Channel	Navy Frequency	Channel	Navy Frequency
1	116.1	6	134.64
2	142.56	7	143.64
3	126.18	8	142.02
4	128.70	9	142.74
5	143.28	GUARD	140.58

CIVIL SPECIAL NOTICES

CIVIL DATA: The Airman's Guide covers primarily two broad fields of civil airport information, namely so-called permanent data changes and temporary hazardous conditions. Permanent airport data refer to new airports or changes in field layout, servicing, lighting, or permanent obstructions or existing airports. Temporary hazardous conditions refer to conditions that make such airports temporarily unusable or usable only with caution. Such hazardous conditions could be, for example, a field closed because of floods, spring thaws, or construction; or merely a burned-out obstruction light or a runway partially unusable because of construction. Obviously, temporary hazardous conditions should be reported to the aeronautical public at once. The necessity for reporting additional aids or minor changes in existing aids, however, isn't nearly as cogent. In other words, a temporarily closed airport is ordinarily of much more importance from a safety viewpoint than is a new airport, and the aeronautical public should be told about it as expeditiously as possible.

Notamizing of advice covering a field unusable because of flood, or snow, a runway closed because of construction, or the erection of a pole line in an approach, doesn't necessitate an engineering background on the part of the reporter. Too, safety frequently necessitates the notamizing of such advice before an official check can be made. On the other hand, advice covering permanent airport data changes, such as a new airport, or a lengthened landing strip, or an additional hangar, obviously doesn't require the same expeditious transmission to the aeronautical public and the data may be checked from an engineering standpoint and for standardization before being publicized.

SUMMATION: (a) Since the aeronautical public should be immediately advised of hazardous conditions, reporters should utilize the CAA Airways Communications Stations. The item to be reported, therefore, should either be telephoned or mailed to the nearest communications station for dissemination as a notam and for further transmission to the publishers of the Airman's Guide.

(b) Permanent airport data chages (as differentiated from temporary hazardous conditions) should be reported to the appropriate CAA District Airport Engineer for coordination before they are included in the Airman's Guide.

CIVIL USAGE OF MILITARY FIELDS: Army and Navy fields are open to civil fliers only in emergency or with prior permission of the commanding officers thereof.

REISSUANCE OF EXPIRED PILOTS CERTIFICATES: 20.550 Reissuance. Any person who on June 30, 1947, held a valid private or commercial certificate and who failed to exchange such certificate in accordance with Section 20.55 of the Civil Air Regulations, may, notwithstanding such failure and without other showing, obtain a pilot certificate with appropriate ratings upon application to the Administrator.

PERSONAL POSSESSION OF PILOT CERTIFICATE: No person shall pilot a civil aircraft within the U.S. unless he holds a valid pilot certificate with appropriate ratings issued by the Administrator or an appropriate and valid foreign pilot certificate. Such certificate shall be in the personal possession of the pilot at all times while piloting aircraft and shall be presented for examination to any inspector of the Administration or state or

local law enforcement officer upon the request of such inspector or enforcement officer.

PART 43 of C.A.R. REVISED: The Civil Aeronautics Board revised C.A.R. 43.52 to become effective November 28, 1947. The revised part reads as follows: 43.52 Flight area limitations. A student shall not pilot an aircraft outside a local flying area designated by his flight instructor until: (a) he has had at least 10 solo flight hours, or if enrolled in and receiving flying instruction from an approved air agency, he is deemed competent by such agency, and (b) his student pilot certificate has been appropriately endorsed by a flight instructor.

NOTICE TO ALL FLYING PERSONNEL: Because of the increase in aircraft operations, both civil and military, in recent months the number of complaints regarding airplane noise nuisance has reached such proportions that the advancement of aviation and development of new airports are in danger of being severely retarded. To reduce the number of such complaints it is requested that the following practices be put into effect by all fliers:

(1) Discontinue all unnecessary low flying.

(2) When weather and traffic volume permit, increase altitudes of all traffic patterns that require flight over inhabited areas.

(3) Re-route channels of approach and departure to avoid residential and business districts whenever possible.

(4) If the airport is located near inhabited areas, reduce power and increase pitch of propellers as quickly as possible during take-off so as to keep engine and propeller noises at a minimum.

(5) Keep rpm's set at a minimum required operational setting when low flying over populated areas is necessary.

SEAPLANE OPERATIONS: Because of the possibility of local ordinances or restrictions prohibiting seaplane operations in resort or congested areas, the Administrator has issued the following advice to seaplane operators: "(1) Take off as far out from the shore as possible.

(2) Cut the take off run as short as safety permits.

(3) Fly high enough to avoid criticism from residents below, or arrange the flight plan so that you pass over as few houses as possible.

(4) Avoid unnecessary 'gunning or racing of the engine.

(5) Explain carefully to those who complain what you are doing to make your airplane a good neighbor.

In the CAA Federal-aid Airport program, we are promoting the use of seaplanes by assisting communities in establishing inexpensive docking and servicing facilities. In view of the high utility value of the seaplane or amphibian, we believe this to be a definite step in the advancement of personal flying in general. Hence, if we are to find acceptance of such facilities, it is up to those pilots who now operate seaplanes to assist us to the utmost by safe and considerate operation of their aircraft".

N.B. The Administrator's admonition was occasioned by numerous complaints received from lake-side residents and vacationists.

SEAPLANE BASE DIRECTORY: A new Seaplane Base Directory will go to press December 1, 1947. The current directory, dated June 15, 1947, is available to any qualified operator or owner upon request to: Office of Aviation Information, Attention: A-258, C.A.A., Department of Commerce, Washington 25, D. C.

RADIOTELEPHONE-OPERATION AUTHORIZATION: This is the simple way in which an authorization to operate a radio telephone transmitter in an aircraft is obtained: the applicant appears in any of the Federal Communications Commission Field Offices, or before any CAA flight examiner, of the CAA, who has been designated by the FCC to issue the permits, proves he is a U.S. citizen, that he has need of such an authorization, and that he understands the few simple rules and regulations. He is given a card granting the authorization then and there. FCC offices are listed under U.S. Government in phone books, and there are some 30 of them throughout the country. Mostly, they are in downtown offices. There are more than 1,000 CAA designated flight examiners. Mostly they are located at airports. The "examination", if it may be so described, consists of a few questions establishing the ability of the applicant to transmit and understand spoken messages in English, and to understand the simple rules governing the use of such equipment. He is also given simple, printed instructions for its use.

CONTROL TOWER TUNING PRECAUTION: On some aircraft receivers, the channel of 278 kcs. is identified as "tower" on the tuning control nameplates. This is not always correct as many towers transmit on frequencies other than 278 kcs. Reports indicate that some confusion is being created by the failure of pilots to tune their receiver to the tower transmitting frequency when such frequency is other than 278 kcs. It is suggested that pilots use care and make certain that they are tuned to the transmitting frequency of the tower with which they desire to communicate.

V.H.F. IFR FLIGHTS: Until further notice, Air Traffic Control will be exercised on the assumption that aircraft are utilizing intermediate frequency radio ranges. If a pilot desires to conduct IFR flight using VHF ranges over all or a portion of the route, his flight plan should so indicate. Further, flights should not be conducted on civil airways in IFR weather using VHF ranges unless the A.T.C. clearances so authorize.

PRIVATE FLIER V.H.F. FREQUENCIES: All C.A.A. Communications Stations and Towers are discontinuing receiving watches on 131.7 and 131.9 mcs. as new equipment becomes available to guard the new private flier frequencies of 122.1 mcs for transmission to C.A.A. Communications Stations and 122.5 mcs. for transmission to C.A.A. operated towers. Practically all

C.A.A. towers now guard 122.5 mcs but the communications stations program is not fully effective yet because of non-receipt of the new receivers. C.A.A. Communications Stations normally reply to itinerant aircraft on the voice feature of the range, low frequency or VHF, whichever is applicable. Replies are made on 111.1 mcs, if VHF reply has been requested on other than range frequency. C.A.A. airport control towers will reply to itinerant aircraft on one of the frequencies 118.3, 118.5, 118.7, or 118.9 mcs, in addition to towers' low frequencies.

RADIOTELEPHONE COMMUNICATIONS: The word ROGER in radiotelephone communications means "I have received all of your last transmission", and its use in any other sense by C.A.A. stations and towers is not authorized. In order to avoid confusion it is suggested that pilots engaging in air-ground contacts also limit the use of ROGER to acknowledgment of transmissions. Pilots enroute are requested to avoid if possible, calling airway communications stations at or about 15 and 45 minutes past the hour (which are the scheduled broadcast times) to request weather information, as such calls may delay starting of scheduled broadcasts and cause inconvenience to other persons who are dependent on the broadcasts for weather reports.

TWO-WAY RADIO FAILURE PROCEDURES: In the event of failure of two-way radio communication between an aircraft and the ground, the pilot will observe one of the following procedures:

(a) If operating under VFR conditions, proceed under VFR and land as soon as practicable, or

(b) Proceed according to the latest air traffic clearance.

If the pilot proceeds according to the latest traffic clearance but has not received and acknowledged a clearance to the tower and if other instructions to the contrary are not received, he shall be expected to observe the following and control will be effected accordingly:

(1) If the pilot has received and acknowledged a clearance to the destination airport or the radio facility serving that point, he shall continue flight at the altitude(s) last assigned by Air Traffic Control, or the minimum instrument altitude, whichever is the higher, to the radio facility serving the destination airport.

(2) If the pilot has received and acknowledged a clearance to a point other than the destination airport or the radio facility serving the destination airport, he shall continue flight at the altitude(s) last assigned by Air Traffic Control or the minimum instrument altitude, whichever is the higher, to the radio facility serving the destination airport.

(3) If holding instructions have been received, the pilot shall comply with these instructions until such time as it will be necessary to continue flight so as to arrive at the radio facility serving the destination airport at the expected approach time last received and acknowledged, maintaining the last assigned altitude or the minimum instrument altitude, whichever is the higher.

(4) If holding instructions have been received, but no expected approach time has been received, the pilot shall comply with these instructions until the time Air Traffic Control has specified that further clearance may be expected. He shall then continue, maintaining the last assigned altitude or the minimum instrument altitude, whichever is the higher.

NOTE: The minimum instrument altitude referred to is the minimum established for that portion of the route over which the operation is conducted regardless of the direction of flight.

Approach: Descent from the altitude maintained to the radio facility serving the destination airport shall be made on the final approach course and shall start at the expected approach time last received. If no expected approach time was received, descent shall be started at the last estimated arrival time specified by the pilot, or as soon as possible thereafter. A full standard instrument approach should be executed unless a VFR approach can be made.

If a clearance to the tower at the airport of intended landing has been received and acknowledged, the pilot shall be expected to comply with any special instructions contained in the clearance and make normal descent for landing.

NOTE: Air Traffic Control may issue appropriate instructions to be broadcast "blind" over air carrier radio facilities (for air carrier aircraft), and over suitable radio range facilities. Instructions must not be broadcast unless Air Traffic Control authorizes such broadcas'

VFR (Formerly CFR) FLIGHT PLANS AND ARRIVAL REPORTS: VFR flight plans may be filed with any CAA airways communication station or airway traffic control center. One hour after E.T.A., if no notice of arrival is received, queries are sent out over CAA communications systems. If the arrival report is not received within 3 hours, search and rescue operations are initiated. Inasmuch as the Government may be put to considerable expense in determining the location of aircraft when an arrival report is not filed, it is vitally necessary that all pilots using this service make certain that notice of arrival is filed with the CAA communications station at the termination of the flight.

To reduce radio congestion, pilots should file VFR flight plans, when required, in person or by telephoning the airways communication station or airway traffic control center. CAA control towers have discontinued accepting VFR flight plans for transmission and will not normally transmit arrival reports except upon the specific request of the pilot. Whenever practicable, however, it is desired that arrival reports be filed in the same manner as flight plans.

CLEARANCE PROCEDURES FOR IFR FLIGHT: Effective Oct. 8, 1947, and concurrent with effective date of C.A.R. 60 as revised, new clearance procedures for IFR flights are being used in the control of Air Traffic.

(1) No Air Traffic Control clearance will be issued for flights operated in accordance with visual flight rules except for flights within a control zone as prescribed in C.A.R. 60.2

(2) Flight plans specifying flight in accordance with VFR for a portion of a flight will be accepted at the point of departure. If VFR flight is proposed for the first portion of the flight, the pilot will be advised to request IFR clearance from the appropriate communications station along the route of flight. The pilot must remain in VFR weather conditions until the clearance is received.

(3) When a flight plan indicates IFR flight for the first portion of flight and VFR for the latter portion, the aircraft will be cleared to the point at which VFR flight is planned, inasmuch as no clearance is necessary for VFR flight. The pilot is expected to continue his flight without further contact with Air Traffic Control.

(4) Standard separation from other IFR traffic will be provided aircraft on IFR flight plans, except (1) when "at least 500' on top" has been assigned or authorized by ATC in lieu of a cruising altitude if frequent pilot reports indicate a generally unlimited ceiling on top and a forward visibility of at least three miles. (2) When VFR operation is specified by ATC during climb to cruising altitude, descent from cruising altitude, or change of altitude enroute. If the flight cannot be conducted under VFR conditions when such clearance is received, it is the pilot's responsibility to secure an amended clearance before proceeding IFR.

(5) Pilots may cancel IFR flight plans at any time by so notifying ATC provided they are operating in VFR weather conditions when they take such action. Where conditions indicate that the remainder of a flight can be conducted in accordance with VFR, a pilot should avail himself of this procedure to lift the restrictions on his own flight and to simplify the general traffic situation. Caution should be exercised, however, that flight plans not be cancelled when IFR conditions are expected in some subsequent portion of a flight. When a flight plan is cancelled and a new instrument clearance is later requested, priority of handling will be based upon the time of filing the new flight plan.

(6) When a flight plan is filed indicating altitude change beyond the control area of the center controlling the point of departure, the flight will be cleared to destination with instructions to maintain the altitude at which the aircraft enters the next control area. The pilot should request further altitude changes enroute. Better service can be given the pilot if an altitude change is requested at the time the change is desired.

This procedure cancels and supersedes the Altitude/CFR procedure now contained in the Flight Information Manual.

AIRPORT LIGHT SIGNALS: Effective October 8, 1947, the following special light signals were prescribed by the Administrator for use at airports in accordance with C.A.R. 60.108(e): (1) A white rotating airport beacon lighted during daylight hours, or flashing lights on a tetrahedron during the hours of darkness, shall mean the official ground visibility at the airport is less than 3 miles, and that if the airport is within an airport control zone, a traffic clearance is required for landing, takeoff or flight in the traffic pattern. (2) A flashing amber light at an airport shall mean clockwise flow of traffic is in effect and that right turns shall be made unless otherwise authorized by Air Traffic Control. These special light signals are in addition to those prescribed in the Flight Information Manual for use with a directed portable traffic signal light, and will be included in the next edition.

RELOCATION OF AIR ROUTE TRAFFIC CONTROL AREA AND FLGT ADVISORY AREA BOUNDARIES: Effective November 15, 1947, the Jacksonville-Miami Air Route Traffic Control Boundaries will be relocated as follows: On Red Civil Airway #25 to 50 miles S of Tampa; on Amber Civil Airway #7 to 15 miles N of Melbourne. (These changes will necessitate the relocation of the Jacksonville-Miami Flight Advisory Area Boundaries to the new positions.)

OCEANIC A.T.C. AREA REVISION: Effective November 15, 1947, the Miami Oceanic Air Traffic Control Area will be redescribed as all navigable airspace extending upward from an altitude of 700' above the surface, lying within the following limits: From the E Coast of the U.S. at lat. 30° extending eastward to long. 78°; thence southward to lat. 24°, thence westward to long. 84°; thence northward to lat. 27°20'; thence along a line directly eastward to the coastline of the U.S.

The inland boundary of this area shall be considered as the seaward limits of the Miami and Jacksonville domestic control areas as designated by the Administrator of C.A.A. Airspace contained within designated danger areas and lying over foreign territories, possessions and territorial waters is excluded.

The Jacksonville Air Route Traffic Control Center will be responsible for that portion of the Miami OATC Area lying between lat. 28°20' and 30°. Operating procedures applicable for flight within this area may be obtained by writing to: Air Route Traffic Control Center, C.A.A., P.O. Box 361, Miami Springs, Florida.

REDESIGNATION OF AIRWAYS AND AIR ROUTES OF CANADA AND NEWFOUNDLAND: Canadian and Newfoundland Airways and Air Routes have been amended or changed to read as follows:

(1) Amber Airway #3: From the intxn of the E leg of Yarmouth, N.S., and the SW leg of Greenwood, N.S. (Mill Lake Intxn) via Greenwood, N.S. rng stn to the intxn of the NE leg of Greenwood, NS., and the SE leg of Moncton, N.B. (Amherst Intxn).

(2) Red Airway #1: From Windsor, Ont, rng stn via London, Ont. rng stn.; the intxn of the NE leg of London, Ont., and the SW leg of Toronto, Ont. (Ash Intxn). From the intxn of the N leg of Toronto, Ont., and the W leg of Stirling, Ont. (Kleinburg Intxn); Stirling, Ont. rng stn; the intxn of the NE leg of Stirling, Ont., and the SW leg of Ottawa, Ont. (Smith Falls Intxn); Ottawa, Ont. rng stn. From the intxn of the E leg of Montreal, Que., and the SW leg of Quebec, Que. (Rougemont Intxn); Quebec, Que. rng stn, Mont Joli, Que. rng stn, and Seven Island, Que. rng stn, to 25 mi. NE of Seven Island, Que. rng stn.

(3) Red Airway #23: From Sioux Lookout, Ont. rng stn via Ft. William.

Ont. rng stn to the intxn of the SE leg of Fort William, Ont., and the U.S.-Canadian Border. From the intxn of the SE leg of Sault Ste. Marie, Mich., and the U.S.-Canadian Border via Gore Bay, Ont. rng stn.; Wiarton, Ont. rng stn; and Toronto, Ont. rng stn to the intxn of the SE leg of Toronto, Ont., and the U.S.-Canadian Border.

(4) Red Airway #63: From the intxn of the W leg of Sarnia, Ont., and the U.S.-Canadian Border via Sarnia, Ont. rng stn to London, Ont. rng stn.

(5) Blue Airway #1: From Megantic, Que. rng stn to Quebec, Que. rng station.

(6) Blue Airway #3: From Gore Bay, Ont. rng stn via the intxn of the NE leg of Gore Bay, Ont. and the W leg of North Bay, Ont. (Sudbury Intxn) to North Bay, Ont. rng stn.

(7) Blue Airway #11: From the intxn of the NW leg of Greenwood, N.S. and the SE leg of Blissville, N.B. (Fundy Intxn) to Blissville, N.B. rng stn.

(8) Blue Airway #38: From the intxn of the NE leg of Haines, Alaska and the U.S.-Canadian (Alaskan) Border via the intxn of the NE leg of Haines, Alaska and the S leg of Whitehorse, Y.T. (Carcross Intxn) to Whitehorse, Y.T. rng stn.

(9) Blue Airway #50: From the intxn of the W leg of Pennfield Ridge, N.B. and the U.S.-Canadian Border via Pennfield Ridge, N.B. rng stn, the intxn of the E leg of Pennfield Ridge, N.B., and the NW leg of Greenwood, N.S. (Maces Bay Intxn) and the Greenwood, N.S. rng stn to the intxn of the SE leg of Greenwood, N.S., and the NW leg of Dartmouth, N.S. (Waverley Intxn).

(10) Red Route #1: From 25 miles NE of Seven Island, Que. rng stn to Goose, Labrador rng stn.

(11) Red Route #2: From the intxn of the SE leg of Regina, Sask. and the U.S.-Canadian Border via Regina, Sask. rng stn to Saskatoon, Sask. rng stn

(12) Red Route #3: From the intxn of the NE leg of Sydney, N.S., and the S leg of St. Andrews, Nfld. (Cabot Intxn) to the intxn of the E leg of Buchans, and the SW leg of Gander (Hunts Lake Intxn).

(13) Red Route #5: From Goose, Labrador rng stn to Stephenville, Nfld rng station.

(14) Red Route #6: From Goose, Labrador rng stn to Gander, Nfld. rng station.

(15) Red Route #72: From the intxn of the E leg of Presque Isle, Me. and the NW leg of Blissville, N.B. (Teague Intxn) to the intxn of the W leg of St. Andrews, Nfld. and the SW leg of Stephenville, Nfld (Gulf Intxn).

(16) Red Route #74: From the Charlottetown, P.E.I. rng stn via the intxn of the W leg of St. Andrews, Nfld and the SW leg of Stephenville, Nfld. (Gulf Intxn) to the intxn of the N leg of St. Andrews, Nfld and the SW leg of Stephenville, Nfld. (St. Georges Intxn).

FLIGHT INFORMATION MANUAL CORRECTION: Correct Chapter IX, page 114, of the July 1, 1947 issue, under the heading of "Handling of CFR Flight Plans and Arrival Reports", which erroneously states that CFR (now VFR) flight plans are forwarded in the same manner that IFR flight plans are. CFR (now VFR) flight plans are not transmitted.

Upon termination of a VFR flight, the pilot should close out his flight plan. Notice of arrival is then sent over the C.A.A. communications system to the station holding the original flight plan.

✓ AERONAUTICAL CHART AND PUBLICATION CORRECTIONS:

(1) Correct Coast and Geodetic Survey Radio Facility Chart #36, dated September 12, 1947, by showing the Odem, Texas Fan Marker as an elliptical pattern rather than bone shaped.

(2) Correct Coast and Geodetic Survey Radio Facility Chart #15A, dated September 18, 1947, by showing the frequency of the Sacramento, Calif. Tower as 118.5 mcs, rather than 126.18 mcs.

(3) Correct Coast and Geodetic Survey Radio Facility Chart #7, dated September 12, 1947, by showing the Ontario, Oregon facility as Type "RBN" and Class as "MHVT"

TELETYPE NOTAMS: Throughout the year climatic conditions (snow storms, floods, etc.) render many fields temporarily unusable or unsafe. In addition, there are intermittent maintenance operations in progress on many fields. Radio facilities suffer temporary power failures or course misalignments, and lighting facilities are temporarily inoperative. Because these temporary conditions cannot be given immediate coverage in the "Airman's Guide", full cognizance must be taken of Teletype Notam service which gives the desired coverage on any facility or field at which teletype transmitting stations are based. Cross-country pilots, accordingly, should consult these Teletype Notams for latest available data on air navigation aids. These teletype notams are posted in C.A.A. Communications Stations and in Air Force Field and Naval Air Station Operations Offices having teletype drops.

✓ AIRPORT TRAFFIC CONTROL PROCEDURES: (a) Planes with 2-way radio should establish communication with control tower when 15 miles from the airport of destination and before taxiing or taking off.

(b) Planes without receivers, when approaching tower-controlled fields, and before taxiing and taking off, should be on the alert for and be guided by light gun signals. (See A.A.F. Regulation 100-4, dated March 4, 1944, and C.A.R. Digest or Manual 60).

(c) Flashing tetrahedron lights, as well as the daylight operation of rotating beacons, indicate that the ground visibility is less than 3 miles and a traffic clearance is necessary to enter the traffic pattern of airports within the control zone.

FOREIGN SPECIAL NOTICES

INTERNATIONAL NOTAMS: The only source of international notams is the C.A.A. Overseas Foreign Aeronautical Communications Stations at the following locations: New York, N.Y.; Miami, Fla.; New Orleans, La.; Balboa, Canal Zone; San Francisco, Calif.; Seattle, Wash.; Honolulu, Hawaii; and Anchorage, Alaska.

FOREIGN ENTRY PROCEDURES; AIRPORTS OF ENTRY; CUSTOMS REPORTS; CIVIL AIRCRAFT CLEARANCE FOR FOREIGN COUNTRIES: These procedures and regulations were all incorporated into the Flight Information Manual, Volume 2, Number 1, dated July 1, 1947. Only amendments to the data contained in the Manual will hereafter be carried in the Airman's Guide.

UNITED KINGDOM MILITARY AIR BASE USAGE: The following United Kingdom Military Air Bases are available to civil air carriers of only U.S. and United Kingdom and to aircraft which were purchased in either the U.S. or the United Kingdom and are in ferry status.

(a) for regular use: Kindley Field, Bermuda; Beane Field, St. Lucia; Coolidge Field, Antigua; and Atkinson Field, British Guiana.

(b) for alternate use: Waller Field, Trinidad; Vernam Field, Jamaica; and Carlsen Field, Trinidad.

Even though the above fields are open to civil air carriers and ferry status planes it is mandatory that the operators of such aircraft secure approval for use of these military air bases from Chief of Staff, U.S. Air Force , Washington, D. C., prior to the departure of each flight or series of flights.

AIRPORT AND RADIO NOTICES

LEGEND

** - New or revised airport, danger area, or miscellaneous data to be added to records.

★ - New or revised radio data to be added to records.

ALABAMA

ALBERTVILLE-ALBERTVILLE ARPT: Use NW/SE strip only. S side NW/SE strip rough in spots. (10-14)

ANDALUSIA-ANDALUSIA ARPT: Bare in spots. Ctn in wet weather. (10-14)

ANNISTON-ANNISTON ARPT: Ends of strips soft in wet weather. (10-14)

ATHENS-ATHENS ARPT: E/W strip soft in wet weather. (10-14)

BARIN NAAS EAST AND WEST FLDS (FOLEY): Closed to trans acft. (5-6)

BIRMINGHAM-RADIO: VHF omni-directional rng without voice operates on test basis, fac unmonitored, and subject to interruptions; not to be used for navigational purposes. Freq. 116.3 mcs, ident. "BH".

**BIRMINGHAM ARPT: Inst. approach lgts (Bartow type) comm Nov. 6, 1947 N end of N/S rnwy and extending 1800' N - operated on req. (11-6). Class: 57h R2 (L6) S6. Standard wind tee sock installed atop hangar 400' W of Admin. Bldg. (10-27) Closed to civil acft not equipped with operating rcvr. Landing on sod areas approved by twr in dry weather, unsafe in wet weather. Ctn ngts or under IFR, plant S of fld has long taxi and parking strips resembling rnwys. (11-6)

BIRMINGHAM-ROBERTS FLD: S side fld avail. in wet weather. N side rough. (10-14)

BRIDGEPORT-ALA-TENN-GA ARPT-Ctn in wet weather. (10-14)

BROOKLEY FLD (MOBILE): Soft-use rnwys, taxi strips only. (10-28)

CENTRE-CENTRE ARPT: NNW/SSE strip closed. N side E/W strip rough. (10-14)

COLUMBIANA-COLUMBIANA MUN. ARPT: Use N/S strip only. (10-14)

CRAIG FLD (SELMA): Bndry lgts inop. Fuel avail. on off. bus. only. (10-27)

DEMOPOLIS-BOYKIN FLD-Cattle on fld. (10-14)

DOTHAN-NAPIER FLD: Use rnwys only. (10-14)

EUFAULA-WEEDON FLD: Trees in W approach. (10-14)

EUTAW-EUTAW ARPT: Use only NW/SE strip. (10-14)

FOLEY-OAK ARPT: W end E/W, N end N/S strips soft in wet weather. (10-14)

GADSDEN-GOODYEAR FLD: Soft in wet weather. Lgt acft land with ctn. (10-14)

GUNTER FLD (MONTGOMERY): CLOSED to all trans acft. Use Maxwell Fld. (6-24)

HARTSELLE-HARTSELLE ARPT: Inactive. No base operator. Emerg use only. (10-14)

HUNTSVILLE-HUNTSVILLE ARPT: Sod strip rough at rnwy crossings. Ngt approaches use ctn-hills NE, S, E. (10-14)

JASPER-WALKER CO. ARPT: Land inside of bndry mrkrs. Avoid new landing strip now being graded. (10-14)

LANETT-VALLEY AIR SERVICE: Soft after rains. (10-14)

LIVINGSTON-JACKSON FLD: Rolling and slightly rough. Soft spots along N side at SW end. (10-14)

MAXWELL FLD (MONTGOMERY): At ngt or under IFR conditions large depot 1 mi S looks like arpt and lgts give impression of parallel rnwys. (10-17)

**MOBILE-AEROMARINE SEAPLANE BASE: 7 mi SSW. Lat. 30-35-45, long. 88-06-45. Elev S.L. Longest water lane 9000 x 1000' NNW/ SSE. Minor acft and engine repairs. Marine railways, floats, docks. Pwr line NW. Ctn: Boats and floating debris at all times in river. Class: 90 S4. (7-16)

MOBILE-BATES FLD: N/S rnwy lgts inop. (8-26)

MONROEVILLE-LEGION FLD: Do not confuse golf course fairways with landing strips. (10-14)

MONTGOMERY-ALLENPORT ARPT: Muddy after rains-ctn. (10-14)

MONTGOMERY-NORMAN BRIDGE ARPT: Muddy after rainy weather. (10-14)

ONEONTA-MOODY FLD: N end strip soft, wet and rough. (10-14)

PRICHARD-CHASTAIN'S ARPT: Soft after rains. Shallow dip near center of E/W strip. (10-14)

**SILVER HILL OLF (SILVERHILL): Formerly Silverhill OLF. (10-14)

TALLADEGA-TALLADEGA ARPT: N 700' N/S strip soft in wet weather. (10-14)

TUSCALOOSA-VAN DE GRAAFF ARPT, SITE 59, FV-AG: Heavy acft avoid extreme NW and SW corners of fld after heavy rains. (6-3)

TUSKEGEE-MOTON FLD: Use with ctn in wet weather. (10-14)

ALABAMA

WINFIELD-WINFIELD ARPT: S end N/S strip soft in wet weather. (10-14)

ARIZONA

**AJO: Aerial gunnery, dive bombing and rocket firing danger area has been enlarged and redefined as follows: Beginning at lat 32-49-30, long. 112-19-00; thence S to lat 32-35-40; thence W to long. 112-36-30; thence S to lat 32-31-00; thence W to long. 112-57-00; thence S to lat 32-20-00; thence W to long. 113-02-00; thence S to lat 32-13-00; thence W to long. 113-27-00; thence S to Mexican Border; thence NW along Mexican Border to long. 114-00-00; thence N to lat 32-35-00; thence E to long. 113-27-00; thence N to lat 32-48-40; thence to lat 32-49-30, long. 113-21-00; thence to lat 32-49-30, long. 112-19-00, point of beginning.

**CHANDLER-RIGGS ARPT: Reinstated. Lat 33-14, long. 111-47. NW/SE strip not usable. Not maintained. (7-25)

**COTTONWOOD-VERDE VALLEY ARPT: Reinstated. Lat 34-44, long. 111-59-45. (7-21)

DAVIS MONTHAN FLD (TUCSON): E fld closed-acft parked on rnwys. Blinding ceilometer W end fld between ends of NW/SE, E/W rnwys. SAC acft under off. orders will be given full svcg; acft of other commands will be given sufficient fuel for flgt to next fuel stop plus rqrd reserve. Obst lgt inop on 75' pole SE control twr. Former taxi strips 12R and 30L are now open as Rnwys 12R and 30L to be used by lgt acft and rstd to day opers only. (9-24)

**GILA BEND AAF: No bcn. (11-3) Maj obsts S fld lgtd. (7-21)

GILBERT-GILBERT AUX. FLD #1: Closed to all acft used for tow target dropping. Hazardous objects on fld. (7-31)

GOODYEAR-GOODYEAR AUX. FLD #2: Closed to all acft used for tow target dropping. Hazardous object on fld. (10-9)

**HAZEN AUX. FLD: Revised data: Lgts inop. (5-15)

**HAZEN FLD: (P) designation assigned. (10-23)

KINGMAN AAF (KINGMAN): Closed to all flying. No obst lgts atop Haulpai Mt. 8500' MSL, 11 mi S. (7-3)

LITCHFIELD PARK NAF (LITCHFIELD): No landings permitted later than one half hr before sunset without prior approval from C.O. No ngt opers. (10-3)

LUKE FLD (PHOENIX): Traffic direction indicator on 2nd hangar from N not operating. (10-15)

MESA-OASIS ARPT: W end E/W, SW end NE/SW strips unsafe for a distance of 500' (ditches across ends)(7-24)

PHOENIX-RADIO: Visual courses of VHF rng not monitored. (8-18). Freq 108.3 mcs, ident. "PH".

PHOENIX-Inst training on Phoenix Rng between 5500' and 9500'.

PHOENIX SKY HARBOR ARPT: Local ngt flying acft must be equipped with 2-way rdol Equip. near Rnwy 12. Installation of ILS in progress off end of Rnwys 26 and 8. (10-3)

**PRESCOTT MUN. ARPT: Formerly Earnest A. Love Arpt. Lat. 34-39, long. 112-25-45. (6-24)

SALOME-SALOME INT, SITE 27B, LA-PH: E/W strip hazardous, but usable with ctn. Sides washed by hvy rains. Damaged portions mrkd. N/S strip avail. (8-11)

ARIZONA

TEMPLE BAR-TEMPLE BAR ARPT: Unsafe (soft). (6-25)

TUCSON-DOWNTOWN ARPT: Oper of lgts depends on student training, no fixed schedule. (10-3)

TUCSON-GILPIN ARPT: Circle fld for lgts. (10-24)

WILLIAMS FLD (CHANDLER)-RADIO: Army rng unreliable and to be used for training only. (9-12) FLD: Use rnwys only. Exten rnwy repairs being conducted. All acft use ctn from 1200M Fri. until 0800M Mon each week. No fuel avail. trans acft. (8-20)

WINSLOW-RADIO: Visual-aural rng stn operates unattended or without means of remote monitor. Freq. 108.7 mcs, ident. "WO".

WINSLOW-WINSLOW ARPT: Acft with rdo ctc Winslow Rdo for lgts. Non-rdo equipped acft cirle arpt and flash navigation lgts when rnwy lgts rqrd. Neon approach lgts inop. (9-29)

YUMA-YUMA CO. ARPT: Bndry lgts inop. (10-3)

ARKANSAS

ALMYRA-ALMYRA ARPT: Ctn on taxiways.

BATESVILLE-BATESVILLE ARPT: N/S strip and E end E/W strip under const-unusable. Taxiway to fuel pump hazardous. (10-17)

BIGGERS-BIGGERS ARPT: Use strips only-cattle on fld. (10-23)

**BLYTHEVILLE-RADIO: Bear. and distance, stn to fld, 225°, 14.2 mi.(11-6)

**BLYTHEVILLE ARPT: Bcn, obst lgts and rnwy lgts avail. on req to arpt manager by fone or telegram. (10-28)
